Measuring Faucet.

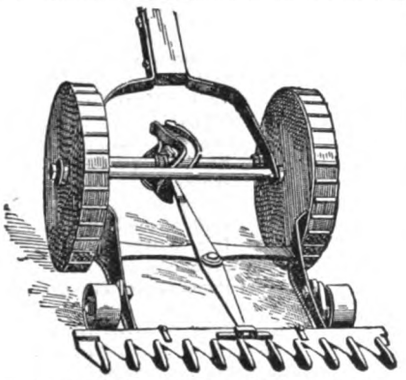
Tobacco Cutter.

We Make Faucets

That measure a pint, a quart or a gallon accurately. A Barrel Drainer that adjusts automatically to fit in the bunghole. No bung borers needed and no molasses wasted. Coffee, Spice and Drug Mills that grind as you like it. Draw Cut Tobacco Cutters that do not squeeze through, but cut with ease. Our goods are second to none. All are fully warranted. Send for Catalogue to

NATIONAL SPECIALTY MFG. CO.

Lehigh Ave. and Third St. - PHILADELPHIA, PA.



No. 3 Mill.

No. 1 Mill.

THE CLIPPER OUR IMPROVED LAWN MOWER.

Light, more **durable and less liable** to get out of order than those now in general use. Nothing escapes the grasp of the Pioneer, weeds, dandelions and plantains being cut as closely and evenly as grass. Only requires the same power to cut grass two feet high as it would to cut two inches, and cuts more closely in the mowing of irregular surfaces and spaces, such as between posts of fences, walks and shrubbery. The Clipper Mower is not analogous to other lawn mowers, as it does not roll down the grass preparatory to cutting it; the finger bars and fingers thereon of the mower, gather in the grass in nearly an upright position, and the vibration or reciprocating motion of the knives shears off the grass with uniformity. **There is no use for sickle or shears where the Clipper is used.** For descriptive Circulars and Prices address the makers.

THE SIAMESE TWINS

In the making of garden hose the labor cost is practically the same for all grades—it's the material cost that varies and raises or lowers the price of the finished article. And, as the strength and life of hose depend on the material used, the quality of this material determines the service of the hose as well as its price. These two, service and price, are the Siamese Twins of rubber manufacture—you can't separate them, you can't even think of one without involving the other. That's why "cheap" hose is never cheap—the same cause that lowers the price lowers the service. And after all, isn't hose intended to work, and isn't the kind that works best sure to win? **We think so and build our line of garden hose on that principle. Ten brands and each with some special merit.**

Belting, *Garden Hose,* *Water Hose,* *Fire Hose,* *Suction Hose,* *Steam Hose,* *Air Hose,* *Tubing.*	*Chicago, . . . 143-145 Lake St.* *Boston, ... 24 Summer St* *Philadelphia, . 308 Chestnut St.* *St. Louis, . . . 210 N. 12th St.* *Indianapolis, . 79 So. A GOOD THING.

IT'S IN THE TEETH.

The Patent "REFORM" Curry Comb is composed of three shallow, oval trays, with corrugated edges. The parts are struck up from a fine grade of cold rolled steel, heavily tinned and bronze lacquered, firmly riveted together and warranted not to rust. The outer dimensions are 6½x4¼ inches and by reason of the large cleaning surface and peculiar arrangement of teeth, the comb will do its work with a large saving of time and labor, cleaning with equal thoroughness both long and short coats. There are no places to accumulate hair and it will not tear or injure the brush, the comb being quickly freed from accumulation by giving its face a gentle tap.

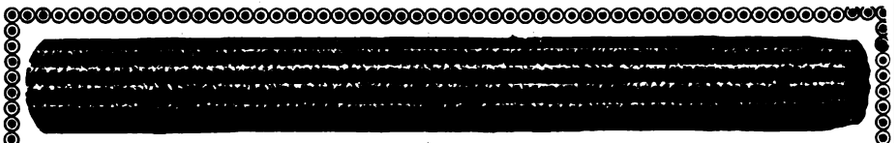
"EVERYTHING IS COMING UP."

BUSINESS IS BETTER AND THERE WILL BE A LARGER DEMAND THAN EVER FOR OUR



Sheep Skin Mitten.

Acknowledged to be the best article for polishing stoves, as it does away with the old time dirtiness of the work, making this work a pleasure. Also invaluable for polishing brass or glass, or silverware, which it does not scratch. For tan shoes and cleaning bicycles it has demonstrated itself a conspicuous success.

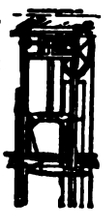
THE CLIPPER OUR IMPROVED LAWN MOWER.



Light, more durable and less liable to get out of order than those now in general use. Nothing escapes the grasp of the Pioneer, weeds, dandelions and plantains being cut as closely and evenly as grass. Only requires the same power to cut grass two feet high as it would to cut two inches, and cuts more closely in the mowing of irregular surfaces and spaces, such as between posts of fences, walks and shrubbery. The Clipper Mower is not analogous to other lawn mowers, as it does not roll down the grass preparatory to cutting it; the finger bars and fingers thereon of the mower, gather in the grass in nearly an upright position, and the vibration or reciprocating motion of the knives shears off the grass with uniformity. **There is no use for sickle or shears where the Clipper is used.** For descriptive Circulars and Prices address the makers.

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted to the Hardware Trade.

Editorial Trade Review.

A positively confident and cheerful feeling seems to be the prevailing feature throughout the trade. While the movements in manufactured Hardware are not of great importance or significance, they are of an encouraging character, and enquiries for a future delivery indicate an underlying belief that prices have reached a point from which improvement in the near future may safely be prophesied.

The foundation for some of this prevailing sentiment may be indicated in the fact that Southern pig iron, after reaching the lowest point since the industry was established, has recently advanced $1 a ton; and as large orders for future shipment have become the most prominent feature of the market, this upward movement is regarded as indicating the turning point toward permanent prosperity in all the fields covered by American Hardware.

Reports from correspondents of intelligence show that the demand for staple lines continues to a limited extent. While Chicago is doing a good trade for the season, judged from the standpoint of a usually dull period of the year, the outlook for a larger volume of business, greatly exceeding that of last year is confidently anticipated. In St. Louis the trade firmly believes the prospects for fall will result in a much better demand with increasing prices than in any season of late years.

The present condition of the market is favorable to the booking of orders for future delivery on many leading lines, and with this feeling of confidence to inspire purchases, the difference in its tone will ere long be a noticeable feature.

To illustrate the processes that have been necessary to influence industrial stability, it is made a matter of comment that "prices and profits in manufacturing, banking, commerce, the arts, trades and other industries, have got down very close to farmers' prices;" so that from now on improved conditions are looked forward to throughout all the elements of permanent progress.

The traveling salesmen are now nearly all at home, preparing for the more encouraging season which they feel satisfied will make the fall trade memorable. They say that as far as observation can demonstrate, the general stocks of Hardware throughout the country have not to any great extent been augmented during the last few months, having simply been strengthened in the interest of making a fair assortment. They are in a condition at the present time to warrant the belief that when the travelers start again upon the war-path they will find orders worth working for.

A Step In Advance.

The Merchants' Association, which effected a temporary organization at the time of the Grant Memorial dedication, has recently become incorporated in this city.

It has a laudable purpose to accomplish, of which the commercial interests of New York cannot help but take note and assist with positive encouragement.

Made up as the association is of the prominent wholesale merchants and jobbers in the various important lines of business, it is their avowed intention to promote in every possible way the trade and traffic which should center in this city, and which in its manifold volume should attract the buyers of the entire country.

A few decades ago New York was so favorably situated, commercially and financially, it was imperative that the wide awake dealers from other States should seek our numerous mercantile establishments, establish their credits, and buy large stocks twice a year for Western or Southern distribution. Then, at certain seasons of the year, our hotels were filled with guests, and our jobbing houses overrun with anxious customers, desirous of having the first early selection of new goods. The travelers who now find their only occupation by frequent visits to possible patrons, were then of a more conservative tone and resident here, taking pilgrimages daily through the various hotels, hunting on the registers for familiar names, and keeping tab on the arrivals and departures of the known buyers.

The net cash and short time trade developed during the war period, and the building up of large trade centers farther west, changed to a great extent the intimate nature of these commercial connections. Money in other financial centers became more abundant, and commercial paper could be as readily discounted at satisfactory rates in Chicago or St. Louis, as in New York. Then the local jobbing interests in the interim finding their occupation gone to a great extent, either disintegrated into commission houses after the working partners had gone to Southern and Western cities to establish new firms, or else dropped out of existence entirely. So that to-day the limited number of large firms interested in a movement of the character above described are those able to boast of an annual business of many millions. They have been controlling lines

Digitized by Google

and possessing extensive and expensive auxiliaries, which included heads of departments who commanded princely salaries, and had a national fame as to the value of their exceptional services. The firm names were known all over the world, and on the back of the commercial paper would make it a purchasable commodity at a fixed standard. But the dullness that has supervened during the last few years has made home stocks smaller in the leading cities, assortments larger, with bargains, remnants and remainder stock predominating, which has created the new regime in which department stores, with constant daily purchases, become an apparent necessity. With the prospects of an early trade revival, these leading wholesale merchants who know that New York has a prestige and supremacy to maintain realize that something must be done to retain it. The Merchants' Association, it is hoped, will permit of a concert of action that will soon become general, and once again New York will become the recognized market of the world, which no merchant can afford to ignore by failure to visit and investigate for himself.

Those engaged in this desirable movement have already secured special advantages from the Joint Traffic Association in the way of concessions of railroad fares from distant points to this city, which concessions amount at present to a one-third rebate.

They hope to accomplish as much in the freight allowances, and other possible advantages. They know and feel that direct contact with the heads of the houses with which they do business increases confidence in each other, and establishes those respectful and fraternal relations that invariably cement trade conditions, and may control patronage for a long time to come; concentrating in a few houses increasing accounts, instead of that multiplicity of smaller charges which carry no prestige, and too frequently little or no profit.

Increasing fame will again become a natural feature in the markets of the second largest city in the world. The geographical disadvantage of our extreme eastern location to the great volume of business of the entire country will speedily be lost sight of in many special advantages, including immense stocks of merchandise from all the known ports in the world, thrown open to all buyers. Bank and sub-treasury vaults filled to overflowing, will furnish a financial backbone to a movement that must prove eminently successful.

With transportation rates placed at an engaging figure, and low schedules of freight charges made possible, especially during those seasons of the year when stocks are to be bought and forwarded, will make New York from henceforth receive in its business transactions an impetus never before known in its history.

We have always possessed the greatest attractions to bring here the leading wholesale and retail buyers of the country, among which are to be found unsurpassed hotel accommodations, unequaled amusements, seashore resorts of world-wide celebrity, and through our various commercial clubs and organizations the social enjoyments of a friendly intercourse, which should revolutionize the present conditions of interstate business relations, and bring a new fame to the commerce of the metropolis that will never again be dimmed by circumstances so readily conquered through sustained effort.

Mr. Tower Goes Abroad.

We are pleased to learn that our old friend, Mr. John J. Tower, of the old established house of Tower & Lyon, is able this summer to take a vacation that permits of his going abroad.

He departed, accompanied by his daughter, on the 12th inst., on the steamer *Anchoria*, intending to go direct to Glasgow, from which point it is his intention to visit every city of interest in Great Britain, with the prospect of spending a short time in France before his return.

It is unnecessary to state that so observing a manufacturer as Mr. Tower will neglect no opportunity in this his first trip across the Atlantic, to study the foreign methods and requirements. He will be impressed with the fact that the intelligent mechanics of the effete monarchies of Europe would be greatly benefited by the introduction of such improved tools as are described in the Tower & Lyon catalogue from cover to cover. We wish Mr. Tower a safe and pleasant journey, an agreeable vacation and withal a glad return.

The Bicycle Dinner.

The usual American ingenuity in evolving new forms of amusement, and new developments of bicycling, has been once more illustrated. Out in Mt. Kisco, N. Y., a quiet and beautiful little town up among the hills, the young people are to give a "bicycle dinner."

A party of young people of congenial natures, have been invited to wheel to a certain residence at 6 P.M. on the given date, and when there, napkins made by the fair hands of the hostess, are to be distributed. The guests are then directed to wheel to another house, where soup is to be served. With that out of the way, they receive a second direction, and at the next stop, are served with fish. This programme is to be continued, through the remaining courses—each one of which represents a separate visit—and finally the whole party are to remain at the place last visited, when music and dancing will end the evening's fun.

This new social experiment will be watched with interest by wheelmen everywhere.

Mr. Oldman Endorsed.

A. N. Oldman: I read your article in *Hardware* of June 10th, and would beg to say that your hints to young clerks are of first-class material, and think that clerks who may chance to read them will be benefited.

You ask in your article: "What shall I do with my clerk who insists on smoking cigarettes?"

Would say: "Kill him, for if you don't, the cigarettes will."

Asking you to accept my congratulations on the article, I remain, Yours truly,

Wellington, Ohio, June 15th. L. W. HOPKINS.

Aluminum has almost entirely replaced tin in the manufacture of articles for the French army. Canteens, cups, cooking utensils, etc., made of aluminum alloys can, by means of stamping and spinning, be made entirely without soldered joints, and, however crushed and dented in service, can readily be hammered back into shape.—*Industrial World.*

Until 1720 the greater part of the iron manufactured in the American colonies was produced in Massachusetts; in 1750 Pennsylvania became the leading iron producing State and maintained the supremacy until 1880, after which time the lead was taken by Michigan.—*Michigan Tradesman.*

To prevent corrosion of collar buttons by contact with the neck, a recently patented button has the back made of cork.—*Stoves & Hardware Reporter.*

DRUMMING AS ONE OF THE FINE ARTS.

There is occasionally a salesman who comes into the presence of the buyer, with an air of "Lo, the conquering hero comes;" he seems to be crowned with a halo of success that can be recognized the length of the store. He is apparently fully possessed of the proper knowledge that a man to get any plums out of the few puddings obtainable in ordinary years, has got to hustle like fun, even after he's found the pudding; but this style of man says under his breath, "I know I'll do it."

He doesn't—he never by any possibility could—question his own ability or fail to take the measure of the man in front of him, and frequently that critical examination becomes a lesson in the fine arts, where the brush has to be handled very deftly, with no thick daubs of colors that are too pronounced for artistic effect.

I remember away back in the 'ties, further back than I would care to confess with my present youthful appearance, when, as buying partner of my own firm, I one afternoon was occupying the busiest desk in the house. I had been writing letters of encouragement to the several travelers we had on the road, covering territory not too far away from the city, and in those letters I had illustrated the text by a few new and lower quotations, which were thought would instigate sales even if they failed in inspiring profits.

As I said, I was sitting at the desk in a meditative mood not favorable to making rash purchases, when in walked a breezy individual whom a block off I could have sworn was a product of the manufacturing centers of the West; he had with him a small grip, a confident air, a radiant countenance, and a good sized piece of mercantile pasteboard, on which his name appeared in smaller letters than I could have believed possible from a casual inspection of his makeup.

A preliminary question administered to our office boy who was near the front, told him who was the ordering man, and also his name, so, walking straight to my desk and gracefully dropping his card upon it, he at once opened his attack.

"Mr. Hop, I believe?"

"Your belief is well founded. What can I do for you?"

"I understand that you purchase all the stock for this house, and I have in my grip a model of an article which I am confident you could sell readily and make a very satisfactory profit; to enable you to do which, we would give you exclusive territory."

"Is it this article which ornaments your card, 'The Excelsior Broiler?'" I asked, holding the card before me.

"Yes, sir; the very thing; please don't let the poor illustration establish any prejudice; it's an article with which in a few months we have swept the entire West, and now, like another Alexander, I am on here looking for other worlds to conquer."

"Well, my friend," I remarked, in a tone of commiseration, "you have struck the wrong house; we are not adding to our line of stove specialties at the present time."

"Oh, but you will," he said confidently, "when I have formulated my plan; I am sorry I haven't the exact article full size, 'all wool and a yard wide' to show you; but that will arrive in the morning, and confirm the good impression of the model."

And suiting the action to the word, he opened his delicate looking grip, and pulled out a cast iron arrangement designed to fit over the hole of a stove; it had a tin cover, and within was a circular wire broiler, doubled like a toaster, and made so it could be readily revolved without removing.

He dilated upon its many improvements and advantages over anything else of the kind; told how successfully he had introduced it to the leading jobbing house in St. Louis, Cincinnati, Chicago, Buffalo and Pittsburg, but failed in the slightest degree to change the negative mood in which he had found me, although I couldn't fail to admire the fact that he had what I call the "salesmanlike faculty" largely developed.

But I was not to be moved. I recommended several houses like "Benham & Stoughtenborough," "E. Ketcham & Co.," and others, who would make more satisfactory agents.

"No," he said, "This is the first house I've called upon in this city, and I have never failed to stick to and sell the first house I interview in every city I have visited; I don't dare to hoodoo my usual luck. I've learned that man is a mercurial animal, and I feel that you are not in a buying humor, and experience teaches me I've got as far as I can go to-day; so if you will permit me to call again in the morning, when I shall have received an 'Excelsior Broiler' life size, it may possibly modify your views."

"You may waste your time that way if you so desire."

"Pardon me, Mr. Hop," he said this in the most subdued and polite air imaginable, and speaking with apparent candor, "but I learn that your house is one of the most enterprising and hustling firms in the city; canvassing the near-by trade thoroughly, with seven or eight men on the road, and I am certain I shall sell you a gross of broilers and make you our agent before I leave the city."

His assurance was an object lesson worth studying.

"A gross of broilers?" said I, aghast at the possibility he conjured up, "If anybody could make me believe that I would give an order for a gross of broilers, I would feel that I ought to be tagged and loaded in the Black Maria for the Bloomingdale Asylum with a lot of other *non compos mentis* wrecks."

"Oh, well," he laughed. "we will let it go until morning, and I will endeavor to alter your decision."

"Let me see—is this the Hudson River a block or two away?"

"It is," I replied.

"What kind of a city is that over on the other side?" indicating with a sweep of his hand Jersey City or Hoboken, I was uncertain which, so I fairly described the characteristics of each, for we had a good trade already established in both of them.

"Well, good day, sir, I hope to-morrow will find you in good buying condition, for I was brought up to believe the Lord loves a cheerful buyer."

The half hour I had devoted to this broiler distributor, kept me in a speculative mood the remainder of the day; but I was sure we didn't intend through my instrumentality adding any quantity of broilers—let alone one hundred and forty-four of them—to a stock that was already voted large enough.

The next morning his visit was timed at an hour that would find me free from any attention to the customary morning mail.

He entered, and greeted me modestly and confidently, in fact very much as though he had sold me goods for years.

"How are you feeling this morning, Mr. Hop? But I needn't ask the question, you look like a man who has

Digitized by Google

found an order or a check alternate in every letter brought in the early mail. I don't suppose you have your order for 'Excelsior broilers' made out with the quantity left blank, but I'm prepared to entertain it."

"Do you know," said I, "there's an originality about your methods that entertains me, and I actually regret that I am compelled to turn you down, for I positively do not wish to be an agent for your incomparable broiler." This was intended to be mildly satirical.

"Oh, that's all right," he smiled, "I'm right glad to find you so cheerful; you will be more so when I get that order. I've brought the sample."

Here he took from under his arm a paper package, drawing from its interior the full sized broiler, of which the previous day he showed only the model. He, having already expatiated on its merits, merely commented upon its size and convenience.

"They are intended to be retailed at $2.00 each, and cost the retailer $16.00 a dozen; being put up ½-dozen in a case. For an order of a gross, we bill them to you at $12.00 a dozen delivered here; payable in 90 days, or one per cent. a month discount for cash in ten days. Now that's the business in a nutshell; there's a good profit in them all around; they'll sell, and you will do the business on our money, for you needn't pay a dollar until you've sold them and got your money. How many gross on those terms do you think you can sell the first three months?"

He had said all this glibly enough, and yet every word was clearly and concisely stated.

"I see no reason," said I, "to change my hastily formed opinion of yesterday, N. B. No broilers. In fact, I am confident we could not sell enough of them to make it pay."

"Pardon me," said this imperturbable salesman; "you have not given the subject as much consideration as I should have liked, so I will have to play my hand."

He reached to his inside pocket and pulled out several slips of paper about the size of bank checks.

"My hand holds five aces," said he. "Do you know the concern that signs that document?" and he handed me one of the slips.

It was a printed order with the blank spaces filled in for "one dozen Excelsior broilers at $16 net cash," and signed "Anness & Murray."

"Yes," I replied, "know them well, sell them over $250 a month."

"That's what they told me, so I knew they must be good. How about this one?" and another order from "Jacob Ringle" for a dozen at $16 turned up. He had also sold "Sam Anness" a half dozen, and several others. Even "old man Bell," who rarely bought a "half dozen" of anything, was on the list; he had hypnotized the trade, and Jersey City was crying for broilers.

"Well, what do you think of it?" he said. "I left this store at 2:45, and left Jersey City at 7:15, but I enjoyed the late dinner I got, for I had in my pocket orders for seven dozen broilers which I had sold subject to your delivery in two weeks, or no sale."

"Now," he continued, "I want to pass these orders over to you to fill, upon receipt of your order on terms mentioned this morning, and I want to say one thing—with seven men on the road, you will undoubtedly sell—you will note that I don't say *probably*—ten gross, before you pay us, necessarily, a single dollar. Mr. Hop, I am glad to have met you; but you are a hard man to work."

I was, I confess, taken a little aback at the work done in our name, by a stranger within a couple of miles of the store. I sat down and made out an order for "three gross as a starter," and in the first three months exceeded his prophecy by ordering 12 gross, and didn't do it on their money either, for we were anxious to add the 3 per cent. to the rest of the profit. Oh the good old days! "HOP."

New York Hardware Jobbers.

A meeting of the New York State Association of Hardware Jobbers was held in Binghamton, on June 9th. The business sessions of the association were held in the assembly hall of the Hotel Bennett and about a dozen jobbing houses were represented. The officers are: President, Capt. Frederick Barker, Elmira; vice-president, Charles H. Turner, Albany; secretary and treasurer, S. J. Weaver, Rochester. Those present beside the officers were J. K. Dunscomb, Albany; George Dana and John L. Murray, Utica; J. William Black, Syracuse; Irving D Booth, Elmira; J. H. Boucher, Rochester, and B. M. and Charles B. Babcock, Binghamton. The guests of the association were J. D. Barber, Dr. Charles G. Wagner, of the State Hospital; Mr. Lewis, Wilkesbarre; Fred E. Hines and J. H. Underwood. The members were the guests of the Babcock Hardware Co. The next meeting of the association will be held at Syracuse in September. The date has not been decided on, but it will be about the middle of the month.

The meeting was called to order at 11:30 and the discussions lasted about three hours. At 2:30 a banquet was served in the breakfast room of the hotel. In response to an invitation of Superintendent Wagner, the party boarded an electric car for the State Hospital, where they were shown through the institution Then the party returned to the city and visited various points of interest.

Our Iron and Steel Importations.

The *American Manufacturer* says that the imports of British iron and steel products into the United States during the second month in the new year are shown in the following table, compiled from returns made to the Board of Trade, London. In additon the totals for the years so far, and those for the first two months of 1896, are given:

	February		Two months	
	1896. tons.	1897 tons.	1896. tons.	1897. tons.
Pig iron	2,981	625	7,714	1,728
Bar, angle and bolt iron	104	169	463	320
Railroad iron and steel	5,224	....	8,396	....
Hoops, sheets and boiler plates	18	8	68	141
Tin-plates and sheets	6,980	9,678	18,841	18,488
Old iron	....	....	377	12
Steel unwrought	1,904	1,031	3,017	2,104
Wire, iron and steel	553	159	924	308
Black plate for tinning	529	89	1,003	99
Totals	18,293	11,759	40,803	23,230

"In comparing the total exports of British iron and steel products to the United States during last month with those recorded for February, 1896, we find a decrease of more than 35.5 per cent. As has been noted for some months past, nearly all the items show lower figures in comparing the two months. Pig iron exports show a decrease of about 79 per cent., while exports of bar iron fell away more than 62 per cent."

New Club Members.

At a meeting of the board of governors of the Hardware Club of New York, held on June 10th, the following were unanimously elected to membership in the Club:

Thomas M. Gallivin, manager E. C. Stearns & Co., Syracuse, N. Y.

Joseph O. Stokes, treasurer Home Rubber Co., No. 80 Reade Street.

Charles L. Patterson, general agent Repauno Chemical Co., Wilmington, Del.

Theo. David, Postal Telegraph Building.

E. H. Parkhurst, New York Belting & Packing Co., No. 25 Park Place.

Frank B. Hurd, No. 425 Broome Street.

W. W. Falmer, No. 63 Beekman Street.

Henry L. Pierson, No. 29 Broadway.

Chas. H. Boaz, No. 256 Broadway.

Geo. H. Armstrong, agent, E. C. Stearns & Co., Syracuse, N. Y.

Henry J. Botthoff, No. 21 Spruce Street,

Digitized by Google

THE DICTIONARY AND THE SAW.

The heedless young Hardware clerk who goes through the stock, handling and naming this article and that, has probably no idea whatever as to the amount of literature that it is possible to discover in relation to the articles which he so carelessly handles.

Take the Saw for instance. Two or more full pages of the great new "Century Dictionary" are devoted to definitions and discussion of this one article, and its various appendages and derivations.

Here is the definition, with description as it is found verbatim: "Saw: a cutting tool consisting of a metal blade, band, or plate with the edge armed with cutting teeth, worked either by a reciprocating movement, as in a hand-saw, or by a continuous motion in one direction, as in a circular saw, a band-saw, and an annular saw. Saws are for the most part made of tempered steel. The teeth of the smaller kinds are formed by cutting or punching in the plate interdental spaces or gullets. In saws of large size inserted or removable teeth are now much used. Small saws are generally provided with a single handle of hard wood; larger saws, for use by two workmen, have a handle at each end. Reciprocating saws more generally have their teeth inclined toward the direction of their cutting-stroke, but some cut in both directions equally. To cut freely, saws must have, for most purposes, what is called set—that is, alternate teeth must be made to project somewhat laterally and uniformly from opposite sides of the saw in order that the kerf or saw-cut may be somewhat wider than the thickness of the saw blade. This prevents undue friction of the sides of the blade against the sides of the kerf. Some saws, however, as surgeons' saws, hack-saws, etc., have little or no set, and undue friction against the kerf is prevented by making the blades of gradually decreasing thickness from the edge toward the back."

Among the various kinds of saws described is the annular saw, sometimes called barrel-saw, crown saw, cylinder saw, drum saw, ring-saw, spherical saw and tub saw.

The annular saw is in the form of a hollow cylinder, with teeth formed on the end.

The brier-tooth saw is one gulleted deeply between the teeth. This is sometimes called a gullet saw.

A butcher saw is not, as is generally supposed a saw in use by butchers, but is named after a Dublin surgeon. It is a narrow-bladed saw, set in a frame so that it can be fastened at any angle.

Other saws are the circular saw, comb-cutters'-saw, cross-cut saw, double saw, endless or band saw, equalizing saw, hack saw, half-back saw (no relation to the foot-ball business), half rip saw, which is a hand saw without a back; Hey's saw, which is a small two-edged saw set in a short handle, and is used in removing pieces of bone from the skull; a perforated saw, a pit-frame saw, a railway cut-off saw, which is a circular or buzz saw supported on its frame upon a carriage moving on a track so that it can be fed backward or forward to its work. There is also a reversible saw, and a hack saw is sometimes called a smith's saw.

Reference is also made to gig saws, ice saws, jig saws, rabbet-saws and ring saws.

Other definitions touching the saw are as follows:

Saw-arbor. The shaft, arbor or mandrel upon which a circular, annular, or ring saw is fastened and rotated. It is also called a saw-shaft, saw-spindle, and saw-mandrel.

Saw-back. An adjustable or fixed gage extending over the back of a saw, and covering the blade to a line at which it is desired to limit the depth of the kerf.

Saw-bench. In wood-working, a form of table on which the work is supported while being presented to a circular saw.

Saw-block. A square channel of wood or iron, with parallel slots at various angles, which guide the saw in cutting wood to exact miters.

Saw-buck, or saw-horse. A support or rack for holding wood while it is cut by a wood saw.

Saw-clamp. A frame for holding saws while they are filed. Also called a horse.

Saw-gummer or saw-doctor. A punching or grinding machine for cutting out the spaces between the teeth of a saw.

Saw file. A file especially adapted for filing saws.

Saw frame. A frame in which a saw is set; a saw sash.

Saw-gage. This has several meanings. A steel test-plate of standard gauge for testing the thickness of saw-blades. A straight edge laid over the edge of a saw-blade to determine whether the teeth are in line. A test for the range of tooth-points of a saw in their distance from the center of rotation. An attachment to a saw-bench for adjusting the stuff to be cut to the saw, the gage determining the width of cut. A device for adjusting the depth of a saw-cut.

Saw-gate. The rectangular frame in which a mill-saw or gang of mill saws is stretched.

Saw-guide. A form of adjustable fence for a saw-bench.

Sawing-block. A miter-box.

Saw-jointer. An apparatus by which the jointing of gang-saws is performed.

Saw-swage or saw-jumper. A form of punch or striker for flattening the end of a saw-tooth to give it width and set.

Saw-Pad. A device used as a guide for the web of a lock-saw or compass-saw in cutting out small holes.

Saw-pit. A pit over which timber is sawed by two men, one standing below the timber and the other above.

Saw-set. An instrument used to wrest or turn the teeth of saws alternately to the right or left, so that they may make a kerf somewhat wider than the thickness of the blade. It is also called saw wrest.

Saw-table. The table or platform of a sawing machine on which material to be sawed is to be held or clamped.

Saw-tempering. The process by which the requisite hardness and elasticity are given to a saw.

Saw-tempering machine. A machine for holding a saw-blade firmly so that it may not buckle when it is plunged into the tempering oil-bath.

Saw-tooth. The tooth of a saw. These are made in a great variety of forms.

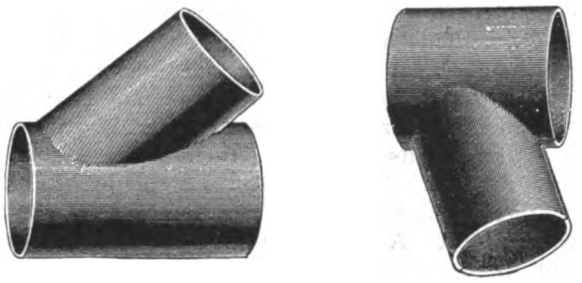
Saw-tooth indicator. An adjustable device used in shaping the teeth of circular saws, to insure their filing and setting at equal distances from the center.

Saw-tooth swage. An anvil-block used with a punch or wedge to flatten the edges of saw-teeth.

Saw-tooth upsetter. An implement for setting the teeth of saws or for spreading their teeth and acting as a swage.

So much for the technical definitions. There is a great deal more in this dictionary hinging on the word saw. For instance in olden times, when one was "held at the long saw" he was being kept in suspense. To saw a thing is to cut or divide with a saw. Hamlet in that memorable passage, where advice is given to the players, advises them not "to saw the air too much with their hand, thus, but use all gently." In book-binding it is to score or cut lightly through the folded edges. A saw is also defined as a say-

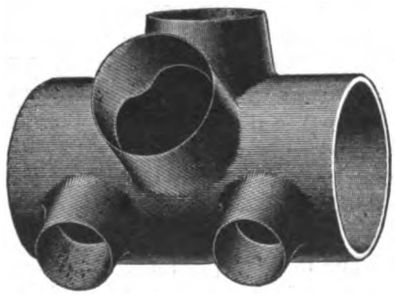
Digitized by Google



ing or speech, especially of a proverbial character. For instance in Shakespeare, we read of the justice "full of wise saws and modern instances." A saw is a Scotch form of salve. A thing is saw-back when the tips of the backbone stand out like a saw, and saw-beaked when the beak is serrated. A sawbelly is a blue-backed herring; a sawbill is a certain species of bird; a sawbones is slang for a surgeon. A sawfish is described in these simple words: "An elasmobranchiate or selachian fish of the family Pristidæ, having the snout prolonged into a flat saw or serra beset on each side with horizontal teeth pointing sidewise."

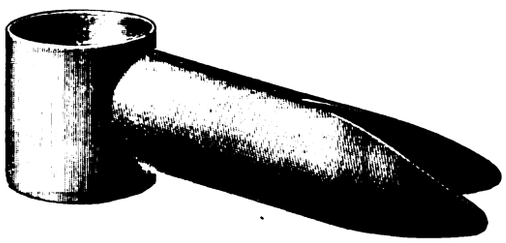
A sawfly is "a hymenopterous insect of the family Tenthredinidæ, so called from the peculiar construction of the ovipositor (saw or terebra), with which they cut and pierce plants."

It was Caesar who said: "I came, I *saw*, I conquered."



The A. L. Moore Co.'s Output.

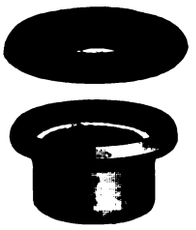
The large increase in the use of sheet steel stampings for bicycle frame connections within the past two seasons, is a

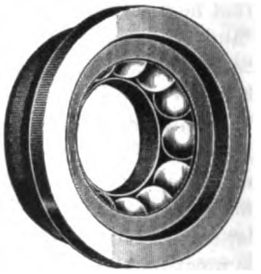


most convincing fact that they have come to stay, and that they have, to an extent, replaced drop forgings for this purpose. One of the best and largest lines of these sheet steel bicycle fittings is that made by the A. L. Moore Co., Cleveland, Ohio.

By the means of an electrical welding process, they have produced some extremely clever features in seamless sheet

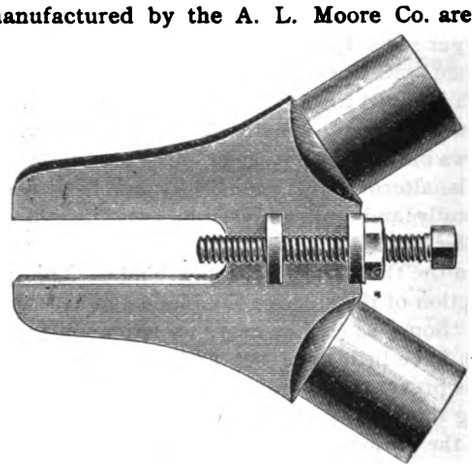
steel crank hanger brackets, head lugs, seat lugs, etc., and for the season of '97 and '98, they are bringing out some interesting novelties in this line. One of the most interesting of these new features is their seamless bicycle head. This is made of sheet steel. The lugs are drawn out and the head electrically welded, in the same manner employed in the manufacture of their seamless or electrically welded head lugs, which have gained a wide reputation during the



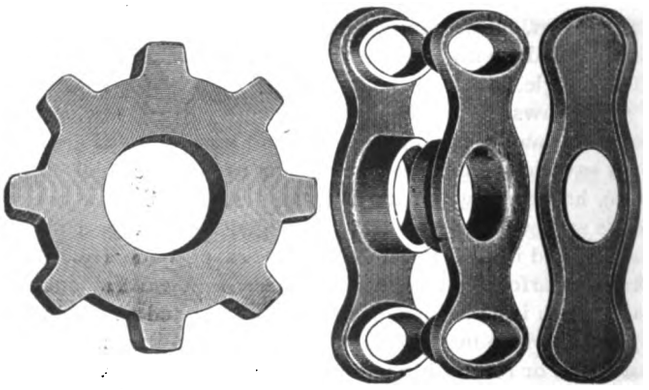


past season. Practical tests have shown this head to meet every requirement for strength and economy, and they will be furnished to meet the specifications of the A. L. Moore Co.'s customers for both flush and open joints, and for any length, diameter and angles desired. They have recently submitted samples of this seamless bicycle head to the large manufacturers of the country, who have pronounced it distinctly high grade. Illustrations of the A. L. Moore Co.'s seamless frame connections are shown herewith.

One of the best known articles, which this company manufactures, is their seamless crank hanger, which was brought



out successfully during this past season. For the season of '97 and '98, they promise still newer and better developments in their crank hangers and their other seamless

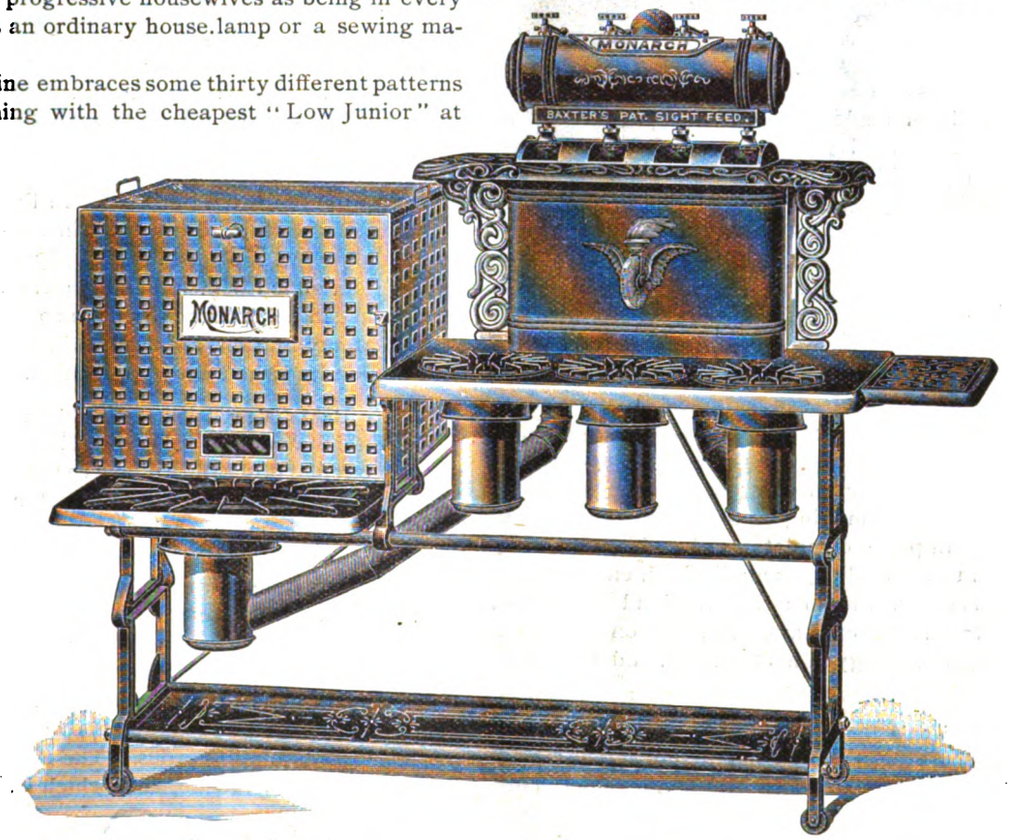


stampings, all tending to reduce the cost of manufacturing wheels, at the same time retaining high efficiency for strength and neatness. Other illustrations of some of the parts manufactured by the A. L. Moore Co. are shown,

such as head cups and cones, crank hanger cups with ball retaining cases, fork crowns, etc.

The A. L. Moore Co. have branch offices at New York, Chicago, and London, the main offices and factory being at Cleveland. They have found it necessary to triple the output of their factory for the coming season, to which end

they have nearly completed the addition of two stories on their present factory, 60 by 180 feet, together with a large separate building for annealing room.



The C. R. Meres Heater Mfg. Co., Norwalk, Ohio, shipped last week two of their No. 3 heaters to A. A. and Captain Clemons, of Marblehead, Ohio, and are shipping this week one to Edward C. Forbes, Cleveland, Ohio, assistant county auditor of Cuyahoga County, and one to Prof. C. P. Doolittle, of Oberlin College, Oberlin, Ohio.

The Monarch Gasoline Stoves.

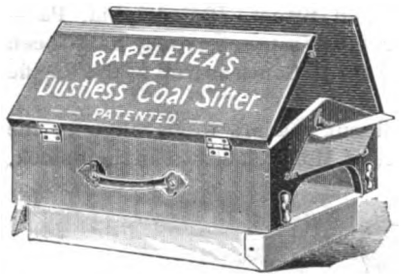
We present herewith an illustration of the Monarch "New Method" Gasoline Stove, made by the Monarch Stove Co., Mansfield, Ohio, which the advent of hot weather makes eminently appropriate at this time. The day has arrived when a gasoline stove is no longer considered a luxury, but an actual necessity in the homes of the middle classes, where the wife gives personal supervision to the cooking of the daily meals. There are few things that add to the comfort of the home that is comparable to a gasoline stove in the summer months particularly, and so great a convenience have these goods been found that they are also adopted by thousands of families for the entire year. Their cleanliness and quick work, and the concentration of the heat to exactly where it is wanted, are points that have made these goods very popular. There formerly has existed more or less fear of the gasoline stove, and in the earlier years of the manufacture this fear was certainly well grounded; but so great have been the developments and improvements and safeguards devised, that the element of fear has been entirely overcome, and gasoline stoves are now regarded by progressive housewives as being in every respect as safe as an ordinary house lamp or a sewing machine.

The Monarch line embraces some thirty different patterns of stoves, beginning with the cheapest "Low Junior" at

$3.50, up to the most complete and capacious family range that is sold at $25 or $28. The stove illustrated is one of the newer inventions, which obviates the objection of waiting until the gas is generated, and lights up like a gas-jet immediately upon the turning on of the valve. No odor or smoke arises from the operation; the heat is an intensely hot fire and the operation is as simple and rapid as a gas stove. A novel feature is presented in the oven or baker. This baker is mounted on casters, and when not required for use is run back to the rear of the stove without lifting or carrying, leaving the burner free for other uses. This is one of the most convenient and labor-saving improvements that have been made in recent years, and the Monarch stove for this reason has become very popular. It is true that a prejudice exists among some of the Eastern homes as to the safety of gasoline stoves, but in the Western country where they have been largely introduced, it is the exception rather than the rule to find a home not supplied with a gasoline stove. It is well for our Eastern people to wake up to the wonderful comfort and saving of labor that is accomplished in the use of gasoline for cooking, and to note the fact that the improvements in their construction brought out within the past four or five years have entirely eliminated this old idea of danger in their use. The progressive and vigorous work of the Monarch Stove Co. has been a great education along this line, and not only have Monarch stoves become very popular at home but a large export business is being worked up, and an agency has been established in New York under the management of the well-known and popular Chas. K. Turner, who has been engaged in this line of work for the past forty years in New York. The Monarch Stove Co. are carrying a line of samples with Mr. Turner at his store at No. 76 Broad Street. Agencies have also been established in all the large cities of this country as follows: For New York and Pennsylvania and New England, the Danville Stove & Mfg. Co., Danville, Pa., No. 284 Pearl Street, New York city; No. 107 North Second Street, Philadelphia, Pa.—while other agencies for the Western territory have been established, taking in the entire South as well as the Pacific Coast.

It would be well for all our readers to be alive to the necessity of placing a line of Monarch stoves in their stock, and a letter to the Monarch Stove Co., Mansfield, Ohio, would bring forth all the necessary information as to prices, goods, etc.

Among recent orders for Inter-locking Rubber Tiling the New York Belting & Packing Co. report the following: General offices of the Western Electric Co., West Street, New York city, Pennsylvania Railroad Co. (fifth order), upper and lower cabins complete on new Twenty-third Street ferryboat; American Line (fifth order), promenade deck gangways, steamship St. Louis; Lehigh Valley Railroad, train of vestibule cars, five smoking-rooms; residence in Yonkers, billiard-room, kitchen and laundry.



A prominent dealer in Hardware and farm implements of Clinton, Ill., displays a sign over the door which reads, "Cast Iron Sinks." A countryman who accepts all statements, even those on sign boards, as meaning what they say, read the words over a couple of times and then walked leisurely off, as he muttered to himself that "any fool ought to know that."—*Farm Machinery.*

NEW GOODS AND SPECIALTIES.

Rappleyea's Dustless Coal Ash Sifter.

The Newburgh Sifter Mfg. Co., No. 119 Broadway, Newburgh, N. Y., are manufacturing and placing upon the market Rappleyea's patent Dustless Coal Ash Sifter which we illustrate herewith. Being differently constructed from any other ash sieve now before the Hardware trade, it is claimed to be positively dustless in operation, and deserves the attention of all of our readers dealing in house-furnish

ing Hardware. It is made of white wood, the ash pan being constructed from galvanized iron, and the screen or sieve, which is adjustable, can be replaced when worn out at a merely nominal expense. By reference to the engraving, the door shown at the end of the box is intended as the opening for removing the coal when the ashes are sifted, while from the door at the end of the ash pan, the ashes are taken, after which the sifter can be set away in the box, barrel or other receptacle where the ashes are stored for future removal. The sieve is of a size sufficient to hold a scuttle of ashes. It can be made very useful as well in sifting the dust or dirt which is usually found in nut coal, now so generally used, the retention of which in the coal, from lack of facilities for separating it, creates the deadened fire, so annoying to the intelligent housekeeper. The retail price complete is placed at $1. Discount furnished to the trade upon application, either direct, or to E. F. Benson, Jr., the sole New England agent, No. 146 Franklin Street, Boston, Mass. Mr. Benson is pushing the Sifter with great energy in his territory, and with gratifying success.

Morrison's Boiler Tube Expander.

J. K. Williams, Akron, Ohio, is manufacturing and placing upon the market the Morrison Automatic Feed Tube Expander, illustrations of which we give in the course of this article and which is referred to as possessing among other improvements the following advantages: As will be

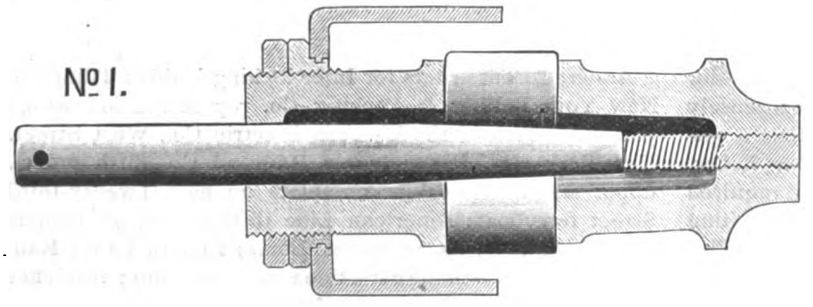

FIG. 1.

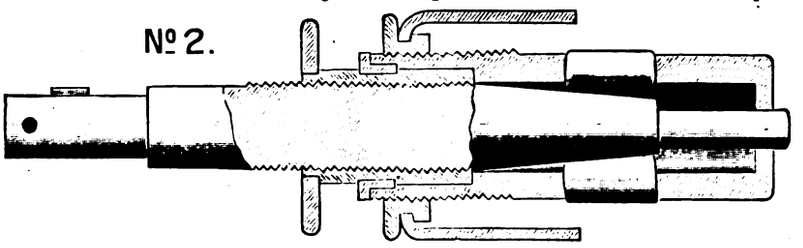
noticed, by reference to Fig. 1, the automatic feed does away with hammering on the pin to set out the rolls. The automatic feed gives a uniform pressure, which sets the tube out evenly all around the hole in the tube sheet. In the usual form of expander, constant driving on the pin swages the tube where the rolls rest: and when they are turned so as to cover the swaged places again, they become loose and get the hammer repeatedly in the same position, which has a tendency to thin the tube unevenly and make the hole three-cornered. The even expansion of this automatic feed prevents the bursting or cracking which frequently occurs with the hard steel tubes in general use, when the pressure and hammering is not uniformly regular. As the rolls are tapered in the opposite direction to the pin, it is possible to roll the tube out par-



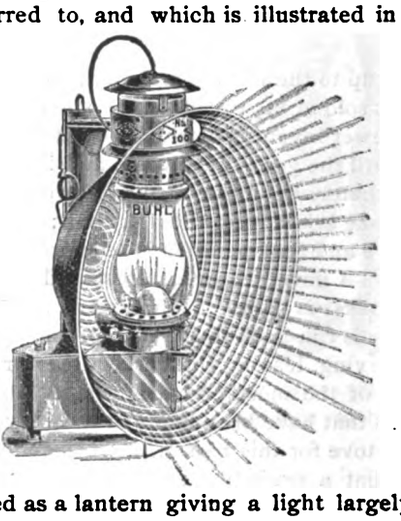


FIG. 2.

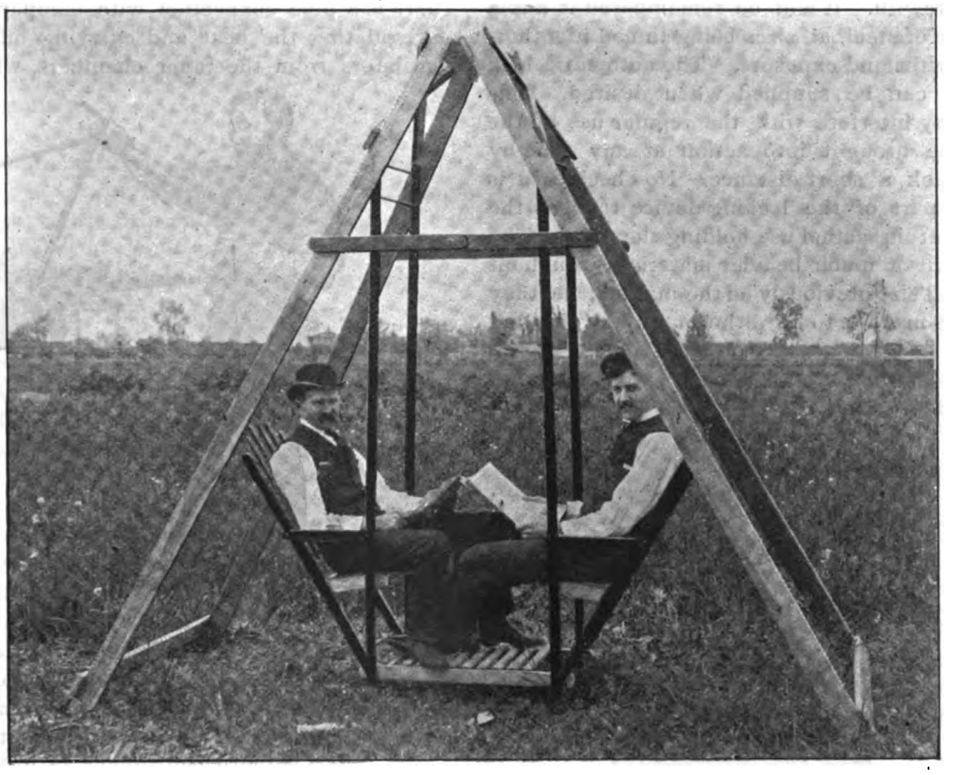
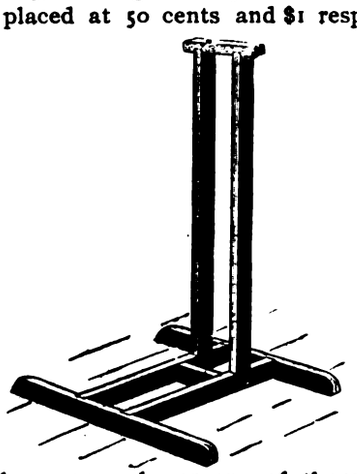
allel to the hole in the tube sheet, which makes it equally tight inside and outside and a perfect joint clear through. After the work is done a turn or two in the opposite direction frees the tool from the tube. In Fig. 2, the same tool is shown having an "adjustable" instead of "automatic" feed; a loose nut is placed in the body of the tool, and by having it extended with a hand wheel on the outside, the expansion can be adjusted to suit the operator and the tube worked at any tension required. Circulars conveying full information furnished upon application.

Buhl's New Tubular Headlight Lantern.



The Buhl Stamping Co., Detroit, Mich., are mailing an attractive circular describing a new case assortment of twenty Tubular Lanterns which they offer at a special net price. This is intended to meet the requirements of small buyers of lanterns who wish to keep a variety of styles without buying too many at a time. It includes six each of their new Side Lift, Top Lift and Dash Reflector Lanterns, and two of their new Tubular Headlight Lanterns. In our "Prices Current" will be found the current quotations on this particular line of goods, the sale of which will be greatly augmented by the adoption of the above extremely attractive method of stimulating sales. The new "Tubular Headlight" above referred to, and which is illustrated in this

article, is described as a lantern giving a light largely in excess of what would be expected. It is claimed that the hood, which is sixteen inches in diameter, is much larger than in similar lanterns. "The Headlight" is provided with a seven-inch nickel-plated brass reflector and new storm top, new lift and low-down oil well of large capacity;

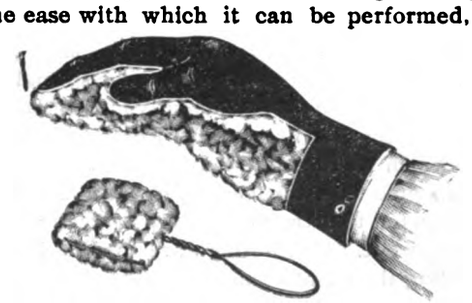


Digitized by Google

it has a No. 2 burner and No. 0 globe. It can be filled, lighted and regulated without removing the globe; and it is claimed that it will burn for forty-eight hours in the wind or rain, and stand the severest tests in all kinds of weather on land or water. It would seem as though "The Headlight" would prove a lantern especially desirable for livery stables, stores, factories, picnic grounds; in fact, all places where at a minimum cost a strong light can be obtained if desired.

Tenax Folding Bicycle Stand.

Fred. Hawley, Nos. 40 and 42 Gold Street, New York, has added to the line of Tenax Folding Bicycle Stands a new style which we illustrate below. We gave an extended notice to this new line of bicycle stands in our recent issue of April 10th, the smallest size noticed being intended for four cycles; but a demand having sprung up for a Tenax Stand holding only one or two bicycles has resulted in the addition of two new sizes—No. 4, holding one cycle, and No. 5, holding two cycles, the list prices of which, being placed at 50 cents and $1 respectively, bid fair to make them as popular as any of those already before the trade, the small space occupied making them expressly desirable for use inside the house as well as outside.

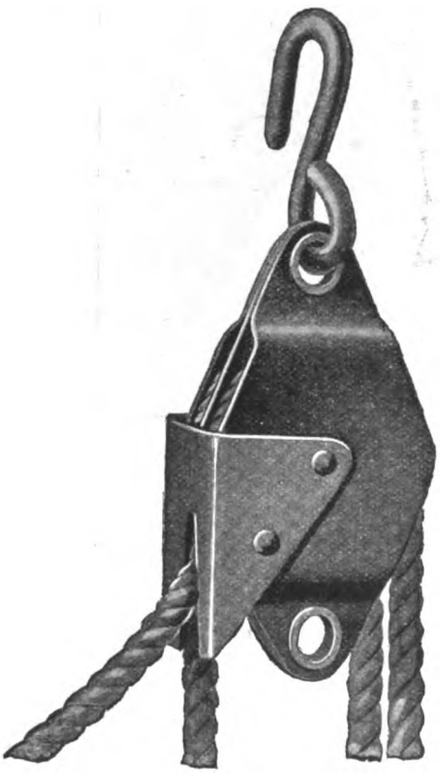


The New Easy Lawn Swing.

The Strobel Mfg. Co., Marion, Ohio, are placing upon the market through the Hardware trade, the New Easy Lawn Swing, an illustration of which we give above. It is made of the very best material, very attractively finished and entirely automatic in its operation. The delightful and healthful exercise imparted by the use of this swing makes it as enjoyable to adults as it is to the little ones who make more frequent use of it. The backs of the chairs are made so they can be adjusted either to sit up perfectly straight or inclined at any angle that may be wished. In order to stow the swing away for the winter it can be closed up in a compact manner, and occupy but very little storage space. Prices and discounts to the trade are mailed by the manufacturers upon request.

Parks' Stove Polishing Mitten.

Parks & Parks, Troy, N.Y., count among their most popular and salable specialties, the Stove Polishing Mitten, an illustration of which we present herewith. All housekeepers know that with the ordinary appliances for polishing a stove, the operation is one of the most unpleasant that falls to their lot, and to avoid the disagreeable task it is too often neglected to the detriment of a tidy kitchen. By the aid of this stove polishing mitten and dauber, which is a great improvement over all other methods, a woman can black and polish her stove or range to the highest degree, without even soiling her hands or clothes, and the labor so universally dreaded becomes a positive pleasure, from the ease with which it can be performed, and the perfect manner of the operation. The mitten makes an equally good polisher for russet and patent leather shoes, or can be used for dusting or polishing furniture. The manufacturers report constantly increasing sales among the Hardware and housefurnishing trade, who have extended the glad-hand of welcome to this extremely useful article.



The Junior Tackle Block.

Lane Bros., Poughkeepsie, N. Y., John H Graham & Co., agents, No. 113 Chambers Street, New York, having found the success attending the introduction of "The Junior" Patent Steel Tackle Blocks to be so much greater than they had

Digitized by Google

anticipated, have decided to make extensive additions to their line which had previously been confined to small sizes only. They are now offered in sizes adapted to any size of rope up to and including ¾ inch. They can be furnished in single and double sheaves, either with or without automatic lock as desired. We present an illustration of "The Junior" herewith. It will be remembered it has a case made entirely of steel, all sizes being tinned in a thorough manner to withstand exposure. The automatic lock above referred to can be supplied when desired. This does not in any way interfere with the regular use of the block, but may be brought into action at any time by simply stepping back a short distance. No check cord is required, and no part of the locking device touches the rope at all when not in actual use holding the load. The new blocks are built of much heavier material throughout than were the small size previously on the market; and they are claimed by the makers to be a thoroughly strong and

reliable block, while the low price brings them within the reach of many who, having only occasional use for such an article, have hesitated about purchasing the more expensive kinds.

The Eureka Brazer and Enameling Oven.

The Union Heater Supply Co., Detroit, Mich., in connection with the large large line of similar specialties with which they have long been prominently identified, are manufacturing the Eureka Brazer and Enameling Oven, the former of which we illustrate herewith. The burners are made of coil pipe with the best brass needle valves, and are so constructed that they can easily be removed should necessity require it. The burners are mounted on swivel joints enabling the user to place the flames directly opposite each other, or at any angle required to get the benefit of the most intense heat. The fire shield is made of heavy sheet iron with a heavy asbestos lining, which can be replaced when necessary. The wing on either side can be dropped so as to admit large work; it can also be raised or lowered. The tank is made of heavy galvanized steel, tested to a pressure of 150 pounds. The pressure gauge is made to show 30 pounds; has nickel ring with nickel dial, and brass nipple connected to tank; the cut-off valve is of globe pattern, and is quick acting. The Eureka pump used in connection with the brazer is 2x22 inch cylinder, nickel-plated, with metal valves, and heavy cast iron base which can be screwed to the floor. The Eureka Enameling and Core Oven also manufactured by the company is intended to do the finest kind of work, and is built of the very best heavy soft sheet iron, with double walls and double seamed all around. The outside walls are lined with asbestos, secured with iron straps, and stay-bolts between walls. There is a pipe connection with damper, for the purpose of regulating the heat and carrying off any fumes; also ventilators from the inner chambers, which are very im-

portant when the oven becomes overheated. The burners are so placed that the flames strike a reflector on the inner bottom, distributing the heat and preventing the burning out of bottom. These burners swing out from under the oven, making it more convenient to light them. It consumes from one to one and one-half gallons of gasoline per day. Catalogues with full description will be forwarded upon request.

Edward C. Van Glahn, the active manager of the wholesale and retail Hardware house of White, Van Glahn & Co., No. 15 Chatham Square, New York, leaves the city to-day, accompanied by his wife, for a five weeks' visit to the Pacific Coast. Mr. Van Glahn has certainly earned a vacation, not only through his regular business labors, but also from his services as a member of the board of governors of the Hardware Club of New York, where, as chairman of the admissions committee, and a member of the house committee, he has given time and loving labor to the best interests of the club. He will stop occasionally en route, to visit the larger cities and other attractions on his way. In going, he will pass through Denver and Salt Lake City, and return by the way of Oregon and Omaha.

The steel work in the new building for the Catholic Protectory at Van Nest, N. Y., has been awarded the Berlin Iron Bridge Co., East Berlin, Conn. This building is two stories high, having a floor supported by steel posts and girders. The roof construction is to be steel trusses supporting slate covering. The building is 60 feet wide and 160 feet long, having projections 60 feet long and about 30 feet wide on either side at the center, for the organ loft and gallery. The ceiling of the upper floors or main auditorium will be arched, and the gallery erected of light steel work will be much lighter than it would have been had clumsy wooden construction of wood columns and beams been used.

H. H. P. Seabrook, of the Anglo-American Novelty Co., dealers in fancy goods, cycle accessories and Hardware, No. 21 Edmund Place, Aldersgate Street, London, E. C., is in this country on business connected with his company.

The New Departure Automatic Brake.

The New Departure Bell Co., Bristol, Conn., John H. Graham & Co., No. 113 Chambers Street, New York, sole agents, are manufacturing and placing on the market through the Hardware trade and dealers in bicycle sundries, their New Departure Automatic Bicycle Brake, which in conception and application is about as original and as radical a change from the present standards as one could imagine. We present herewith a number of illustrations which will convey a clear idea of the points of excellence referred to.

A glance at the illustrations—which are here given one-half actual size—will at once demonstrate its extreme simplicity and its right to the title of the greatest adjunct to the safety and pleasure of cycling, as well as one of the longest strides in the progress of cycle building which has yet been conceived.

The construction shown by the drawings is that made use of when the hub is specially constructed to include the brake as an inherent component of the bicycle. When applied to machines already in use it is furnished in form to which reference will be made further on. This construction is obviously subject to such minor changes and modifications as are required to adapt it to the conditions of different manufacturers, but such modifications will be slight, and will readily suggest themselves upon inspection.

The automatic brake properly consists of two parts, which may really be classed as integral parts of the machine itself. In Fig. 1 is shown the brake assembled complete. It is applied to the rear hub, between the sprocket and the fork, and occupies the space which is always there found. It consists simply of a split expansion ring, and an internal friction faced drum in conjunction with the hub and sprocket. A is the hub with the flange A1 and the lug A2 formed in one piece. This is shown in detail in Fig. 2. B is the sprocket, which has a slot cut out to allow it to slip over the lug A2. C is the split expansion ring, which is slipped upon the hub with the enlarged end fitting into the slot in the sprocket and the other end abutting against the lug A2. (See detail of ring Fig. 4). The ball cup F (Fig. 5) is then set into the end of the hub, and over all is placed the cap E, which forms the internal friction drum, its inner surface being provided with suitable friction material. (See Fig, 6).

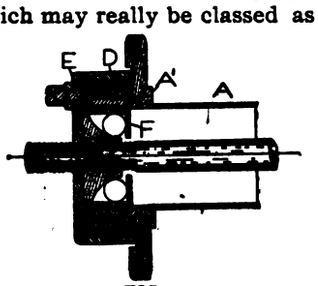

FIG. 1.

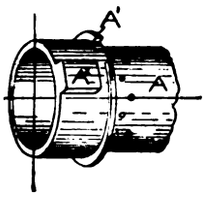

FIG. 2.

It will be noted that this construction requires no screw threads on either hub or sprocket, and is extremely simple and inexpensive, with no screws or loose parts to become broken or deranged in any way.

In case of danger from obstructions of any sort, or preparatory to riding down a steep hill, the natural impulse is to hold back upon the pedals and firmly grip the handle bars. This is as involuntary and unconscious on the part of the rider, whatever his degree of proficiency, as it is for the pedestrian to slacken his pace under similar conditions. So soon as the rider ceases the forward motion of the pedals, and attempts to hold back, the automatic brake comes to his aid and is in instant action even without any backward motion whatever upon the pedals. The retarding of the sprocket causes the expansion ring C to expand, and the outer surface is brought into frictional contact with the inner surface D of the friction drum, the latter being held against rotation. This causes positive braking of the wheel, and whether slowly or suddenly applied, the braking action is smooth, positive, and of instantaneous effect. There is no back lash of either chain or sprocket, and no backward motion whatever is required to set the brake on firmly, simply holding back upon the pedals accomplishes the desired effect, whether it be to merely slacken the speed or come to a full stop. It is claimed that in case of sudden obstruction the wheel may be brought to an instant dead stop, and this without any strain upon any part of

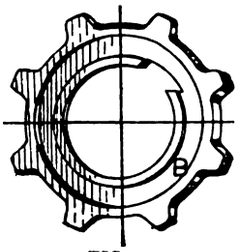

FIG. 3.

the machine; without any pressure whatever upon the balls or bearings, and with no danger of unseating the rider.

The manufacturers state that when supplied for wheels already in use, the brake is furnished already assembled upon an interchangeable rear sprocket so that all the rider has to do is to unscrew the old sprocket and screw on the new one, and the thing is done.

The manufacturers believe that a thorough examination of their great improvement will convince the most skeptical that the ideal brake has been found as the New Departure Automatic Brake fills to the fullest extent the essential qualifications demanded in the ideal brake, which are: That it shall be absolutely automatic, and operated with no conscious effort on the part of the rider; it must not detract from the beauty of the wheel; must cause no appreciable increase in weight; cause no wear upon the tire; bring no strain upon the chain, sprockets or other parts, and no crushing strain upon the ball bearings. It must be instantaneous and positive in its action whatever be the muscular capabilities of the rider; it must be of absolute reliability when wanted, but entirely out of the way when not in operation, and, most important, it must in no way interfere with the normal motion and action of the bicycle. To all the foregoing must be added the greater and imperative requirement, that the rider shall at all times be able to keep his hands and feet firmly in proper position on the handles and pedals and never, even for an instant, lose control of his machine.

This ideal, exalted and exacting though it be, they feel has now been fully realized, and in the new automatic brake herein described will be found embodied every requirement and advantage demanded of the perfect brake.

FIG 4.

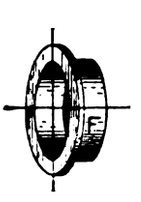

FIG. 5.

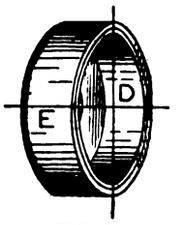

FIG. 6.

The presence of the brake adds in no wise to the appearance of the machine, and no one would ever realize that there was a brake upon it unless he knew where to look and what to look for. Circulars, fully describing this new departure in the construction and application of bicycle brakes, will be sent upon request by the manufacturers.

"I suppose your daughter is just like mine—rather ride a wheel than eat."

"Not exactly; but she would rather ride a wheel than cook."—*Michigan Tradesman.*

The Climax Stoves and Ranges.

Ever alert to keep abreast with the times, and to meet the demands of this progressive age and people by constant watchful care of the interests of the trade, Taplin,

FIG 1.—CLIMAX RANGE.

Rice & Co., of Akron, Ohio, anticipate the wants of the public, and are constantly bringing to notice novel and superior adjuncts to their deservedly popular line of Climax Stoves and Ranges, which has always maintained an enviable and leading position in the branch of trade to which it belongs, and so well established, that the word

FIG. 3.—CLIMAX JUNIOR.

"Climax" has become a synonym of superiority and perfection. With the present issue of *Hardware* it is our privilege to present to our readers a few of the recently constructed novelties offered by this enterprising and representative establishment, whose reputation for finished workmanship, originality of design and complete construction is second to no other stove house in the country.

In the 1897 pattern of cast iron Climax Range, which is made in the various conventional styles and sizes (with and without hearth), is presented a remodeled, newly ornamented, reconstructed range, which is well and favorably known throughout the Western market as a strong competitor of all the leading, first-class, high grade ranges, having special features to commend it as a culinary article of superior merit. The introduction of it in any market is a guarantee of additional trade.

The Modern Climax, just completed, is a well constructed, model steel range, made in plain, portable and flush reservoir style, equal in beauty of finish and ornamentation to anything on the market, and it is destined to become a very popular range and ready seller, combining in its construction special features, with all the essential and important appliances found in strictly first-class steel ranges heretofore recognized as standard goods, and any

FIG. 2.—MODERN CLIMAX.

dealer who can secure the agency of this range can account himself as very fortunate.

Another very attractive and popular novelty, especially designed for and adapted to service in smaller families, is the Climax Junior, a strictly first-class four-hole cast iron range, having balanced drop oven door, similar to arrangement found on the larger Climax range, with a counter balance weight working vertically in the end flue, and shaking and dump grate so arranged as to be perfectly operated from the outside; has sectional fire box linings, pouch extension for wood, together with other modern improvements which a constant careful study has suggested as desirable features.

In the Buckeye Climax, we find a new medium price four-hole cook stove, made in square top and flush reservoir style, strictly first-class in form, ornamentation and finish. It is supplied with duplex grate, large ash pan and sliding hearth so arranged that air is admitted to feed fire without the use of the slide in front door, making it substantially an air-tight cook stove, thus permitting the maintaining of fire for a long time, a commendable feature

Digitized by Google

which all who have occasion to use a cook stove will appreciate.

For a cheaper four-hole range, for the price asked, none can be found excelling the Gem Climax Range. It is perfectly mounted and finished in various popular styles, and as a medium price four-hole range is in every particular as its name indicates, "a perfect gem."

Among their new productions in the way of heating stoves which have come inte popular favor during the last

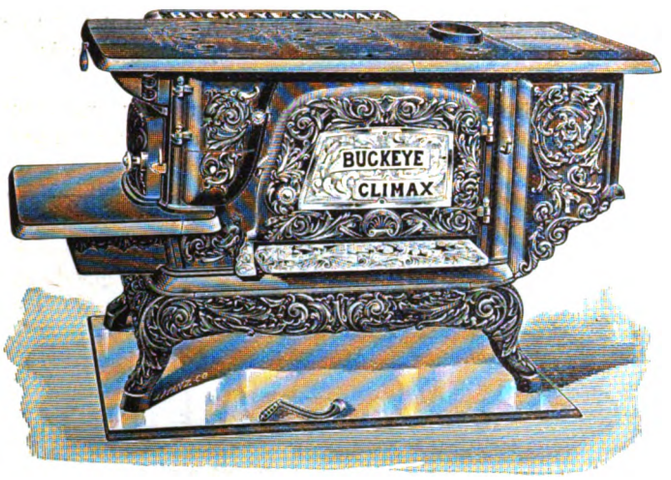

FIG. 4.—BUCKEYE CLIMAX.

season, they offer with confidence the Air-Tight Climax for soft coal, illustration of which is presented herewith, so constructed that perfect combustion of gases in the fire chamber and consequently economy of fuel is secured. It is constructed with four vertical air ducts or blast pipes leading from the ash pit to the upper part of fire pot, where they enter same and serve as a top blast, and by supplying fire chamber with air sufficient for proper combustion of the gases, all the virtue of the fuel is utilized, and this principle, combined with peculiar form of grate used in this stove, obviates the waste of fuel and prevents the formation of clinkers.

As suggested, the above illustrations form but a meagre outline or hint of the products of this enterprising firm,

FIG. 5.—GEM CLIMAX.

whose constant study and aim has ever been to maintain the high standard of excellence which their Climax line has enjoyed in the past. As has been well said: "Among the stove factories of the present age, it is safe to say that none exist whose goods are formed from better material, more carefully constructed, with better workmanship and finish, none which possess in all details more essential features and improvements than does the line of which we speak. When once introduced, their perfect form and finish will

FIG 6.—AIR TIGHT CLIMAX.

attract attention, their inherent values will insure sales, and their splendid service will remain a constant and never-ceasing advertisement for the dealer who has the privilege of handling them."

New England Iron & Hardware Association.

The New England Iron & Hardware Association held its fifth annual meeting in Boston, on the evening of Tuesday, June 15th. The gathering was at Young's Hotel, and took the form of an annual dinner. At the conclusion of this Charles H. Breck, chairman of the bureau of credit, presented a report of the work accomplished by his department during the year. The report of Frederick H. Butts, clerk, was received. Reports were also made by the chairman of the heavy Hardware committee, chairman of the shelf-Hardware committee, of the metal trades, and by Charles H. Breck, the treasurer. This latter showed that the organization is in a satisfactory financial condition.

The following gentlemen were named as directors for the ensuing year, by the nominating committee, of which William Q. Wales is chairman: Leon C. Carter, Henry C. Bangs, Charles H. Breck, John T. Boyd, G. W. Herrick, Charles F. Dowse, H. L. Doten and Hayward C. Dodge. These gentlemen were elected unanimously. Charles H. Breck succeeded himself as treasurer, while John T. Boyd was elected as clerk as the successor of Mr. Butts. At a meeting of the board of directors Leon C. Carter was elected president and Henry C. Bangs vice-president. It was decided that the July and August meetings should be omitted.

"Work up a good, solid business by solid business methods. Coax and wheedle, and suggest, and argue—don't try to yank trade in by the hair. As Bill Nye once sagely observed: 'When you want to kiss a girl, don't grab for it. Take your time—*it's there.*'"

HARDWARE costs only One Dollar a year.

The Winton Hydro-Carbon Motor.

After some three years of experimental work upon a motor vehicle which should fulfil all the necessary requirements, the Winton Motor Carriage Co., Cleveland, Ohio, was organized on March 30th, and is now manufacturing carriages for the market in their works in that city. On September 1, 1896, Mr. Winton, president and master mechanic of the company, completed his first motor carriage. This has been in constant use since that time in all kinds of weather and over all sorts of roads. On Decoration Day he made a mile on a circular track with this machine in the phenomenal time of one minute and forty-eight seconds. In sixty days after the organization of the company, the first new and improved carriage was turned out, an illustration of which is herewith given. On June 12th this new carriage was given a road test of sixty miles from Cleveland to Elyria and return. The day was a warm one, and the roads torn up, and for six miles were a bed of sand, yet the motor went bravely through with four passengers, and consumed only six gallons of gasoline. Five miles of the route were covered in sixteen minutes, and the running time was five hours for the sixty miles.

The Winton motor carriage resembles an ordinary trap with the seats back to back, each wide enough to seat three persons comfortably. The motor and driving mechanism are snugly concealed in the body of the vehicle and are self-lubricating. The wheels are 36 inches diameter in the rear and 30 inches diameter in front, and equipped with nickeled spokes, steel rims and three-inch pneumatic tires. Ball-bearings are used throughout, thus securing the greatest freedom from friction and wear. The body is supported on easy riding springs and is handsomely finished in polished natural wood with nickeled trimmings and leather cushions and dash. It will be provided with canopy top when ordered. The weight of the entire machine is 1800 pounds.

The ten horse-power motor is of the hydro-carbon type, compact, powerful and practically noiseless, odorless and free from vibration. It uses gasoline, available everywhere (carrying seven gallons), which the patent feeder converts to a fixed gas before entering the cylinders. It is economical in fuel and costs less than one cent per mile, carrying six passengers over ordinary country roads and city streets. The improved igniter is positive in its workings, requires no adjustment and will run for years without any attention. Mr. Winton's perfected and patented pneumatic governor places the machine under control and by pressing a button the speed can be increased and held anywhere from zero up to the maximum power of the motor, which is capable of thirty miles per hour, and the transmission of power to the wheels is thus explained. The carriage is operated by a lever, which at will engages, releases or reverses the driving mechanism or applies the brake. The steering gear is simple, ingenious and easily handled.

The company state that they are in position to make deliveries within sixty days. They now have a contract with the Automatic Co. of Cleveland for their entire output of carriages outside of vehicles for private use and will shortly turn out a light phaeton motor, which will sell at a popular price and will be fully described in their catalogue to be issued soon.

Business Stationery.*

BY NATH'L C. FOWLER, JR., DOCTOR OF PUBLICITY.

All printed matter is advertising matter.

The billhead, the letter head, the business card, and the envelope are articles of advertising, and yet must not be reckoned as advertising mediums.

Commercial stationery may be likened to commercial clothing, and as men are judged by the clothes they wear, so may the house be judged by the stationery it uses.

It is true that the swindler engraves his stationery, and gives the nicest care to the outward appearance of his business.

What if he does?

If good stationery will assist in making bad business good, why should it not all the more make a good business better?

Both the confidence man and the good salesman are well dressed.

Poorly printed stationery stands for false economy or forced economy.

The over-elaborate design may be detrimental to the business.

The correct form of stationery is that appropriate to the business, neither too good nor too bad.

It is better to have the stationery too good than to have it too poor.

Because many rich concerns use the poorest of stationery is no more proof of the advantage of economy in letter paper than is the fact that many a rich man dresses like a beggar.

Good stationery must make a good impression.

Bad stationery may make a bad impression.

Appropriate stationery creates and holds respect.

On all stationery must be given the name and full address, including the State, and proper names must not be in fancy or illegible type.

The receiver of the letter should not be obliged to puzzle out the name of the writer.

If the letter is signed by an individual, that party's name should be printed on the letter head, so that the identity of the writer, and the spelling of his name, can be discovered, even if the writing is poor and the signature blurred.

Billheads should be printed in the extreme of distinctness.

Nobody should be given opportunity to incorrectly make out a check.

Often days, and even weeks, elapse on the collection of a check because the maker of the check could not readily read the business name or title on the bills.

When in doubt, use a plain Roman letter.

Simplicity in stationery is stationery art, indeed.

The most artistic stationery, whether engraved or of the letter press, is of simple design, and of perfect clearness.

*Copyright, 1897, by Nath'l C. Fowler, Jr.

A Human Hardware Store.

In Kansas City, Mo., on June 14, 1897, Harry Whallen, famed as the "Human Ostrich," who ate knives, nails, tacks and glass for the entertainment of the morbidly curious in dime museums and side shows for years, died on a cot in the German Hospital.

Whallen had more nerve than thousands who have adorned more laudable pursuits. He did not lose it under the remarkable surgical operation of Saturday morning, when his stomach was cut open and 120 pieces of iron and a handful of nails were taken therefrom. He went to the operating table stoically after having been told that his chances of surviving were slender. When he came from under the spell of anaesthetics he inquired if the operation had been successful and asked eagerly how many nails and knives had been taken from him.

Whallen seemed to rally well from the operation, but thirty-six hours after it was over he began to sink, and soon passed away. The operation which relieved him of 120 pieces of Hardware and a handful of glass, was successful, as was disclosed by a post-mortem examination, and of itself would not have been fatal. But Whallen's internal organs were in such a bad condition that the shock was fatal.

Whallen was twenty-seven years old, and was a native of Louisville, Ky. He began his glass-eating career when ten years of age, and there have been few days since, according to his statements, when he did not eat a lamp chimney or a beer glass for breakfast, to say nothing of tacks, nails, screws and jack knives. He had traveled with the Barnum & Bailey, Sells, Forepaugh and other big shows, and had been in museums in all parts of the country. He said that he never felt the slightest ill effects from his remarkable diet until two weeks ago, when in Pilot Grove, Mo., he gave a street exhibition, bringing his gastronomical feat to a climax by swallowing a two-bladed Barlow knife.

He arrived in Kansas City with a pain in his stomach, which grew so bad that he applied to the city physician for relief. His story was laughed at, but finally other physicians were persuaded to examine him with the fluoroscope.

The examination showed the correctness of his story, and an operation was decided upon. The operation showed beyond question that it was the Barlow knife that had caused all his trouble. The doctors marvel that Whallen had been swallowing glass, nails and knife blades for seventeen years without having his stomach or internal organs punctured.

Whallen declared that by eating heartily of oatmeal and coarse foods such as bacon, cabbage, potatoes and corn bread he had never before failed to expel the Hardware and glass which he swallowed daily.

The physicians who attended him will not express an opinion on Whallen's theory nor will they advance a theory of their own, beyond the assertion that Whallen had had a streak of marvellous good luck, which, however, deserted him after seventeen years.—*New York Herald.*

His Job Is Gone!

The past week has been one fraught with woe, woe, woe, for the calamity howler. His job is gone, and let us hope he will seek some dark and noisome cave far removed from civilization and hibernate till the human beings now on earth will forget that there ever existed such a disagreeable thing, bearing the semblance to mankind.

From every quarter comes bright news. In nearly every branch of business there is noted either a decided improvement, or infallible signs of early improvement. Capital is seeking investment; merchants stocking up; real estate changing hands; prices of products of farm and mine advancing; big manufacturing plants preparing to increase output, and business men taking hold with renewed confidence.

Trade has shown a steady increase from the first of the year and prospects were never brighter for a good summer and fall trade, than at the present time.—*Farm Machinery.*

The American Institute fair, to be held from September 20th to November 4th at the Madison Square Garden, New York, promises to eclipse all its predecessors. The exhibits will include stationary engines, pumping machinery, iron and wood-working machinery and tools, textile paper and tanners' machinery, ore crushers, etc.

Have a name for good goods and keep it before the public.—*Hardware and Metal Reporter.*

Review of the Markets.

Hardware: With the vacation list already in operation, the indefatigable travelers resting on their laurels, and extending a welcome to the breezes of Coney Island, the rush of business may be considered over for the season. A few mail orders for previously specified wants, or the filling of "back orders," constituting—outside of any local demand—about all the business seemingly in sight.

Wire Nails: In the absence of any strength being shown among the wire rod producers in the effort to effect a combination, the discussion of which agitated the large buyers recently, the wire nail market is quiet. The mills having caught up on old orders, feel disinclined to enter any new specifications for July or August delivery. The usual shutdown of the mills will occur during July and still further shorten a warehouse stock that is by no means large at the present time. It goes without saying, that few buyers anticipate any lower quotations for the future than are made at present. Car load lots at mill, f. o. b., are quoted at $1.35. New York prices for smaller lots from store, $1.55 @$1.60.

Cut Nails: But little is doing except relatively in this especial line, and prices may fairly be considered in the interest of the buyer. Car load lots at mill are represented by the quotation of $1.20@$1.25, f. o. b. New York prices for small lots from store are based on the previous quotation of $1.40 delivered for car load lots.

Linseed Oil: The Dean Linseed Oil Co. quote as follows: In lots of less than 5 barrels, 30 cents per gallon; in lots of 5 barrels or more, 29 cents per gallon; Boiled Linseed Oil, 2 cents per gallon higher; Calcutta Oil, 50 cents per gallon.

THE PHILADELPHIA TRADE.

We are now approaching the Fourth of July, when business takes a rest for a few days; vacations are in order; salesmen are in; farmers are harvesting and general midsummer dullness is the rule, as far as business is concerned.

If trade should be lively at this time of the year, it would be a most unwonted change, and yet we are glad to say in the last few days business has taken somewhat of a turn for the better, and orders are not only more numerous but larger in quantity and volume, while raw material is looking upward and many goods which have been quoted at low prices are now restless and inclined towards an advance.

There is no doubt the market is in a waiting state, but prices are now so low that manufacturers will be glad to advance on the first opportunity. There have been no quotable changes in prices, but the general tone can be described as firm. Collections seem to be somewhat on the mend, but the cold and wet weather has rather hurt the retail trade, and complaints are heard from some sections, but the summer is still young and we may have plenty of heat before it is over.

There seems to be a noticeable scarcity of poultry netting and screen doors, but although this is the case, prices do not show the improvement in those lines which might be expected.

On the whole trade may be said to be looking upward; everyone is more hopeful, and there are some indications that better things may soon be expected.

BIDDLE HARDWARE CO.

THE PITTSBURG TRADE.

Transportation facilities about Pittsburg will be materially advanced very soon. The purchase of the Monongahela Slackwater Navigation Works by the national government is about completed, and it is expected that within thirty days the Monongahela River will be free of all tolls, thus relieving our coal men of a heavy burden. The new Carnegie railroad to Lake Erie is also nearing completion, and it is expected to be in operation by August or September. This road intends to carry rough freight, such as ore and coal, at rates much below anything known up to this date. It will be a freight road only; no attention will be given to passenger traffic.

An invention has been seeking capital in our city, which seems to have merit. It is a machine for picking cotton from the plant and is operated by horse power. It has picked 1700 pounds of cotton in 2¼ hours in an ordinary cotton field. If it can be fully perfected to do continuous work, there shall be a big fortune in it for the owners. It will be for the cotton planter what the harvester is for the wheat growers.

Trade is holding out quite well for this time in the season. Summer weather is now with us and will move goods which have been hanging, caused by the cool spring.

LOGAN-GREGG HARDWARE CO.

THE MINNEAPOLIS TRADE.

While business is not very brisk, and local collections are poor, still there is a hopeful feeling that results for the year, as a whole, will be better than the past four years. There is very sharp competition by local dealers on every little contract for trimmings on a $1500 job, such bills being figured closer and closer, and in many instances there cannot be much more than freight charges left. This would be serious in good times with a much larger volume of business, but now with the small amount of building operations going on it is doubly so.

The price of nails has been reduced to $1.50 rates by local jobbers and manufacturers who carry a stock at this point. This makes it difficult to get more than this, as in many cases some jobbers will not hesitate to name a large contractor and consumer bottom prices, thus making it difficult for the dealer to get a satisfactory margin of profit. This is one of the things that should be remedied.

The tool trade is better than it has been for the past two or three years: this is an encouraging sign. The prospect of good crops was never better; this is general throughout the whole Northwest. We have had plenty of moisture and are now having warm growing weather. With good prices we shall be in excellent shape in the Northwest this fall.

W. K. MORISON & CO.

THE BALTIMORE TRADE.

Any great amount of business at this time of the year is unlooked for. June the first usually ushers in the dull days—a sort of preparatory period for the summer holidays, inventory for some, rest time for others. The month of May was a comfortably busy one, and, had weather conditions been favorable, it would, no doubt, have largely exceeded in volume the corresponding period of the past two years. The continued cold weather lasting throughout the month greatly retarded the growth of fruit and many farm products in this section. This delay was inconvenient to the country store keeper, as the money put in circulation by the sale of such products, was temporarily withheld. When the glad sunshine comes, bringing a blush to the peach and lusciousness to the berries, the revenue due the country merchant will flow into his till.

Looking back over the events of the past six months we see much to be grateful for. Values have been well maintained, combines of a dropsical nature have been punctured, thus eliminating a very disturbing factor. The marvelous growth of our export trade has furnished an outlet for the surplus product. The movement of goods throughout this period has been fairly satisfactory, March, April and May showing the most activity. Returning confidence has been gradual, but sure, increasing materially during the present month.

A word as to the outlook. The crop prospects, gauged by government reports, are more than favorable. Railroad earnings show a marked improvement, the exports of cereals from this port showing a larger percentage of in-

crease than any other port in the country. While some of this may be due to the differential rate of freight in favor of Baltimore, much of it is undoubtedly due to superior harbor accommodations and quicker methods of handling.

A speedy adjournment of our national legislators is desired. The farce at Washington each year becomes more grotesque. The inconsistencies of the metal schedule of the proposed tariff bill are so apparent as to require no comment. Just let them pass a law, *any old law will do*, so that the uncertainty incident to such agitation is removed. If their efforts were confined to home affairs we might reasonably hope for more speedy action. The paternalism of our law givers is unique. It will prompt them to reach out an arm a thousand miles into the Pacific to protect the sugar-producing, leper colony of Hawaii, and yet they cannot reach out sixty miles into the Atlantic to succor and relieve poor down-trodden Cuba—fighting for liberty to-day the same battle fought by us a century and a quarter ago. That old latin proverb about fits the case: *Ubi mel, ibi apes* (Where there is honey, there are bees). There is not such a broad difference between honey and sugar. Oh, yes! We are happy and hopeful.

TABB & JENKINS HARDWARE CO.

THE COLUMBUS TRADE.

Trade is holding on extremely well, and from the amount of mail orders we receive, it indicates that merchants' stocks are light, and the demands for goods good. We have had very hot weather for a week (weak) back and some severe storms. The weather bureau issued a bulletin to-day that a cyclone would strike at one o'clock to-day. We all began to think of holes to crawl into should the prediction prove true. I tried to think of some mean thing I had done, so as to make myself small enough to get in a small but good hole when I heard it coming, but it was a failure, as I have always been a good boy. Thank the Lord the cyclone did not come, and we are all right end up.

The flurry on nails and wire has subsided, and merchants are buying as they need from week to week. We know of some jobbers who saw a fortune within their grasp apparently, and tried to buy all the nails and wire in the country. They are now trying to unload through brokers at a loss. As a rule, it is better to be sure of a small profit than to chance the fickleness of the market.

Heavy goods seem to be pretty firm, but quite a number of articles are very low in price, and it would seem that there was no margin of profit for the manufacturer.

This continued whittling down of prices reminds me of the man who had a big trade on Albata spoons, and he insisted that he must have a better price. The manufacturer said he could not make any reduction, unless he put in more lead. The merchant said, "All right; use more lead." It was not long before he wanted another reduction, and he got the same answer from the manufacturer. He got instructions from the merchant to use more lead, as he must have the spoons at a less price. Still he was not happy, and wanted another reduction. The manufacturer informed him that it was impossible; that he could not make any lower price. The merchant wrote back and said, "Put in more lead." The manufacturer answered and said, "I can't do it, as the last lot I sent you were all lead." We must admit that many goods have been reduced in price from time to time, either by the importunities of dealers, or willingly by the manufacturer, until the quality is like the last lot of spoons.

Quality don't seem to cut much figure with some dealers; all they want is price, and it is hard work to sell a good article in competition with a cheap one. No doubt the scarcity of money for the past two years had a good deal to do with it, and we think it will not be long before good goods will be in demand again. People will find they are the cheapest in the end. We cannot but think that better times are here already, and will grow still brighter from month to month. If Congress will do what they were convened for, and go home to the bosom of their families, it will hasten the advent of good times, and we will all say "Amen."

SMITH BROS. HARDWARE CO.

THE DAVENPORT TRADE.

Will *Hardware* please forego for a few days the pleasure of standing on tiptoe in an overcrowded elevated car, hanging to a strap for two hours a day, between Harlem and Chambers Street; even give up the material and social comforts of the New York Hardware Club, and take a trip West? We invite you to come out here on the 28th inst. and visit the Iowa Hardware Jobbers at the home of its president, shake hands with Mr. Fernley, secretary of the National Hardware Association, and gather in one immense bundle all the concentrated knowledge that has been gained from long years of experience by these active representative Hardwaremen of Iowa. We urge you to come. Will show you the largest government arsenal in the United States; a double deck, double track railway and wagon bridge made of the finest quality of steel; a perfect water works system and the largest and best filtering plant extant; the great Bettendorf Steel Works, which are the wonder of this steel age; the Bettendorf Metal Wheel Works, who ship goods everywhere; the Sylvan Steel Plant; the largest plow factories in the world. Show you how to make maple sugar out of Iowa corn, and last but not least, the great store and warehouses of

SICKELS, PRESTON & NUTTING CO.

THE ST. PAUL TRADE.

The condition of trade in our section is very fair. We have had very favorable weather, except for corn, on which we depend but very little. Prices are badly cut, particularly on nails and barbed wire, but this condition has lasted so long that we are getting used to it, though we cannot say that we enjoy the condition. We often think of the long ago, when we could get larger profits and when the sales, though small in amount of goods, were large in amount of money and profits. The writer has before him a price book of the early seventies, and in comparison often wonders why we did not fail in business, while the decline to present prices was taking place. Just to show what has

taken place, we give you these examples: We sold Hunt's axes at $15.50 per dozen, 2-inch augers at $15 per dozen, 2-inch narrow wrought butts at 50 cents per dozen, No. 1 blind butts $3.50 per dozen, No. 4 babbit 20 cents per pound, 1⅛-inch iron bench screws $9.50 per dozen, Reliance clothes wringers, not better than Novelty, at $75 per dozen, 1-bushel stave baskets $7 per dozen. Now the trade kick at paying $1 per dozen for baskets, $13 a dozen for wringers, and if we charge $5.25 for Hunt's axes they hold up their hands in holy horror. Did you ever think how much less the actual necessities of life cost to-day than they did twenty-five years ago? The writer honestly believes that the cost of living to-day is not over one-third of what it was in 1872, and if we practiced the same economies now that we were obliged to then, we would be fairly happy, but we do not appreciate how cheap everything is, be it Hardware, dry goods or groceries.

C. W. HACKETT HARDWARE CO.

THE TOLEDO TRADE.

Since our last report, there has not very much occurred to write about, no more than trade has been fairly active.

The weather is really too cold for goods that ought to be moving at this time of the year, such as refrigerators, gasoline stoves, ice cream freezers and kindred goods. The crops in our section are looking very well, with the exception of corn, which is still very far backward, owing to our not having warm weather, especially warm nights for its growth.

Trade this month can be compared favorably with the same time last year. Prices remain about the same, although everything is still very cheap.

We notice that some of our bicycle concerns have laid off some of their help, which is generally customary at this time of the year.

Not having anything of note to write about, we will simply write "finis." STOLLBERG & CLAPP CO.

THE DENVER TRADE.

Business in this locality continues steady and slightly improving. The weather has settled down to summer conditions at last, and should have its effect in the near future. Building, not only in Denver, but in many towns in the State, is rapidly increasing, and yet the supply of new houses is not equal to the demand. A heavy tide of immigration of desirable people has set into Colorado, and will, no doubt, continue for a year or two, and its effect must be for general improvement, and is already felt.

Late rains have given us most favorable crop prospects, and the future looks bright.

GEORGE TRITCH HARDWARE CO.

Water Heaters 2000 Years Ago.

In two of the museums of old Roman antiquities at Naples there are several water heaters, which indicates that the principle of the water tube, the crowning feature of modern boilers, was fully understood and appreciated 2000 years ago. W. T. Bonner, of Cincinnati, has been investigating these heaters and found them to be as interesting as they are beautiful. One of them consists of an outer shell twelve inches in diameter and nearly seventeen inches high, surrounded by a somewhat hemispherical top, which is ten inches in diameter and twelve inches high. The two shells are connected at the bottom by a rim, like the mud rim of a locomotive fire box, and the space between them was filled with water. The grate was formed of seven tubes made from sheet bronze, rolled and soldered or brazed. These tubes open at both ends into the bottom of the space between the shells, thus forming a water tube grate for the fuel to rest upon. Charcoal was probably used for this heater and was placed on the grate through an opening 4.8 inches high and 4 inches wide, closed by a beautifully decorated door. The gases from the fire escaped into the outer shell about 5.6 inches above the grate. The whole apparatus was raised about twelve inches on a tripod so as to allow air to reach the fuel. In another boiler of somewhat the same type the outer shell has the form of an urn, while the inner shell rises from a water tube grate to an opening in the side. It is twelve inches in diameter at the widest part, 17.6 inches high and supported on a tripod about four inches high. Its general shape is much like that of the silver cream pitchers known as the Paul Revere patterns, although, of course, it is much larger and has a top closed by a lid. It has been suggested that these utensils may have served at some time to heat wine as well as water, which suggestion appears reasonable, as many historians state that the Pompeiians made great use of hot drinks. It may be that they were found in one of the termpodi or cafes, of which there were several in Pompeii.—*American Artisan.*

R. E. Dietz Co. Burned Out.

The large and extensive lamp, lantern and oil stove factory of the R. E. Dietz Co., corner of Laight and Greenwich streets, this city, was entirely destroyed by fire on Wednesday afternoon of this week, throwing out of employment 150 hands, whose escape without injury from a fire so swift in its destructiveness was something remarkable. The building destroyed was a massive brick structure 100 by 60 feet, seven stories in height, the walls of which were of unusual thickness, minimizing the danger to the adjoining buildings. Beyond the fact that it originated in the stock room, it was difficult to locate the cause of the fire. The building was erected a few years ago by the R. E. Dietz Co., a corporation capitalized at $100,000. The losses are estimated to be on building, $50,000, and on stock, $75,000, being fully covered by insurance in both cases.

The sporting trade of Zululand and the South Seas wish the stocks of their guns made of crimson wood and carved with hideous designs. Our own people, on the contrary, prefer walnut or some other dark wood, and want that finished as plain as possible. The tastes of the different countries vary considerable in this as in other lines.—*Chattanooga Tradesman.*

"Bisicle, a Pile of Fun."

The subjoined amusing item is said to be an order sent by a Kansas man to a bicycle company:

"Deer sirz—I live on mi farm near Hamilton, Kansas, am 57 year old and just a little sporta. My neffew in Indiana bot hisself a new bisicle and sent me his old one by frate, and ive learned to ride sume. Its a pile of fun, but my bisicle jolts considerable. A feller come along yesterday with a bisicle that had hollow injun robber tires stuffed with wind. He let me try hissen, and mi, it run like a kushin! He told me you sell injun robber just the same as hissen. How much will it be to fix mine up like hissen? Mine is all iron wheels. Do you punch the holler hole through the injun robber, or will I have to do it myself? How do you stick the ends together after you got it done? If your injun robber is already holler will it come any cheaper empty? I can get all the wind I want out here in Kansas free. EBERNEEZER Y. JENSON."

"P. S.—How much do you charge for the doodad you stuff the wind into the robber with and where do you start?"—*American Field.*

Not That Kind of a Gun.

In a corner grocery in the western part of the city the other day, a boy was buying shot and getting ready to go hunting. His old gun was lying around rather loose, and the grocer nervously remarked:

"Boy, I wish you'd take care of that gun; I'm afraid of an accident."

The boy stood it up against a barrel, and went on telling how many rabbits he meant to pepper, and pretty soon it came near falling to the floor.

"I tell you that infernal thing will hurt some of us yet!" exclaimed the grocer as he jumped aside, and the boy leaned it against the counter, and said he'd never take a back seat for a bear—never. As he reached over to look at some buckshot, down tumbled the gun and off went the charge, sending about forty duck shot into a ten-gallon oil can in range.

"There she goes—there she goes!" yelled the grocer, as he danced around. "Didn't I tell you that infernal gun would go off?"

"And did I deny it?" promptly retorted the boy. "Do you s'pose I'm fool 'nuff to go out to hunt rabbits with brass knuckles or a bean shooter?"—*Detroit Free Press.*

He Gave It Up.

"Do you make keys here?" asked the woman as she entered a locksmith's shop.

"Yes'm."

"Well, I want one."

"What sort of a key, ma'am?"

"One for the front door."

"Have you a duplicate?"

"No."

"Bring the lock?"

"No."

"What sort of a key is it?"

"I—I don't remember."

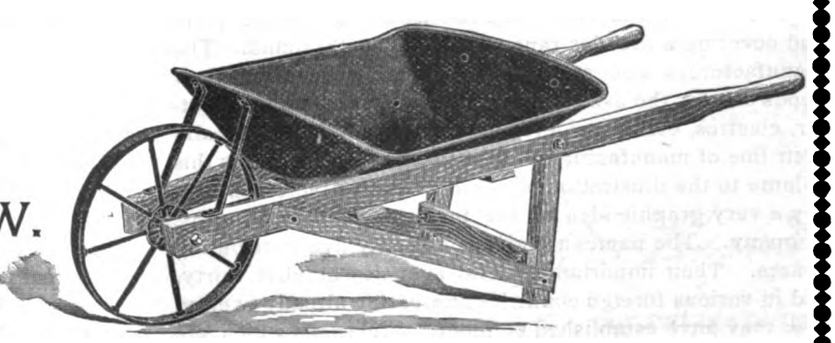
"But how am I to guess? There are about 40,000 different kinds of keys."

"H'm. I didn't know that."

"Is it a night key?"

"Yes, yes. That's it. It's a night key."

"But that's also very indefinite."



"Well, my husband sometimes comes home at midnight and unlocks the door with his pocket knife or button hook or anything else that comes handy, and you ought to know about what sort of a key would fit such a lock."

He studied over it a while, but finally had to admit that he was up a tree.—*Detroit Free Press.*

Morrill's Perfect Cutting Pliers.

Chas. Morrill, No. 35 Warren Street, New York, is making special efforts to call the attention of the Hardware trade to Morrill's Perfect Cutting Plier, the construction and perfection of which Mr. Morrill had found to be a long, tedious and expensive undertaking. In order to perfect the cutting temper of the jaws, experiments were made with every obtainable quality of steel, it being his greatest wish to make them the most perfect tool of the kind that was ever placed on sale. There are many reasons why this great faith in the excellence of his cutting

pliers should have justified the confidence of the inventor, and among these special features may be enumerated the following:

1st. The screw on the cutnip is a regulator for adjusting the space between the cutting blades.

The screw on the loose handle is to regulate the throw by turning up, and brings the cutters together after grinding them.

2nd. The cutting jaws move parallel, thereby lessening the liability of breakage by about 75 per cent., and can be taken off and sharpened on a grindstone.

3rd. With a small outlay of strength, they exert great power.

4th. The jaws and other parts are all made interchangeable, and can be replaced at a small expense.

5th. Simplicity of construction, can be taken apart and put together by the removing and replacing of one pin.

Catalogue of the important specialties manufactured by Charles Morrill will be forwarded upon request.

Recent Trade Publications.

F. E. Myers & Bro., Ashland, Ohio, have recently issued catalogue No. 30, covering their extensive line of Pumps and Haying tools. It forms a handsomely printed volume of 275 pages, admirably printed on excellent paper, having a gold embossed cover and fully illustrated throughout with a high grade of wood cuts, forming altogether a very attractive catalogue for the Hardware and implement dealer to have within reach. In a circular letter which accompanies it, the firm state that this new catalogue is intended to supersede all others until further notice. The list prices in this catalogue have been reduced and re-arranged in order that one discount may be made to cover the entire line. Throughout the entire catalogue this well known, complete and practical line of pumps and hay tools with all the latest improvements and fully up to-date and modern requirements, are arranged in a concise and convenient form and covering a broader range than is usually found. The manufacturers also state that customers handling their goods can for the asking, have all the special printed matter, electros, etc., considered essential in advertising locally their line of manufactures. The two pages devoted in this volume to the illustration of their extensive factories, convey a very graphic idea of the facilities possessed by this company. The names are given of twenty-five distributing houses. Their important general agencies number thirty, and in various foreign countries numbering already twenty-five, they have established commercial relations which are rapidly becoming an important export department of their business. The assortment of pumps shown comprise every possible variety, from the ordinary house or cistern pump, to power pumps of great capacity. The catalogue includes as well a large line of fittings and appliances of every description, appertaining to this important business. Spray pumps of every description are here largely and extensively illustrated and described. In the assortment of haying tools, including as it does elaborate overhead track systems of hay carriers with steel tracks and patent slings, forks and pulleys, they show a varied assortment in style, price and description, equally as important as in their other lines. They also manufacture Myers cushion tire store ladder, for use in connection with a system of store shelving, which deserves the popularity it has already succeeded in obtaining. Their line of bicycle stands and home trainers which are here described, have met with a large sale and extended use made possible by excellence of construction and judicious advertising. Taking it all in all, this useful catalogue should be in the hands of all our readers handling any goods of this description, and it will be furnished the trade with discount sheet upon application to the manufacturers.

The Union Heater Supply Co., Detroit, Mich., have issued their catalogue for 1897, covering the unique specialties controlled by them. This pamphlet presents in its pages, a line of articles not readily obtainable in many establishments in the trade, and yet of such importance that when wanted the possession of this catalogue would be highly appreciated. Among the contents will be found illustrations and full descriptions of the following: The Helper fire pots, Nos. 1, 2 and 4, to be used by plumbers, metal workers and contractors: are constructed of heavy sheet brass, with a malleable iron hod; they are calculated to melt lead and anti-friction metal and heat irons faster than any mechanic can use them; the No. 2 being especially adapted for roofers, and No. 4 for construction work and putting in soil pipe, etc. The Lineman's fire pot, for electricians and machinists' uses. The Favorite paint burner; gasoline electrical forge; Perfection, Consort and Diamond gasoline torches. They are also manufacturing Rein's self-heating gasoline flat iron, for the use of tailors and cloakmakers. A six-burner furnace, for confectioners' use, that will boil a batch of twenty-five pounds in ten minutes, ready to put on the slab. Confectioners' gasoline furnace and gasoline batch heater. They manufacture gasoline wall torches and steam pipe cleaners for brewery use. We illustrate on another page in this issue one of their most important specialties, the Eureka Brazer, and also describe their core and japanning ovens, which are attaining just celebrity.

The Union Hardware Co., Torrington, Conn., Tower & Lyon, sole agents, No. 95 Chambers Street, New York, have just issued their new catalogue covering the line of handles and other manufactures from wood, controlled by this company. This pamphlet of 16 pages, embraces in its contents tanged, socket and framing chisel handles; file and screwdriver handles, gravers', carvers' and jewelers' tool handles; plumbers' drift plugs and turn pins; handled brad and scratch awls; saddlers', sewing and pegging awl handles and chalk line reels. Floor and base knobs in all the leading varieties of wood. Round and square mallets, with and without iron rings; bung starts, etc. They are also manufacturers of sailors' palms and sheaths and belts, so well known to the trade. While this catalogue is intended to describe only the regular goods, which have so long been prominent among their productions, a list is furnished of 75 additional lines, running from auger handles to whip butts, for which they possess the facilities for economical production, and would gladly quote prices on receipt of samples or drawings with specification of requirements. Included in this assortment may be mentioned all electrical supplies in wood usually required, such as push button shells, transmitter boxes, magnets, clock, battery and bell boxes, switch boards and handles, etc.

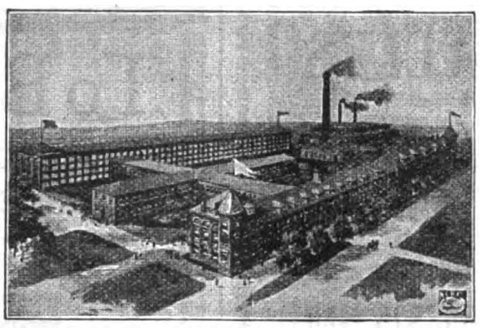
Joseph Jefferson.

The Famous Actor Looked About Our Factory and Said:

"This is the greatest institution I ever saw in my life. You have combined here utility and philanthropy. You make money, and you make happiness at the same time. To conduct a great business, which stretches out all over the world, and to practice, at the same time, the practical gospel of good will to men is about as far



MR. JOSEPH JEFFERSON.

as any one can go until we get wings.

"The system which you sell to retail merchants reaches its highest perfection in your own plant.

"Panics do not hurt people who run their business as you do. The atmosphere of your establishment stimulates industry and good feeling. When hard times come and it is difficult to make sales, people like yours simply work enough harder to make up for it. I should like to take a little part in the work you are doing," concluded Mr. Jefferson, "and when I come to Dayton again I should be glad to give your people a free lecture."

Factory of The National Cash Register Company.

Big Facts.

Why The National Cash Register Company Can Manufacture and Sell Cheaper Than Any Other.

It employs 1,400 people.

Its factories cover eight and one-half acres of floor space.

It makes nothing but cash and autographic registers.

Its rights are protected by 335 patents.

It has 131 offices in all parts of the world.

It makes 90 different styles and kinds of cash registers.

It has sold over 117,000 cash registers.

Its registers are used all over the world.

It received 2,046 orders for registers in April, 1897.

It inspected 1,902 registers in April, 1897.

It shipped 1,886 registers in April, 1897.

It is doing more business in 1897 than ever before in its history.

25 in 25 Stores.

He Wouldn't Try to Do Business Without One.

Mr. T. P. Hunter owns twenty-five retail grocery stores in Philadelphia, and uses a National Cash Register in each of them.

In a recent letter to us he says:

"About three years ago my attention was called to your No. 79 National Cash Register. Becoming interested, I placed an

MR. THOS. P. HUNTER.

order for one machine. Receiving perfec satisfaction from this, I ordered fifteen more, and subsequently ordered nine additional, making twenty-five, the number I now have in use in my stores.

"By the use of the registers I am able to tell at a glance how trade is running in each store, whether business is increasing or decreasing, and which of my clerks are making the sales.

"I would not attempt to run one of my stores without your No. 79 National Cash Register."

T. P. Hunter

If you will send us your name, address, business, number of clerks you employ, percentage of business done on credit, and state whether or not you employ a cashier, we will send you in return, free of charge, a handsomely-printed description of a cash register system for use in stores like yours. The National Cash Register Company, Department H, Dayton, Ohio.

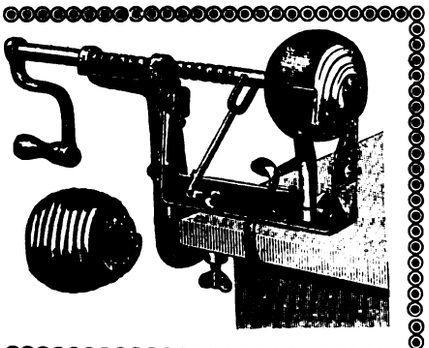
A Magnificent Line.

THE

Martin & Gibson Mfg. Co.

BUFFALO, N. Y., U. S. A.

Our Name Plate.



A Critic on Nails.

A builder of Everett, Mass., brought into the local newspaper office a collection of nails, with an interesting story about them. He said that it had recently been stated in some of the scientific papers that the cause of the rapid rusting of the nails used for shingling houses near the seashore was the action of the salt in the air and the acid in the shingles. This gentleman disagreed with this theory, and showed several wrought iron nails drawn from an old house in Everett, and others taken from a house erected about eight years ago. The wrought iron nails were still in thoroughly good condition, although the house is said to be about 250 years old, and the part in which they were had been exposed to the weather for a score of years, because of its neglected condition.

The nails driven eight years ago had been reduced from 1½ inches in length to the size of a small tack, and were entirely useless, the shingles blowing off long before they were worn out. The explanation given was that the quality of the iron used nowadays was so much inferior to that employed years ago that the nails soon rusted, until they crumbled when being drawn from the building. He said wire nails were as bad, or even worse.—*Hardware and Metal Reporter.*

In reference to the above a veteran Hardwareman observes: "The quality of the iron didn't have as much to do with the long life given to the wrought nails as the fact that by being hammered on an anvil they were given a forged homogeneity impossible to find in an ordinary rolled iron nail plate. The wrought nails could be had to-day did we build houses to last 250 years."

We make eight different kinds of

Apple Parers, besides **Potato Parers, Cherry Stoners, &c.** Some pare, others pare and core, while others pare, core and slice at one operation. This cut represents the . . .

White Mountain Parer, Corer and Slicer

so well known in all parts of the United States. It is now sold at about one-half former price although it is as good, if not better, than ever before. No other low-priced Parer, Corer and Slicer compares with it, when you consider that an apple parer is made for use, and not to look at.

Thirty-odd years' experience in making Apple Parers, and making as we do larger quantities than anyone else, enable us to give more value for same money than is obtainable elsewhere. *Send for Catalogue. . . .*

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers, the country over are requested to contribute to this page. News of new factories or companies, changes, improvements, etc, will be gladly received, and promptly published.

New Companies, Etc.

Bridgeport, Ala.—A deal was closed recently that will give this city another factory. The deal has been negotiated for some time between the Harriman Hoe & Tool Co., of Harriman, Tenn., and the owners of the building, and will put in machinery to turn out handles. Work will be begun immediately toward remodeling the building, and the manufacture of handles will be begun just as soon as the machinery can be put in. The new company will give employment to about twenty-five men, besides furnishing a market for the good timber of this section.

Des Moines, Ia.—The Holt Specialty Co. filed articles of incorporation recently. Its principal place of business is in this city. The company will purchase Holt's clothes line hanger invention and manufacture patent clothes lines. The capital stock is $30,000. The incorporators are W. E. O'Bleness, G. L. Dobson, J. H. McBride and others.

Fairhaven, Mass.—This city is about to have another new industry. Frank G. Crafts, of this town, the patentee of Craft's New Metallic Folding Fire Screen, has secured quarters in the shoe factory building, Main Street, and will manufacture these screens. The screen is the result of much thought and care on the part of the inventor, and is a new novelty in the screen world that is bound to take a place in the front rank. There is nothing like it on the market at the present time.

Holyoke, Mass.—At a meeting of the Business Men's Association recently, it was voted to invite the Indian Orchard Screw Co. to locate here, and it was further voted to open subscriptions at once for any desiring to take stock. The company is to be reorganized and Holyoke people are to have the controlling interest. A capital of about $15,000 is needed. The company will employ from 30 to 40 hands. It makes all kinds of bicycle fixtures, and in the opinion of those who have become interested it is the foundation for a first class bicycle concern.

Muncie, Ind.—John Cranor, cashier of the Daleville bank, reports that Daleville has just closed a contract for the building of an important interest there, and work will be begun on the plant at once. It will be a stove and iron foundry, and will be known as the Ideal Stove & Foundry Works. Most of the machinery comes from Youngstown, Ohio, and is the remains of the Girard Stove Works there. The plant will be of brick, and the main building will be two stories and 160x70 feet in dimension. The town gives the company free fuel and the buildings as a bonus.

Rutherford, N. J.—The Hall Needle Co. has been incorporated with a capital stock of $50,000, and a paid-up capital of $5000. The incorporators are W. Locke Rockwell, of Plainfield, Edwin C. Abbott, of Rutherford, and John P. D. Kirsch, of North Plainfield.

St. Louis, Mo.—The E. H. Lindley Supply Co. has been incorporated, with a capital stock of $100,000, fully paid. Ezra H. Lindley holds 175 shares, Robert W. Green, twenty shares, and August F. Zell, five shares. The firm will deal in machinery, Hardware and general merchandise.

Trenton, N. J.—The Duggs-Seabury Gun & Ammunition Co., with a paid up capital stock of $1,000,000, has been incorporated by William H. Driggs and others. The largest stockholders are residents of Washington, D. C., and the company will have its office in this State in Jersey City. It will manufacture and deal in all kinds of ordinance, including guns, mortars, projectiles, ammunition, fuses, gas checks, gun carriages, etc.

Improved Conditions.

Beaver Mills, N. H.—The tack and nail manufactory recently established by G. E. and A. I. Fuller is now in full operation.

Bridgeport, Conn.—The Union Metallic Cartridge Co. have purchased the dock property which was a part of the estate of the late A. L. Winton, near the Berkshire mills. It has a frontage of over 400 feet on North Washington Avenue and about 270 feet on the harbor line. C. A. Grannis bought the property at the auction of the Winton estate. The cartridge company are rebuilding the wharf and will use it as a landing point for their explosives.

Cincinnati, Ohio.—The Hall Safe & Lock Co. have their Hamilton plant so far completed that they will soon begin to remove from Pearl and Plum Streets. Only the lighter machinery will go first, as several orders are under way, and this will require the heavy machinery to remain for a time. It will likely be the first of the year before the firm has completely severed its connection with this city.

Clayville, N. Y.—Plans have been prepared by Architect Richard A. George for a new foundry to be built by the Pratt Chuck Co. at Clayville. The new foundry building is to be 161 feet in length by 61 feet in width and 15 feet high. There will be a lanterne on the roof running the entire length of the building. It will be a frame building roofed with corrugated iron.

Cortland, N. Y.—G. L. Reeves and M. J. Turner, who have been running a general job shop in the old Carmichael building on Port Watson Street, found their quarters too small for the increasing business, and have moved across the street to the second floor of the foundry building. Here they have more room and plenty of power. They manufacture screen doors and windows, ice cream coolers, buggy bodies, bicycle racks, etc. Both members of the firm of Reeves & Turner are expert wood workers, and with the equipment in their new quarters, they are prepared to build anything that is made of wood.

Dallas, Tex.—The McCormick Harvesting & Machine Co. recently took out a building permit for the erection of a 4-story and basement brick building on the southwest corner of Pacific Avenue and Austin Street, to cost $25,000. The building will face on Austin Street and will be 86x100 feet. The company's offices will be on the ground floor, while the rest of the building will be utilized for the storage of machinery.

North Easton, Mass.—The Ames Shovel Works will be run ten hours a day and five days a week, commencing this month.

North Tonawanda, N. Y.—The nut and bolt works, the largest in the world, owned by Plumb, Burdict & Barnard, have reopened. Between 400 and 500 men went to work. The opening is hailed with delight.

North Wayne, Me.—The North Wayne Tool Co. have nearly completed their year's work on scythes, their orders being mostly filled. The work on axes and corn knives is still going on.

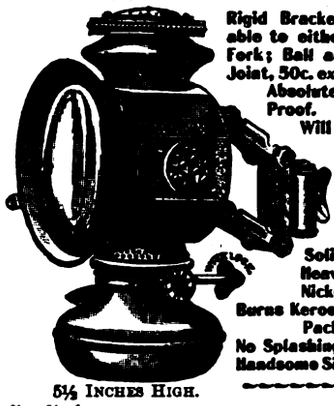
Recent Embarrassments.

Cleveland, Ohio.—A deed of assignment was filed yesterday by the King Axe & Tool Co. The failure was foreshadowed by certain cognovit judgments taken against the company recently. Assets were estimated at $25,000, and liabilities at $30,000. Frank H. Ginn was named as assignee. He gave bond in the sum of $15,000.

Haydenville, Mass.—The Haydenville Mfg. Co., manufacturer of plumbers' brass supplies, with office at No. 73 Beekman Street, New York, made an assignment to George N. Robinson, of Brooklyn, N. Y., and John Mayher, of East Hampton, Mass. It is a Massachusetts corporation, organized in August, 1884, with a capital stock of $150,000, Howard H. Beals, of Mount Vernon, N. Y., being president, and Rollin C. Wilson, of the same place, secretary. At the office it was stated that the failure was due to dull trade, nothing else; that the liabilities are $125,000, and assets from $125,000 to $150,000.

New Bedford, Mass.—The stockholders of the Lambeth Rope Co. met recently and voted to wind up the company's affairs at once. Authority was given the directors to sell property, petition for dissolution of the corporation, and to petition into insolvency. The collapse of the company is due to the embarrassment last month of the Bennett & Columbia Mfg. Corporation, of which Frank B. Hadley, president of the Lambeth Co., was treasurer. Hadley died soon after the revelations at the cotton mill.

Recent Fires.



Burlington, Iowa.—The Ray Plow Works were totally destroyed by fire. The fire originated in the roof of the plow works from a spark from an engine, and the entire building and contents were destroyed, making a loss of about $17,000, with insurance for about $3500. No insurance was carried on the dwellings and the loss on these amounts to about $8000.

THE BANNER

Is the Cycle Lamp for '97.

None as handsome, as practical, nor as thoroughly and honestly made. Throws a powerful, broad light, having a **3-inch optical ground double convex lens.** No lamp so easily cleaned. Has removable top burner and reflector, removable and **reversible oil pot.** The only lamp made with a positive wick-locking device—it acts on the ratchet. Your dealer should have them; until he has will send, carriage paid, for **$3.00,** to any part of the United States.

Rigid Bracket, adjustable to either Post or Fork; Ball and Socket Joint, 50c. extra.
Absolutely Wind Proof.
Will not Jolt Out.
No Solder to Melt.
Fills on Outside Oil Fount.
Solid Brass, Heavily Nickeled.
Burns Kerosene in Packed Fount.
No Splashing.
Handsome Side Lights.

5½ INCHES HIGH.

BONE BLACK

For Tempering and Filtering Purposes.

No-Slam Checks.

The slam of the Screen Door that breaks in on the summer days' quiet is a reminder that our NO-SLAM Screen Door Check will prevent just such noises. The comfort that comes with the attachment of this little noise-preventer is an argument in favor of its general use. The hardware dealer should keep it, talk about it and sell it.

BICYCLE TRADE RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores.

Alexandria, Minn.—G. S. Spaulding.

Benson, Minn.—J. P. Van Slyke.

Cannon Falls, Wis.—O. F. Peters, Hardware, has taken up bicycles.

Cazenovia, N. Y.—George A. Benjamin.

Fargo, N. D.—Charles Bennett.

Glencoe, Minn.—W. G. Gould.

Marshalltown, Iowa.—Williams Brothers.

Newport News, Va.—The Hampton Cycle Co.

Riverside, Cal.—George F. Streeper.

Silver Lake, Minn.—John Kredci.

Springfield, Mass.—Chicopee Falls Wheel Co.

Waterloo, Iowa.—The Waterloo Mfg. Co., bicycles, commenced business.

Wilmington, N. C.—W. P. Oldham & Co. invites correspondence with manufacturers of good wheels that can sell for $50 or less.

New Companies, Agencies, Etc.

Baltimore, Md.—The Owen Mfg. Co., of New London, Conn., has opened a branch store at No. 203 East Baltimore Street, where they will sell Owen bicycles.

Bethel, Vt.—The Keene Bicycle Rim Co. has commenced the erection of a large bicycle factory in this city. It is expected that the building will be completed in two months, when the company will transfer from Keene, N. H., its largest bicycle rim shop. The company expects to employ at the outset 50 hands at least.

Big Timber, Mont.—J. W. Geiger has taken up bicycles, handling high grade wheel, Columbia, also the Hartford.

Casselton, N. D.—E. G. Guthrie has added a line of bicycles, and will handle the Regent and Euclid wheels.

Columbus, Ohio.—The Brown Saddle Co. has been incorporated to manufacture bicycle and other saddles. Capital stock, $100,000.

Denver, Colo.—Davis Mfg. Co., capital $10,000, has been incorporated to manufacture bicycle saddles; office, Denver; incorporators, Allie P. Ray, C. M. Moses, William B. Walker, Harry T. Davis, Oliver F. Rhoads.

Galt, Ont.—The MacGregor-Gourlay Co. have commenced the manufacture of bicycle hub machines.

Jersey City, N. J.—Albemarle Cycle Co., to manufacture bicycles. Capital stock, $100,000.

Mason City, Iowa.—G. R. Ainsworth, of Chicago, will establish a bicycle factory.

Minneapolis, Minn.—Deene & Webber Co. will probably build a bicycle factory in Chicago.

New Brunswick, N. J.—The Kilton Cycle Co. has been incorporated to manufacture bicycles. The main office will be in the National Bank of New Jersey building, and the incorporators are New York parties. The amount of capital is $2000.

New Haven, Conn.—The Yale Cycle Mfg. Co. has just been organized in this city. The purpose of the organization is to manufacture and sell bicycles. The company is capitalized at $2000, and the stockholders are S. E. S. Gay, secretary; Benjamin Slade, William Gay and W. H. Hubbard.

Norfolk, Va.—The White Cycle Co, maximum capital, $10,000, has been incorporated. The officers are: L. B. White, president; Luthur W. White, vice-president; H. L. White, secretary. These, with Thomas E. Elliott and Oscar T. Edwards, are stockholders.

Ontario, Can.—A movement is on foot to form a joint stock company in St. Thomas, for the purpose of manufacturing bicycles. The capital stock will be $20,000, and several American gentlemen are being interested in the scheme.

St. Louis, Mo.—The St. Louis Frictionless Ball Bearing Co. has been incorporated by O. G. Shands, F. W. Klocke and Edward F. Flanagan. Capital stock, $5000.

Tacoma, Wash.—W. A. McNeiley, manufacturer of bicycles, has established a bicycle factory.

Changes and Improvements.

Boise City, Idaho.—Gordon, Elmo & Co. have retired from business.

Brooklyn, N. Y.—Plumtree & Murphy, reported to have dissolved partnership.

Buffalo, N. Y. — Buffalo Cycle Works, bicycles, reported to have dissolved partnership.

Crookston, Minn.—Hawkins & Olds will put in an electric motor to furnish power with which to run the machinery in their bicycle repair shop.

Dallas, Tex.—Young Cycle Co., bicycles, etc., succeeded by William Kern.

Elysian, Minn.—J. G. Gerlich has purchased the stock of Kuykendall & Chadwick; he will continue the business at the old stand, and put in a complete stock of Hardware, bicycles, etc.

Fort Worth, Tex.—Wasser & Son, bicycles, have retired from business.

Galveston, Tex.—Labadie Bros., reported to have dissolved partnership.

Lafayette, Ind.—The Lindsay Bicycle Works has reopened with 100 employes.

Minneapolis, Minn.—P. A. Myers & Co., succeeded by H. A. Jacobs.

New Haven, Conn. — Clark A. Hallin, succeeded by Summit Bicycle Works.

New Haven, Conn.— Smith-Stowe Co., George E. Stowe withdraws.

New York, N. Y.—B. H. Rose & Co., bicycle sundries, No. 256 Broadway, have moved to No. 26 West Broadway.

New York, N. Y.—Page, Dennis & Co., Howe bicycles, etc., No. 325 Broadway, have removed to No. 341 Broadway.

New Orleans, La.—H. A. Testard & Co., bicycles, reported to have been succeeded by H. A. Testard.

San Diego, Cal.—Miller-Burris Cycle Co., succeeded by Miller Cycle Co.

Sioux Falls, S. D.—Maxwell & Gregory, bicycles, reported to have been succeeded by Leavitt & Gregory.

Springfield, Mass.—The Central Cycle Mfg. Co., of Indianapolis, will probably remove its plant East, and the Business Men's Association is making arrangements to have it move to this city.

Stockton, N. J.—Stockton Cycle Mfg. Co., wholesale and retail bicycles, reported to have gone out of business.

Toronto, Ont.—The R. A. McCready Co., of Toronto, Limited, sporting goods, etc., advertised to be sold by auction.

Recent Embarrassments.

Buffalo, N. Y.—The Niagara Top Co., manufacturer of buggy tops and bicycles, in hands of sheriff. It had a paid-in capital of $12,000.

Cherokee, Iowa.—Shardlow & Baker, bicycles, have made an assignment.

Dansville, N. Y.—Wm. H. Dick, manufacturer of wool lined shoes and bicycles, reported to have made an assignment.

Fayette, Mo.—Bell Bros., commission bicycles, reported to have made an assignment.

Jackson, Mich.—Charles A. Cone, bicycles, has made an assignment to Frank Cummings, who will continue the business for some time.

Knoxville, Tenn.—Bayzarian Cycle Co., reported to have applied for a receiver.

Memphis, Tenn. — Henwood & Yeates, bicycle sundries, etc., reported have been attached.

New Castle, Pa.—Ball Bearing Mfg. Co., Ltd., reported to have made an assignment.

New York, N. Y.—Maurice Meyer, dealer in bicycle supplies, under the style of the Union Bicycle Supply Co., No. 68 Murray Street, has failed, and Deputy Sheriff Lipsky has closed up his place of business on an execution from Erdman, Levy & Mayer, for $1023, in favor of Annie Phillips.

Rochester, N. Y.— The Punnett Cycle Mfg. Co., reported to have appointed a receiver.

Recent Fires.

Mankato, Minn.—George B. Owen, dealer in bicycles, musical instruments, etc., damaged by fire and water.

Portland, Ore. — The Rambler Cyclery, Sixth Street, between Washington and Alder, damaged by fire. There were 400 bicycles in the building, and all were destroyed except twenty-five. The insurance is about $5000.

Westfield, N. J.—The Bard Cycle Co.'s stock of bicycles was destroyed by fire recently. The loss on wheels and sundries was about $3000, partly covered by insurance. The fire is supposed to be of incendiary origin. The theory of the authorities is that the store was first broken into by burglars, who, after robbing it, set the place on fire.

STERLING BELLS.

One Best THE Sterling.

Bells of all Description.
Send for Catalogue.

N. N. HILL BRASS CO.,
East Hampton, Conn.

Bells.

The belle of the ball on her escort leaned,
And so very happy the dear girl seemed,
That he took her aside to a cozy retreat
And told her the story that's always so sweet.

She perked up her lips, so enticing and fair,
And his own were reaching the heaven that's there,
When she said, "Dear boy, this is only a sell.
You'll first have to buy me that 'Climax' bell."

The new 1897 model "CLIMAX" Bell possesses without doubt the most improved Lock Clamp known. Can be adjusted to the Handle Bar quickly without removing the screw, thus saving all vexatious worriment in the operation, and at the same time presents a more attractive appearance than any other kind of an attachment.

We have just published a handsome little booklet to be carried in the vest pocket, containing lots of valuable information for the benefit of wheelmen. Send us a two-cent stamp and we will mail you a copy.

THE ONLY "PERFECTION" WATER ELEVATOR AND PURIFYING PUMP

Dealers, get in line and sell your trade an article you can guarantee for ten years. The chain or buckets is the principal factor in any elevator. The **Perfection Bucket** is cut by die in one piece of **Black Open Hearth Steel** folded together by double lap seams, and the entire chain **Galvanized** after **Construction.** Others are made of several pieces of galvanized iron soldered together. Simply this one feature is a sufficient guarantee that the **Perfection** has no equal. It is handled by all leading jobbers throughout the world. Call for the **Perfection.** Take no substitute.

For full particulars, circulars, etc., address the sole manufacturers.

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

CRONK'S

Combination Fencing Plier.

This newly invented fencing tool is needed by all people that build or have occasion to remove or repair wire fence, as it is made with two staple pullers, two hammers and two button cutters. They are the same heft as the 1½ Maydole Hammer, and they are made of forged tool steel. No good farmer will be without one. They are warranted to cut No. 8 hard or No. 6 soft wire. Like the celebrated Cronk Plier they are fully warranted in all respects. No. 12, 11 in. long, $12.00. Dis. . . .

CONDENSED BUSINESS WISDOM.

"THE BEST OF ITS CLASS."

John M. Holladay, Holladay, Va.: HARDWARE is so nicely gotten up, and so well edited, giving such a variety of information, yet costs so little, that I cannot see how any dealer in Hardware can afford to be without it. It is the best paper of its class.

"THE BEST THING OF ITS KIND."

W. L. L. Morrow, Purdy, Mo.: I regard HARDWARE as the very best thing of its kind I have ever seen, and really at the low price of subscription I cannot see why it is not in the hands of every dealer in Hardware.

"WOULD NOT BE WITHOUT IT."

H. M. Seitzinger, Wilkesbarre, Pa.: Enclosed please find my check for $1 for renewal of subscription to HARDWARE. I would not be without your paper nor should any one handling electrical supplies.

"JUST WHAT HAS BEEN WANTED."

W. P. Walter's Son, Philadelphia, Pa.: Enclosed please find $1 for renewal to HARDWARE. We think your paper is just what has been wanted for a long time for the retail Hardware trade.

"WELL PLEASED WITH 'HARDWARE.'"

W. W. Johnston, Bartlett, Ohio: Enclosed find $1 to pay my subscription to your journal. I am well pleased with the paper, and think it would pay all dealers in Hardware to take it.

"LIKES IT."

A. D. Matthews, Liberty, Me.: Enclosed find check for $1 to pay for HARDWARE for another year. The paper I like much.

"WELL WORTH THE MONEY."

A. A. Case, Pittsford, Mich: Enclosed please find $1 to pay for my subscription to your paper. I think it well worth the money.

"ALL WANT TO READ IT."

H. E. Iseman, Prattsville, Mich.: The boys all want to read HARDWARE as soon as it reaches us, and are delighted with it.

"WHAT EVERY MAN WANTS."

C. A. Fisk, Helena, Mont.: HARDWARE is what every man wants, who hopes to gain success in the Hardware business.

"A HELP TO OUR BUSINESS."

N. G. Bickford & Son, Mount Holly, N. J.: Please send us HARDWARE for one year from January 1st. Enclosed you will find the price of subscription. After examining the copy sent us we find the paper will be a help in our business.

"THE BEST OF ALL PAPERS."

S. I. King, Brighton, Mich.: I received a specimen copy of your paper dated October 10th, and I like it best of all the papers I have ever seen, devoted to the retail trade. Enclosed find $1 for which send me HARDWARE one year.

"CANNOT FAIL TO HELP OUR BUSINESS."

J. C. Tanger & Co., Hanover, Pa.: Please find $1 enlosed for one year's subscription. After examining a specimen copy, we think it one of the best, and that it cannot fail to help us in our business.

"WOULD NOT BE WITHOUT IT."

H. D. Wyman, Mt. Dora, Fla.: You will please find enclosed check for one year's subscription to HARDWARE. I think a great deal of your paper, and would not be without it.

"NO JOURNAL ITS EQUAL."

Hendricks & Stall, Thayer, Kan.: While we are doing business a great number of miles from New York, we know of no journal that we consider the equal of your paper.

"MUCH PLEASED WITH IT."

Chas. N. Vittum, Laconia, N. H.: I am pleased to be one of your subscribers, as I am very much pleased with HARDWARE. I think it a very useful and interesting journal.

"WORTH WHAT IT COSTS."

Spence & Co., Keene, N. H.: Enclosed find $1 to pay for HARDWARE for one year. We think it well worth what it costs.

"CANNOT GET ALONG WITHOUT IT."

T. C. Lamson, Elizabethtown, N. Y.: Please find enclosed $1 for HARDWARE for one year. Can't get along without it.

"READS ADS. AND ALL."

Fred. A. Welles, Milwaukee, Wis.: I like your paper first rate, and I read the advertisements as well as the rest.

Wrought Iron Pipe, Cast Iron Soil Pipe, Water Closets, Brass Plumbing Goods, and everything else to plumb a house from cellar to garret.

RESERVOIR PUNCH

For Euchre and Whist Parties.

This Pocket catches the pieces punched from Tally Cards, thus preventing a littering of the carpet.
Is hinged, can be opened, emptied and closed in an instant.
Of great value to Railroads as it prevents the replacing of pieces punched out of monthly or commutation tickets.
Also valuable in Restaurants where punch tickets are used.

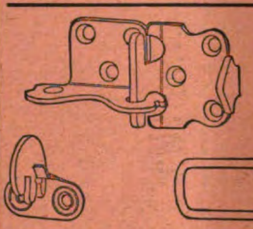
ANY DEALER knows that a Stove Polish which other manufacturers try to imitate, is the Polish for him to sell. The enormous sale of

Enameline
The Modern **Stove Polish**

Proves that dealers are friendly to it, and that consumers will accept no substitute for ENAMELINE. Why? Because it's

THE BEST!



THE trade-mark most familiar to the sportsmen of the United States is the **"U. M. C."** of the Union Metallic Cartridge Co., of Bridgeport, Conn. It stands for the highest excellence of sporting ammunition for Rifle, Shotgun and Revolver. The favorite paper shot shells bearing

the U. M. C. stamp are the "Trap," "Smokeless," "Walsrode," "Black Club" and "New Club." In your shooting, as in everything else use the best. To make sure of the best ammunition, always ask your dealer for U. M. C. goods.

A GOOD THING.

IT'S IN THE TEETH.

The Patent "REFORM" Curry Comb is composed of three shallow, oval trays, with corrugated edges. The parts are struck up from a fine grade of cold rolled steel, heavily tinned and bronze lacquered, firmly riveted together and warranted not to rust. The outer dimensions are 6½x4¼ inches and by reason of the large cleaning surface and peculiar arrangement of teeth, the comb will do its work with a large saving of time and labor, cleaning with equal thoroughness both long and short coats. There are no places to accumulate hair and it will not tear or injure the brush, the comb being quickly freed from accumulation by giving its face a gentle tap.

"EVERYTHING IS COMING UP."

BUSINESS IS BETTER AND THERE WILL BE A LARGER DEMAND THAN EVER FOR OUR

Sheep Skin Mitten.

Acknowledged to be the best article for polishing stoves, as it does away with the old time dirtiness of the work, making this work a pleasure. Also invaluable for polishing brass or glass, or silverware, which it does not scratch. For tan shoes and cleaning bicycles it has demonstrated itself a conspicuous success.

Diamond Hardware Co.,

"Replies From All Sections."

McIntosh-Huntington Co., Cleveland, Ohio. [*General Hardware and Bicycles*]: As an advertising medium, we have recently had occasion to test HARDWARE in a manner that would give us some idea as to how successful it can be used. Our advertisement did not occupy a very prominent position, but was of a character to excite the cupidity of the reader. We found that within two days after your paper came out, we commenced to receive replies from all sections of the country to the advertisement. This would seem to be sufficient proof that yours is a good medium.

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted to the Hardware Trade.

Editorial Trade Review.

We are having some of the hottest weather of the season just at this particular time, and with the mid-summer dullness in full sway—if one may so state the stagnation generally attending all kinds of business, Hardware not excepted.

It has looked since commencing a new governmental fiscal year, as though the tariff question would be settled in a very brief time. It has been a delay of an unfortunate character for the many industries which it was the intention of our legislators to protect by increased duties. The countries more greatly affected by proposed increase in duty, have been rushing over their finished products without the consignees worrying themselves very much about patterns and styles, for anything is supposed to possess a selling value when a change in the tariff advances the prices of new goods from fifty to three hundred per cent. Judging from the reports of our consuls, the declared exports from many Austrian, French and English ports have almost doubled in value as compared with 1896. From Reichenberg, Austria, March, April and May, 1896, the exports to the United States were $186,673; this year they increased under the tariff pressure to $330,290. From Haida, Austria, they were increased from $137,626 in 1896, to $200,649 for March, April and May, 1897. The exports of cutlery from Sheffield, England, were largely increased each month this year, reaching $33,195 in January, $57,518 in February, $99,063 in March, and $117,659 in April, other exports of steel, wire, sheets, etc., increasing in a similar ratio.

The same notable advance in values exported can be seen in every report; Nottingham, Eng, reaching $1,156,959 in the quarter ending May 31, 1897, an increase over the same period in 1896 of $421,226. The report of Consul Roosevelt from Brussels and Charleroi shows an increase for the three months, as compared with 1896, of 313 per cent.

It may readily be believed until such heavy shipments are checked by the signing of the tariff bill, it will be a difficult matter to make a positive date for any prosperous business in American products.

The sheet iron, tin and glass factories, under one pretext or another, have closed down this month for overhauling plants, necessary repairs, or in conforming to an annual custom. The glass factories invariably select this time in the year to stop work, and let the workmen have a rest usually reaching into September. This year there is a difference to settle as to the wages scale as well, which will lengthen the idle months rather than shorten them. The iron workers will doubtless agree upon the scale demanded, as soon as needed repairs are made, as activity in that line for months to come seems possible under existing conditions.

The Changes in Bicycle Values.

The very radical changes in the list prices of the entire line of Columbia bicycles which was made on July 1 by the Pope Mfg. Co., of Hartford, Conn, will undoubtedly have a serious and permanent effect upon the general bicycle market from now on.

It has, this year especially, been a very difficult job for the leading makers of $100 wheels to maintain their arbitrary list prices, and sell enough of such wheels on which to figure a balance on the profit side. In the meantime, company after company has been formed to make a wheel that could be sold at very much lower prices, and very many of these cheaper wheels were establishing reputations that constantly created new purchasers.

It would no doubt have been better for the cycle business generally, as represented by these old-established makers, had the decision been made January 1 to reduce Columbia bicycles to the schedule now adopted. The entire business would have been at this date on a much more solid and satisfactory basis, and a hundred additional companies new this year would have "died a bornin'."

In a future clearing of the deck for action, the old companies with large plants and abundant financial resources, will be found early in the swim for the trade of 1898; but the large profits anticipated by the newer arrivals on the field of battle, will probably this year fail to materialize and compel many withdrawals, with no successors. Cycles certainly can now be made at a lower cost than obtained several years ago, and the retention and sustaining of a price established so far back, was a great mistake, which has made the seasons of 1896 and 1897 both deficient in revenue. In the future it will undoubtedly be found good policy on the part of the manufacturer to abolish many of the unprofitable company stores, carried on at great expense in all the leading cities, and to seek at the same time first class representation among the established dealers in Hardware. All over the country they are to be found possessing unbounded advantages and unequalled facilities to handle a line of goods which have become staple supplies, in many cases necessaries, and

Digitized by Google

which it would seem the correct thing for the legitimate Hardware dealer to exert himself to the utmost in distributing, awaiting only the proper advances and solid support of the manufacturer to find a great success possible of achievement.

Death of Samuel S. Patterson.

Samuel S. Patterson, who has long been identified with the wholesale Hardware trade of this city, being the senior member of the established house of Patterson, Harral & Gray, No. 85 Chambers Street, New York, died at his home, No. 177 Halsey Street, Brooklyn, on July 3rd, of paralysis.

He had been ill for about four weeks, and only on Wedday of last week had gone to his office in this city, believing he was on the road to a permanent recovery, when the following day he received a second stroke which terminated fatally at midnight on July 3rd.

He was a member of Alexander Hamilton Post, No. 182 G. A. R., and was a Pastmaster of Globe Lodge No. 618, F. and A. M. A widow survives him. Interment was had in Frederick City, Md.

Mr. Patterson was born in Lowell, Mass., in 1839, coming to New York when twelve years of age.

At the outbreak of the war he joined Company G, Ninth Regiment, N.Y.S.M. Volunteers, afterwards known as 83rd N.Y.S.V., and served his country as a private until the close of the war. After his return from the battlefields, he connected himself with the Hardware firm of James E. Halsey & Co., then in Beekman Street, as confidential bookkeeper and cashier; this firm later became Day & Halsey, located on Canal Street, finally changing to T. D. Day & Co., who were unsuccessful in business, and Mr. Patterson, who had continued with the house through all its various changes, started for himself in Franklin Street, this city, in the handling of "job lots" of Hardware as a special business. He has always been considered the pioneer in this now extensive and important business. About this time, R. T. Hazell, who had been the leading Hardware auctioneer of this city, sold out his interests in that line for the purpose of joining Mr. Patterson in the business he had successfully established. As Hazell & Co. they were associated a number of years, when Mr. Francis Harral, whom he had known ever since the early days with Day & Halsey, became a partner, the name continuing as before. At the expiration of several years' successful business, Mr. Hazell desiring to retire, Mr. Harral purchased his entire interest and formed the firm of Patterson & Harral, which later, by the admission of Walter R. Gray, made the style of the firm as at present, Patterson, Harral & Gray. As a perfect summary of the high esteem and dignified opinion held by his business associates in all the walks of his long business career, the writer is permitted to extract the following from a letter of condolence written by one whose intercourse with the deceased had been of many years' duration. He refers to Mr. Patterson as "one who was so universally esteemed, honored and respected for his manly qualities, his business judgment, and his rectitude and integrity. These qualities which made his name so greatly respected in our trade were his greatest pride, and must be to you, his associates in business, a source of great comfort. His loss will be sincerely felt by all who knew him and had business and friendly relations with him."

A more perfectly honest and conscientious man, or one more upright and consistent in his business methods it would be difficult to find. Industrious and painstaking in all he ever undertook, he was more inclined to overexert himself by diligence in his affairs than to be found lacking in any of the elements that make a successful man of business.

Changes In Prices Of Columbia Cycles.

On July 1, as announced a day or two previous to that date, the Pope Mfg. Co., Hartford, Conn., reduced the list prices on their line of Columbia bicycles, as follows: 1897 Columbias, from $100 to $75. 1896 Columbias, from $75 to $60. 1897 Hartfords, from $60 to $50. Hartfords, Pattern 2, from $50 to $45. Hartfords, Pattern 1, from $50 to $40, and Hartfords, Patterns 5 and 6, from $40 to $30. It goes without saying that this entirely unexpected reduction in prices that have been upheld and sustained through every contingency during the season, has taken the trade by surprise, and will prove a great mover of any stock accumulation of these wheels that may now be found in excess of ordinary requirements. It will undoubtedly be met by corresponding reductions in wheels of the recognized standard makes, and result in clearing up all fears of carrying over any stocks of bicycles to handicap the trade of 1898; for the requirements of which, all the leading manufacturers must now at once make preparations.

Picture Molding, Wire and Hooks.

Consul Germain sends the following from Zurich, under date of March 29, 1897: If manufacturers of picture molding, wire and hooks will send me samples and prices, I think I can help to introduce these articles in my district (this city being the distributing center for Switzerland) and, for that matter, in the whole Swiss territory. I have visited every Hardware and picture-frame shop in this city to ascertain whether these articles were kept on sale, and found they were not to be had and were not even known. I would like to show the trade in this district that molding, wire and hooks, as used in the United States, are better for the walls, more practical, and more pleasing to the eye in the hanging of pictures and mirrors than are the spike-like nails and heavy cords now in use. I refer particularly to Nos. 1, 2 and 3 galvanized woven wire, gilt, bronze, and various colored wood moldings, as well as brass hooks of assorted dimensions.

Outing of the New England Hardwaremen.

The members of the New England Hardware Dealers' Association who went to Nantasket Beach, on Wednesday, June 30th, felt that the day was well spent. Some fifty ladies and gentlemen left Boston on the boat a little after noon, and after a sail down the harbor, landed at Nantasket, and were driven to the Atlantic House, where dinner was served. At the conclusion of this, a business meeting was called, at which a committee consisting of the following gentlemen, was appointed to arrange for the meeting of July 17th: Thomas H. Baldwin, Boston; Edgar H. Bowers, Needham, and Myron H. Tarbox, Boston. Music followed, after which an address was delivered by Prof. C. W. Rishell, of Boston University, who took for his subject "Germany as our Business Competitor." A couple of hours were devoted to social pleasures, and return made to Boston by boat in the evening.

Low Priced Cash Registers.

The National Cash Register Co., Dayton, Ohio, has just put on the market a large line of low-priced detail-adding cash registers. It offers registers as low as $15. The No. 18, a detail-adding register, with twenty-five keys, can be bought for $25. The No. 19, which has an automatic cash drawer and twenty-five registering keys, is sold for $40. These registers are put up in painted wooden cabinets, and can be seen at any of the offices of the company.

The Hardware business conducted under the name of Rice, Born & Co., Ltd., New Orleans, La., has been succeeded by the firm of Henry Rice & Son. The business will be carried on as heretofore.

NEW YORK CREDIT MEN'S ASSOCIATION.

Following is the report of delegates to the Kansas City Convention, of June 9th, 10th, 11th, 1897:

New York, June 29th, 1897.

Dear Sir: As the regularly appointed delegation of the New York Association, it was our pleasure to attend the Convention of The National Association of Credit Men, held in Kansas City, Mo., on June 9th, 10th and 11th, and we herewith beg to submit a brief report of that gathering, and to indicate the results promised by this organization.

We were agreeably surprised at the growth, which the National Association has attained in the short period of time since its formation. Already twenty-three local associations have been established in the principal commercial centers of the Union, while the individual membership is from all sections of the country. There was an enthusiasm manifested by the delegates present at the convention, that evinced their faith in the ability of the organization to fully execute its great purposes in behalf of commercial dealings, and to establish better trade conditions, more uniform and equitable state legislation, and more perfect credit conditions.

The association was fortunate in the selection of its new officers, and the names, identified with the management of the executive affairs, clearly indicate that all undertakings will be conducted with tact and judgment, and with the view of securing the most practical results.

James G. Cannon, President, (vice-president Fourth National Bank,) New York; H. F. Gillean, vice-president, (Preston & Stauffer,) New Orleans, La.; T. H. Green, treasurer, (Tolerton & Stetson Co.) Sioux City, Ia.; F. R. Boocock, secretary, New York.

The work of the association is done very largely under the jurisdiction of its standing committees, which are as follows: Membership, Legislative, Business Literature, Investigation, Credit Department Methods, and Improvement of Mercantile Agency Service. Although brevity is sought in this report, we feel that we should outline, but in only a suggestive way, the character of work that will be undertaken.

The Legislative Committee: Comprehensiveness, simplicity, equity and uniformity are the characteristics aimed at in matters of legislation by this committee. The variations in the commercial laws of the different states are deplored and considered largely unnecessary. Fraud is too easy of perpetration and honorable dealings not sufficiently protected. Legislative improvements will be attempted through local associations in their respective states, but largely under the guidance of the National Committee in order to insure similarity and approximate perfection.

Business Literature Committee: It is the intention of this committee to publish and widely distribute literature of a suggestive character to business men. Many merchants suffer failure through the pursuance of wrong methods, while others create unsatisfactory conditions by their adoption of incorrect ideas in the management of their affairs. This committee hopes to have space assigned it in nearly all of the trade periodicals of the country, so that under its supervision all phases of business may be adequately, logically and wisely treated. By vote of the convention the able treatise on "Individual Credits," by President Cannon, will be at once issued in pamphlet form and widely distributed among retail merchants, and the result hoped for is that an agitation will be started which will completely revolutionize this entire system.

Credit Department Methods Committee: Upon the recommendation of this committee, the vice-presidents of the National Association will canvass their respective States for the purpose of submitting to the board of administration, for approval, suitable blanks for the use of the members of the association. It is proposed to have separate forms for each State, with a printed heading—for instance, "Standard Form for New York." It is not believed that one general statement blank will adequately meet the needs of the various lines of business embraced by the membership, and it has, therefore, been decided to undertake a systematic course of investigation in order to achieve the best results. The following resolutions offered by the Committee on Credit Department Methods were unanimously adopted at the Convention:

Resolved, That the National Association of Credit Men, in convention assembled, hereby declares itself in favor of the adoption of uniform statement blanks, and recommends to its membership the employment of such form, or forms, in obtaining signed exhibits from their customers as may be approved by the Board of Administration.

Resolved, That by an adoption of this recommendation the Association believes that the best interests of its membership will be served by minimizing losses and by removing from the field of business enterprise those whose character and financial status render them undesirable as credit risks.

It is the intention of this committee to draft blanks for making trade inquiries which, it is thought, will be of considerable service in obtaining information. Careful attention will also be given to other blanks and systems employed in Credit Departments, with the view of attaining as near perfect methods as possible, but no final action will be taken until the different questions have been thoroughly considered by all local associations, and also by the consulting constituency of about five thousand of the leading firms in the United States. The subject of Dating will also be taken under advisement during the year, in the hope that the abuses which have crept into our business dealings under this custom may be remedied.

The Improvement of Mercantile Agency Service Committee: It is the ambition of this Committee to so co-operate with the Mercantile Agencies that, as a result of a clearer understanding of what the Credit Man essentially needs in commercial reports, the agencies, through their effective machinery and the executive genius of their managers, may be able to make a great advance in the character of their service to the advantage of themselves, their subscribers and the public.

The Investigation Committee: It is hoped that this Committee will be enlarged into an Adjustment Department, not with the view of establishing a collection bureau, for nothing is further from the intention of the Association, but in order that failures having a suspicious character may be thoroughly investigated, and if fraud is indicated, the perpetrators be fully prosecuted. Under this department efforts will be made to encourage, in every State, the selection of business men in the various lines of trade to act as assignees, receivers or trustees, in the belief that competent men for this class of work, will realize an average of twenty-five per cent. larger dividends from bankrupt stock.

We have endeavored to outline briefly some of the purposes of this Association, and we believe that all of its undertakings are eminently practicable and meritorious, and worthy of high commendation and generous support.

Digitized by Google

As a result of our attendance at this convention we would wish to convey to each member of our own Association some of the added enthusiasm of this movement, which we have secured from a more thorough understanding of the great purposes in view. Very truly yours,

CHAS. BIGGS, Chairman, M. E. BANNIN,
W. T. BINGHAM, S. S. CONOVER,
R. P. MESSITER. W. A. PRENDERGAST,
Delegates.

The Stowell Steel Parlor Door Hanger.

The Stowell Mfg. & Foundry Co., South Milwaukee, Wis., are manufacturing the Stowell Steel Parlor Door Hanger, which is referred to as possessing original points

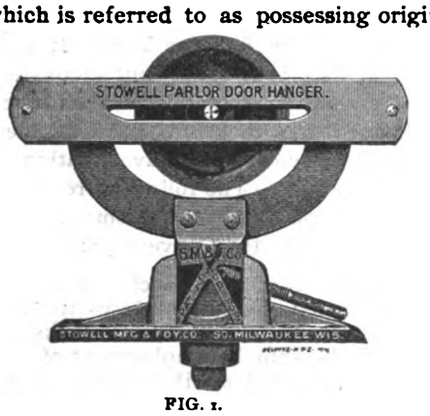

FIG. 1.

of merit, worthy of investigation by all dealers in builders' Hardware. We present herewith several illustrations which embody the salient features referred to. Fig. 1 shows the general appearance of the Stowell Steel Parlor Door Hanger, when in position.

It is a steel track hanger, smoothly japanned and stenciled in bronze. The center piece is made of malleable iron. The wheel is 3½ inches in diameter, the groove is turned and the upper edge of the rail is planed smooth. These features, it is claimed, reduce the noise to a minimum and give it the advantage of noiselessness and great ease of movement. There are two requisites in a good door hanger apart from features of durability. First, simplicity in attaching the hangers to the door and putting the rail in place, and second, facility in leveling up the door by adjusting the hanger after it is in place. The steel track is preferably screwed to a board and the board, in one piece, nailed or screwed to the studding. A long pocket is left in the soffit corresponding in length to the width of the door, and the

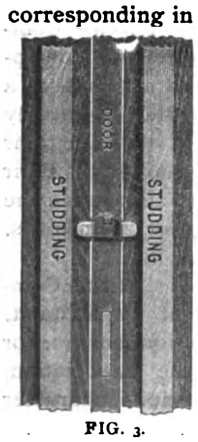

FIG. 3.

FIG. 2.

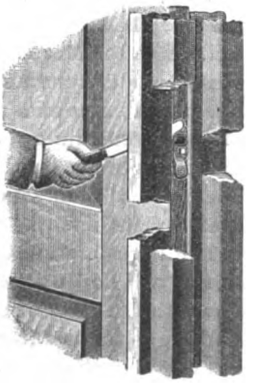

FIG. 4.

hangers, with the door attached, can be thrust into the opening left by this pocket and hooked over the rail. The door, at any time, can be removed or adjusted in the same way by simply taking out the pocket.

Double doors are lowered or raised by a screwdriver inserted in the set-screw at end of the door. The hangers are placed one inch from edge of the door.

Single doors can easily be adjusted by removing the stop and the long pocket in soffit, thus affording an opening the full length of door, to get at both hangers.

In Fig. 2 is shown the stop to which reference is made above; its application to the door is shown in the following illustrations; Fig. 3 showing the stop closed, and Fig. 4 showing it open. The stop is made of malleable iron with rubber plugs to deaden the sound, and is secured by a lag screw in center of the rear of the door. With the stop used in this manner it is thought the door will be more apt to strike square and not be wrenched out of line. The door may be pulled from the casing in order to adjust the rear hanger, by simply inserting a knife blade at the side of the door, turning the stop one quarter way round, when the door will be free to pass out. When the door is pushed back the stop adjusts itself. Many advantages are claimed for this improved hanger. A full list of same with discounts to the trade will be forwarded upon request of the manufacturers.

A Chance For Dealers.

In a special card on page 2 of this issue, P. M. Sharples, of West Chester, Pa., makes an announcement that will be of interest to the Hardware trade. This is concerning the Sharples Farm Cream Separators, of which there are over 15,000 in daily use at this time. This is described as an article which a Hardwareman can handle to first-class advantage, and which will sell to dairymen on sight. The manufacturer will be pleased to hear from a number of good houses in various parts of the country where agencies have not already been established, and will send full printed matter, illustrating and describing the article, on application.

Mr. Sharples has recently taken an order for five hundred of these separators, which is the largest order from one party that was probably ever given for articles of this kind. He has published two entertaining books, one on "The Moody Iowa System of Cream Gathering," and another on "The Farm Cream Separators," each of which is filled with valuable information, not only concerning the character of these goods, but also the advantages arising from their use, and the special advantages to be obtained through handling and selling the same. These books will be sent on application, and it would well repay any Hardwareman anywhere to investigate.

Special attention is called to the announcement of the Smith & Egge Mfg. Co., Bridgeport, Conn., on page 18 of today's issue. This company whose fame has extended into every quarter of the globe, have a large and well-equipped factory arranged for the manufacture of Hardware specialties of any character, or sheet metal novelties. Any who have in view the manufacture of articles in these lines, but do not wish to establish a factory of their own, will do well to correspond with this well-known establishment in relation to terms, etc. The Smith & Egge Mfg. Co. need no introduction to the trade anywhere, as the character and quality of the goods they have long been manufacturing, are their best introduction.

William Connors, proprietor of the Troy Paint & Color Works, Troy, N. Y., has issued a handsome and attractive leaflet showing sample colors of his American Seal white lead or ready mixed paint. All the shades known to the trade are depicted on this card in tablets of an inch square, some thirty-two in number. Accompanying this is a great deal of useful information for the benefit of the retailer or user, and also much valuable information as to the character and quality of these first-class goods.

The Lowry Hardware Co., dealers in cutlery, bicycles and Hardware notions, Atlanta, Ga., has changed its corporate name to the Anderson Hardware Co., the stockholders and officers remaining the same.

THE MAKING OF CRUCIBLES.

The following able and entertaining address on "Crucible Making, and How they Should Be Cared For, "was delivered by John A. Walker, vice-president and general manager of the Joseph Dixon Crucible Co., Jersey City, N. J., at the convention of the American Foundry Men's Association, held in Detroit on May 10th, 1897:

To the last half of the nineteenth century—just closing in such a blaze of metallurgical and industrial glory—belongs the graphite industry; so much so, in fact, that graphite has become one of the great factors in our modern civilization.

To speak mineralogically, graphite belongs to the coal family, and is classified with the carbon minerals.

To speak chemically, it is a pure carbon, and has substantially the same analysis as charcoal and the diamond.

To speak geologically, it occurs only in the oldest archaic rocks, and is the product of an unmeasurable heat.

To speak electrically, it is one of the best conductors of the subtle electric current.

And to speak colloquially, it has entered every civilized home in the form of stove polish for the kitchen, and the lead pencil for the library.

It has revolutionized methods in metallurgy by its use in the making of crucibles or melting pots.

As a mineral it crops out all over the globe, but as an ore of a suitable quality, and in sufficient quantity to pay for mining and refining, it is confined to three or four well-known localities.

The most notable product of the graphite industry for foundry men is the graphite crucible, or melting-pot.

Crucibles, or melting pots, of some description, have, of course, been used since the first fusion of metals by man. We all know the legend that the earlier alchemists marked their crucibles with a cross (hence the word "crucible"), to prevent the devil from interfering with the chemical operations about to be performed. This legend, whether true or not, shows the antiquity of the melting-pot.

Before the present century, crucibles were made chiefly of sand and clay, but what we know as the modern graphite crucible, more commonly known as plumbago, or black lead, was originated in the year 1827 by Joseph Dixon, then living at Salem, Mass. So it is to the present century, and to an American, that the world owes this useful invention.

In its broadest sense, a crucible is the vessel in which a fusion of some substance is conducted. Crucibles differ widely, according to the substance to be fused and the object of the fusion. They differ in composition, shape, and size, from the tiny platinum crucible of the laboratory, and the average melting-pot for brass or steel melting, to the fifty-ton hearth of the modern steel furnace.

Crucibles are used in every laboratory and every scientific shop, but chiefly in the foundry for the fusion of metals and alloys.

There are now in use, in various parts of the world, platinum crucibles for laboratory work, sand crucibles so-called, made from Hessian clay and sand, straight-out clay crucibles made from English clay, and the melting-pot known to all foundrymen as black lead, or plumbago, crucible, which is, more correctly speaking, the graphite crucible.

While the use of the Hessian sand crucible still lingers among assayers, and while English steel-makers still cling to the use of the one-heat clay crucible, the vast bulk of all the metals and their alloys is fused in the modern graphite crucible.

As before mentioned, graphite crucibles were first made in 1827 by an American. Later the American taught the Englishman, and still later the practice traveled to France and Germany, Japan and China; and now, to the best of my knowledge, the making of the graphite crucible is confined to France, Germany, England, Japan, China and America. America, however, has taught the world.

The theory of the graphite melting-pot is that, vastly better than anything else, it is a ready conductor of heat, and at one and the same time it is both strong and elastic. Again, it is refractory and durable. Being the best conductor of heat, the coal bill is minimized and quick melting possible. Being strong and elastic, it stands all reasonable shocks and accommodates itself to radically different temperatures. Being refractory, the most stub-

JOHN A. WALKER.

born metals succumb and become fluid long before the walls of the pot show the slightest sign of collapse.

The making of crucibles is based on a well-defined theory, and the crucible-making plant should be under the sharpest supervision of its manager and his trained assistants. They must be possessed of the latest knowledge of metals and their alloys, of furnaces, of fuels, of fluxes, and of the mechanics and the chemistry applied by the people who use their crucibles.

A successful crucible-maker must make constant chemical analyses of his materials, and he cannot have too much knowledge of the broad lines practised by his customers.

The fusion-point of different metals is vastly dissimilar. This must be taken seriously into account. For instance, the crucible made for steel-melting is useless in a brass foundry. It is far more refractory, it is true, but if the brass-melter employed a crucible intended for steel-melting, it would slowly wither away in his lower temperature, where it would behave beautifully in a furnace with heat 1000 degrees Fahrenheit higher.

Intimate knowledge of fuels and their functions is also absolutely necessary to the crucible-maker. He must know not only the behavior of the several fuels, as coal, coke, gas, and perhaps electricity, but also the quality of these several fuels, as not only a change from coal to oil,

Digitized by Google

but a simpler change of from one coal to another, has an intimate bearing on the life of a crucible.

Again, the crucible-maker should know the nature of the fluxes used, and try to be informed of the crucible-user's preference in fluxes. These fluxes chiefly attack the binding materials in the walls of the melting-pot. To some fluxes these binding materials are impervious, to others they are an easy prey.

Again, by slow and almost unperceived steps a very large use of the more fusible alloys has come, and come to stay. The market demands denser and stronger castings, and for this the fusion must be much more fluid. Hence the rapidly increasing use of phosphorus, aluminum and manganese.

The use of these alloys not only adds strength and density to the castings, but promotes the fusion and increases the fluidity. This raises the question of the porosity or permeability of the wall of the pot.

If the crucible with these extra fluid fusions is not well chosen, or should it contain hair-line cracks, invisible to the naked eye, this very fluid mass will find such cracks and prepare the way for a leak. The day has passed when a crucible is simply a crucible, or when one kind will suit all fusions, all fluids, all fluxes, and all furnaces, or, to change the putting of it, there are graphite crucibles and graphite crucibles. It is not sufficient that the mixture carries graphite, the crucible must be speedily adapted to its particular service.

For causes of failure, or unreasonably short life, in a crucible, we may mention:

First. The wrong kind for the service; either a pot unsuited to the furnace, to the metals, or to the fuels. Every up-to-date shop is now equipped with fierce drafts, taller stacks, corrosive fluxes, so that the old-time two and one-half to three hours' heat has dropped to one and one-half and one and three-quarter hours. Don't expect the crucibles to stand this extraordinary strain unless you are equipped with a crucible made with a knowledge of the special situation.

Second. The life is shortened by rough handling, a great deal of which is unavoidable. The melter's job is a hard one; he works always in an atmosphere of excessive heat; his eyes are invariably in distress; he lifts heavy weights of seething molten metal; he literally earns his bread not only by the sweat of his brow, but of his whole body; his work taxes his every nerve and every muscle. Not much wonder then that now and then the tongs squeeze a pot to a crack, or he flinches from the sometime extra care necessary.

Third. The life is shortened by corrosive fluxes. These fluxes are introduced to promote fusion and give clean slags. The crucible-maker does not know what the melter will use. The melter does not always know the destructive influence of his flux on the walls of his particular melting-pot.

I must ask great respect for the graphite crucible. There are not many men, and not many things in this world for which there are not substitutes, but for the graphite crucible there is no known substitute. It is a fragile thing, and you ask it to do and stand what nothing else in this wide world can do or can stand.

By the widening of Elm Street, New York, which will be proceeded with at once, the Colwell Lead Co. will lose a portion of their property which is now located on the line of the contemplated thoroughfare. They consequently purpose to remodel and improve their plant by erecting a high building on the corner of Centre and Pearl Streets, as well as several additions within their present lines that will provide needed accommodations for the departments of their business disturbed by the widening process.

The Michigan Hardwaremen.

The annual meeting of the Michigan Hardware Association will be held at Battle Creek, Mich., on Wednesday and Thursday, July 14th and 15th. The programme for the two days will be as follows:

WEDNESDAY, JULY 14TH. AFTERNOON SESSION, 2 O'CLOCK.

Address of Welcome, Mayor Metcalf.
Response, H. C. Weber, President.
Roll Call.
Selecting Committee on Credentials.
Recess.
Report of Committee on Credentials.
Annual Address by the President.
Reading of the Minutes.
Report of Secretary and Treasurer.
Report of Standing Committees.
Report of Special Committees.
New Business.
Paper—The Best Method of Creating and Maintaining Harmony Between Manufacturers, Jobbers and Retailers, J. B. Sperry, Port Huron.
Discussion.
Adjournment.

EVENING SESSION, 7:30 O'CLOCK.

Paper—Is the Department Store a Benefit or Detriment to the General Public? A. K. Edwards, Kalamazoo.
Discussion.
Paper—The Most Systematic and Simplified Form of Conducting our Day's Sales to Avoid Oversights in Making Charges, Credits, etc., Edwin D. Warner, Jackson.
Discussion.
Paper—Bicycle, H. W. Webber, West Bay City.
Adjournment.

THURSDAY, JULY 15TH. MORNING SESSION, 9 O'CLOCK.

Unfinished Business.
Election of President.
Election of Vice-President.
Election of Secretary and Treasurer.
Election of Two Members of Executive Committee.
Election of Investigating Committee.
Election of Transportation Committee.
Appointment of Entertainment Committee.
Adjournment.

The officers of the Association are: President, H. C. Weber, Detroit; Vice-President, C. F. Bock, Battle Creek; Secretary and Treasurer, H. C. Minnie, Eaton Rapids.

Executive Committee, *ex-officio:* H. C. Weber, Detroit; C. F. Bock, Battle Creek; H. C. Minnie, Eaton Rapids; Edw. A. Moye, Marquette; J. B. Sperry, Port Huron; C. M. Chamberlin, Kalamazoo; T. A. Harvey, Saginaw.

Investigating Committee: W. J. Boyce, Port Huron; S. P. McDonell, Bay City; T. Frank Ireland, Belding.

Transportation Committee: T. A. Harvey, Saginaw; J. W. Drury, Detroit; Sidney F. Stevens, Grand Rapids.

Entertainment Committee: C. F. Bock, Battle Creek; Frank M. Brockett, Battle Creek; V. C. Wattles, Battle Creek.

At the meeting of the File Manufacturers Association of the U. S., held at the Astor House, New York, June 16, the following officers were elected: President, Elias G. Heller of Newark; vice-president, Henry Barnett, Philadelphia, and secretary and treasurer, Courtlandt C. Clarke, New York. At the above meeting the new price list of files and rasps, which we give complete on another page, was agreed to and adopted.

The debt contracted by Spain to subdue Cuba amounts to about $400 to every citizen of Cuba, and in case of Spain's success Cubans will be compelled to foot the bill if it is ever paid.—*Michigan Tradesman.*

IOWA HARDWARE JOBBERS.

The Iowa Hardware Jobbers' Association held its annual meeting in Davenport, Iowa, on June 28th and 29th. Heretofore it has been the custom to hold the meetings at the hotels, but this year was a deviation from the rule, and the president of the association, Col. J. R. Nutting, opened his beautiful residence on East Front Street to them. In addition to holding the sessions there, all of the members were entertained at lunch at 1 o'clock. The occasion was one of the most delightful in the history of the association, and the members were greatly pleased and free in expressing their appreciation of the hospitality of their president and his accomplished wife.

Most of the members, which include the leading Hardware jobbers in the State of Iowa, arrived in the morning and were present at the opening session at 10 o'clock.

At 9 o'clock the members, upon invitation, assembled at the Sickels, Preston & Nutting Co.'s large store on Third Street, between Brady and Main, and were shown through from the main floor to the roof, thereby being enabled to get a splendid view of the business portion of the city. Shortly before 10 o'clock they took a car for Col. Nutting's residence The gentlemen were somewhat disappointed at the failure of T. James Fernley, secretary of the National Hardware Association, of Philadelphia, to be present. A telegram was received, which announced that his train was five hours late and could not get there until at night. The majority of the members of the association decided, therefore, to remain over in order to meet him.

MORNING SESSION.

The morning session opened in the southeast parlor of Col. Nutting's home. All of the members in the city were present, with the Colonel presiding. The opening matters of the meeting, with the exception of the reading of the minutes of the last preceding meeting, were of an informal nature and pertained to matters of general interest to the jobbing trade in Iowa.

The session lasted until nearly 1 o'clock, when an adjournment was taken. Shortly after the gentlemen were invited to the dining hall, where luncheon was served.

The tables were beautifully decorated with cut flowers and smilax. There were twelve covers laid, and at each plate was a beautifully hand-painted souvenir, in design emblematical of the trade. They were in the form of hatchets, axes, shovels, coal hods, pails, tubs, and articles handled by the Hardware merchants, most elegantly executed. In the center of the table was a huge bunch of American Beauty roses, and at either end a floral design representing, at the one end a spade, and at the other a tub, while here and there were trailed smilax in pretty designs. Mrs. J. R. Nutting, as hostess, personally presided at the luncheon. The delicate viands were served in courses, and at the close of the repast cigars were passed. While enjoying their flavor some very witty and pleasing remarks were indulged in by the gentlemen present, in response to impromptu invitations by the president.

In the afternoon an invitation was extended by Col. Nutting to take a drive, and the entire party was taken to the government island, and returning were shown a number of places of interest about the city. In the evening they were invited to Black Hawk's Watch Tower for dinner.

SECOND DAY'S SESSION.

At the second day's session of the Iowa Hardware Jobbers, a good deal more was accomplished in a business way than was done on the first day.

The members of the association accepted the invitation of Col. Nutting to take a drive upon the government island and inspect the arsenal. Commandant Capt. E. S. Blunt was exceedingly kind to them and took them through the entire works explaining the contemplated improvements and giving them any amount of valuable information concerning the arsenal and its workings. After they had passed through the buildings he took them to his residence and treated them to refreshments before departing across the river.

The important feature of the evening was the arrival of Secretary Fernley, of Philadelphia, the secretary of the National Hardwaremen's Association. He was present at the meeting in the forenoon and addressed the members.

At the morning session occurred the election of officers of the association. All of the retiring officers had signified their desire that there be a rotation of office, and therefore declined re-election. The election resulted as follows:

President: J. P. Patrick, of Des Moines.

Vice President; W. H. Kolbach, of Oscaloosa.

Secretary and Treasurer: Charles Otto, of Burlington.

It was decided to hold the next quarterly meeting of the association at Des Moines the third Wednesday in September next.

This closed the work of the morning session, and an adjournment was taken until 2 o'clock, when the closing session of the meeting took place.

The session was of an informal nature and was devoted to Secretary Fernley exclusively. He requested all of those present to deposit written questions which they would like to have answered, in a hat, and then answered each as he came to them. Mr. Fernley devotes his entire time to the meetings of state and district associations, and in this way gathers and disseminates valuable information to the trade in different parts of the country.

The meeting was very interesting in every way. Every firm belonging to the association was represented at the meeting, with the exception of four, who were unable to get there on account of sickness. These sent letters explaining their absence. Those who were there were delighted with the city and the treatment they received at the hands of the retiring president and his estimable lady, Col. and Mrs. J. R. Nutting.

Cushman & Denison: New Blood In An Old Firm.

George F. Wilcoxson has recently become a partner in the old established firm of Cushman & Denison. As is well known, this firm is one of the oldest in the cycling trade. Established in 1883, they have made a specialty of Oilers, which articles they manufacture for a large part of the trade. Although their "Perfect" and "Star" oilers are staple articles, and have always been acknowledged leaders in their lines, they are still the subject of constant study and continual improvement. Mr. Wilcoxson was formerly general eastern agent of the Mexican National railroad, with headquarters in New York city. He is an enthusiastic cyclist and ardent believer in the merits of the "Perfect" Pocket Oiler. His past record as a hustler is a guarantee that the oilers will continue to be well made, well advertised and well handled generally. Mr. Wilcoxson agrees with the old firm, that "an oiler can not be made too good." There will be no change in the firm name or in its policy, which will continue to have for its motto as in the past: "The best oilers possible at the best price possible."

NEW GOODS AND SPECIALTIES.

Whiting's Ratchet-Action Wrench.

Whiting, Macomber & Whiting, South Framingham, Mass., are engaged in manufacturing Whiting's "Ratchet-Action" Wrench, a new article possessing original features that commend it to all dealers in goods of this character,

FIG. 1.

or machinists' and manufacturers' supplies. It is claimed that the principle underlying its construction, "is the outgrowth of years of experiment by an expert mechanic, to meet his own needs; and has been amply, thoroughly and severely tested in actual every day use." We present herewith illustrations of this unique tool, showing the originality of its construction. Fig. 1 shows the wrench when adjusted to nut, while the nut is being turned to place. Fig. 2 shows the action of the wrench while being turned backward to get a new grip upon the nut. In its practical working it is a ratchet wrench, but with no rack or teeth to wear out. It is made with a sliding lower jaw, with nut and screw adjustment, similar to that used in the best monkey wrenches already on the market. The upper jaw is pivoted, and swings back enough to allow the nut to pass the lower jaw; it is held in its normal position by a spring

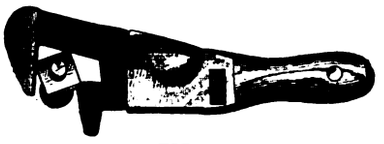

FIG. 2.

which is protected by a guard, to limit the backward movement and prevent weakening the spring. After being adjusted, the wrench is not removed from the nut; by simply moving the handle back and forth sufficiently to take a quarter or half turn, the nut is quickly tightened. When in the operation of unscrewing, the wrench is held reversed. Using only the best material in its construction, the manufacturers state they make a wrench every part of which undergoes a rigid inspection. They are made of steel throughout, the spring being oil tempered and the jaws carefully case hardened by an improved process. They are finished for service, and are fully warranted. Prices and discounts furnished upon request by the manufacturers.

F. E. Kohler & Co.'s Specialties.

F. E. Kohler & Co., Canton, Ohio, are manufacturers of a large line of Hardware specialties among which are a number which have achieved a wonderful success, and are

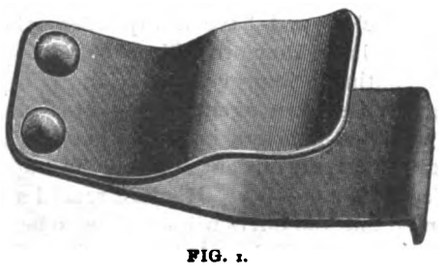

FIG. 1.

regarded by the Hardware trade as being exceptionally good sellers. We illustrate herewith a few of these novelties, which have become staple goods in many Hardware stocks. Fig. 1 is the "Invisible Anti-Rattler" which when inserted in the coupling is practically invisible, and yet cannot get out of position; it effectually prevents any rattling, and in placing them, it is not necessary to remove the bolt or shaft. They are held firmly in place by a spring tension. They are made of fine cold rolled spring steel and are warranted to preserve their strength and

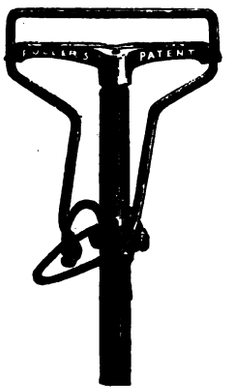

FIG. 2.

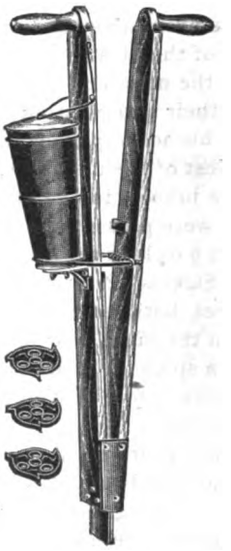

FIG. 3.

elasticity, and not to bend or break with ordinary use. Fig. 2 illustrates the "Fuller Patent Mop Stick," the simplicity in the adjustment of which is apparent at a glance. Fig. 3, showing the Eclipse Corn Planter, represents an article that has met with a large sale which is still on the increase. It has a positive feed, and possesses four changes of disks, one being for seed or broom corn. It is claimed by the makers to be the easiest operating planter on the market.

The National Sausage Stuffer.

The National Specialty Mfg. Co., Lehigh Avenue and Third Street, Philadelphia, Pa., are placing upon the market the new National Sausage Stuffer which combines in

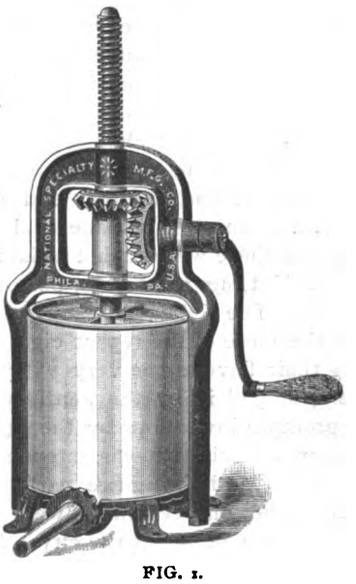

FIG. 1.

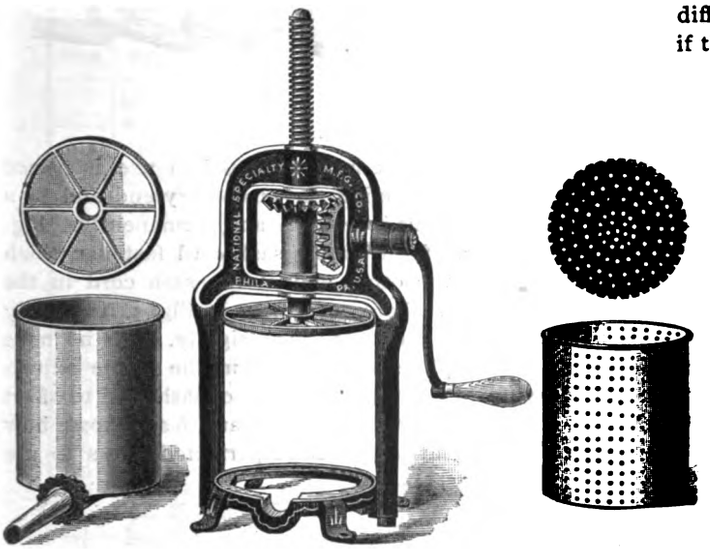
its construction many features of excellence, which will be found to increase its present popularity very greatly. The machine consists of an iron frame-work, which sustains an upright screw shaft that is operated by a pair of gears. This method of construction, the accompanying cut

Digitized by Google

shown in Fig. 2 graphically illustrates. A removable plunger plate is attached to the lower end of this shaft, which is intended to work within the iron cylinder that is placed in the base of the frame; and within the cylinder is a tin strainer of the same shape as the cylinder which, with a strainer bottom plate, is also removable. A smaller plunger plate is also supplied with each machine. When the machine is used for sausage stuffing the large plunger



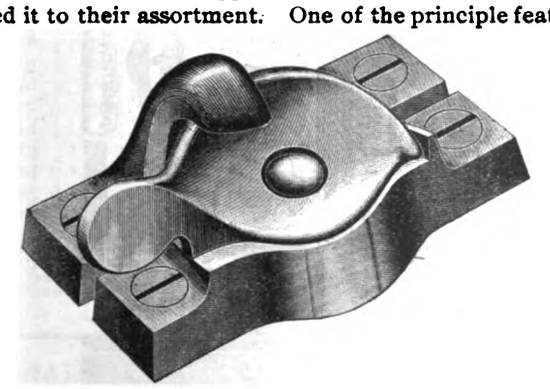


FIG. 2.

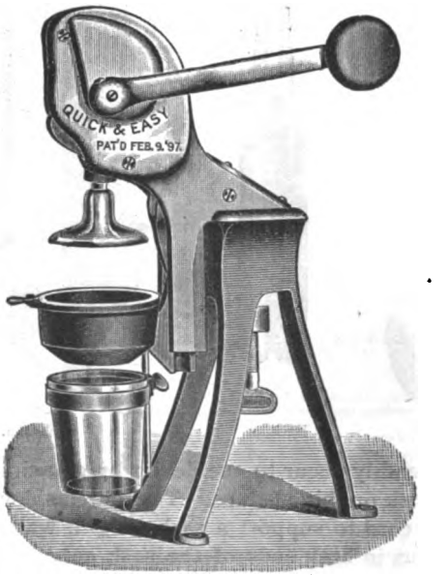
plate is utilized and the strainer and bottom plate are then removed from the cylinder. The machine can also be used as a lard compressor and fruit strainer; in Fig. 1 it is shown in proper position to be used as it may be desired. It is furnished in two styles of finish, one having all parts japanned and ornamented, and the other having japanned and ornamented frame, but all the parts coming in contact with the meat, etc., tinned with pure tin. It is supplied in 2, 4 and 8 quart sizes, and prices and trade discounts will be furnished upon application.

The Fitch Sash Lock

W. & E. T. Fitch Co., New Haven, Conn., are manufacturing and distributing through the Hardware trade, the Fitch Sash Lock which we illustrate herewith. Among the numerous devices for securing windows, it is a rare thing to find any great originality in their construction, but the Fitch Sash Lock presents points of interest that give evidence of an inventive ability that has secured for it a very extensive distribution through the Hardware trade, and the steady demand which has followed shows that its merits are acknowledged and appreciated by the dealers who have added it to their assortment. One of the principle features

of this sash fastener is the simple device by which positive security is obtained in its use; it adjusts the sash to a rigidity in position by which all rattling is avoided, and without any disfigurement of the top sash, the window can be kept locked or unlocked with comfort and convenience. The manufacturerers take pleasure in stating that "the sash lock is growing rapidly in public favor and is becoming a notable staple article of builders' Hardware, which for the purpose intended, can safely be relied upon." Catalogues and discounts furnished by the manufacturers upon request.

The Matchless Mop Wringer.

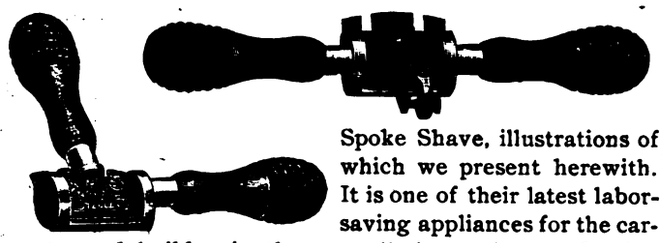


The Matchless Mop Wringer Co., Canton, Ohio, which is a newly organized company, are putting on the market to reach the Hardware and housefurnishing goods dealers, a new and improved Mop Wringer, the style and operation of which are shown in the illustration herewith. All the different parts of this wringer are interchangeable, so that if through wear or other causes, a new part becomes neces-

sary, it is readily supplied. The rollers are made from hard maple, and attached to these are a pair of strong springs that can always be adjusted to the proper tension, so that when the mop is drawn upwards between the rolls it is wrung perfectly dry. The wringer is made in a thoroughly compact and convenient form, and occupies but a small portion of the bucket when in use. The wringer, bucket and mop combined, are made to be sold at the popular price of $1.50 a set, with a liberal discount to the trade. There can be but little doubt it will meet with a large sale when its merits become thoroughly known and its fame extended. The company state they are catching up on their advance orders, and are now prepared to ship all orders promptly.

Quick and Easy Lemon Squeezer.

The Erie Specialty Co., Erie, Pa., always alive to the wants of their patrons, have placed on the market an iron stand on which to clamp their now celebrated Quick and Easy Lemon Squeezer. This stand will be much appreci-



ated by those who wish to use it on street lemonade stands or where the room is small, as with the stand it can be used in any place. This Quick and Easy Lemon Squeezer, while only one year old, has come to the front and is now recognized by the trade as a most complete machine for

Digitized by Google

extracting juice from lemons, oranges and limes; the saving in juice alone pays for itself, and the parts coming in contact with the acid being made from heavy cast aluminum, will not corrode, thus insuring the juice being perfectly pure. Catalogue giving full description of all goods made by this firm will be sent on application.

The Stanley Universal Spoke Shave.

The Stanley Rule & Level Co., New Britain, Conn., and No. 29 Chambers Street, New York, are manufacturing and distributing through the Hardware trade the Universal

Spoke Shave, illustrations of which we present herewith. It is one of their latest labor-saving appliances for the carpenter and builder, in the annually increasing production of which this company has been noted for many years. In the construction of the Universal Spoke Shave, it is provided with two detachable bottoms, which enable its adaptation with equal facility to either straight or circular work, and by means of a movable width gauge, the tool can be used in rabbeting. Its usefulness is greatly extended from the fact that both handles are detachable and either of them can be screwed into a socket on top of the stock, thus enabling the workman using it to work into corners or panels; features that are regarded by the trade as of considerable importance, and greatly increase its popularity.

Sash Cord and Sash Weight Fastener.

Tower & Lyon, Nos. 95 Chambers and 77 Reade Streets, New York, are placing before the Hardware trade one of the most useful little novelties in the builders' Hardware line with which the trade has been favored in a long time. It is difficult to imagine the important part played by a number of trifling specialties throughout a line of general Hardware, little things not of very great value intrinsically, and yet labor saving in a way that once seen is fully appreciated, and the utility recognized so readily they become staples in the dealer's stock forever after. Many of

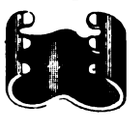


FIG. 1.

FIG. 3.

FIG. 2.

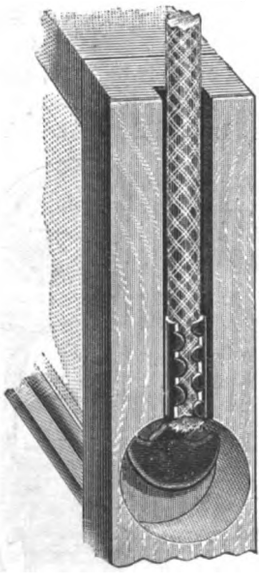

FIG. 4.

these will readily occur to the dealer by glancing his eyes over the stock on his shelves. The old fashioned way of fastening a cord to support a sash weight, was usually by making knots in both ends of the sash cord; one running through the eye of the weight, the other placed in the slot in the sash, which upon any dampness being manifest in the atmosphere, would swell up, bind the sash and create trouble for the householder. The knot when made was not considered entirely secure from slipping, until a nail was driven through it, and that was usually the source of more annoyance. Now all such old fogy methods are rendered obsolete by the simple contrivances struck up out of strong sheet steel and forming the useful appliances shown in this article by the several illustrations. Fig. 1 shows the little Sash Weight Fastener which supersedes the knot, and as

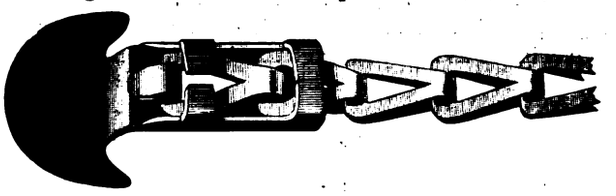

FIG. 5.

shown in Fig. 2, where it is represented in use, is placed about the two cords forming the customary end and by a proper pressure fastens it securely and permanently. Fig. 3 is an illustration of the simple sash cord fastener which fastens and holds the other end of the sash cord in the frame of the sash, where, as shown in Fig. 4, it is easily placed in position and held there rigidly, with no nails necessary to complete the job, and in the whole adjustment a saving of more than enough of sash cord to offset the cost of the fasteners. In Figs. 5 and 6 are shown how the idea has been carried out and perfected so as to use

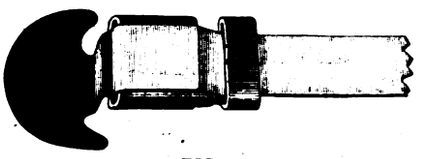

FIG. 6.

the fastener on the sash chains now so popular, where heavy sashes have to be hung; and also on the sash ribbon which have in many localities been found to be an improvement on sash weights so important and desirable as greatly to extend their use. The amount of time, trouble and annoyance that can be spared the carpenter by these simple specialties, should result in their being found in every Hardware stock in the country, the prices asked for them being so nominal as to greatly increase their deserved popularity.

Home Repairing Outfits.

The Root Bros. Co., Plymouth, Ohio, have long been identified with the manufacture of outfits of tools and materials by which home repairing is greatly facilitated and encouraged thereby. They have recently greatly improved

their "Home Repairing Outfit No. 1," which we illustrate herewith, principally in the iron lasts and stands, making the outfit now consist of forty-four separate articles, which being of full size possesses great utility. The explicit directions which accompany the same would enable anyone with the slightest ingenuity to do all the ordinary repairing re-

Irregular Goods: all lengths above those listed, and files varying from standard sizes, to be classed as irregular and subject to special prices.

quired in connection with a household, farm or stable, and the saving therefrom would astonish the frugal householder. As many thousands of these repair outfits are already in use, there is a constantly increasing demand. Up-to-date Hardware dealers should carry them in regular stock, and all the leading Hardware jobbers are receiving orders from their customers. Full information and prices rnished by the manufacturers upon request.

HARDWARE costs only One Dollar a year.

The New Price List of Files and Rasps.

Above on this page will be found the new and revised price list of Files and Rasps adopted by the manufacturers of these goods at a meeting held in New York City on June 16th. The list was established to take effect July 1st.

The price list previously in use having been in existence since the latter part of 1885, had become unsatisfactory under current discounts, which had a tendency to make the

Digitized by Google

net prices on many of the files greatly at variance with actual costs, and many of them unnecessarily low. By comparing the new and old lists, some changes will be noted in the classifications; warding files are separated from Hand and Pillar; Flat files from Square, etc. Some of the files have been advanced in price but slightly, while many of the very small sizes will be found much higher than before. There has been a great deal of care given to this price list in its compilation, and it would seem to be one that will stand the demands of the trade, and make further changes a long time coming. It is not intended, as we understand it, that any changes shall be made in the discounts now current, which are simply made to apply to the new price list, as the old prices are not to be used after July 1st, when the new prices become the regular standard list on which future transactions will be based.

F. E. Kohler & Co.

The establishment of F. E. Kohler & Co. is one of the widest known and most progressive of Canton's manufacturing institutions. The factories are located in East Tuscarawas Street, just west of the Ft. Wayne tracks and partly adjacent to these tracks. The articles and commodities manufactured have their trade demand largely by seasons, but some of these products are in demand by the trade all the year round, and the plant is kept running the year round. The concern is divided into two departments. The specialties manufactured in department No. 1 include the Chieftain hay rake, the Chieftain hay tedder, anti-rattlers, curry combs, can openers, furnace shovels, garden trowels, hand corn planters, hog ringers, hose menders, lawn rakes, lawn fountains, post hole diggers, spray pumps, saw sets, and numerous other Hardware specialties. Manager F. E. Kohler is the inventor of all these specialties made by the company. He stated, in answer to a reporter's query, that the season for the bulk of these goods is in the spring, and in consequence is practically over. "However, the trade for the past spring has been as good as any since '92, and the outlook for increasing trade is good," he continued. "We aim to keep the plant running all the time, and keep the business on the move." A month or so ago a splendid equipment for the manufacture of strap hinges was added to the plant. A fair business was the result at the start, and at present it is the principal trade in this department with a demand for the entire output. The past week has found the men working 13 hours a day making hinges. The equipment and arrangement of the shop is good. Department No. 2 is the wire nail department, and it is the only factory in Canton where wire nails of all principal sizes and styles are manufactured. This department was started last November and eight machines for the manufacture of wire nails are in operation. These machines are of the latest pattern, and are run by steam power. Their combined capacity is nearly a car load each day. The output is of the very best grade of nails, and all principal sizes and styles are turned out. The employes are working the machine 13 hours a day at present, and the trade prospects are very good. A large warehouse has been added to this department, which promises to be quite a prosperous enterprise. The plant of F. E. Kohler & Co. is seldom shut down except for necessary repairs.—*Canton (Ohio), Repository.*

Mother: Johnny, how often have I told you that you must not bolt your food?

Johnny: Guess 't isn't no worse to bolt my food than it is for you to turn the key on it when it's in the cupboard.—*Boston Transcript.*

When business is not business it is ruin.—*Hardware and Metal Reporter.*

Review of the Markets.

There is usually very little demand for goods during the present month, and trade is necessarily dull and quiet, assisted largely by a lessening demand from factory centers, where enforced idleness follows a closing for repairs and other purposes. Between the present date and August 1st no doubt this will change largely, and a steady overhauling of stock requirements will, among the wholesalers, make some encouraging conditions assume a proper importance.

The reports throughout the country are of a character that would make a good season's business among the possibilities, and preparations cannot be long delayed by which this feeling shall be made a certainty.

Wire Nails: Many of the mills closing for temporary repairs and general overlooking of plant requirements has made the stocks on hand gradually diminish, although orders have been extremely light and the demand has dropped to a lower ebb than usual for this season. Prices continue low; carload lots at mills being obtainable at $1.30 base, with the usual advance for small lots from store here in the city.

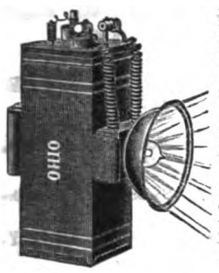
Cut nails are, if anything, in slower demand than wire nails, the price being unchanged at $1.20 for carload lots at mill. Smaller lots from store in New York at the customary advance.

Anti-Friction Metals: Magnolia Metal Co. announce the prices to the trade on the various metals of their manufacture as follows: Magnolia, anti-friction, 25 cents a pound; No Name, 18 cents a pound; Mystic, 8 cents a pound. At these prices the metals are furnished f. o. b. in either Chicago or New York.

Files and Rasps: Changes resulting from the adoption of the new list, which went into effect on the 1st inst., made a brisk trade in these indispensable adjuncts of a Hardware stock, inducing well-assorted orders during the latter part of June. As it is an advance on the average of ten per cent., it proved really the first incentive to order a good sized stock of a leading staple, which the trade has had for very many months. These goods have been run so low in price by pressure under competition, the change comes as a relief and will be well sustained, with a possible lessening of the discounts at a date not very remote.

THE PITTSBURG TRADE.

June was the first month of 1897 that ran ahead of the corresponding month in 1896. Trade is fairly active in seasonable goods; our city is cleaned out of scythes, and stocks are very low in forks, and hoes, snaths, etc. It is a good thing to clean up seasonable stocks, as the jobber will buy more freely for the next season when his stock is in this condition.



The Glorious Fourth has passed, and had a "red hot" reception in this part of the country. Thermometer has been 100 degrees in the shade for the past two days, but is now lower. The accumulation of mail prevents a longer letter to-day. LOGAN-GREGG HARDWARE CO.

THE COLUMBUS TRADE.

We are glad to report a continuance of good trade. We can truthfully say that we have had all we could do for the past two months. The demand for harvest tools was never better, and it has kept us busy to fill orders. Builders' Hardware has not been moving as fast as we would like to see it, but we think there will be an improvement in that line after harvest is over. Prices have not changed much since our last report. Wire and nails are same as last report. If the strike in mines and rolling mills continues long, prices will, no doubt, be higger. The new list on files will, no doubt, cause some trouble until dealers become familiar with the change. It is an advance of about 10 per cent. on staple sizes. In our opinion, files have been too low in price to keep the quality up to standard. Manu-

STANLEY'S
IMPROVED BUTT GAUGE.

A Metallic Butt Gauge, having one bar with two steel cutters fixed upon it. When the cutter at the outer end of this bar is set for gauging on the edge of the door, the cutter at the inner end of the bar is already set for gauging from the back of the jamb. The other bar has a steel cutter to accurately gauge for the thickness of the butt.

The form of this Tool is convenient for carrying in the pocket. It is so constructed that the bars cannot fall out of the stock.

No. 95. Nickel-plated Butt Gauge, one in a box, $0.75

facturers are tempted to use a lower grade of steel when prices are too low.

The weather has been very hot for several days, and the 3rd, 4th and now the 5th have been scorchers. The festive fly is busy tickling your nose or the top of your cranium. It is cooler to have a head with a skating rink on the top of it, but "oh, my," what a picnic the flies do have! It is a good plan to wear a piece of fly-paper on the top of your head, but be careful and put the sticky side up. [A personal investigation, made at our expense, by the faculty of the Starling Medical College, of Columbus, demonstrates that Mr. Smith has the right to be called an expert on this theme.—*Editor Hardware.*]

Farmers are busy now cutting grass and wheat, and the crop of both is excellent; 75-cent wheat and $10-hay would make the farmers happy and put them in good shape to liquidate some of their indebtedness. To-day is being observed as the glorious 4th, and young (and old) America are demonstrating the fact that they have money to burn.

SMITH BROS. HARDWARE CO.

THE DAVENPORT TRADE.

Monthly statement day revealed less slow or bad accounts than it has shown for a year.

If dealers scanned merchandise credits as closely as they do money, there would be fewer losses from this source.

Fourth of July has again come and gone, with its usual accidents. Unearthly noise and racket are remnants of barbarism; educated Americans should devise some more cultivated means of expressing their patriotic feelings.

A three days' sirocco has left devastation and blight of cereal crops in the semi-arid regions, west and southwest of the Missouri River; farmers who do raise any grain this season will get a good price for it.

Money is plenty and in good demand for manufacturing and commercial uses. Prices of local bank stocks are advancing. Business continues to improve; advances that have been made in Hardware are well sustained.

Stocks in the hands of both wholesale and retail dealers are very light; conservative buyers are already contracting for goods in excess of present wants.

The two great strikes of iron, steel and tin workers and the United Mine Workers of America, are on. Before these lines are in print, a final vote on the tariff bill in the Senate will have been taken; soon after, there will in all probability be a nail rod pool and a wire nail trust formed; prices will advance; this will develop a speculative tendency that may send values up to a point reached in 1879.

SICKELS, PRESTON & NUTTING CO.

THE ST. PAUL TRADE.

We are fairly happy, having a fair amount of business, and good prospects for the coming fall. Crop prospects are fine, and unless something unexpected happens, and the price of wheat will remain about where it is, we can expect a good trade, lessened somewhat by the debts of our farmers, who, as a class, are improvident.

Wire and nails are still selling at cost in our market, about same as the Chicago price; while the difference in freight is 25 cents per 100 pounds, our trade gets this advantage. All of this is due to a manufacturer who is bound to sell all the goods.

C. W. HACKETT HARDWARE CO.

THE BALTIMORE TRADE.

Trade quiet, weather hot.

Taking that as a text, a space writer might give you a very interesting letter, but the art of saying something about nothing is given to few. Some of our brothers on the press, and many of our senatorial brethren at Washington, possess this faculty in a high degree. A keen sense of delicacy will not permit them to present the naked truth—it must be clothed in the raiment of fine words. If, as the philosophers teach us, "truth is the most beautiful thing in the world," and we couple to that the modern saying, "Beauty unadorned is adorned the most," then it must follow that truth without adornment—truth in all its nudity is the most beautiful thing in the world. So much for apology!

Avoiding any reference to the weather, we mentioned that trade was quiet. And so it should be. At this time of the year, in this market, it is always quiet, and we do not expect anything else. With a large number of our traveling men at home resting up, and one half of the clerical force away on vacations, how could it be otherwise? Sales for the month of June were very satisfactory,

CUSHMAN & DENISON, Mfrs., 172 9th Ave., N. Y.

mail order business being indeed quite large; rush orders of ammunition for Fourth of July celebration, hot weather goods, such as screens, freezers and ice tools being most in demand. Business in bicycles throughout the season has has been quite active. While there has been a large demand for cheap wheels, there will always be legitimate demand for strictly high grade wheels from those riders who have passed the novice rank. We look upon them as a natural adjunct to the up-to-date Hardware store.

Prices on Hardware remain fairly firm, but few changes within the past month. Files are the most notable exception. The new list. which went into effect on the 1st inst., was adopted by the manufacturers, as we are told, to remove those inequalities which existed in the old list; although, why tapers should be advanced about thirty per cent. on the list and horse rasps only about five per cent. remains a mystery to us. If, as has been intimated, the Wire Rod Pool was only temporarily abandoned until the Senate has passed its tariff bill, then we might look for some interesting developments in the near future.

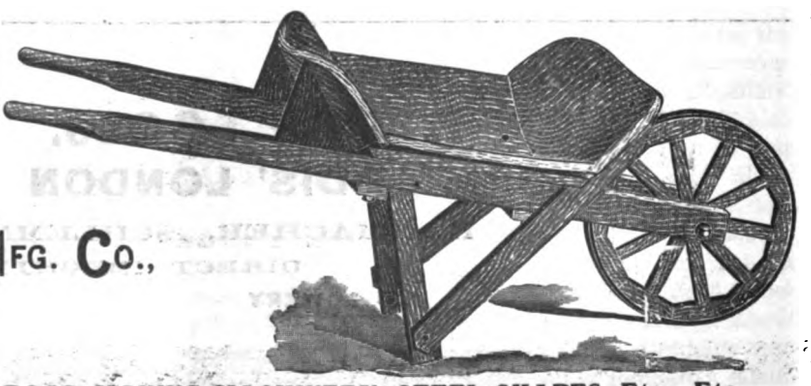
Collections show a marked improvement.

TABB & JENKINS HARDWARE CO.

The Bells.

Bells were well known to the Egyptians before the time of the Jewish exodus. In the description of Aaron's sacerdotal robe mention is made of the fact that upon the hem of the garment there were bells of gold, alternating with pomegranates of blue, of purple and of scarlet: "A golden bell and a pomegranate, upon the hem of the robe round about. And it shall be upon Aaron to minister, and his sound shall be heard when he goeth in unto the holy place before the Lord, and when he cometh out, that he die not." Hand bells were in common use all over the ancient world. The earliest use of bells in churches was for the purpose of frightening away the evil spirits which were believed to infest the earth and air, and the earliest curfew was rung at nightfall to rid the neighborhood of the village or town and church of demons.

Most old churches of Europe have a small door on the north side, and at certain points in the service this door was opened, and a bell was rung to give notice to the devil, if he chanced to be present, that he might make his exit before the elevation. By the command of Pope John IX church bells were rung as a protection against thunder and lightning. The monument of Porsena, the Etrurian king, was decorated with pinnacles, each surmounted with a bell, which tinkled in the breeze. The army of Clothaire raised the siege of Sens on account of a panic occasioned among the men by a sudden chime from the bells of St. Stephen's church. The largest bell in the world is in the Kremlin at Moscow. Its weight is 250 tons, and the value of the bell metal alone, not counting the gold and silver ornaments which were thrown into the pots as votive offerings, is estimated at £66,565, or about $332,825.—*Exchange.*



The following dialogue between the different parts of a bicycle was recently overheard: "I am the greatest of you all," said the saddle, "have the highest position, and always sit before the bar. I offer a seat to my rider, and when he is thirsty, I allow him the use of my spring." The hub then spoke up as follows: "Don't listen to that conceited piece of cowhide; he makes us all sick. Why, the handlebars have the grip, the rims feel tired, the lamp is weak, the tires feel very much depressed, and even the sprocket wheel has the toothache." The tire wishing to distinguish himself, shouted to the cyclometer: "You've got wheels in your head." "You're full of wind," retorted the cyclometer. The crank, who also wanted to be heard, shouted up the tube to the head of the wheel, saying: "If you don't fork out that sovereign I lent you, I'll wrench your neck, brake your crown, and put you in chains." "Come off," he replied; "you only make your living by pedaling." The axle exclaimed: "Say, boys, the tire is going to blow himself, and invites us all to come down to the hub and have a ball!"—*New York Advertiser.*

Agencies Wanted.

SOME first class agencies in Hardware, Cutlery and Tools by a party who now has a prominent agency and has had twenty-five years' experience on the road. Address W. H. B., care HARDWARE, No. 143 Chambers Street, New York City.

"SCIOTO" for R. R. or Canal Work.

A thoroughly first class bolted barrow. Full sized Tray. Well planed, cleated, braced and bolted. Legs and cross pieces gained. Knocks down for shipping and is easily set up.

American Steel Abroad.

The Philadelphia *Press* says, editorially, the industrial revolution involved in the appearance of American steel in England has created a sensation out of all proportion greater there than here. How great the sensation is becomes apparent in the correspondence from the English iron district. English newspapers see in it the ultimate supremacy of our steel trade the world over. English steel masters face on one side the cheap labor and technical skill of Germany and Belgium, and on the other the dear labor and cheap materials of this country. English coke costs over $2 a ton, where Connellsville is $1.25 to $1.50. Yet our best furnaces use only 1600 pounds of coke to the ton of steel, when English furnaces use 2000 pounds. English newspapers are asking if the invasion is to be permanent. As it is based on a cheaper cost-sheet it has certainly come to stay. No country in the world can compete with $20 steel rails or billets at $15 or $16.

"I make whisky," said the moonshiner, "to make shoes for my little children!"

The judge seemed touched, for he had children of his own. "I sympathize with you," he said, "and I am going to send you to the Ohio Penitentiary where you can follow the shoe business for two years!"—*Atlanta Constitution.*

THE DIFFERENCE IN PRICE

between high and low grade rubber goods gives an idea of the difference in quality, but not a full idea—the difference is considerably greater than the price would indicate. Take two grades of ¾-inch water hose, one selling at five cents per ft., the other at ten cents. Now the labor cost in dollars and cents of making the five-cent hose is just as great as the labor cost of the ten cent—consequently the entire reduction in price must come out of the material. And, as the material forms only one item of the cost, *a 50% reduction on the finished hose means considerably more than a 50% cut on the material.* In other words, low-grade hose is considerably poorer than the price would indicate, and the lower you go the greater the disparity between the apparent and actual value. The converse is equally true—the higher you go in quality the more the actual value exceeds what you pay for it. **1846 PARA, TUXEDO AND DOUBLE DIAMOND HOSE BELONG TO THE LATTER CLASS.**

The Dictionary on Nails.

What can be said about a nail? The new "Century Dictionary," whose remarks on saws we discussed in the issue last preceding, manages to devote nearly two pages to this little article of the Hardware trade, and things connected with it. The first definition is devoted to the fingers and toes of humanity, with which we have little to do in this connection,—unless, for the benefit of careless clerks, we make a quotation from the ancient Babees Book, where is found the valuable advice to all who wait upon customers: "*Pare clene thy nailes.*"

In the Hardware line, the nail is defined as "a pin or slender piece of metal used for driving through or into wood or other material for the purpose of holding separate pieces together, or left projecting that things may be hung on. Nails usually taper to a point (often blunt), are flattened transversely at the larger end (the head), and are rectangular or round in section. Very large and heavy nails are called spikes; and a small and thin nail, with a head but slightly defined, is called a brad. There are three leading distinctions of iron nails as respects the mode of manufacture—wrought, cut, and cast. Nails are said to be seven-pound nails, eight-pound nails, etc., according as 1000 of the variety in question weigh seven pounds or eight pounds, etc., hence such phrases as six-penny, eight-penny, and ten-penny nails, in which penny, it is said, retains its old meaning of pound weight."

To nail a thing is to fix or fasten with a nail or nails; to drive nails into for the purpose of fastening or securing; such as to nail up a box, to nail a shelf to the wall, to nail down the hatches, etc.; to stud with nails. Figuratively, to nail a thing is to pin it down and hold it fast, such as to nail a bargain or secure by prompt action. It was Burns who said:

> "Ev'n ministers, they ha'e been kenn'd,
> In holy rapture,
> A rousing whid at times to vend,
> An' nail 't wi' Scripture."

Passing into the colloquial, to "nail to the counter" is to put a counterfeit coin out of circulation by fastening it with a nail to the counter of a shop; hence, figuratively, to expose as false.

Other definitions referring to the nail are Nailer; one who nails, who makes nails or who sells them; while a female nailmaker is referred to by Hugh Miller as a Naileress. A Nailery is described as an establishment where nails are made. A Nail Head is the head of a nail, and anything is said to be nail-headed when so shaped as to resemble the head of a nail.

A Nailing-Machine is one for forcing or driving nails into place; in carpentry, a feeding-tube for the nails, connected with a plunger or reciprocating hammer; in shoe-making, a power-machine closely allied to the shoe-pegger, used to drive small metallic nails or brads into the soles of shoes.

The Nail-Machine is a power machine for making nails, spikes, brads, or tacks.

A Nail-Maker is one who makes nails; a Nailer; a person connected in any capacity in the manufacture of nails.

A Nail-Plate is a plate of metal rolled to the proper thickness for cutting into nails.

A Nail-Rod is a strip split or cut from an iron plate to be made into wrought nails. A Nail-Selector is a machine, or an attachment to a nail machine, for automatically throwing out headless or otherwise ill-formed nails and slivers.

A countersunk nail is one having a cone-shaped head, like that of a screw; a cut nail, one made by a nail-machine, as distinguished from a wrought or forged nail.

"On the nail" means on the spot; at once; immediately; without delay or postponement; as, to pay money on the nail. This phrase is said to have originated from the custom of making payments, in the exchange at Bristol, England, and elsewhere, on the top of a pillar called "the nail."

Ready for Them.

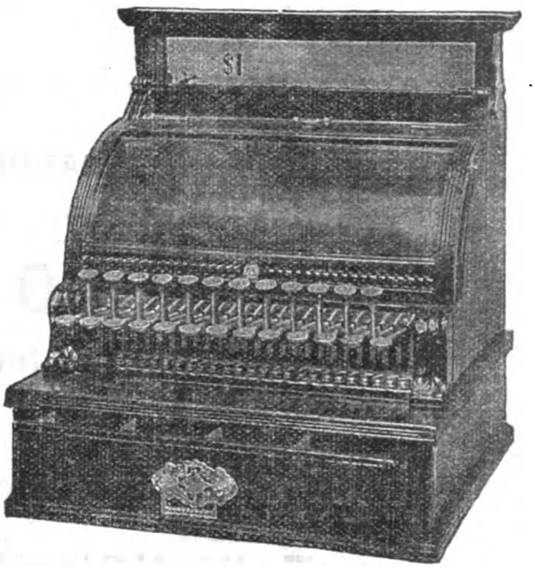
A New England town rejoices in a man with a peculiar voice. It is one of those voices given to ups and downs, and no one, not even the man himself, can tell when it is going to be up and when down. He will start to speak in a regular basso profundo, then suddenly, right in the middle of a sentence, he will pipe up high and shrill. To any one not accustomed to such extraordinary vocal conditions the effect is startling. The story goes that one day the man dropped into a Hardware store, the proprietor of which he knew very well. At that moment the proprietor was above stairs. Stepping to the stairway, the man began in his deep voice: "Look here, Brown, I want a pound of tenpenny nails!" Then high and shrill: "And ten papers of tacks."

The proprietor not only couldn't see the man, but he failed to recognize the voices. "All right, gentlemen," he replied, "I'll be down in a minute and attend to you both."—*New York Sun.*

We learn with pleasure through the New Departure Bell Co., of Bristol, Conn., that the New Departure Automatic Brake has been adopted by the Pope Mfg. Co., and they expect to apply it regularly on Columbias and Hartfords for 1898. "The device was subjected to thorough and exhaustive tests by the Pope Co., and the decision in its favor is a high compliment, as only such features are incorporated into those machines as have been demonstrated beyond question to be radical and valuable improvements. The brake was tested thoroughly and under the most severe conditions, far exceeding any possible conditions of actual service, fully demonstrating its remarkable simplicity and efficiency. Fitted with this brake the power to control the wheel is unconsciously increased and the steepest hills may be ridden safely as on the dead level. The rider does not even have to 'push the button'—the impulse of safety to self and machine is materialized simultaneously with the thought, as the action is absolutely automatic. The brake adds nothing to weight, and is invisible when on the machine, and with this added feature the high rank of Columbia will be fully maintained and still further advanced."

Announcement is made that the bicycle manufacturing business heretofore carried on under the name of A. U. Betts & Co., Toledo, Ohio, has been sold to F. W. France & Co., with headquarters at Rochester, N. Y., the consideration being in the neighborhood of $50,000. While the France concern will have absolute supervision and a controlling interest in the business, Mr. Betts and E. G. Eager will each have some stock. Mr. Eager has tendered his resignation as manager of the Viking interests, and will at once devote his time and attention to the new company's interests. A reorganization will at once take place, and the concern will in future be known as the Red Cross Cement & Rubber Co.

The American Wringer Co., No. 99 Chambers Street, New York, have recently issued their new catalogue and price list for the business of the season just commencing. The line of "ball bearing" wringers now manufactured by this company are here illustrated for the first time, and will undoubtedly prove very popular. The company state they have greatly improved the "Universal" and "Novelty" wringers, principally by "the addition of a steel spring and raised guide board," which are improvements the trade will certainly appreciate.



The keys to Japanese locks turn in the opposite direction from ours, and the lock is fastened to the jamb instead of the door.—*Chattanooga Tradesman.*

"SATISFACTORY RESULTS ON INVESTMENT."

Aladdin Lamp Co., Newark, N. J. [*Bicycle Lamps*]: We think that the Hardware trade is one of the best to handle the side line of bicycles and bicycle sundries, as it seems to be in perfect keeping with the other lines of goods which are kept in stock. We are also of the opinion that the trade will, in time, be controlled by a very few exclusive stores, and a large number of Hardware and carriage warehouses, where the bicycle can be sold at a legitimate price as a side line. Regarding HARDWARE it has always given us satisfactory results on investment made.

RETAIL TRADE RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Hardware Stores.

Bradley, Ill.—Crevier Bros.

DeKalb, Ind.—The Clark Hardware Co. Capital stock $10,000.

Fennimore, Wis.—Frank Hile.

Fort Wayne, Ind.—Koehlinger Bros.

Garnaville, Ia.—Ed. Keumpel.

La Place, Ill.—B. Hendricks.

La Rue, Ohio.—J. H. Campbell.

Malone, N. Y.—F. H. Tully.

Midland, Tex.—Burton, Lingo & Co.

Montreal, Can.—James Walker & Co.

Mt. Vernon, N. Y.—George D. Ferguson & Co. has been incorporated by George D. Ferguson and others to carry on general Hardware business. Capital stock $40,000.

Nashville, Mich.—Frank C. Boies.

Rochester, N. Y.—Long Mfg. Co. has been incorporated by Samuel W. Long and others to sell Hardware specialties. Capital stock $1000.

Rolfe, Ia.—J. P. Sherman.

San Jacinto, Cal.—Bradley Bros.

South Elbridge, Mich.—J. H. Stuber.

St. Thomas, N. D.—Childerhose & Gibson.

Thornton, Ia.—D. E. Howe.

Changes and Removals.

Atwood, Ill.—T. A. Flickinger has sold out to J. W. Hamilton.

Bancroft, Mo.—H. E. Hosman has traded his farm near Gallatin for a stock of Hardware in this place.

Beaver, Minn.—Albert Niebels, has just added Hardware stock in connection with his gun store.

Birmingham, Ala.—Mayberry & Watson, closed a deal recently for the three buildings on Third Avenue and 20th Street, and will erect thereon a five-story building after the Chicago style. The price paid for the property was $14.000.

Black Hills, S. D.—Samuel Voorhees has moved into larger quarters with increased facilities for doing business; located on lower Main Street.

Bloomington, Wis.—F. H. Fischer is now occupying the new Taylor Building with his new stock of Hardware. It is the first new building completed in the burned district.

Cairo, Ill.—Oliver McNulty, Hardware, etc., sold to F. Nordman.

Cecilton, Md.—Patrick Anderson is having an addition built to his corner store property in order to combine his dry goods and Hardware stores into one.

Dallas, Tex.—Smith & McCling have made a contract to have a second story placed on their building. The partition wall now between them and R. L. Warren is to be torn down and an 18-inch wall raised in its place.

Faribault, Minn.—Alex Carniel has admitted A. M. Hatch to partnership.

Flemington, N. J.—Edward Shepherd, of the firm of John F. Shepherd & Son, has purchased the Hardware stock of A. B Williamson, through his brother, John W. Williamson, of Califon.

Girard, Kans.—Albert Finger, Hardware, succeeded by D. K. Gise & Sons.

Great Falls, Mont.—Richard Barry, Hardware, closing out business.

Hastings, Minn.—H. F. Emery, Hardware, has removed to Stillwater.

Holstein, Neb.—W. T. Carson is adding to his stock a full line of Hardware, harness, etc.

Horton, Kans.—Hedge & Brown, Hardware, etc., sold to Beeler & Bishop.

Howell, Mich.—C. B. Elliott who sold his interest in the store on Saginaw Street has purchased a half interest in the Hardware store of F. P. Schroeder. The new firm will be known as Schroeder & Elliott.

Hoytville, Ohio.—Mr. Deiter has moved his stock of Hardware and furniture into the building recently vacated by J. O. Weimer.

Kokomo, Ind.—H. Jackson, has formed a partnership with Jackson Bros., of West Sycamore Street.

Lafayette, Ind.—The Warrenburg Hardware stock is being invoiced. J. Neumann will continue the business.

La Place, Ill.—Miller & Hendricks succeeded by D. S. Hendricks.

Lynn, Mass.—The Brockway-Smith corporation have purchased the stock of Orrin Welch & Son, the Hardware dealers, formerly located at No. 144 Monroe Street, and they are absorbing the same into their stock.

Marion, Ohio.—J. K. Milligan has sold his Hardware business.

Midland, Tex.—Murphy, Purcell & Connell have sold out.

Meilnor, N. D.—McMulty & Helgeson, Hardware, have sold one-half interest in their business to H. K. Pennington. The firm will be known as H. K. Pennington & Co.

Menominee, Mich.—Buhl Sons Co. have moved into new quarters.

Mt. Calm, Tex.—Glenn & Rowe of this place and Ingraham Bros. of West, closed a trade recently for the entire Dupree stock of Hardware and furniture. The stock invoices between $9000 and $10,000. They intend to conduct a large Hardware business under the name of Glenn, Ingraham & Co.

Mt. Carmel, Pa.—Before the building season closes, there will be a new three-story brick building on the Bergstrasser property on North Oak Street, between the building now containing the Hardware store and the one on the corner of the avenue. The new building will be 25x75 feet, covering three floors. The Hardware store is to be removed to the first floor of the new building.

Nashville, Mich.—T. S. James sold out his Hardware stock.

Newton, Mass. -C. Campbell has got his store nicely settled in the new location in the Stevens Building, and is adding largely to his stock of everything in his special line.

New Orleans, La.—Rice, Born & Co., Limited, succeeded by Henry Rice & Son.

New Philadelphia, Ohio.—Geiser & Kuenzli have dissolved partnership, Mr. William Kuenzli retiring. Mr. John Geiser will continue the business, and the firm will now be known as John Geiser & Son.

New York, N. Y.—Knight Mfg. Co., builders' Hardware, style changed to George D. Knight Mfg. Co.

Oskaloosa, Ia.—Terrill & McClure succeeded by Augustus Hamilton.

Park Rapids, Minn.—Tennis & Plummer have sold out to Fuller & Denning.

Preston, Minn.—Bennett & Heinrich, Hardware, M. M. Blunt of Howard, S. D., has purchased remainder of stock, and is now busy taking invoice.

Spava, Ill.—S. L. Marshall has disposed of his stock to Al. Stumpf, who will continue the business.

Springfield, Mass.—James A. Clough has leased his block on High Street to C. I. Russell & Co., the Hardware dealers, and they will occupy the entire block, having leased the property for ten years.

Syracuse, N. Y.—The Burhans & Black Co., the wholesale and retail Hardware dealers, at No. 136 No. Salina Street, have lately added to their accommodations the store next door south. This enlargement of sale facilities has been necessitated by the increasing business of the firm. This additional store will be devoted entirely to the retail trade, including builders' Hardware and sporting goods.

Whiteville, Tenn.—W. J. Andrews will soon have completed his fine storehouse, the lower room of which will be occupied by Webb Bros. & Co. as a Hardware store.

Business Embarrassments.

Ashland, Ohio.—F. M. Patterson, as assignee, sold T. B. Ambrose's Hardware stock recently, to the Ashland Hardware Co., realizing $2309, which includes about $100 worth of goods sold before the sale of the whole stock. The new purchasers are now disposing of the goods at cost.

Covington, Ky.—Thompson & Brown have assigned to C. C. Hagemeyer.

Laceyville, Pa.—Abel Platt & Son, Hardware, etc., reported to have made an assignment.

Lebanon, Pa.—P. S. Greenawalt, in the hands of the sheriff, on execution of $8000.

Springfield, Mo.—Thomas H. Rathbone has assigned to F. W. Hoyt. The full value of the stock is about $2000; liabilities not stated. Mr. Rathbone is among the oldest business men of this State, and is deeply sympathized with by the trade.

Recent Fires.

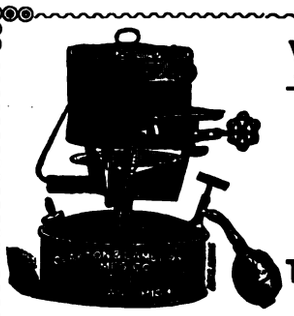
Delano, Cal.—Chas. A. Weaver & Co.; totally destroyed.

Marshalltown, Pa.—Shoudy Bros. Damage $3000; insured.

Milwaukee, Wis.—C. J. Smith & Sons. Damage, $1000.

Missoula, Mont.—J. W. Wilson; totally destroyed.

Prospect, Ohio.—Biddle & Cahill; insured.



Springfield, Ill.—John S. Chaper; totally destroyed.

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers, the country over are requested to contribute to this page. News of new factories or companies, changes, improvements, etc, will be gladly received, and promptly published.

New Companies, Etc.

Cleveland, Ohio.—English capital is to be invested in the weldless tube industry in this country. Several wealthy men of England, headed by Arthur Pilkington, who is known as the "Tube King," have joined H. A. Lozier, of Cleveland, in the formation of a new company, that promises to govern the steel tube output of the world. Mr. Lozier retains a controlling interest in the weldless tube industry, and has been made president of the new company. His plants in Ellwood City and Greenville, Pa., and the English plant in Toledo, Ohio, have been merged under one control. The price paid by the new corporation for the Lozier plants is placed at $3,000,000. The exclusive use of the Ralph Stiefel patents has been secured for five years. These patents govern the machines which produce the cold drawn steel tubing, and which it is said, reduce the cost of production fifty per cent.

Cleveland, Ohio.—The East End Brass Co. of Cleveland, changed its name to the Central Brass Mfg. Co.

Dayton, Ohio.—The Patterson Tool & Supply Co. was incorporated by William B. Patterson, Theo. E. Fritch, Frank B. Moorman, W. R. Kemper and George K. Young. Capital stock, $40,000.

Denver, Colo.—Colorado Steel Range Co. was incorporated, H. C. Stuchfield, E. M. Kent and Charles Kibler, incorporators.

Eldred, Pa.—The new knife factory of which C. H. Platt & Sons are proprietors, will soon be operation. The building is nearly finished and will give employment at the commencement to twenty-five hands. It is expected soon the number will be increased to fifty.

Johnstown, Pa.—The Board of Trade announces two new enterprises for Johnstown. The one is a shovel factory, at the head of which is Henry O. Shea, a former Johnson Co. foreman, with experience and capital. The other is an extensive addition to the Johnstown Radiator Works at Moxham. Both will employ a large force of skilled mechanics.

Nashville, Tenn.—The Gas Range Mfg. & Exhibition Co. has incorporated with the following chartered members: C. Fredericks, W. D. Meyers, M. A. Bullard, F. G. Lovelace and R. S. Connor.

Newark, N. J.—The Trackless Door-Hanger Co. has been incorporated to manufacture door-hangers and Hardware specialties. The capital stock is $100,000, all paid in. Lewis C. Van Riper, Philip Fitzpatrick, New York City, and John R. Weeks, Newark, N. J., are the incorporators.

Rochester, N. Y.—Long Mfg. Co. to manufacture Hardware specialties. Capital, $1000. Directors: S. W. Long, Janet Remington, H. F. Remington and Abraham Benedict of Rochester.

Rockport, Ohio.—The Norton Tool Co. was incorporated recently, with $50,000 capital, by George S. Duperon, Harry Dixon, W. T. Norton, W. M. Paazig and L. C. Manzelman.

Improved Conditions.

Anderson, Ind.—The Wright Shovel Co. is experiencing a return of its old time prosperity, and has orders in excess of ability to turn out stock. The company is unable to keep abreast of the demand of buyers and is compelled to increase its force of workmen. A telegram was sent to Pittsburg recently, asking for experienced shovel makers, who will be put to work at good wages the day they reach Anderson.

Brockton, Mass.—The work now being done at the factory of Dunbar, Hobart & Co., at East Whitman, is done under the orders of the reorganization committee that recently purchased the property of the Atlas Tack Corporation. The workmen here are in hopes that the new move will give them more work, and that the good, old times will come again to this factory which used to be one of the steadiest in town when the firm was Dunbar, Hobart & Whidden. In those days a few days of dull work were welcomed by the operatives.

Chambersburg, Pa.—The stockholders of the Landis Tool Works Co. met recently and by ballot decided to accept the site on the Funk estate, along the the Mont Alto railroad. The Land and Improvement Co.'s site was that on which the works formerly stood.

Durand, Mich.—F. E. Leonard, of Durand, has branched out in the manufacture of land rollers and wheelbarrows, and is looking for some one that wants to establish novelty works in the town.

East Bristol, Conn.—The Bristol Bell Co. that will manufacture P. & F. Corbin bells has commenced to lay the foundation for its new building. This building will be 300 feet long, but only one story in height. The work of rebuilding the dam will commence at once.

Hartford, Conn. — The Colt Firearms Manufacturing Co. has bought the stock, patents, machinery, and good will of the Gatlin Gun Co. An entire new board of directors has been elected. They met recently and elected John H. Hall, vice-president of the Colt Arms Co., president and treasurer. Frederick W. Prince is retained as secretary. The capital of the old company was $250,000, but the terms of the sale, which was conducted by J. G. Batterson, president of the Travelers' Insurance Co., are not made public.

Indianapolis, Ind.—Another new building is to be added to the plant of E. C. Atkins & Co., saw manufacturers. This will make the second steel structure of their great saw manufacturing plant, their intention being to ultimately replace their buildings with those of modern construction.

South Bend, Ind.—The Oliver Plow Co. do not wait for the procession to pass by when there is anything modern that they are convinced is a good thing. The works shut down for a week, recently, and the object was to make complete tests to ascertain the practicability of utilizing electricity and electric motors in running their immense machinery which now requires three engines of 750-horse power. Tests have been going on in department after department, and these will be submitted to an expert for a report. It is expected by electric motors to utilize much waste power now lost in transmission through shafts, pulleys and belts. The plan is to generate the electricity at the works, instead of steam.

Warren, Mass.—The Warren Board of Trade has been instrumental in securing the Slater Engine Co. for Warren, with a capital of $50,000; a cigar manufactory, which will soon employ forty or fifty workmen; the Bridgeport Valve Co., for which buildings are being erected and prepared, while it is more than probable that a large optical factory, and a novelty manufacturing company from Middletown, Conn., will locate in Warren in the immediate future.

West Newton, Pa.—The Stewart Manufacturing Co. will soon begin the manufacture of iron pumps. The company have secured control of the patents of a force and lift pump. The new department will give employment to fifty hands.

York City, Pa.—A. Schwenk, file manufacturer, of North George Street, is erecting a new shop at the rear of his lot considerably larger than the shop he now occupies.

Recent Embarrassments.

New Haven, Conn.—The W. Haskell King Co., manufacturers of Hardware specialties, with works at No. 65 Orange Street, filed a voluntary assignment through their president, W. Haskell King, in the probate court recently, naming George W. MacKenzie, of MacKenzie & MacArthur, trustees. The liabilities are $7500, of which Mr. King claims $6000. The assets are $100. The firm organized in Guilford eighteen years ago to manufacture window locks and catches, and eleven years ago moved to this city. They formerly employed fifteen hands, but for the past three years only three have been employed.

New York, N. Y.—A general assignment made by Joshua H. Cort of Amityville, L. I., and Warren L. Cort, of No. 21 Cambridge Place, Brooklyn, manufacturers of gas stoves at No. 41 Adams Street, Brooklyn, was filed recently in Brooklyn. Rufus O. Catlin is the assignee, and preferences to the amount of $10,500 are made in favor of A. G. Wiley, A. H. Scoville, Amelia A. Cort, N. Leonard Cort, Lilla C. Cort and John W. Chapman.

Quincy, Ill.—The Barlow Corn Planter Works has succumbed to the hard times and fallen into the hands of local creditors, whose claims amount in the aggregate to $25,000. The company's plant represents an investment of $100,000 and is one of the oldest manufacturing concerns in Quincy.

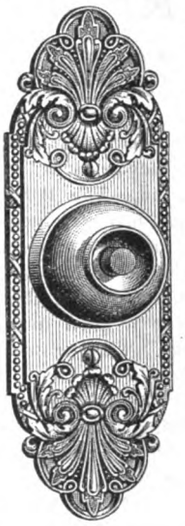
THE BANNER

Is the Cycle Lamp for '97.

None as handsome, as practical, nor as thoroughly and honestly made. Throws a powerful, broad light, having **a 3-inch optical ground double convex lens.** No lamp so easily cleaned. Has removable top burner and reflector, removable and **reversible oil pot.** The only lamp made with a positive wick-locking device—it acts on the ratchet. Your dealer should have them; until he has will send, carriage paid, for **$3.00,** to any part of the United States.



Rigid Bracket, adjustable to either Post or Fork; Ball and Socket Joint, 50c. extra.
Absolutely Wind Proof.
Will not Jolt Out.
No Solder to Melt.
Fills on Outside Oil Fount.
Solid Brass, Heavily Nickeled.
Burns Kerosene in Packed Fount.
No Splashing.
Handsome Side Lights.

5½ INCHES HIGH.

New York. Boston. Chicago. **PLUME & ATWOOD MFG. CO.** FACTORIES: Waterbury and Thomaston, Conn.

Because they are hidden

V Design.

is no reason why poor locks should be used in a building. A poor lock always causes trouble; it gets out of order, the woodwork is marred when repairs have to be made. Sargent's Easy Spring Locks are durable and will last while the building stands—that's as long as they are needed. They are easy working and give comfort to all who use them.

BICYCLE TRADE RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores.

Anderson, Ind. — The Wosterfield Bros.' store and repair shop in the Opera House block.

Beeville, Tex.—W. T. Landridge.

Florence, Ala.—A. P. Hartland, on Mobile Street. He will conduct a bicycle repair business.

Fort Wayne, Ind. — Koehlinger Bros., Hardware, sporting goods, etc., at No. 31 East Columbia Street.

Geneva, Ohio.—D. R. Grace, bicycle repairer, will open in the Reid Block, on South Broadway.

Grand Blanc, Mich.—George Jones.

Newport, R. I.—J. Engel will open at No. 163 Prospect Hill Street.

Newton, Mass.—W. B. Jones, bicycles and bicycle repairing, at No. 326 Center St.

Owatonna, Minn.—John Gladboch, Hardware, sporting goods, etc.

Toledo, Ohio.—The Truman Cycle Co., at No. 311 Superior Street.

Watertown, S. D.—Max Duffner, on Oak Street.

New Companies, Agencies, Etc.

Boonton, N. J.—The W. C. Hubbell Bicycle Electric Lamp Co., of Scranton, Pa., (organized under the laws of Pennsylvania) have rented the old box factory on Myrtle Avenue, and as soon as possible will begin the manufacture of their goods, consisting of bicycle electric lamps and other articles. The president, W. C. Hubbell, is a practical electrician, well known in the electrical world. We understand that they will remove to this place and begin business at once. The company will employ about 25 hands, mostly girls.

Bristol, Conn.—The P. & F. Corbin Co., of New Britain, will build a factory in Bristol for the manufacture of bicycle bells.

Camden, N. J.—The Audubon Mfg. Co. has been incorporated by George A. Aldrich, and others, to manufacture bicycles. Capital stock, $25,000.

Charleston, S. C.—The Aiken Bicycle & Athletic Association has been incorporated with a capital stock of $500.

Charleston, S. C.—The Southern Cycle Co. has been incorporated, with W. H. Welch, president; R. H. Simons, vice-president; F. R. Lett, treasurer, and F. J. Kentinzing, secretary.

Chicago, Ill.—The Warman-Schub Cycle Mfg. Co., Chicago, has been incorporated by John A. Warman and others, to manufacture bicycles. Capital stock, $200,000.

Davenport, Iowa.—The Mason Carriage Works will handle "Liberty" bicycles.

Detroit, Mich.—The Detroit Improvement Co. Limited, has been incorporated. The capital stock is $40,000, all paid in by patents, and the stockholders are John T. Dodge, $19,900; Horace E. Dodge, $19,900; Michael J. Dee, $100; Fred S. Evans, $100. The company will deal in patents concerning bicycles and bicycle parts.

Indianapolis, Ind.—The Bruner-Munger Mfg. Co., bicycles, has been incorporated.

Indianapolis, Ind. — The Central Cycle Mfg. Co. is anxious to locate its factory in Denver, if the merchants of that city will offer the company a good inducement to build their works. They manufacture the "Ben Hur" wheel.

New York, N. Y.—The Henry Hall Co., of Highland Mills, Orange County, has been incorporated to manufacture fishing tackle, and deal in bicycle supplies. Capital stock, $40,000. Directors, Henry Hall and Esther A. Hall, of Highland Mills; Robert Humphrey and Alexander G. Hall, of New Brighton, S. I.

Peoria, Ill.—The Peoria Rubber Mfg. Co.'s "Peoria" tire will be handled in Ohio by the McIntosh-Huntington Co., Cleveland.

Richmond, Va.—The Manly B. Ramos Co. has been incorporated, with Dr. L. Thurston, president; T. Wiley Davis, vice-president; Manly B. Ramos, secretary and treasurer, to conduct a general merchandise business, to sell, make and repair musical instruments of all kinds, also all musical supplies, bicycles and sporting goods generally. The capital stock is not to be less than $1000, nor more than $15,000.

Wallingford, Conn.—The Treat Mfg. Co. has been organized to manufacture bicycle handles and sundries. Capital stock, $3000.

Waterloo, Iowa.—The Waterloo Mfg. Co. has fitted up basement of its large building on Bridge Street, for the making of high grade bicycles. The wheel will be called "The Garland."

Wilmington, Del.—The McLear & Kendall Co. has commenced the manufacture of bicycles. It is making the "Belmont" wheel.

Wrightsville, Pa.—H. Smith has taken the agency for the "Elm" bicycle, and will also carry a line of bicycle sundries.

Changes and Improvements.

Galveston, Tex.—John A. Payment & Co. William Falkenhaven retires; J. D. Burkehead admitted.

Hartford, Conn.—The Pope Mfg. Co. will erect new three-story factory building.

Hawarden, Iowa.—C. L. Stewart has been succeeded by M. J. Finch.

Houston, Tex.—C. L. & Theo. Bering, Jr., dealers in stoves, bicycles, etc., will double the size of their store.

Jacksonville, Fla.—The Columbia Bicycle Agency, Tom F. Harris, manager, Main Street, has moved into new and larger quarters on Bay Street.

Kearney, Neb.—H. S. Lambert has been succeeded by W. E. Jakway.

Louisville, Ky.—Elzy & Manuel, bicycle repairers, succeeded by Thos. E. Elzy.

Malden, Mass.—C. W. Coombs & Co., bicycles, have dissolved partnership.

Manistee, Mich.—Haskins & Olson, bicycle repairers, succeeded by Charles Haskins.

Savannah, Ga.—Lindsay & Morgan intend going out of the bicycle business.

Recent Embarrassments.

Boston, Mass.—Fenway Cycle Co.; reported to have made an assignment.

Freehold, N. J.—A. A. Zimmerman Mfg. Co., bicycle concern, organized three years ago, with Champion Arthur A. Zimmerman as the principal stockholder. J. F. Russell has been appointed temporary receiver. The Vice Chancellor granted a rule for cause to be shown why the receiver should not be appointed permanently. The liabilities of the concern are placed at $17,000. The assets are made up of real estate valued at $3000, and machinery and stock of an uncertain value, according to the bill of the complainant.

Grand Rapids, Mich. — The Hamilton Kenwood Bicycle Co. has failed, having filed mortgages amounting to $67,000. Slow collections.

Middletown, Conn.—The Worcester Cycle Co. has been attached.

Minneapolis, Minn.—H. A. Jacobs, reported to have made an assignment.

New Haven, Conn.—The New Haven Chair Co., manufacturers of bicycles and rolling chairs, have applied for receivership, and E. C. Mersick and Isaac N. Dann, president of the company, have been appointed receivers. The liabilities of the concern are reported to be about $85,000, and the lack of capital and business depression are given as the cause of the failure. The assets are not known.

St. Louis, Mo.—Grand Avenue Cycle Co. Harry C. McLean reported to have made an assignment.

St. Louis, Mo.—Shepherd Mfg. Co., bicycles, reported to have made an assignment.

St. Louis, Mo.—The Tilden Cycle Mfg. Co. made an assignment to James P. Williams, trustee for the creditors. The value of the property, which consists of a stock of bicycles, office and store fixtures, bills, accounts, etc., is about $4000. The company was doing business on the south side of Olive Street, between Twelfth and Thirteenth.

St. Louis, Mo.—Tidd Cycle Mfg. Co.; reported to have assigned.

Terre Haute, Ind. — The Terre Haute Mfg. Co., manufacturers of the Scheuer separable tandem bicycle; the Whiteley Malleable Casting Co. have asked for receiver for the above named company, alleging the company owes $60,000. Judge Piety issued a restraining order pending the hearing for a receiver.

Toledo, Ohio.—Ojisto Cycle Co.: mortgagee sale reported advertised.

Recent Fires.

Athens, Mich.—Wm. Grills, bicycle repair works, damaged by fire, at a loss of $200; no insurance.

Portland, Ore.—Frederick T. Merrill Cycle Co., destroyed by fire. Loss, $40,000; insurance, $8000.

STERLING BELLS.

One Best THE Sterling.

Bells of all Description.
Send for Catalogue.

N. N. HILL BRASS CO.,
East Hampton, Conn.

Bells.

The belle of the ball on her escort leaned,
And so very happy the dear girl seemed,
That he took her aside to a cozy retreat
And told her the story that's always so sweet.

She perked up her lips, so enticing and fair,
And his own were reaching the heaven that's there,
When she said, "Dear boy, this is only a sell.
You'll first have to buy me that 'Climax' bell."

The new 1897 model "CLIMAX" Bell possesses without doubt the most improved Lock Clamp known. Can be adjusted to the Handle Bar quickly without removing the screw, thus saving all vexatious worriment in the operation, and at the same time presents a more attractive appearance than any other kind of an attachment.

We have just published a handsome little booklet to be carried in the vest pocket, containing lots of valuable information for the benefit of wheelmen. Send us a two-cent stamp and we will mail you a copy.

THE ONLY "PERFECTION" WATER ELEVATOR AND PURIFYING PUMP

It is the simplest structure for raising water on the continent; guaranteed never to freeze. . .

Dealers, get in line and sell your trade an article you can guarantee for ten years. The chain or buckets is the principal factor in any elevator. The **Perfection Bucket** is cut by die in one piece of **Black Open Hearth Steel** folded together by double lap seams, and the entire chain **Galvanized** after **Construction.** Others are made of several pieces of galvanized iron soldered together. Simply this one feature is a sufficient guarantee that the **Perfection** has no equal. It is handled by all leading jobbers throughout the world. Call for the **Perfection.** Take no substitute.

For full particulars, circulars, etc., address the sole manufacturers.

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

CRONK'S

Combination Fencing Plier.

This newly invented fencing tool is needed by all people that build or have occasion to remove or repair wire fence, as it is made with two staple pullers, two hammers and two button cutters. They are the same heft as the 1½ Maydole Hammer, and they are made of forged tool steel. No good farmer will be without one. They are warranted to cut No. 8 hard or No. 6 soft wire. Like the celebrated Cronk Plier they are fully warranted in all respects. No. 12, 11 in. long, $12.00. Dis. . . .

CONDENSED BUSINESS WISDOM.

"ONE OF THE BEST MEDIUMS."

Lane Bros., Poughkeepsie, N.Y. [*Hardware Specialties*]: One thing we know—we get the trade, and have good reason to believe that HARDWARE has in the past been one of the best mediums for our large trade and the popularity of the Lane goods.

"NEARLY FROM THE BEGINNING."

Samson Cordage Works, Boston, Mass. [*Cordage*]: We have had our advertisement with you nearly from the beginning, and we know no reason why we should not continue it.

"WOULD NOT BE WITHOUT IT."

H. M. Seitzinger, Wilkesbarre, Pa.: Enclosed please find my check for $1 for renewal of subscription to HARDWARE. I would not be without your paper nor should any one handling electrical supplies.

"JUST WHAT HAS BEEN WANTED."

W. P. Walter's Son, Philadelphia, Pa.: Enclosed please find $1 for renewal to HARDWARE. We think your paper is just what has been wanted for a long time for the retail Hardware trade.

"WELL PLEASED WITH 'HARDWARE.'"

W. W. Johnston, Bartlett, Ohio: Enclosed find $1 to pay my subscription to your journal. I am well pleased with the paper, and think it would pay all dealers in Hardware to take it.

"LIKES IT."

A. D. Matthews, Liberty, Me.: Enclosed find check for $1 to pay for HARDWARE for another year. The paper I like much.

"WELL WORTH THE MONEY."

A. A. Case, Pittsford, Mich.: Enclosed please find $1 to pay for my subscription to your paper. I think it well worth the money.

"ALL WANT TO READ IT."

H. E. Iseman, Prattsville, Mich.: The boys all want to read HARDWARE as soon as it reaches us, and are delighted with it.

"WHAT EVERY MAN WANTS."

C. A. Fisk, Helena, Mont.: HARDWARE is what every man wants, who hopes to gain success in the Hardware business.

"THE BEST OF ALL PAPERS."

S. I. King, Brighton, Mich.: I received a specimen copy of your paper dated October 10th, and I like it best of all the papers I have ever seen, devoted to the retail trade. Enclosed find $1 for which send me HARDWARE one year.

"A DOLLAR WELL INVESTED."

John T. Merimee, St. Mary's, Ky.: Enclosed please find $1 in payment for another year's subscription to your valuable paper—a dollar well invested, I believe, for it keeps me posted.

"CANNOT FAIL TO HELP OUR BUSINESS."

J. C. Tanger & Co., Hanover, Pa.: Please find $1 enlosed for one year's subscription. After examining a specimen copy, we think it one of the best, and that it cannot fail to help us in our business.

"WOULD NOT BE WITHOUT IT."

H. D. Wyman, Mt. Dora, Fla.: You will please find enclosed check for one year's subscription to HARDWARE. I think a great deal of your paper, and would not be without it.

"NO JOURNAL ITS EQUAL."

Hendricks & Stall, Thayer, Kan.: While we are doing business a great number of miles from New York, we know of no journal that we consider the equal of your paper.

"PRIZED IT VERY HIGHLY."

A. J. Pellum, Ranger, Texas: Enclosed find money order for $1. Please credit my account with the same. I prize your paper very highly and cannot afford to be without it.

"USEFUL AS AN ADVERTISING MEDIUM."

Smith & Egge Mfg. Co., Bridgeport, Conn. [*Traps, Locks, Chains, Pulleys, etc.*]: We have found your paper very useful as an advertising medium.

"THE BEST WE HAVE SEEN."

Massey & Thompson, Monroe City, Mo.: Place our name on your subscription list. Your paper is the best thing we have seen in that line.

"CANNOT GET ALONG WITHOUT IT."

T. C. Lamson, Elizabethtown, N. Y.: Please find enclosed $1 for HARDWARE for one year. Can't get along without it.

RESERVOIR PUNCH

For Euchre and Whist Parties.

This Pocket catches the pieces punched from Tally Cards, thus preventing a littering of the carpet.
Is hinged, can be opened, emptied and closed in an instant.
Of great value to Railroads as it prevents the replacing of pieces punched out of monthly or commutation tickets.
Also valuable in Restaurants where punch tickets are used.

"A Good Medium for Advertising."

Edw. K. Tryon, Jr., & Co., Philadelphia, Pa. [*Bicycles, Fire Arms, Sporting Goods*]: We consider the Hardware dealers as the legitimate and best class of trade to handle bicycles, and as HARDWARE reaches a great number of them we consider it a good medium for advertising this line. We think that sooner or later the bicycle business will be done almost exclusively through the Hardware trade, and in order to keep our line continually before them we shall continue to advertise in your columns.

Gilbert's Rival Ash Sifter.
House Furnishing Wire Goods.

44 Cliff Street, NEW YORK.
148 Lake Street, CHICAGO.
Factories: GEORGETOWN, CONN. CHICAGO, ILL.
ESTABLISHED 1818.

THE OLDEST AND LEADING MANUFACTURERS OF GALVANIZED WIRE GOODS IN AMERICA.

"Pennsylvania" Fruit Picker

This Cut almost speaks for itself—the device being so much like the human hand, shows at once the utility of the article.

AS A FRUIT PICKER IT HAS NO SUPERIOR.

It is made of Heavy Galvanized Wire, and Easily Adjusted to a Pole. It has been sold for several years, and the demand (as it is becoming known) is steadily increasing. The difficulty of detaching fruit and securing it unbruised is apparent to everyone so engaged. This overcomes the difficulty, and saves the finest fruit which commands the highest prices.

THE LOW PRICE AT WHICH IT IS SOLD

brings it within the reach of those who have but little fruit to gather as well as those who have large quantities. *Price, per dozen, $5.00.* It will gather Apples, Peaches, Pears, etc.

MANUFACTURED BY **EDWARD DARBY & SONS,**

233-235 Arch Street, PHILADELPHIA, PA.

"Goodell's" Turret Head Glass Cutters.

(Patented March 31, 1896)

SIX CUTTERS. Carefully Hardened, Ground and Tested before mounting. Nickeled Frame, Rosewood Finish Handle.

A GOOD THING.

IT'S IN THE TEETH.

The Patent "REFORM" Curry Comb is composed of three shallow, oval trays, with corrugated edges. The parts are struck up from a fine grade of cold rolled steel, heavily tinned and bronze lacquered, firmly riveted together and warranted not to rust. The outer dimensions are 6½x4¼ inches and by reason of the large cleaning surface and peculiar arrangement of teeth, the comb will do its work with a large saving of time and labor, cleaning with equal thoroughness both long and short coats. There are no places to accumulate hair and it will not tear or injure the brush, the comb being quickly freed from accumulation by giving its face a gentle tap.

"Replies From All Sections."

McIntosh-Huntington Co., Cleveland, Ohio. [*General Hardware and Bicycles*]: As an advertising medium, we have recently had occasion to test HARDWARE in a manner that would give us some idea as to how successful it can be used. Our advertisement did not occupy a very prominent position, but was of a character to excite the cupidity of the reader. We found that within two days after your paper came out, we commenced to receive replies from all sections of the country to the advertisement. This would seem to be sufficient proof that yours is a good medium.

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted to the Hardware Trade.

Editorial Trade Review.

After contact with the school of severe experience through which the Hardware trade has passed in recent years, it need excite no wonder that the temperament of the average buyer is anything but a speculative one. The fact that prices are the lowest known, in many branches of the trade, and sufficiently irregular, hazards the belief that quotations might be shaded for a desirable stock order. Still, the trade prefers to take no chances, and will wait until some of the uncertainties now prevalent are dissipated; the unsettled tariff agitation forming one of them, and promising prognostications of future crops indicating another, before they can screw their courage to the sticking point on the matter of stock orders.

The prevailing lack of confidence, however, which until this year has been too pronounced to be argued down, is now disappearing like dew before the rising sun. Encouraging news on every hand producing a spirit of hopefulness worthy of cultivation, may well be called the dominant factor in the present situation of affairs.

The reports of the improved conditions prevailing among the Western farmers which has enabled them so largely to pay off existing mortgages, more than anything else, point to a future that will create an epoch in the history of the country and bring to an end a period of depression that will ever be memorable.

When the farmers know a prosperity founded on large crops and good prices, the effect permeates the entire body politic, and is visible in its results in so many directions that the dawn of prosperity is readily traceable; store accounts, long standing, are settled up; new machinery ordered, making an extended area of cultivation possible; railroad earnings are increased; the surplus money gravitates to the centres, where even at low rates of interest some use can be made of it; manufacturing interests are stimulated, and in every part of the world where our cereals find an abiding place, the products of our looms and forges go hand in hand, seeking new fields for development, new footholds to maintain.

We have ample capital for almost any rate of expansion that may be possible, but within our own boundaries we have opportunities enough to use every dollar of our resources, as soon as the old timidity departs from the hands that hold the money bags, and fills the safe deposit vaults with negotiable securities.

What Fools These Mortals Be.

The various labor troubles which are the causes of industrial distubance in many places, frequently result in driving away many established and well organized plants from the cities that for years have been nourished by their growth. Conditions sometimes prevail in consequence of local sympathizers who are unfamiliar with the fundamental principles underlying mechanical progress, being the instigators of the disturbance. Many of these towns are practically dependent upon the established industries thus jeopardized, and until the works are closed down for good, the befooled workmen fail to realize the extent of damage created by their unjustifiable proceedings.

A recent case of this description is the departure from Paterson, N. J., of the old-established file works of Kearney & Foot Co.; the operatives of which, numbering 500, have for the last three months been on strike demanding "six day's work a week at full rates," after having agreed to accept a reduction of ten per cent., made in order to give them six days' work a week instead of four. In consequence of the long continuance of these unsettled conditions the Kearney & Foot Co. have been compelled to purchase an extensive plant situated in Kent, Ohio, and having already forwarded from Paterson enough machinery to place 250 operatives to work, will be in running order early in September, and may say good bye to Paterson.

They will take with them only the heads of the several departments, and a few of the workmen who were compelled to join the strikers contrary to their wishes; from a long list of skilled workmen now in their hands, they will recruit an extra force when required, giving precedence where possible to such old hands as were friendly to their interests throughout the present trouble.

The sympathies of the intelligent observers in the trade, are with the Kearney & Foot Co. in the move which they have been compelled to make. They have been located in Paterson twenty-five years, and among their 500 employees ninety per cent. of them were educated by them in every essential requirement in the work they have now suspended the operation of; as in all large factories the old hands have been misled and misguided by a few aggressive shouters with a record for disorganizing influences and who are never satisfied to leave well enough alone.

The Kearney & Foot Co. have always ranked among

Digitized by Google

those fair-minded manufacturers who when compelled by stress of circumstances or conditions of trade, to ask concessions from their men as to prices of labor, have always without solicitation, restored the old rates as soon as business justified their doing so; firmly believing the best interests of a manufactnrer is in having his workmen possess a contented and happy frame of mind, believing that the interests of both employer and workman cannot be otherwise than identical.

The foundation of this strike which has lasted three months, was of this character: About two months prior to the strike, the works were running on four days' time; it was proposed and accepted by the men, that if they would agree to a cut of ten per cent. in the prices then being paid, a gain in time would at once be made, running six days a week instead of four; agreeing that if the factory should be compelled to return to four days' work again, full pay would follow for the more limited employment. With the statement that "business was good and they wanted full pay as well as full time," the men decided to strike; notwithstanding the fact that there was not a file factory in the country running except on reduced time, and one had been shut down entirely for over six months. As business conditions didn't warrant it, the company could not concede the demand, and this precipitated the strike.

Had the local authorities of Paterson done their full duty and furnished protection to the hands who were willing to work, as against the riotous mob of artisans from other industries, the works in Paterson would not have been thus partially abandoned by the company. After having built their own works at Riverside, N. J., including their own sewer to the river, they had also supplied themselves with artesian wells and built their own roads, putting in hydrants and placing the factory in shape to receive the benefits of insurance which such advantages entitled them to. All they asked from Paterson in return for $25,000 taxes they had paid, was proper protection for their men from lawlessness and intimidation by strikers. This protection Paterson was either unwilling or unable to furnish, and a long period of idleness has been the result. It would seem as though this was but the beginning of the end, and that unless the municipal authorities awaken to the necessities of the hour, other factories than the one commented upon, will be compelled to seek "green fields and pastures new" where such unprofitable conditions cannot prevail.

An Unqualified Endorsement.

The efforts being made by the newly-organized Merchants' Association of New York are rapidly demonstrating their successful character. The city of New York has for years stood still while every means has been taken by other mercantile centres to pull trade away from us under one pretext or another, until finally the idea has become prominent in the minds of many buyers, that there was no urgent necessity of frequently visiting our metropolitan markets, filled as they are with all the known products of the art centres of Europe, and the industrial resources of noted foreign countries possessing almost unlimited facilities for their production.

Many new buyers will be attracted to our city from all over the country, the reduced rates made possible by the labors of the Merchants' Association assisting in no small degree to provide a stimulus.

The fact of an interest being taken by all classes of trade through this concert of action to extend a welcome to the ambitious merchants of other localities, will produce a more home-like feeling among our visitors, many of whom will be accompanied by some of their families, who have long anticipated a trip of this kind, combining business and pleasure. Hotels and public conveyances will feel the beneficial influence of this seasonable addition to our population.

To the old merchants who are still "in harness," it will seem again like the congenial days of the past, when in the spring and fall seasons our streets were congested by the strange faces of buyers and their kindred, during the six or eight weeks usually devoted according to locality, to the purchase of such stocks of goods as were needed in every hamlet throughout the States.

Let the good work go on, and in the genuine revival of business of every kind which is now visibly in progress, we shall be able to lay the foundation of good work for the future, already made evident in the 7000 members which the Merchants' Association have placed upon their records within a single month of their incorporation.

New Members Hardware Club.

At a meeting of the Board of Governors of the Hardware Club of New York, held on July 20th, the following gentlemen were unanimously elected to membership:

A. C. Morrison, Chambers and Pearl Streets.

W. B. Fox, Jr., No. 97 Chambers Street.

George F. Trowbridge, No. 35 South William Street.

William F. Molloy, No. 19 Murray Street.

Merrill Watson, Central Expanded Metal Co., No. 256 Broadway.

Gordon W. Burnham, Benedict & Burnham, No. 253 Broadway.

George L. Storm, No. 21 Murray Street.

B. W. Gage, No. 280 Broadway.

Ross M. Turner, vice-president United States Export Association, No. 143 Chambers Street.

Charles H. Storm, Chicago, Ill.

A New Field Open.

The National Cash Register Co., Dayton, Ohio, have just added some improvements to their No. 79 cash registers, which make them available in stores where it is sometimes necessary to register single transactions amounting to more than $100. The registering capacity of these machines have been increased from $99.99 to $999.99, while at the same time it is possible to keep a separate account of the sales in the different departments of the store or to keep separate the sales of each clerk in the store. This should open a new field for the use of cash registers.

The Secretary's Hat.

The session was of an informal nature and was devoted to Secretary Fernley, exclusively. He requested all of those present to deposit written questions which they would like to have answered, in a hat, and then answered each as he came to them.—REPORT OF IOWA HARDWARE JOBBERS' ASSOCIATION.

Did the Hardwaremen of Iowa
  Surmise where they were at,
When the genial secretary talked to them
  Through the lining of that hat?

Not every man there is, whose words
  Come out so true and pat;
For few there are who have learned the art
  Of talking through a hat.

Digitized by Google

After Studying the Foreign Markets.

At an informal dinner given in his honor July 12, at the Queen City Club, of Cincinnati, Ohio, Charles Davis, president of the Davis & Egan Machine Tool Co., in the course of an address made use of the following interesting illustrations having reference to a recent trip in Europe from which he has just returned.

Referring to the prevalence everywhere of the products of American skill, he said: "It may not be generally known that the Belgian state locomotives are equipped with lubricators made on Spring Grove Avenue, Cincinnati, and brass goods made here are in evidence in all parts of Europe. Pumps, desks, veneers and many other similar products are exported largely. Cincinnati iron, steel and woodworking machinery is employed in all the great ship yards and gun works of Europe, and is now running day and night in Russia turning out locomotives and cars that will soon be flying across the steppes of Siberia to the Pacific Ocean and down through Manchuria to the Yellow Sea."

His views on tariff restrictions have been broadened by foreign travel: "A high tariff fosters fictitious prices and false ideas of value.

"A thing is worth only what it will bring in the open markets of the world. You cannot fly in the face of the great law of supply and demand. Your marking up of tariffs will be of no more permanent value than the action of the Irishman who said he had made $3000 in one day by marking up all the goods in his store.

"There is now a rumble and muttering of discontent in Europe at the raising of our tariff, and unless we have a care the growing trade in the United States will there be shut off by retaliation.

"In France the duty on American machinery is 50 per cent. greater on one class, 25 per cent. on another, and 15 per cent. upon another, than the same machine coming from England, or even from her hated rival, Germany. Hardware and other iron products are also higher. This was retaliation as against the increased tariff act on French products in our tariff act of 1890.

"Austria, Germany and other countries are contemplating similar action."

In this connection he frankly confesses: "I remember in former times when I used to stay at home all the time, and thought I knew it all. I used to talk much about a tariff as a protection to American labor. The only protection to the American workingman is his brains and intelligence—nothing more or less. American superintendents, foremen and workmen are all through Europe getting 50 per cent. more than they received here. You cannot legislate brains into a man or out of him.

"We are sending a couple of men from our works next week who will receive in Germany as a starter $24 per week as against $15 here.

"The people of the United States will never learn the industrial situation of Europe by rushing up the Alps and down the Rhine. The only way is to dig right down into the locomotive works, gun works and machine shops.

"Watch the men at their work, get the expression of their eyes, that have been called 'the windows of the soul.' You will see them dull and listless. The workman looks through the glass door at the end of the shop and sees probably the proprietor; there only because he is the son of his father.

"He says to himself, 'It is almost impossible that I can ever be in there.' Then despair siezes upon his heart and he plods on, like the galley slave, chained to his task.

"Not so with the workman in the United States. He looks through the glass door at the end of the shop and sees the proprietor there busy with his plans. He says: 'Very well, my friend, it was only a short time back that you were out here in the shop where I am now. Some day I will be where you are.' Then the star of hope rises high in his sight. He puts his lathe on a faster speed and the chips fly. The proprietor, seeing his work, makes him a foreman, then superintendent, and then a partner.

"A man like this needs no protection. Like Monte Cristo, 'The world is his.'"

He concluded an extremely interesting address with the following prediction: "Gentlemen, if the manufacturers of the United States will exert the energy that is latent in them, and Congress re-enforce our efforts with wise and beneficent laws, I predict that in a few short years we will, in a commercial sense, overrun Europe as, in a warlike sense, did the Goths and Visigoths of olden time."

Some Up-To-Date Topics.

The heated term is not prolific of live features even in the best of times, and an off-year is no exception. This is an off-year, and is so characterized by the trade. In other words, it marks the end of a memorable depression, and the hour before dawn is always darkest.

The passage of the new tariff law will at once alter conditions. We have had the same experience before. Our manufacturers and mill owners are simply awaiting the issue of the new tariff. They have promised us that they will operate their plants to the fullest possible capacity as soon as the tariff is out of the way, and we may expect they will do it. With this move activity will become general and prosperity be once more in the land. Travelers are awaiting this move. They will not rush headlong into the fray as they did last November; they will not travel in advance of prosperity, but with it. By doing this they will avoid the rush which will, no doubt, set in this fall. And by avoiding crowding the buyers they will also avoid being disappointed. Slow haste will be the watchword.

It is feared in some quarters the coal strike will delay autumnal movements. This is borrowing trouble. Had the strike eventuated a month later, serious contingencies would have arisen, but by the time the fall season is ready for exploit, the strike will have ended. This is the opinion of the best informed men who are nearest the seat of the trouble. The strike occurring at this juncture may be considered a blessing in many ways. It will tend to clear up the market and foster better prices all round. Vesselmen will be the ultimate beneficiaries, and a busy, profitable navigation season means a great deal to all the lake ports. The iron and Hardware interests will be more directly benefited than the other industries, and we may therefore look for brisk fall movements at all the important lake ports, late though they might be.

The wholesale trade are not at all disappointed at the developments for the first half-year. The volume has been ordinarily good, and collections were no worse than in other off-years. In fact, they were better, for the trade is now on better cash-paying basis than ever before, a more cautious credit system having weeded out the irresponsible element. As was generally expected, July wound up with the cycle trade thoroughly demoralized, but even the low cash prices which are now realized entail a fair profit and save the trade from disintegration. These price-cutting features will not recur when the market has returned to normal conditions.

This may be properly termed the season's bargain interim, and old custom seems to have perpetuated it among our merchants. Whenever a season is winding up, closing-out or stock-reducing prices will prevail. So when our merchants are now offering summer specialties at reduced prices, it is no index that times are hard, or harder than at previous seasons. The public has come to expect lower prices at this period, and a fool the merchant would be who

Digitized by Google

would leave his competitors enjoy undisputed the rare opportunity of "cleaning up."

While the building season should be at its height now, it is just commencing. This is all-evident. The delay was due to the same causes that retarded other enterprises. The dealers tell me that the building season will be in full bloom within sixty days. They have the proofs in hand. And as the beginning of winter is no longer the terminus of the building season, thanks to the evolution of modern architecture, large movements in builders' and plumbers' Hardware and structural iron may be looked for during the latter part of the year. J. B. RINDFLEISCH.

Morgan & Wright Single-Tube Tire.

Morgan & Wright, of Chicago, have just issued a neat leaflet giving a section of their famous tire for bicycles, in which they announce that they are now prepared to furnish single-tube quick-repair tires. In regard to its special points of interest, the company say: "By new and improved methods, we are making and are now ready to place upon the market a single tube tire free from porousness, which we believe will meet the approval of our friends. Its advantages are as follows: Has quick-repair patch, which is far easier to use, more certain than plugs; does not deface or weaken casing, and at same time permits the use of any single-tube outfit on the market. Vulcanizing large holes in casing is made easy by the ability to slit the casing next the rim down to tube, open up and insert patching stock, patch tube, and lace casing, thus making a double-tube repair on a single-tube tire. The valve is attached to a cemented base, which can be reached through lacing, and can be repaired quickly and certainly. The chronic leaks shown in other single-tubes are entirely prevented by our system of manufacture. The manufacture of this tire will in no way interfere with our regular double-tube tire, which permits of a wider range of repairs than is possible in any single-tube construction. This tire is made under M. & W. patents and sold under the old Morgan & Wright guarantee, which has stood unchanged from the beginning of our tire busines."

The Interlocking Rubber Tiling.

At the suggestion of Frank Furness, the well-known architect of Philadelphia, an extremely valuable series of tests has been carried out to determine the relative durability of various flooring materials. The experiments were undertaken on May 15th by William Gray & Sons, who are the largest contractors for stone work in Philadelphia, and they were made under the supervision of Mr. William J. Gray, who has given his affidavit as to the accuracy of the results as herewith published.

In carrying out the tests the specimens were cemented to identical blocks of sandstone, each of which weighed 21 pounds. The samples presented a surface 6 inches square, and the thickness of each sample was the same as that commonly used in the various floorings. Thus the interlocking rubber tile specimen was three-eighths of an inch thick, the No. 1 Vermont marble was 1 inch thick, the Oregon pine 2¼ inches thick, and so on.

The samples were all placed face downward upon a horizontal iron rubbing wheel 10 feet in diameter, which was run for a space of one hour at a speed of 75 revolutions per minute. A suitable frame held the blocks loosely in place and prevented them from rotating with the wheel, care being taken to let the full weight of the blocks bear upon the wheel. The face of the wheel was freely supplied during the test with the best sharp rubbing sand and water.

By far the best showing was that made by the interlocking rubber tile, which only lost one-sixty-fourth of an inch as the result of an hour's grinding. On the other hand, the marble mosaic collapsed altogether, the 1 inch strip being rubbed entirely away within fifteen minutes under a pressure of a little over half a pound to the square inch. The whole slab disappeared in thirty-five minutes under the same pressure.

Next to the rubber, the English earthen tile showed the best results, losing only one-eighth of an inch in thickness; and of the stones, the granolithic made the best showing, losing three-eighths of an inch, flagstone coming next, with nine-sixteenths of an inch wear. The marbles wore away very fast, No. 1 Vermont marble losing three-fourths of an inch. Their average resistance, indeed, was not so high as that of the woods.

One of the most curious results is shown in the action of the woods, where teak lost nearly double as much as the softer white pine, the wear being respectively thirteen-sixteenths and seven-sixteenths of an inch. Yellow pine showed the same wear as white pine, and the oak specimen lost the same amount as its great rival, Oregon pine, which was reduced by five-eighths of an inch.

The interlocking rubber tiling is manufactured by the New York Belting & Packing Co., Limited, No. 25 Park Place, New York City. See their advertisement on page 35 of this issue.

Death of Charles J. Lawson.

Charles J. Lawson, ex-mayor of Newburgh, N. Y., and the leading Hardware merchant of that city, died suddenly at his home, on Grand Street, Sunday, 18th inst. He had a slight hemorrhage, which seemed to affect him very much, and feeling his wrists, which had seemingly grown very cold, said: "I think my time has come," then lay back in his chair and expired at once. He was in his 55th year, and leaves a widow and two sons.

Mr. Lawson was the son of James T. Lawson, one of the old residents of Newburgh, and, upon his father's death, inherited considerable property, succeeding about 1865, to the Hardware business established by James S. Brown.

Mr. Lawson has always been a successful merchant, progressive in every sense of the word, of incorruptible probity and extreme conscientiousness. Possessed of a sympathetic nature, his heart was always open to appeals of the unfortunate, and many a heart in Newburgh has been made lighter by the charitable assistance of one who rarely let his right hand know what his left hand did in this respect.

Mr. Lawson has always been prominent in the affairs of the city. In addition to occupying for two years the highest municipal office in the gift of the people, he was one of the original members of the Board of Trade, was for many years president of the Almshouse Board, and at the time of his death he was a member of the Public Park Board and of the Board of Education. He was also prominent in the Masonic fraternity and in the Fire Department, being a member of Lawson Hose, named for his uncle. He was vice-president of the Newburg National Bank, and treasurer of the Newburgh Building & Loan Association. He was a member of the First Baptist Church and held the offices of trustee, treasurer, and superintendent of the Sunday school. He was also trustee and treasurer of the Hudson River Baptist Association, and treasurer of the Domestic Missionary Board of that association.

The Saratoga Gas, Electric Light & Power Co., Saratoga, N. Y., are rebuilding and rearranging their gas plant, and have let the contract for the steel work connected with the generator house roof and the roof over their cold storage building, to the Berlin Iron Bridge Co., East Berlin, Conn. The roofs have steel trusses covered with corrugated iron.

HARDWARE'S "Prices Current" are reliable.

An Advertising Novelty.

The Buhl Stamping Co., Detroit, Mich., among the advertising novelties which they are distributing this season, have a little booklet catalogue covering a line of their popular Rustless Milk Cans, with price lists and other information, the whole publication being in the form of a milk can of their make and of the size shown in the illustration herewith, which forms the front cover. As the covers are finished in silver bronze and the lettering is in white and blue, it makes a very pleasing and novel appearance, and prevents to a great degree the failure to preserve valuable information when printed in a miniature form.

The pages within this characteristic cover call attention to the merits of the Victor Milk Can made from cold rolled steel and containing in its construction the unmovable outside wrought iron protecting hoop which enables it to withstand the rough usage which is the customary fate of all milk cans. They also illustrate their Western (or Chicago) pattern, and Eastern (or New York) pattern, describ-

ing at the same time their "Elgin" and "Detroit" patterns of similar design but varying in some minor particulars. This entire novelty in the way of a booklet-catalogue, was printed in Spanish during the visit of the "Pan American" delegates from South America, and included in its contents their leading lanterns. The publication excited considerable favorable comment, and at the same time was made the subject of complimentary allusion to the progressiveness of this enterprising company.

Strathmore Deckel-Edged Papers.

The Mittineague Paper Co., Mittineague, Mass., are sending to those interested in fine writing, book and cover papers, samples of their new hand finished deckel-edged product which in other styles, and under their trade mark of "Strathmore," have already achieved an enviable position in the paper world. Those in the Hardware trade contemplating the publication of artistic booklets, or high grade progressive advertising matter, will thank us for advising them to send to above address for a set of their handsome samples.

Some Hints.

Always aim for the top rung; although you may never reach it, you will be pretty sure to find yourself farther from the bottom round for having made the attempt.

Don't find fault when you are given a difficult piece of work to do. The woods are full of people who can do the easy things. Try to lift yourself above the average.

Never attempt to give your employer advice uncalled for; he knows his own business best; but when you are consulted by him, tell what you think will be the best. If he don't abide by your decision, he will know your capabilities the better.

Should any one speak in a kindly way to you of any bad habit you may possess, don't get angry, but bear in mind they do it for your own good and personally have no financial interest in it.

Whenever the opportunity comes that you are asked to do something that is not necessarily required in your line, do it without grumbling and to the best of your ability, for you never know what the future has in store for you, and if you don't take advantage of your opportunities, small though some may seem, your life to some extent will be a failure.

In general, don't look for an easy time; the man who does, usually has a hard time trying to find it, and eventually wakes up to find out that the world owes him a living after he has earned it. W. A. M.

Annual Meeting Bissell Carpet Sweeper Co.

At the annual meeting of the Bissell Carpet Sweeper Co., held at their general office, Grand Rapids, Mich., on July 15th, the following directors were duly elected to serve for the ensuing year: Mrs. M. R. Bissell, Charles B. Judd, Maurice Shanahan, W. J. Drew, Robert E. Shanahan, Henry Idema, T. W. Williams.

At the same meeting, the following officers were duly elected to serve for the ensuing year: President, Mrs. M. R. Bissell; first vice-president, secretary and general manager, Chas. B. Judd; treasurer, Maurice Shanahan; second vice-president and Eastern manager, T. W. Williams; assistant secretary, Robert E. Shanahan.

A reduction in prices on all high grade sweepers was decided upon. Full particulars of the same will be announced to the trade by circular letter.

The Bissell Co. have under way several new and important features in mechanical construction that will be brought out during the coming feason, and which doubtless will be highly appreciated by the trade generally. This progressive concern is very much alive to the wants of buyers of carpet sweepers and the outlook for an increased demand in Bissell sweepers for the coming season seems very apparent.

The Oldest Plowmaker.

Chicago has the oldest plowmaker in the United States. His name is David Bradley, and he is at the head of a big manufacturing company on the West Side. Mr. Bradley first worked at the business in Syracuse, N. Y., in 1832. In 1835 he came to Chicago, which then numbered about 2500 inhabitants and a camp of several thousand Indians, to help erect the first iron foundry established here. Mr. Bradley was the first man to bring pig-iron into Chicago. In connection with the foundry which he helped to build was a machine shop, and the establishment soon began along with its other business the manufacture of plows. Mr. Bradley by the growth of his business was finally forced to build a little town of his own, which is known as Bradley, Ill. Mr. Bradley has passed his 85th birthday, but is still hale and hearty, and thoroughly enjoys the prosperity which hard work has brought him. The active business has been surrendered to his sons.—*Chicago Tribune.*

THE MICHIGAN HARDWARE ASSOCIATION.

The second annual convention of the Michigan Hardware Association was held in Battle Creek, on Wednesday and Thursday, July 14th and 15th, and was a success in every sense of the word.

A call of the roll showed the presence of the following members of the Association: Henry C. Weber, Detroit; C. F. Bock, L. B. Brockett. Frank M. Brockett, V. C. Wattels, G. A. DuBois, Battle Creek; H. C. Minnie, Eaton Rapids; John Popp, V. E. Widemann, G. W. Bruske, J. M. Morley, Saginaw; W. J. Boyce, J. B. Sperry, Port Huron; A. K. Edwards, C. M. Chamberlin, Fred W. Zimmerman, Kalamazoo; O. H. Gale, Albion; H. W. Webber, Geo. L. Mosher, West Bay City; C. E. Park, Flushing; Geo. Vernier, Jr., Mendota; H. C. Waters, Paw Paw; G. A. Kanter, Holland; H. C. French, Cassopolis; J. S. Cappen, J. G. Standart, J. M. Thurber, Casper Gnau, Detroit; H. P. Everett, Stockbridge.

The first session was held at 2 P.M., on Wednesday, and was called to order by President H. C. Webber. A prayer was offered by Rev. Lewis Brown, of Battle Creek, after which Charles F. Bock, vice-president, introduced Mayor Metcalf, who in a brief and appropriate speech, welcomed the convention to his home city.

President Webber next delivered an appropriate address of welcome, in the course of which he said:

THE PRESIDENT'S ADDRESS.

I have the honor of welcoming you to our second annual convention, which, judging from past experience, has been anticipated with considerable pleasure, not only from a business point of view, but a social one as well. Although the Michigan Hardware Association was organized only two years ago with a comparatively small membership, it has already demonstrated its value as a factor in developing and extending our mutual interests, as well as those of the Hardware business generally throughout the State.

Among other advantageous features which might be enumerated I would specify the following:

1. Its membership, with the exception of your humble servant, represents the best element in the Hardware business of this State.

2. It has resulted in bringing together men who have grown gray in the Hardware business, and who have, perhaps, never met hitherto in a social and business way, and the bonds of friendship thus established are likely to prove a source of satisfaction to all.

3. The exchange of business views and discussions pertaining to timely topics cannot fail in giving us all some new thoughts for careful consideration, which cannot result otherwise than mutually beneficial.

The past year was a very trying one to business men generally, not only on account of the far reaching effects of the national election, but the prevalence of the commercial depression which preceded it, and which was intensified during the latter portion of 1896. It may be an easy matter for some to assign certain reasons why business was dull, or has been dull, but it requires all the ingenuity of a merchant to successfully cope with a condition of business affairs such as we have all experienced to a greater or less extent. Undoubtedly we can learn, if we will, many useful lessons from the current course of events which ought to prove of value to us in directing our affairs in the future. I am now convinced, however, that future prospects are more favorable, and I think we can reasonably expect in the not distant future, a resumption of business activity similar to that enjoyed prior to 1893.

In reviewing our standing with our fellow Hardwaremen who have been approached as to going in with us, I have met many of our best and largest dealers, and they are awakening to the fact that we are a representative body, and I have no doubt most of them will join us and lend us their assistance in the future. What member is there among us who, after reviewing the work accomplished during the past year, is not imbued with a feeling of gratification and appreciation of our worthy organizer and the first president, Mr. Carleton? I know you all realize, as I do, the great pleasure of meeting business men who are identified with practically the same commercial interests, and by our mutual exchange of ideas we are all certainly benefitted. The consideration of topics and the decisions arrived at by such an organization as ours must prove more efficacious than any individual effort. In what other way than by organization can we accomplish what we are doing and enjoy the pleasure of social and business intercourse?

I regret to announce the loss of one of our very active members, Mr. Moye, of Marquette, who is in business in another State. May success follow him. We are also disappointed in not having the wise counsel of another of our members, Mr. Harvey, who, on account of ill health, has gone to Germany to take the Carlsbad baths. May his journey be a pleasant one, and we hope to have him back with us again enjoying good health.

Gentlemen, I thank you for your kind, patient attention. It is a pleasure for me to mingle with honorable business men in convention such as this, where the united purpose is the individual welfare of each. Long may this bond of unity prevail, and as the years go by may it increase until it embrace every reputable Hardware merchant in the State.

THE SECRETARY'S REPORT.

H. C. Minnie, secretary of the Association, then presented his report for the past year. This showed that there were now one hundred active members and one hundred honorary members. He also spoke of the work of the Association in other respects, with special reference to the new Lien Law, which had become a law in Michigan during the past year.

The first paper of the gathering was read by J. B. Sperry, of Port Huron, upon the subject "The Best Method of Creating and Maintaining Harmony Between Manufacterers, Jobbers and Retailers." Mr. Sperry touched upon the question of personal acquaintance, divided trade, the cutting of prices, back orders, substitution, prompt payments. etc. In the course of his remarks he said:

In making claims, we are quite apt to exaggerate the circumstances, thinking it is necessary in order to get our just dues. This has been done so often that the jobber and the manufacturer have to a certain extent lost confidence in the retailer. When differences arise why cannot the jobber or manufacturer give the traveling salesman authority to adjust these differences? This has been brought up in one of our previous meetings. Some have claimed that the traveling salesman has enough to do to sell the goods without collecting accounts or adjusting claims. This may be true, but the traveling man should be in closer touch with the retailer than is the former, thereby settling more satisfactorily than it could be done by a cold typewritten letter from some unknown clerk at the office, and if he is not in closer touch he had better get off the road and give his position to some one who

Digitized by Google

will make friends with those with whom he comes in personal contact.

I am of the opinion that if the traveling man were allowed to adjust claims and settle differences he would many times be met with a more friendly hand shake, little differences would be adjusted, and the traveling man before he left the retailer would have been able to not only adjust the old differences, but to sell him a new bill of goods as well. If he is a competent man he will not deviate from his judgment in settling any more than he would in selling a bill of goods. Of course we very often come across some of those everlasting kickers, who are always entering large and unreasonable claims. It would seem to us that when the house comes in contact with such a person it would be better to drop him at once. After he has been dropped by two or three houses he will see the folly of his stubborness, and will made some one a good, agreeable and profitable customer. Houses are sending out competent salesmen, and I think they should have anthority to represent their house.

A discussion followed, in which a number of the members participated.

The session directed by formal vote that its thanks should be tendered T. A. Harvey. of Saginaw, and Senator W. L. Holmes, for their efforts in securing the passage of the Lien Law referred to above. After the adjournment of the session, the local entertainment committee tendered their guests a trolley ride to the Battle Creek Sanitarium, which was thoroughly inspected, after which a banquet was enjoyed in the main dining-room. Addresses were made by Mayor Metcalf and others.

DEPARTMENT STORES.

The evening session of Wednesday was opened with the reading of a paper by A. K. Edwards, of Kalamazoo, "Is the Department Store a Benefit or Detriment to the General Public?" Among other things, Mr. Edwards said:

To the question, "Is the Department Store a Benefit or a Detriment to the General Public?" we, unquestionably, all have an answer that fits our individual case. Our several individual opinions would naturally be biased by the influence this class of business has upon our several individual pocket books. Those of us having direct and active home competition will naturally have the strongest opinions upon this subject. As I understand the subject chosen it requires me to rise, if possible, beyond or above this prejudice as an individual. It applies not to you or to me alone, but to the general public. My opinion, which I have endeavored to form as unbiased from personal prejudice as possible, is that the department store is a detriment to the general public.

For the purpose of brevity only, in this article I shall sometimes refer to the department store as it. I might name it as the Lansing man did his horse, an "iser." When asked for his reason for giving it this name, he said: "He isn't a 'has been' or a 'going to be;' he is an 'iser.'" Many of our members undoubtedly think, with me, that the department store is an iser. What we all want is that it should be a "*has been.*" One reason why it appears to be a detriment to the general public is that it creates distrust of the merchant in the mind of his customers. Distrust is lack of confidence, and what a serious thing laek of confidence is we all know, as the politicians and wiseacres tell us that this is the disease the business of this country has been suffering from for the past four years. May the patient entirely recover and never have a relapse, is the earnest prayer of every business man, and anything which tends to retard the patient from a speedy recovery is certainly a detriment to the general public.

It causes his customer, who possibly is his personal friend, to believe he has been and will be charged unfair and extortionate prices for all goods that he has sold him or will sell him. This conclusion is naturally reached by the customer after reading the advertisements of the department store—advertisements written, not by a member of the concern or an employee who is familiar with the goods he buys or sells, but by a person who is hired for the express and only purpose of writing ads.. having a semblance of truth, if possible, but mainly to catch the customer's eye. Prices named in this advertisement are usually for a special day or a special hour, and were the goods as represented would generally be great bargains. It is only necessary to follow up a few of these advertisements to be convinced of their deceitfulness. For instance, a large department store, in one of our nearby cities, advertised on a certain day sugar in the grocery department at an extremely low price, a price that meant a positive loss to them on every pound sold. Now this grocery department was a large store of itself, and the supposition was that anybody and everybody who wanted sugar could buy what they wanted by going to the store during the time of the advertised sale, if they had the money to pay for their wants.

The result was quite different. In the grocery department, on this day, while they had a large number of clerks, sugar was sold by one only, a boy, who, evidently following instructions, worked very slow, always had a great deal of trouble to exactly balance his scales, and when finally his package was weighed and tied up he would pay no attention to the next customer until the first had paid his bill, often being obliged to wait some time before the change would be returned from the office. When the barrel from which he was selling was empty he would have to get another himself, no porter, mind you, waiting upon him this day. The result was that the two flights of stairs leading to this department were soon packed, and probably not one person in fifty that tried to buy sugar that day succeeded. What were the results gained from this advertisement?

A general discussion ensued, the conclusion of which was that the local dealers should work together, and meet the Department Store prices.

An interesting paper, prepared by Edwin D. Warner, of Jackson, was next read on "The Most Systematic and Simplified Form of Conducting our Day's Sales, to avoid oversights in making Charges, Credits, etc." In the absence of the author, this was read by the President.

A paper on "Bicycles" was read by H. W. Webber, of West Bay City.

At the session on Thursday morning, after considerable discussion, the following amendments to the by-laws of the Association were adopted:

ARTICLE 13.

Any manufacturer or jobber soliciting orders or selling goods in any town or city where a member of the Michigan Hardware Dealers' Association is located and doing business, except it be to an exclusive Hardware dealer in such town or city, shall be considered as working against the interests of said association, provided that nothing in this article shall be so construed as to prevent manufacturers or jobbers from selling to manufacturers in any town or city goods actually used in articles manufactured by them, nor from selling to railroad or transportation companies.

ARTICLE 14.

It shall be the duty of all members to make complaint to the Investigating Committee of said association, in accordance with the provisions of Article 8, of any violations of Article 13 by any manufacturer or jobber.

If the Investigating or Executive Committee is unable to amicably adjust the grievance complained of, it shall then become the duty of the secretary of this association to notify all members of said association of the facts in the case.

ARTICLE 15.

Whenever any complaint has been entered against any manufacturer or jobber, charging a violation of the provisions of Article 13, it shall then become the duty of every member of this association to withhold his patronage from

Digitized by Google

said manufacturer or jobber until all such complaints as aforesaid have been satisfactorily adjusted.

The following gentlemen were then nominated and elected officers for the coming year:

President, Charles F. Bock, Battle Creek.

Vice-president, H. W. Webber, West Bay City.

Secretary, H. C. Minnie, Eaton Rapids.

Executive Committee: C. M. Chamberlin, Kalamazoo, two years; T. A. Harvey, Saginaw, two years; G. W. Hubbard, Flint, one year.

Investigating Committee: W. J. Boyce, Port Huron; S. P. McDonell, Bay City, and T. Frank Ireland, Belding.

Transportation Committee: S. F. Stevens, Grand Rapids; G. W. Bruske, Saginaw, and J. W. Drury, Detroit.

Entertainment Committee: H. C. Weber, Casper Gnau and J. S. Cappen, Detroit.

After the adjournment of the final session, a trolley ride over the local railways of Battle Creek was taken, and visits made to a number of the leading industrial centres of the place.

All About the Hammer.

A hammer is not generally regarded as an article about which much can be said, but, as in case of the saw and the nail, the dictionary-makers manage to say a great deal about it.

If the junior office-boy in a Hardware store were asked to describe a hammer, he would say, "It's a thing to drive nails with." The gentlemen who made the "Century Dictionary," go a little farther than the boy, and couch their definition in these words:

"Hammer. An instrument consisting of a solid head, usually of metal, but sometimes of wood or stone, set crosswise to the handle, used for beating metals, driving nails and spikes, dressing or breaking stones, etc.; hence, a machine in which a heavy block of metal is used for such a pupose. The head of the hammer is made in various forms, according to the use to which it is to be put. Hammers of stone are found among the remains of antiquity, and are still in use among barbarous races. The hammer has also been used as a weapon of attack in war."

Continuing, the definition is extended to fit "something which resembes the common hammer in form, action, or use. (a.) The piece in a clock which strikes upon the bell to indicate the hour; the striker. (b.) In a bell, an independent wooden or metallic lever by which it is sounded: distinguished from a tongue, which is attached to the bell, and is usually operated by swinging the bell itself, though a tongue is sometimes used as a hammer. (c.) A small wooden mallet with a padded end or knob, held in the hand, with which the strings of the dulcimer and other similar instruments are struck. (d.) In the pianoforte, that part of the mechanism or 'action' that is thrown against the strings by the key or digital. It consists of a slender, elastic, wooden shank, and a wooden head thickly covered with felt. Each key has its own hammer, which strikes against the one, two, three or four strings belonging to that particular key. (e.) That part of the lock of a firearm which falls with a sharp blow and causes the discharge of the piece. In the flint-lock the piece of flint was secured in the front of the hammer and struck sharply against the steel covering of the pan, displacing it, and throwing sparks into the priming in the pan. In the percussion-lock the blow of the hammer explodes the percussion cap. Ordinarily the hammer can be fixed at half-cock, at which point the pull of the trigger does not move it and at full-cock, when the movement of the trigger will release it. The form of the hammer and the mode of its action in exploding the charge differ greatly in different kinds of guns. (f.) A gavel used by auctioneers."

Other uses of the word are found in the hammer-ax, a tool consisting of a hammer and an ax combined on one handle; a hammerer, one who works with a hammer; hammer-headed, having a head like that of a hammer; hammerman, a mechanic whose work involves the use of a hammer as a blacksmith, goldsmith, etc.; hammer-marked, a mark left by the hammer as in forging; hammer-picked, a tool having a hammer face at one end of the head, and a pointed pick at the other.

We also quote the following bodily from the "Century Dictionary," throwing as it does a side light upon the various uses of this useful tool:

Ceremonial hammer. In archæology, a small stone object resembling the head of a hammer or hatchet, one or two-edged, and drilled with a fine hole, apparently intended to be hung about the person as an amulet. It is especially common in North America, but amber beads resembling it in form are found in northern Europe.

Dental hammer or plugger. An apparatus used in filling teeth with gold, consisting of a plugging instrument fitted to a loose sleeve carrying a spring and tapping device. When the instrument is pressed against the filling of the teeth, the sleeve or tool-stock moves back till a detent is passed, when the sleeve is released and under the influence of a spring strikes a blow upon the plugger. Also called automatic mallet.

Double hammer, a forging device for operating upon a bloom or puddler's ball, striking it on opposite sides simultaneously. Electric hammer, an electric apparatus for working a rock drill. It is constructed on the principle of the dental hammer.

Enlarging hammer, the hammer used by a gold-beater. It weighs fourteen or fifteen pounds, and is shaped like a truncated pyramid, with a slightly convex face.

Hammer and tongs, with great noise, vigor or violence; violently; vigorously. (Colloq.)

Luceren hammer, a name given to the war-hammer or marteau d'armes when fitted with a long handle for the use of foot soldiers: so called because a favorite weapon with Swiss mercenaries from Lucerne.

Nasmyth hammer, a steam hammer used in forging large masses of metal, especially iron, and having its head attached to the piston-rod of the steam engine by which it is worked.

Patent hammer, in stone dressing, a hammer having knife-like ridges on its face, numbering six, eight or ten to the inch.

Thor's hammer, in Norse myth , the hammer of the god Thor, by the wielding or throwing of which thunder and lightning were supposed to be caused. A pendant ornament, usually of silver, found among relics of the prehistoric iron age in the north of Europe. It has somewhat the shape of a mallet, and it is undoubtedly intended to represent a hammer as weapon or utensil.

To bring or to come to the hammer, to sell or to be sold at auction; from the use by auctioneers of a gavel or small hammer to indicate by a rap the sale of an article to the highest bidder, called knocking it down.

C. E. Sontum, of the firm of C. E. Sontom & Co., Christiania, Norway, desires to place himself in closer connection with American manufacturerers. The United States Government has lately appointed a new consul at Christiania, and Mr. Sontum is an applicant for the appointment as vice-consul at that point. The position is not a salaried one, but his ambition is to be in a place where he can be of service to American manufacturers and also to his own country, in the further introduction of American goods. C. E. Sontum & Co. are among the most energetic in their line in Europe, and we believe that the appointment of a member of this firm to the position named, will be a decided benefit in many respects.

HARDWARE costs only One Dollar a year.

NEW GOODS AND SPECIALTIES.

The Graham Grooved Shank Chucks and Drills.

The Detroit Twist Drill Co., Detroit, Mich., are the manufacturers of the Graham Grooved Shank Chucks and Drills, which have been largely introduced and severely tested by the leading machine shops of the country since their introduction a few years ago. They form part of a

FIG. 1.

"grooved shank system" applied to mechanical appliances, which in many respects were a radical departure from methods previously in vogue. It required concentrated effort, effective advertising, and the distributing of many samples to make this new tool forge its way into the affections of the mechanics to whose attention it had been drawn; but a steadily growing acquaintance with its admitted improvements, soon resulted in its adoption by workmen who had previously looked in vain for the points of excellence brought out so prominently by its continued use. In Fig. 1 we illustrate the Graham Chuck, which is claimed to be "the smallest and simplest automatic chuck now on the market; it possesses the rare qualification of having jaws that are made additionally strong by being a part of the shank itself. The groove is milled into the round solid steel, to a depth sufficient to give the proper spring to the jaws for tightening and releasing the drill by the hand." It will be noticed in Fig. 2, showing a sectional view of the chuck, that a loose-fitting stop is placed between the jaws, in which the various drills rest each to the same depth, preventing any possible straining; the jaws and stop are hardened, which reduces the wear to a minimum and prevents the tool from getting out of true. The shell of the chuck, which is also made out of the solid, acts on the taper on the ends of the jaws, causing sufficient compression by the use of the hand only to hold any drill and prevent its drawing out when in use. The range of sizes taken by the various chucks is unusually large, and is still further increased by the use of "reducers" manufactured by the company which, as stated by the makers, practically enable a press fitted with their largest chuck to take drills from 3-32 inch to 2½ inch inclusive in one

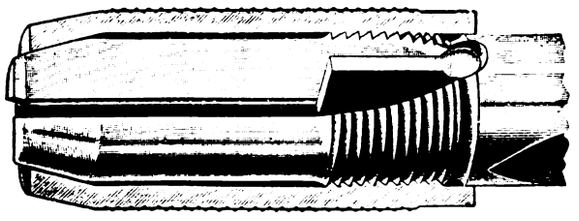

FIG. 2.

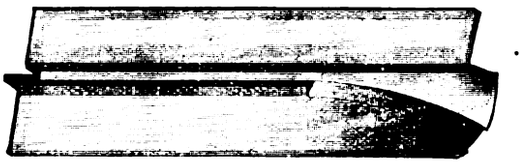
chuck. The reducers referred to are made from solid steel and are carefully hardened, do not project from the jaws of the chucks or shorten the distance between the table and the chuck and are warranted to run perfectly true. An illustration of this appliance is given in Fig. 3. As in the application of the grooved shank system, the shanks of special drills, boring bars, reamers, etc., require that shanks should be grooved. The manufacturers express their willingness to furnish milling cutters for such shank grooving when desired, cheerfully granting users of their drills and chucks full privilege to mill the shanks of any special tools they may have on hand or may require to fit into their chucks. They are also able to furnish sets of loose jaws for breast and ratchet drills to hold the grooved shank drills. Hand tools, it is claimed, when adapted to use grooved shank drills, possess great advan-



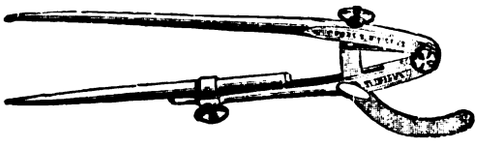


FIG. 3.

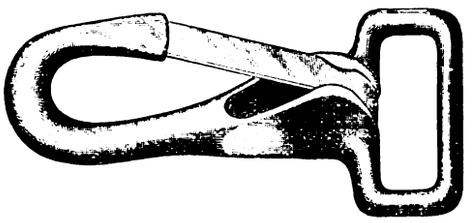
tages, saving the additional expense of the square shank and large round drills. Catalogues and further information will be furnished by the manufacturers upon request.

Copeland's Patent Steel Extension Dividers.



Thomas F. Eagan, No. 72 School Street, Worcester, Mass., is the manufacturer of the Copeland's Patent Steel Extension Dividers, so long and favorably known to the Hardware trade. In this style of dividers, with its latest improvements, the manufacturers have greatly improved the patent attachment of movable points, making them far superior for the use of draughtsmen, joiners and carpenters than the ordinary kinds previously in use. They are so constructed that instead of the leg of the compass, shown in the accompanying illustration, a carpenter's pencil may

be substituted, thus greatly facilitating the work for which this divider possesses the greatest usefulness. They are made with single or double leg extension, and the double adjustment permits of caliper points being used when desired in place of the straight points which permits their use in caliping stair railing, or any hollow piece of work, or where one leg should be extended further than the other, turners and machinists will find this description very desirable. The manufacturer also manufactures smooth joint calipers of superior shape, neatness, stiffness and durability, and also a patent round bolt spiral window spring is made by him, which is referred to as being a very secure fastener and quite easily adjusted to any common sash. Circulars referring to these will be furnished upon application.

The Derby Snap.

The Covert Mfg. Co., West Troy, N. Y., are placing before the Hardware trade their latest achievement in the line of snap hooks. It has been named "The Derby" Snap,

one of the patents being granted as late as June 22, 1897. It is up to date in the strictest sense of the term. Embodied in its construction are many new and novel features. The spring being plated throughout, is completely

Digitized by Google

rust proof, and is guarded by the patented feature of having edges which overhang the cheeks, rendering it impossible for it to spring out of place, or become in any manner disarranged. The retaining hook of the spring, which is one of the valuable features in the construction of "The Derby," is also covered by the patent. We present herewith an illustration by which these important points can be more fully understood. The Derby is intended to answer all the purposes for which every style and form of snap is demanded by the trade; in fact, the makers claim that the usual objections urged against many other snaps in use are entirely obviated by the formation of the Derby Snap, which will prove its superior excellence to even the casual observer.

Recent Trade Publications.

Among the books recently published possessing an interest for the trade we have received an elaborate volume inscribed "The Self-Proving Accounting System, Including Illustrations of various books and forms in facsimile, with special application made to the Installment Business. A manual for Business Men, Accountants and Auditors." By A. O. Kittredge, F. I. A., Consulting Accountant, Editor of *Accountics*, formerly editor of *Business* and co-editor of *The Lawyer and Credit Man*, and J. F. Brown, merchant, of J. F. Brown & Co., credit house furnishers. 328 pages, large octavo, four facsimile insets and numerous other illustrations. Published by the Self-Proving Account Book Co., Toronto and New York. Price, $5. The authors of the system are both practical men. Mr. Kittredge has been prominent in accounting circles for many years past. He has had an extended business experience, and, in addition, is widely known on account of his editorial work upon the monthly paper, *Business*, and upon *The Lawyer and Credit Man*, and more recently upon *Accountics*, of which he is at present the editor. Mr. Brown is a successful installment merchant, and, although doing business in Canada, is a citizen of the United States and a native of Michigan. Much of the system which the book explains is in successful use in Mr. Brown's store. By reason of its joint authorship the volume presents a completeness of detail which would otherwise be impossible. All that is advocated has been subjected to the severest tests of practice. This work differs from various books on accounting which have preceded it, in that it treats first of accounting and second of bookkeeping, and that it commences the inquiry and discussion to which it is devoted where the ordinary volume ends. The reader is spared the tedious pages usually devoted to an exposition of the principles of double entry and to a presentation of the distinguishing traits of single entry and double entry. Instead of this his attention is at once drawn to certain new and special applications that may be made of double entry principles, with which it is assumed at the outset he is well acquainted. The Self-Proving Accounting System is declared to be in all respects a double-entry system, and in various particulars much more than a double-entry system. It has all that double entry includes as ordinarily interpreted, and still more in matters of classification and consolidation, with the feature of proof by balancing maintained throughout.

Among the first to take advantage of the new regulation of the post office department respecting private postal cards, were the Troy Nickel Works, Troy, N. Y., from whom we have received a postal card printed in two colors, on two sides, and 7x14 inches in size, all of which the government forwards for a one cent stamp. Its sole mission in this case is to inform the trade that the Troy Nickel Works have already had an interview with the advance agent of prosperity, and although they found him "somewhat broken up, as if he had seen some hard times himself, a little brushing up, and a good square meal would fix him up all right, and then he will be himself again." They state that they don't want to be alone in their invigorating efforts, and hope their customers will assist by "sending in a few orders ahead of their wants." May this postal card "Jumbo" have the desired effect. This enterprising concern knows too well the value of advertising, ever to ask for bread with a glad hand and receive the marble heart in return.

E. C. Atkins & Co., Indianapolis, Ind., are distributing to the trade the Atkins' Hand Book of "Saws and Saw Tools" for 1897. This is a valuable publication for those handling such goods as are included in the comprehensive title, and from its great utility has become very popular and welcome to the Hardware trade, and also to mill men generally, who, upon application, will have a copy promptly forwarded to them. The present edition has among its varied contents a number of practical suggestions and instructions in the use and care of saws; the points to be carefully observed in ordering saws, especially circular saws; suggestions for the successful use and care of band saws, in which the matter shows the result of great experience and the surmounting of many difficulties. Many other important points are skillfully treated in the various departments of this useful volume; and included in its pages is a complete catalogue giving sizes, prices and detailed descriptions of many of their original and unique patented tools for the use of the skilled mechanic and saw mill operator. The interesting character of its contents in so many details connected with the lumber industry, makes it too valuable a publication to be neglected, when it can be so readily procured by a simple request.

We have received from the Builders' & Traders' Exchange, Milwaukee, Wis., a copy of the Contractors' & Builders' Directory of the State of Wisconsin. This is a very useful and valuable publication, having been compiled under the direction of the manager of the Exchange, W. H. McElroy. In addition to a complete history of the Builders' & Traders' Exchange, articles of incorporation, constitution, etc., the book embraces a mass of material it would be difficult to find in any other single volume, and contains beside an alphabetically classified directory of kindred trades of building industries, from architects and builders to well contractors and wood carvers. It will be found extremely useful by those desiring to reach this large class of artisans.

John H. Graham & Co., No. 113 Chambers and No. 95 Reade Streets, New York, having added to their list of agencies the Forest City Screw Driver & Drill Co., of Portland, Me., and Mason & Parker, of Winchendon, Mass., are distributing to the trade new catalogue pages to take the place of pages 83, 84, 85 and 86, of the catalogue issued this year, by this firm. The new pages cover the screw drivers and screw drivers and drills manufactured by the first company mentioned above, and the large line of high-grade ratchet and other braces manufactured by the last named firm. The goods referred to are first class and popular, and will prove a desirable addition to those already identified with the name of this hustling commission and manufacturing house.

Undisputed Circulation.

Angry caller (at newspaper office): Say, I want that little advertisement I gave you two days ago—"Wanted, an electric battery in good working order"—taken out.

Advertising clerk: What is the matter? Didn't we put it in the right column?

Angry caller: Column be dashed! Your extensive circulation overdid the business. My house was struck by lightning last night.—*Michigan Tradesman.*

An Ancient's Advice.

The man who fails to take a vacation, does an injustice to himself, his family, his employes, his country and his God.

This may seem a little strong language, coming from one whose hair is silvered with the frosts of many winters in a Hardware store, and whose feet, if not in the grave, are standing upon the edges thereof. But it is out of this old age, and the experiences which it has gained for him, that I feel justified in making as strong a statement as that contained in the above.

When I was a boy, those in the mercantile class did not know what a set vacation was. Where I served as a clerk, we opened the store at 7 o'clock in the morning and kept it open until 9 o'clock at night, three hundred and sixty-five days of the year, with the exception of Sundays; and the old man for whom I worked would have run her right open all day Sabbath, if the community had approved of such procedure, and had come to buy. When a town was filled with strangers and merry-makers, on the Fourth of July and other days of jubilee, we boys were kept back of the counter from morning until night, and a request for the closing of the store on such occasions, would have been almost equivalent to handing in our resignation. I believe we did shut up on Christmas day, but not on Thanksgiving or New Year's.

If one of the boys wished a day off, once or twice a year, for some special occasion, such as a picnic, or the burial of a grandmother, he could sometimes obtain it, provided he stood high in the graces of the old man. The person who had been filled with a sufficient amount of hardihood and desperate courage to have suggested two weeks' vacation to each of the employees during the summer months, would have been looked upon as a spendthrift, or one in whose head more wheels had been generated than were necessary for the proper origination and propulsion of his ideas.

I have three clerks in my store, in addition to a young lady bookkeeper and stenographer, and I wish to tell you merchants that I would regard it as a piece of almighty poor business policy, if I did not give each one of these a full two weeks' vacation each year.

In the first place, I see that they earn it during the remaining forty-eight weeks. In the second place, I get more good value out of them in the course of the year than I could if their noses were kept at the grindstone during the whole period. In the third place, no man has a right morally, religiously, economically or patriotically, to cheat a fellow being out of that which is his natural due; and I believe that in the economy of this universe, God as much intended that the Hardware clerk should have a period of bountiful rest in the country, among the trees and flowers, and the thousand and one attractions that a man meets when away from brick and mortar, as He intended that the flowers, and the trees, and the birds, and the running brooks and good fishing, should be scattered promiscuously through this broad land of ours, with an invitation to man to go forth and enjoy them.

I always take two weeks' vacation myself, and am the better man because of it. Sometimes my family go with me, and sometimes I go alone, but in either case I come home invigorated, and with a better opinion of things in general, a warmer side toward humanity, a more comprehensive grasp of my business, with more kindness and love toward my immediate associates, a fuller and broader comprehension and understanding of my duties as an employer, a father, a citizen, a Christian and a man.

HONESTY THE BEST POLICY.

Once I was young and now I am old, yet have I not seen the righteous forsaken, nor his seed begging bread.

The above is not an exact quotation from the Scripture, in all probabilily, but is as near as memory will permit me to recall it. The sentiment is all there, however.

There never was a truer truism—if the expression may be used—than the old saw: *Honesty is the best policy.*

I admit that it does not occupy the highest moral grounds. It does not say that one shall do right because it is right. It does not say that one shall render his neighbor full due because it is Christian—Christ-like—to do so. It does not touch the higher plane of pure morality at all. It simply says that one shall be honest because *it pays.* Because it is politic to do that which is fair and right.

And it does pay. The truth of this is proved by the history of every honest man, and by the history of every dishonest man.

I do not say that all honest men do well in business, and all dishonest men fail. Not by a long shot. There are honest men in the alms house; there are thieves who live on velvet and eat from silverware.

But when all things are weighed and measured; when the balance is struck all around; when the average of men's lives is made, you will find that it pays one to do that which is right, in business matters, as in all others. The assets of good character and a clear conscience is the best holding one can have at the end of life.

AS TO LIES.

If you must lie, do it artistically.

A business lie may be a pretty thing to look at, but unsafe to handle.

Is a business lie ever justifiable? I would like to hear from some of the experts. I know a lot of them.

If you lie to a customer, and the clerk knows it, has the clerk a warrant for falsifying to you?

I know a youngster who said: "Dad licks me when I tell a lie. I want to grow up so I will have a right to tell lies—same as he does."

Can a man be a good deacon in a church, and at the same time a good salesman?

Where does the lie come in between business diplomacy, and outright falsehood?

A great deal may be said about the advantages of always telling the truth. Can anything be said on the other side?

A. N. OLDMAN.

Fell In Love With The Flies.

The following is but one of many letters received by the enterprising company to whom it is addressed:

The Enterprise Mfg. Co., Akron, Ohio.

Gentlemen: I never knew of your Luminous Flies until recently, when I found a card somewhere with Montreal, Yellow May and March Brown on it. A friend was going to the Adirondacks and I gave him his choice for "luck" of the three I had. He chose the Luminous March Brown. The party consisted of four, and this was the only Luminous Fly any of them had. In ten casts my friend pulled out ten trout, the remainder of the party having only fair luck. All wished they had put in a stock of your Luminous Flies, when they compared notes after a couple of hours' fishing. This has made me a friend of Luminous Flies. If you will send price, will be pleased to order a lot and recommend them to an extensive acquaintance.

Geo. B. Dowling, Yonkers, N. Y.

Hobbs—We had a great century run the other day, of the Scorchers' Club. Half the members fell dead at the end of it.

Nobbs—Why didn't you make it a double century, and kill the rest?

Is a glazier of necessity a putty man, an editor a paper man, a maker of tubs a wooden man, and a baker a dough man?

Two million glass eyes are manufactured yearly in Germany and Switzerland.—*Industrial World.*

Review of the Markets.

It is discouraging to realize how long it has taken the legislators at Washington to bring to an end the uncertainties resulting from the long delay in passing the revised Tariff bill. This and the prevailing strikes throughout the country, cause more or less discussion, but the reports of universally improving crop conditions and the hopeful feeling regarding the future everywhere prevailing, will have the effect of producing a greater activity in business circles without much longer delay. Still, large orders are the exception and not the rule at present, even under existing low prices and favorable opportunities for purchasing. It will take but little in the way of sustained demand after August 1 to brace the market so effectively as to make the army of purchasers more eager to get under cover. As nothing but encouragement as to crop conditions comes from the West, the farmer, whom we have been in the habit of believing was impoverished and despondent, is paying off the mortgages under which he has groaned for years, and looking for "dollar" wheat with a remarkably fair chance of seeing it before the season progresses very far. Under such favorable prospects, the Hardware stocks of the West, which have rarely if ever been in such meagre shape, will need replenishing as never before for years, and the impetus thus given once started, will permeate the entire country and inspire the East with a feeling of hope and encouragement which they are anxiously prepared to welcome and profit by.

The demand for heavy goods continues anything but an attractive one; on such goods as carriage bolts, machine bolts, lag screws, etc., which have not in some time been quoted at an extravagant profit, low prices still prevail, competition being active for any trade in sight; and although a fair amount of business is being transacted, the manufacturers are hopefully waiting for a more energetic enquiry. The prospect of a more active trade in the South has made the competition on traces and other chains exceptionally active, and has had a tendency to weaken the entire line; so that for good-sized specifications, lower prices could be anticipated than previously prevailed on all the varieties, including coil and other heavy chains, the market being quite an irregular one.

Wire Nails: As most of the mills are shut down under one pretext or another, but little effort is being made to encourage the booking of orders for future wants, the few nails being sold only evening-up very ordinary stocks, with no speculative feeling underlying any movement, although prices are admittedly very low, and the belief is prevalent that higher quotations in the near future will succeed the present quotations. Carload lots at mill have been sold as low as $1.25, base, f. o. b., while from dock in New York carload lots are held at $1.40, and smaller lots from store, in accordance with quantity desired, are selling at $1.50@$1.60.

Cut Nails: In this line no movement of importance is noticeable, the demand being very limited in character and the output quite restricted. The tone of the market is still shown by the prevailing price of $1.20. base, for carload lots at mill, while carload lots in New York are quoted at $1.32@$1.30. Smaller lots from store are sold at the usual advance.

Linseed Oil: Under date of July 22nd, the Dean Linseed Oil Co. quote as follows: In lots of less than 5 barrels, 31 cents per gallon; 5 barrels or more, 30 cents per gallon; boiled linseed oil, 2 cents per gallon higher; Calcutta oil, 50 cents per gallon.

THE PITTSBURG TRADE.

The trade in harvest tools has been unusually good this season reaching up to July 15th, and stocks have been thoroughly cleaned out of the hands of jobbers. This has caused an appearance of good business, though it must be confessed that the aggregate amount of sales is disappointing. The low prices ruling in nails and wire, as well as in all other goods, keeps the amount in dollars low, although the tonnage of shipments must be considerably in excess of other years.

Pennsylvanians are quite interested at present in a bill passed by our recently adjourned legislature increasing the State tax on sales of merchants. The increase is from three to ten times the amount of the old tax which was high. Protests have been filed with the Governor, and it is hoped he will vetoe the bill. The increase in expense of doing business from year to year, and from one cause or another, is becoming a very serious matter, and one which should receive the earnest attention of all merchants.

Our weather conditions are now favorable and crops reported abundant. Vacation time is with us, giving a much needed rest to our faithful workers, but at the same time making the machine work rather awkwardly when some cogs are out of the wheels.

Logan-Gregg Hardware Co.

THE DENVER TRADE.

There is very little that is new to be said in regard to business at Denver. It holds on steadily and with gradual improvement.

The earlier promise of immense fruit and grain crops throughout the State is being fulfilled. The mines continue their steady and increasing production, and under any natural future conditions, Colorado would seem to be bound to prosper. Such promising prospects have encouraged prospective investors, stimulated them to some action, has caused an increase in building (mostly residence property of the better class), and a consequent improvement in feeling in all circles. George Tritch Hardware Co.

THE PHILADELPHIA TRADE.

The old proverb "there is a time for everything under the sun" does not seem in any way to affect the insatiable editor of *Hardware*. No matter what the season may be—whether it is vacation time, a holiday, festival or a feast—nothing will suit him but his semi-monthly letter, and when a man's mind has been occupied by the patriotic festival of the Fourth of July, and by the ensuing vacation, visions of big fish and small golf scores, are much more attractive than letters on the subject of business.

We return, however, to find business at about its usual gait at this time of the year. Salesmen have likewise had their turn of play, and are now again starting for the road, and a fair number of orders is resulting.

Goods are cheap and bills do not run up as heavily as they might, but there is some business moving and now that we have just received news that the House has passed the tariff bill, it seems that, with the enormous crops which nature is pouring into our laps, and with the shortage abroad, as if all indications pointed to a thoroughly healthy improvement in business and to higher prices as well.

Of course we have been looking for this for some time, and conditions are now shaping themselves much more favorably and, as President McKinley said in his address in our city some weeks ago, the country is not going backward but forward. American energy has not been destroyed by the storms of the past. We feel justified, therefore, in looking for better times this fall, and trust that the turning point of this very long lane has at last been reached.

Biddle Hardware Co.

THE DAVENPORT TRADE.

The Excelsior Mfg. Co., of Davenport, have sold their interest in the Excelsior Washing Machine to the Vendergrift Mfg. Co , of Jamestown, N. Y., who will continue to make the machines under another name.

A change in the method of branding tin and terne plate boxes by marking the weight on each box instead of the

Digitized by Google

letters I. C., IX, etc. has been suggested; also a change in packing from an odd number of sheets, as at present, to a uniform number of one hundred sheets in each box of any size or grade. Both changes will be an improvement. Wish all Hardware could be bought and sold on the decimal plan.

Vacation season occupies the attention of both employer and employe just now. When pleasure interferes with business in July, we say let business go.

SICKELS, PRESTON & NUTTING CO.

THE MINNEAPOLIS TRADE.

There is not very much to report; business rather quiet, about the same as we expect during the hot weather; people generally have more confidence in the future. Our crops are pretty well assured now, as far as rain and good growing weather is concerned. The harvest will commence in a few weeks. There is every promise of the largest crop of wheat ever raised in the Northwest, and the probability of fair prices.

Prices are very badly demoralized in builders' Hardware line, what little business there is, being taken at little or no profit. The nail situation is unchanged, that is to say, they are being sold in small lots for less money than they should be sold in carloads. We do not anticipate any improvement in this line in the near future.

W. K. MORISON & CO.

THE COLUMBUS TRADE.

Your former correspondent (senior member) has hied himself off to the lakes, on his annual vacation and fishing trip, and from cards just received, think he has been successful, having caught a fish weighing about 125 pounds. (This is not a fish story.) Trust he will give you an account of his trip on his return.

Trade is not as brisk as in our last report. Beginning to show the usual midsummer dullness, although not more so than usual during July, and the strike cuts off a good share, which we trust will soon be settled. Comparing half year '97 passed with '96 shows a healthy improvement, and quite a gain over last year. Trade was especially good during the months of May and June, and we have faith to believe that we will enjoy a good fall trade.

We have been enjoying the cool weather of the past week, after the long continued warm spell. We have had rain in plenty, and sunshine and dry weather is needed to gather our hay crop.

Not much change in prices, except wire and nails a little lower. We think wire and nails at present prices are good stock to own. Collections fair.

SMITH BROS. HARDWARE CO.

Chas. Churchill & Co., large importers of American machine tools, with headquarters in London, have removed to new and enlarged premises at No. 9–15 Leonard Street, Finsbury, London, E. C. They represent a large number of American manufacturers, and now that they are in a central location, not ten minutes from the Bank of England, they are better situated than before for the handling of American goods. Their new building is four stories high with a basement, and they have a total floor space of 12,474 feet. Among the American firms represented by them in England, are the following: Armstrong Mfg. Co., Brown & Sharpe Mfg. Co., Henry Disston & Sons, Ferracute Machine Co., C. E. Jennings & Co., Chas. Morrill, Chas. Parker Co., Stanley Rule & Level Co., L. S. Starrett Co., and Tower & Lyon.

The amount of iron contained in the animal tissues of a man weighing 150 pounds is about 100 grains, or a quarter of an ounce. Yet so important is even this small amount to the system that a difference of a few grains more or less may produce serious constitutional disturbance.—*Industrial World.*

A Cycle Hanger.

Some time since, *Hardware* published an article concerning the care of bicycles, in the course of which the following language was used: "Many cyclists don't give care and attention to their wheels from the fact that they find it troublesome to get at the different parts; they either have to lean the wheel against something while they are working at some defective part, or hold it with one hand while they do the best they can with the other toward the work they desire to accomplish. For all such riders, it might be well to suggest that they grasp the front and rear fork on the same side of the wheel and turn it over on the saddle and handle bars, thereby giving them access to any part of the machine and at the same time allowing them the use of both hands. This will be found a most convenient way for cleaning the wheel."

A valued correspondent has sent us the above clipping with endorsement of Lane's Cycle Hanger, manufactured by Lane Bros., Poughkeepsie, N. Y. He endorses this article as being the best method which he knows of disposing of a bicycle during the process of cleaning. With this hanger, one can not only raise the bicycle for cleaning, but can also pull it clear up to the ceiling out of reach if necessary, when not in use. A fully illustrated description of this hanger will be sent to anyone on application to the manufacturers above named. See page 2.

The Cards Are Out.

The following interesting announcement concerning the senior member of the Smith Bros. Hardware Co., of Columbus, Ohio, will be of interest to Mr. Smith's friends, and speaks for itself:

John Henry Smith
Sarah Elizabeth Howard
Married
Wednesday, July Fourteenth,
1897,
Cuyahoga Falls, Ohio.

At Home
after August tenth,
257 East Broad Street,
Columbus, O.

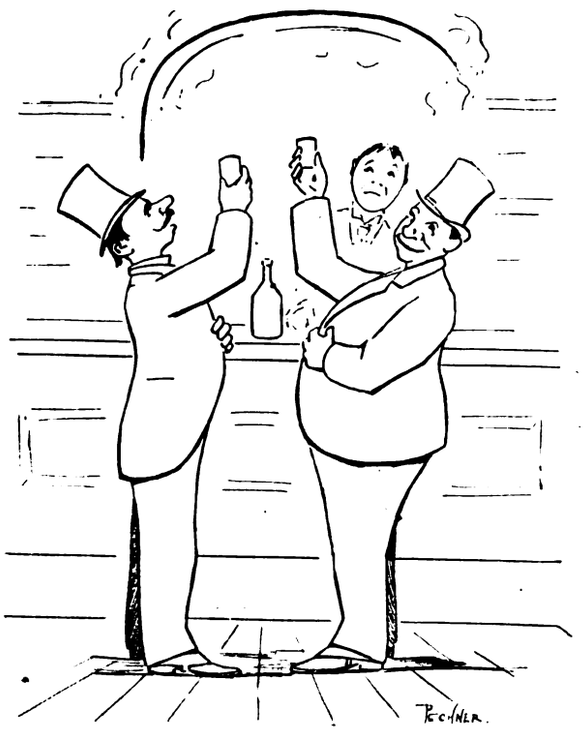
Tennessee Hardwaremen.

The East Tennessee Hardware Dealers' Association has just concluded a very interesting session at Knoxville, Tenn. Several interesting papers were read on Thursday, the 15th. The final session was held on Friday, and at the conclusion thereof officers to serve during the next six months were elected. J. W. Bayless, of Athens, was honored by being unanimously re-elected president, and E. T. Hall was re-elected secretary. The association decided to meet again in Knoxville, in January. A vote of thanks was tendered to W. W. Woodruff & Co., for their entertainment of the association Wednesday night.

Krupp, the great German manufacturer of cannons, has lately completed a number of paper field-pieces for the use of the German infantry. Their calibre is a little less two inches, and the pieces are so light that one soldier can easily carry one. But the resistance is greater than that of a field-piece of steel of the same calibre.—*Chicago Journal of Commerce.*

HARDWARE is printed for men now on earth.

Digitized by Google



A DRUMMER'S REMINISCENCE.

It was along in the early seventies when I thought no fall season would reach its full fruition of profit, unless I took my annual summer trip up among the mining regions of Lake Superior.

I had departed from Green Bay, on a bright and beautiful morning in July, after clearing up all the business I could corral along Lake Michigan *en route;* and with an interesting novel in my hand, I was comfortably reclining on the upper deck of a Green Bay steamer bound for the welcome shores of Escanaba; doing my level best to extract comfort from a camp stool, with fresh air accompaniments, aided by an occasional visit to the subaqueous department, where pop punches alleviated the despondency of the lonely traveler.

The deck was occupied in spots by others who, on pleasure or business bent, were throwing bouquets at themselves on account of having such a lovely and enjoyable day, on which to traverse the pleasant waters that separated the objective points of our trip, dotted as they were, here and there, by an occasional island exceedingly picturesque and not frequently inhabited.

The captain, whose name was Gibson, was a jovial, good-natured specimen of the fresh-water skipper, whose principal ambition—beyond a safe transit over the deep waters of Green Bay—was in providing for a boat load of hungry tourists the best dinner for seventy-five cents I ever remember receiving, the acknowledgment of which fact, at a later hour, being so gracefully and feelingly done, caused an

outlay on the skipper's part of the price of of two of the aforesaid punches, of which nectar and ambrosia combined, the captain was fully as fond as I was.

But to resume the thread of my experience. About the time I was getting into that most interesting part of an absorbing work of fiction, where the hero was gradually working loose from the machinations of the unusually exasperating villain, and rapidly approaching a haven of rest in the arms of the victorious heroine; almost unconscious of surrounding influences, I was suddenly brought back to a mundane sphere of usefulness by having a gentleman in my immediate vicinity salute me in a mildly interrogative manner as follows:

"I beg pardon! but you seem to be so familiar with every object of interest surrounding us, as to no longer give any attention to their beauties. May I crave your indulgence for a moment or two?"

I looked at the gentleman who had the temerity to so interrupt my interesting perusal of the novel referred to, and found he presented the appearance of a quiet little man about fifty years of age, who, with pencil and tablet in his hands, was trying to fill a page or two, and make a home letter—as I supposed—detail the delights of an initial vacation.

There was a lurking imp of mischief tugging at my benevolent heart, as I asked the asspiring tourist "in what way I could be of service."

He said in reply that he "had never been over this route, and would be under many and lasting obligations if I would kindly enlighten him on any interesting points of interest connected with the islands and points of land, which made the trip doubly attractive."

The lurking imp, to which reference has already been made, kept saying "help the old gentleman out," "help him out;" and so I acquiesced, and submitted with a dignified demeanor and an air worthy of "truthful James," to become a tank of information on constant tap.

"That point of land we passed a mile or so back," he remarked, humbly, "are you familiar with the name of it?"

"Oh, yes!" said I, in accents of extreme frankness and simplicity. "That was Dead Man's Point."

"'Tis a singular name." said he, "and suggests historical associations."

"Yes," said I, "it originated in the finding in 1819, by a party of explorers, of a well-preserved Indian's body, which, after being bound to a trunk of a tree, had been buried with his feet up."

"Goodness gracious! how interesting," said my questioner. "Pardon me until I write that all down; do you know I am awfully glad I met you?"

Well, we passed point after point and island after island; he filled up all the paper he had on his tablet, and went below for more; I became so interested in the Indian and other romances I was weaving, the barkeeper came on deck to see what had become of me. The old gentleman thanked me profusely, and while resting his tired pencil, brought my whole structure of untruthfulness to grief, upon a rock of fact, which no jollying efforts on my part could shake from his suspicious mind.

While pausing from sheer fatigue, he remarked to me:

"You are certainly a walking encyclopedia of all matters of interest that Green Bay can boast."

I removed my hat in acknowledgment of a compliment I so little deserved.

"You probably know how much the waters of Green Bay exceed in height the waters of Lake Winnebago?"

I ought to have known better, but I had been lying so interruptedly, I thought one more wouldn't hurt, so I said: "Certainly; twenty-eight feet."

The old skeezzicks must have asked that question to test me.

"Oh!" he said, "you certainly must be in error."

I persisted I couldn't possiby make a mistake; and then the old duck went to work and figured it up by counting the number of locks there were on some canal that joined

the two bodies of water, added the number of feet allowed to each lock, and conclusively proved I was an apostle of misinformation. I didn't maintain my ground; it wasn't solid enough; so he folded his camp stool and silently stole aft.

He never approached within twenty feet of me the balance of the trip; and an hour later, in the captain's private stateroom, while smoking a couple of Park & Tilford's "Antiguedads," with which I had supplied myself before leaving New York, he told me the reason why my questioner failed to speak as he passed by.

When he took his camp stool and stole away he sought the captain, who was then in the pilot house just above my head.

Pointing with a trembling hand to me, he asked the captain:

"Do you know that gentleman?"

"Oh, yes!" said the captain, "I've had his company on my boat every summer for the past seven or eight years."

"Then, of course," said the scribe, "you know whether he's a gentleman of truth and veracity."

"Well, well!" asked the captain, his interest increasing, "what has that got to do with the business?"

"A very great deal," replied his questioner. "Look at this," showing the fifty or sixty pages of manuscript I had assisted in illustrating. "Ever since leaving the Bay he has been giving me information about every island and point of land, with which the trip has been beautified."

"He has!" exclaimed the captain; "what possessed you to write it all down, as though it was gospel truth?"

"Well, you see, I'm connected in an humble capacity with the Baptist Church at Oshkosh, and I promised the 'Advertiser' to send them one or two interesting letters while away."

"And you have it all written out on that pile of paper?" asked Captain G———. "As you value your good name for truth, and desire to stand well with your fellow townsmen, let me advise you to tear up every d—— page of it; pardon my getting excited, but your informant is a Hardware drummer from New York, who, during July and August in any year, was never known to tell the truth except in the way of remunerative business." HOP.

Our Exports.

From the figures recently given out by the Treasury Bureau of Statistics it is shown that the exports for the fiscal year ending June 30, were the largest the country has known in its history, exceeding by upwards of $21,700,000 the previous largest total, which made a record in that respect in 1892. As stated in Bradstreets: For the month of June the exports were valued at $74,174,689, which represents an increase of over $7,400,000 as compared with the corresponding month of last year. The imports for the month were valued at $84,826,110. which represents an increase of over $28,600,000 as compared with the corresponding month of last year. The dutiable imports were valued at $43,672,847, which represents an increase of over $12,600,000 as compared with June, 1896, while the nondutiable imports were valued at $41,153,263, an increase of over $16,000,000 as compared with the corresponding month a year ago.

For the twelve months ending with June the total exports were valued at $1,051,987,091, which represents an increase of over $169,300,000 as compared with the preceding fiscal year. The imports were valued at $764,373,905, which represents a decrease of over $15,300,000 as compared with the preceding fiscal year. Ths dutiable imports were valued at $382,441,300, which represented a decrease of over $27,500,000 as compared with the fiscal year ending June 30, 1896, while the non-dutiable imports were valued at $381,932,605, an increase of nearly $12,200,000, as compared with the preceding fiscal year. As will be seen, the dutiable and nondutiable imports almost balanced each other in amount, a very slight excess, only a little over $500,000, being shown in favor of the dutiable imports. The exports for the twelve months exceeded the imports by $287,613,186, which is considerably more than double the excess on the same side shown in the treasury accounts for the fiscal year preceding.

Illness of John P. Lovell.

News has come from Cottage City, Martha's Vineyard, Mass., of the very serious illness of the venerable John P. Lovell, founder of the John P. Lovell Arms Co., Boston.

On the afternoon of July 13th, Mr. Lovell was stricken with paralysis at his summer cottage. He had not been enjoying vigorous health, and his friends had hoped that this visit to the Vineyard would prove a benefit. While at luncheon he was suddenly stricken, and was found by his family upon the floor, apparently dead. At the last report, pneumonia had set in and the worst was feared. Mr. Lovell was one of the pioneers in his line of manufacture and has filled a long life with great usefulness and many benificent deeds. He is now in his 77th year.

A Nail in His Tongue.

Merwin Wiant, 18 years old, of Canoe Hill, N. Y., used a wire nail to dislodge a cartridge from a revolver on Saturday afternoon, and while doing so the revolver discharged and Wiant received the full charge in his face. He went to Saugerties and told Dr. S. L. Dawes he had a bullet in his tongue and wanted it extricated. The doctor found a hard substance which lay diagonally across the tongue. Upon being drawn out it proved to be the wire nail which Wiant used to dislodge the cartridge. It measured three and a quarter inches in length. It entered on the right side of the face through the lower lip.—*N. Y. Sun.*

They are introducing office girls in Chicago, and those who have them in their employ are well pleased with them. They say that the office-girl is superior to the office-boy in many particulars. In the first place, she does not smoke cigarettes, and she does whistle. As a rule, she has no taste for dime novels.—*Chicago Journal of Commerce.*

Some Early Tools.

Rakes, hoes and other agricultural implements are represented in the Egyptian catacombs.

Until comparatively recent times the only harrow was a large pile of brush or tree branches, dragged across the field by a team of oxen.

Knives of flint and other stone breaking with a sharp fracture were known in early times. When the Spaniards invaded Mexico the natives had knives of volcanic glass.

Spades and shovels, together with scoops, are found depicted on the walls of Egyptian catacombs and all three are frequently mentioned by Roman and Greek agricultural writers.

The earliest spoons were made of horn. Specimens of ivory and bone have been found in the abodes of the cave-dwellers and lake dwellers all over Europe. Spoons of gold and silver are mentioned as having been used at Nero's table. In Saxon times every guest brought his own knife and spoon, the host providing a towel or cloth for wiping each at the close of the repast.

The screw was known at an early age in the history of civilization; its invention being attributed to Archimedes and other mechanicians and philosophers. Screw-making machines have been patented, which by peculiar appliances and devices, turn out screws complete in every part. Screws are of many sizes, from the largest, which weigh almost a pound, to the microscopic articles used in the delicate mechanism of the watch. The smallest sized watch screws look like grains of sand and only with a microscope can the fact be discovered that they are perfect.

Hammers are represented on the monuments of Egypt, twenty centuries before our era. They greatly resembled the hammer now in use, save that there were no claws on the back for the extraction of nails. The first hammer was undoubtedly a stone held in the hand. Claw hammers were invented some time during the Middle Ages. Illuminated manuscripts of the eleventh century represent carpenters with claw hammers. Hammers are of all sizes, from the dainty instruments used by the jeweler, which weigh less than half an ounce, to the gigantic fifty-ton hammer of ship-building establishments, some of which weigh as much as fifty tons and have a falling force of from ninety to one hundred. Every trade has its own hammer and its own way of using it.

Pliny says that the first saw was invented by Daedalus, but, according to Apollodorus, it was the invention of Talus, who used the jawbone of a crocodile to cut through a piece of wood, and then made an iron instrument in imitation of it. The saw is represented on the monuments of Egypt from 2500 to 3000 years B. C. As early as A. D. 1322, saw mills, driven by water power, were in operation at Augsburg, and, it is believed, before this they were in operation in Paris, driven by the current of the Seine. The first saw mill erected in the Norway pineries was in 1530. Saw mills were numerous in Italy in the sixteenth century. They were not introduced into England until 1663, when a native of Holland built one, but was compelled to abandon it by the opposition of the populace, carpenters and other artisans, who saw no good in such a new-fangled contrivance.

The ax is of so great antiquity that its origin is lost, though the Greek legends attribute it to one of their mythical heroes. Stone axes have been found in many countries. Iron axes have been discovered in the Egyptian catacombs, and axes of bronze have been found in almost every land in Europe. Flint axes, for wood cutting, were in use among the Mexican and other Central and South American tribes at the discovery of America. The axes of ancient times were badly made, having most of the weight in front of the handle, and being thus uncertain of aim and ineffective in cutting power. Battle axes are represented on the monuments of Nineveh and Babylon. The battle-ax of Robert Bruce was so heavy, and used with such effect, that, it is said, at the battle of Bannockburn, he clove an Englishman in twain with one blow. The battle-ax of Charles Martel, it is said, weighed thirty pounds.

The first nails were undoubtedly the sharp teeth of various animals; then it is believed, pointed fragments of flint followed. The first manufactured metal nails were of bronze. The nail with which Jael killed Sisera was a wooden tent pin probably pointed with iron. Bronze nails have been found in the Swiss lake dwellings, in several places in France and in the Valley of the Nile. Until the present century iron nails were forged, a blacksmith being able to make only two or three dozen a day. The first cut-nails were made by Jeremiah Wilkinson in Rhode Island in 1775. The first patented nail machine was by Perkins, 1795, and its product of 200,000 nails a day was considered so enormous that some persons deemed the result due to a supernatural agency. Many improvements in nail making machines, greatly increasing the quantity and quality of their output, have been made in the present century.—*Exchange.*

Coal mining is promising to become an important industry in Arizona. In the northern part of the territory extensive bodies of bituminous coal are encountered north and east of the Painted Desert region. This coal crops out in many places and at one point has a thickness of thirty-one feet.—*Chicago Journal of Commerce.*

"I don't know," cried the excited feminine voice in the darkness, "whether you are my husband or a burglar, but I'm going to be on the safe side and shoot."—*London Figaro.*

Situation Wanted.

BY a practical mechanic, experienced in manufacturing patented and builders' Hardware and specialties, well up in modern shop methods. Competent to get out work cheap, etc. An expert workman at bench, and a hustler. Address EXPERT, No 3029 Poplar Avenue, Chicago, Ill.

Agents Wanted.

WANTED—Resident agents in all cities to sell our Patent Mixer and Beater. This is a new and useful household article for all mixing purposes, for the table. No competition. Good profits. Address EYNON & SONS, No. 122 N. 6th Street, Philadelphia, Pa.

Kansas City Trade.

From $90,000,000 to $100,000,000 worth of business has been done by the wholesalers and jobbers of Kansas City during the year ending June 30th. The territory of consumption has been somewhat extended, although not equal to that of some years previous. The jobbers report a great increase of business in the more Southern States, particularly Arkansas, Texas and portions of Louisiana. In the latter State Kansas City never did have much of a hold until the last six months, and those who have looked the ground over prophesy that Kansas City will, before long, be the leading city to supply the western sections of that country.

Kansas City sells more agricultural implements than any other city in the world. It seems to have made no difference with merchants in this line, whether times were stringent or easy, the trade has gone right along increasing each year since 1892. The latter year sales reached the highest point, the implements sold aggregating a value of about $21,000,000. The year following sales fell off in the neighborhood of $5,000,000, but the reaction has been sure, sales during the year under review amounting to the enormous sum of $17,500,000. The implement houses employ in the neighborhood of 1700 men, and when it is remembered that none of the above have to do any manufacturing, one will the more readily comprehend the enormity of this branch of Kansas City's industry.

There are but eight cities in the United States that equal Kansas City in the amount of mail handled. The value of stamps sold during the year amounted to $540,419, reaching above the half million mark the first time in the history of the town.—*Kansas City (Mo.) Journal.*

Fishing for Squirrels.

E. P. Barrol, a Hardware merchant of Colfax, was in the city on business recently. Among other things he purchased while here was a quantity of large fish hooks. When asked if fishing had become suddenly good in the Palouse country he replied that it had not, but that the farmers were using the hooks to catch squirrels with. The idea is new but quite a popular and successful one. A large fish hook is fastened to a small piece of board by means of a nail driven through the eye. The board is placed in the mouth of the hole with the point of the hook pointing out. The squirrel comes out by it in safety, but when he starts to run back by it the hook catches him in the breast and holds him fast.—*Spokane Chronicle.*

TOOLS THAT ARE REAL

The man who makes or breaks a thing is the man who uses it. No article, however fine in appearance, however well advertised, can succeed without the good word of the man who works with it for his living. It has got to suit him—it may suit everybody else, manufacturers, jobbers. dealers, but all counts for nothing unless the consumer is satisfied. What does that mean? It means that quality is bound to win. *For real work can't be done without real tools.* The tools we make—rubber belting, hose, packing and all the rest—are genuine clear through, **AND WHENEVER YOU SEE "1846 PARA," OR "DOUBLE DIAMOND" BRANDED ON A RUBBER TOOL, IT'S A WORKER.**

Something for Nothing.

"If there is any one purpose that has made a pronounced impress upon the times," says the *Hub*, "it is the almost universal effort to obtain something for nothing. It is this that leads the trusts and other corporations to issue a million in bonds for half a million in property. It prompts the worker to give a few hours' work for a full days' pay, and causes the woman to hunt the bargain counters and pay full values for inferior goods, under the impression that she is getting a bargain. We see it in every phase of life. The lawyer without clients becomes the political trickster and secures an office, where little work and big pay make up the sum total of his ambition. The preacher sees more money in sensationalism than in the religion he professes, and his Bible is laid aside for the scandals of the day. The public press appeals to the lowest elements in man's nature, to gain notoriety, and with it the dollars. The manufacturer debases his materials to increase his profits, and law makers enact laws which will invite contests in courts, in order that fees may be earned with little labor. Every element in private or public life, is thoroughly permeated with the virus, notoriety purchased by court scandals, and even the supposed custodians of purity close their eyes on vice of an every day character, and affect to see crime lurking in the teachings of men of letters. They know that the innocent man can defend himself, while the guilty will shrink from publicity. The seller strives to give nothing for something, while the buyer strives equally hard to get something for nothing. The man who has failed through questionable business methods is the most persistent in his efforts to obtain a release from his just obligations, through a petty compromise, and he who accepts the mite offered hopes to make good his losses through future sales. It is this special grab that balks business and stimulates freak legislation and gives that uncertainty to all matters that should be public and private. There never was a time when these conditions existed to the same extent that they do now. Let us hope that the climax has been reached and that the time is approaching when each and all will be able to give an equitable return for what is received."

Points in an Employer's Liability to Employees.

A workman does not assume a risk where he knows there is some danger without appreciating it.

An employer is bound to use reasonable care to see that machinery used by his workmen is in proper condition.

The mere fact that a workman received an injury raises no presumption of negligence on the part of his employer.

A workman does not assume the risk of injuries from a latent defect in machinery, because his opportunity of discovery is the same as his employer's.

An employer is bound to give notice of latent dangers, among which the employe is required to work, and of which the employer has knowledge or should have had knowledge.

A person entering the service of another assumes all risks naturally incident to that employment, including the danger of injury by the fault or negligence of a fellow workman.

The mere fact that an employe was careless in doing a certain piece of work does not show that he was a reckless and incompetent workman, whom it was negligence to employ or keep.

Where a workman knows that the appliances with which he works are defective, and he does not complain to his employer, or representative, of their condition, he assumes the risk of their use.

The fact that a superintendent assures a workman that there is no danger, and tells him to return to work, does not relieve the workman of the assumption of the risk, he being of full age and knowing the danger.

The mere fact that a manufacturer hires an unlicensed engineer to run his boiler does not render him liable to other employes for personal injuries caused by the explosion of the boiler.

An employer is not required to use the most improved kinds of machinery in his factory. It is sufficient that the machinery was reasonably safe and suitable for the purpose for which it was used.

An employer is not bound to anticipate every probable risk which may happen in the use of a machine, but discharges his duty if he give such general instructions as will enable the employe to comprehend the danger.

When an employe's duty to inspect and repair machinery is incident to his use of the machinery in a common employment with other workmen, the employer is not liable to fellow workmen for the negligence of such employe.

An employer who calls a surgeon to aid an injured employe is not liable for the negligence or malpractice of the surgeon, provided the latter had knowledge and skill ordinarily possessed by other surgeons, and the employer had no reason to suspect that the surgeon would fail in his duty.

An employe of mature years who was removed from one employment to another, without objection by him, cannot recover from his employer for injuries received through his unfamiliarity with the machinery which he was required to operate, unless his employer knew of his inexperience in that direction, or was informed of it by the employe.

When the conditions of a mill and the relative situations of the deceased and his fellow workmen would suggest to a person of common intelligence menacing and obvious perils from the use and operation of the machinery, an employe who continues to work in it assumes the risk, though it arises from the negligence of the employer, and the latter is not liable for the death of the employe.—*The Manufacturer.*

Cute Japanese.

"The Japanese are getting too cute," said George Bradshaw of London at the Palmer recently. "They are the cleverest people in the world, I believe. Last winter I traveled all through the land of the Mikado. We arrived at Yosaka one day, and it is quite a small town. We did not know where to stop. There were a number of inns, and we were asked to stop at each one that we passed, but I didn't like the appearance of them. Presently we ran across a neat, tidy place that looked quite English. There was a big sign in front like this:

English, German and French
spoken here.

"That suited us, for we were obliged to communicate with some one in the village, and we could talk but little Japanese. Soon after our arrival we asked for the interpreter.

"'Pardon, master,' mumbled the landlord in cracked English, 'but I have none now.'

"We were just able to understand him. He knew a few English words and we knew a few Japanese.

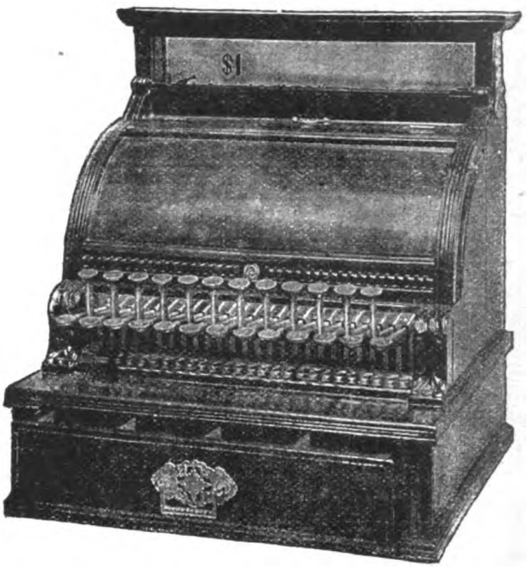
"'No interpreter?' we exclaimed.

"'No.'

"'Your sign says that all languages are spoken here.'

"'They are.'

"'By whom?'



"'The guests. We have all kinds at different times.'"—*Chicago Herald.*

Neal Dow says the first elephant exhibited in this country was Old Bet, which was exhibited at Portland, Me., somewhere between 1815 and 1820.—*Chattanooga Tradesman.*

A Metallic Butt Gauge, having one bar with two steel cutters fixed upon it. When the cutter at the outer end of this bar is set for gauging on the edge of the door, the cutter at the inner end of the bar is already set for gauging from the back of the jamb. The other bar has a steel cutter to accurately gauge for the thickness of the butt.

The form of this Tool is convenient for carrying in the pocket. It is so constructed that the bars cannot fall out of the stock.

No. 95. Nickel-plated Butt Gauge, one in a box, $0.75

Hardware Business Ninety-six Years Ago.

Not only was the field of business enterprise restricted, but the transaction of business within that field was slow and difficult. The merchant kept his own books, or, as he would have said, his own accounts, wrote all his letters with a quill, and when they were written, let the ink dry or sprinkled it with sand. There were then no envelopes, no postage stamps, no letter boxes in the street, no collection of the mail. The letter written, the paper was carefully folded, sealed with wax or a wafer, addressed and carried to the post-office, where postage was prepaid at rates which would now seem extortionate. To send a letter, which was a single sheet of paper, large or small, from Boston to New York or Philadelphia, cost 18¾ cents, and to Washington 25 cents, and this at a time when the purchasing power of a cent was five times what it is at present. To carry a letter from Philadelphia, then the capital of the United States, to Boston and bring back an answer by return mail, would have consumed from twelve to eighteen days, according to the season of the year and the weather.—*Atlantic Monthly.*

Why the South Sells Iron in England.

The Atlanta *Constitution* says that "there was a time when the British empire enjoyed a monopoly in the production of iron and looked with scorn upon the products of other countries. Within the last few years, however, our British friends have commenced to doubt the superiority of their domestic iron and to look abroad for supplies. That Great Britain has deigned to become a purchaser of our southern pig iron is not only a most significant fact, but clearly proves that her own product is inferior to the output of southern mines. While our sister State of Alabama is entitled to special congratulation, the victory is one which the entire section can unite in celebrating."

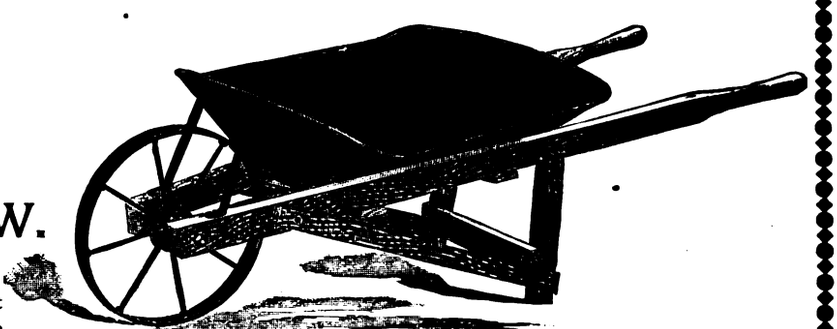
The Chattanooga *Tradesman* adds: "The assumption that British mill and foundrymen and steel makers buy our iron because of its superiority is a mistake. They buy of us because they get the material cheaper than it can be bought at Stockton, Glasgow or Cardiff, that is all. Our southern iron may be a trifle better than the foundry and mill grades of the Cleveland district; but the superiority in quality, if it exists—which we doubt—is not enough to tip the scale in our favor were prices the same. But fifty cents or a dollar a ton lower quotations catches your British manufacturer, accustomed as he is to saving every penny—a habit, by the way, which more of our manufacturers could fall into to their decided advantage. The great fact in our iron exports to Great Britain and her continental customers is that the southern district makes iron so much cheaper than the cheapest cost the British furnaces can reach that our iron undersells theirs in the British markets, leaving the American producer a fair profit. It is a very great achievement, something the most enthusiastic American iron man could not have been made to credit as possible five years ago."

Wanted Spice of Variety in Life.

The expression of the editor's face showed that he was easily irritated, and the contractor into whose office he walked braced himself for trouble.

"I wish," said the irritable man, "that you would do me a favor in connection with the work on my house."

"Anything that we can do will be cheerfully attended to."



"Thank you. I wish you'd send a new man to do the painting."

"But the one we have there is an excellent workman."

"I don't doubt that. But he's been there three days and he hasn't whistled anything but 'Tell Them That You Saw Me.' I'm pretty slow at catching a tune, but I've learned that with all the variations, and if it's just the same to you I'd like to start in on a new one."—*Washington Star.*

A steel "chest protector" against bullets and knife thrusts, in the form of a vest, has been patented by a Texan.—*Stoves & Hardware Reporter.*

RETAIL TRADE RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Hardware Stores.

Biscay, Minn.—James Nowak.
Dexter, Mich.—S. A. Sorenson.
Elmwood, Pa.—Charles Beguin.
Flat Rock, Mich.—J. J. Wahl.
Hamilton, Ont.—Thomas Ramsey.
Henderson, Mich.—J. W. Groetch.
Lebanon, Pa.—Charles B. Greenwald.
Osseo, Wis.—Field & Olson.
Walworth, Ill.—J. L. Carr.
West Sullivan, Me.—Patterson & Porter.
Wilmot, S. D.—Ireland & Hougen.

Changes and Removals.

Alexandria, Minn.—Mason & Sims, Sims sells interest to H. A. Le Roy.

Atlanta, Ga.—The Lowry Hardware Co. changes its name to the Anderson Hardware Co. There is no change in the personnel of the management, H. L. Anderson remaining president, with J. B. Barton as secretary, and Sims Bray as treasurer. The capital has been enlarged and the company will continue upon its course of unbroken success with the brightest prospects for the future. The business is fast becoming one of the most flourishing in the Hardware trade of the South and its continued growth will be watched with interest and pride by those who are interested in the future of Atlanta and her many strong business enterprises.

Bancroft, Mo.—H. E. Hosman, sold to Meade Bros. Hardware Co.

Crowley, La.—E. H. Ellis, succeeded by E. H. Ellis Hardware Co., Limited.

Dexter, Mich.—T. S. James has sold his business to F. Boise, who will continue.

Fort Wayne, Ind.—Henry B. Monning, trustee for the defunct Hardware firm of Henry Beuret & Co., disposed of the last of that concern's business. The business had been carried on for some months since the failure of the firm, and much of the stock was disposed of at retail. Recently Mossman & Yarnelle bought in the remaining stock of Hardware for $6500. The office fixtures, safe and furniture were sold to Sponhauer & Crim, the wheel manufacturers, who are fitting up office rooms in their east-side factory.

Garden Grove, Iowa.—J. P. White succeeded by Adams & Stellersburg.

Greensboro, N. C.—The Daniel Hardware Co. sold out, good will, stock and all to Jno. Stewart, M. C. Stewart, and W. E. Phipps. The new concern will be known as the Greensboro Hardware Co., and they are to take charge this month.

Jacksonville, Fla.—H. D. Wyman, before leaving on his tour, sold his stock of Hardware to the A. E. Hill store.

Mankato, Minn.—Clem Schroeder disposed of one-half interest in business to John Murphy, formerly of St. Clair, and in future the business will be carried on under the firm name of Schroeder & Murphy.

Merrill, Wis.—C. F. Smith of Marathon county recently purchased of Van R. Willard the property situated on the north-west corner of East River and South Park Streets. He will remodel the store front building and will open up a farming implement establishment. Other improvements on this property will also be made.

Muncie, Ind.—F. E. Putnam, stock purchased by C. W. Oakley and W. K. Little.

New Lisbon, Wis.—E. Smart has sold his interest in firm of E. & W. H. Smart.

Omaha, Neb.—The Carter Hardware Co. at No. 1405 Douglass Street, successor to the pioneer Hardware firm of Himebaugh & Taylor, has changed ownership, A. S. Carter retiring from the business and disposing of the entire capital stock of the company to Iowa men. The purchasers of the business are C. M. Hickman and G. M. Kirby, merchants, and Day Dunning, a banker, all from Mount Ayr, Ia. Mr. Hickman and Mr. Kirby, who have been here for a time to complete the arrangements for the purchase of the stock, will remain to take active charge of the business. The new owners of the store have engaged Nathan Roberts as general manager, he having been identified with the Carter company almost since its formation. Fred Schrem will be retained as manager of the builders' Hardware department.

Paterson, N. J.—A. R. Christie, the Hardware merchant who does business under the name of George Christie, has secured three floors in the new building at the corner of Washington and Fair Streets, erected by Park Commissioner I. A. Hall, and will move his business from Main Street to the new store which is particularly adapted to the Hardware business.

Salem, Mass.—Morton & Hill, stoves, now Hill & Parker.

St. Thomas, N. D.—Wm. McBride, Hardware, succeeded by Childerhose & Gibson.

Tell City, Ind.—L. C. Lasher, stock purchased by Charles Ebersold, who has taken charge.

Thompsonville, Mich.—J. A. Evist's Hardware store has been purchased by H. Yarger.

Tyndall, S. D.—Chas. Schladek has sold out his business to M. Weissner.

Waterville, Minn.—The Waterville Hardware & Furniture Co., has been succeeded by Edward Minges.

Vincennes, Ind.—A new change in business, the firm of Wegner & Ecker. Mr. Wegner has traded his half interest of general merchandise and Hardware to Herman Westfall and the firm will be known as Ecker & Westfall.

Waynesburg, Pa.—Munnell & Hunnell Hardware Co., reported to have sold out.

Whitewater, Wis.—The Whitewater Hardware Co. has been succeeded by J. P. Coffey.

Wilmot, S. D.—C. C. Draves has sold out his business.

Business Embarrassments

Cobourg, Ont.—Pearcy & Knox have assigned to T. A. Gibson. Assets and liabilities not stated.

El Paso, Ill.—O. C. Guillemont has assigned to Joseph G. Baker. Assets estimated at $1400, and liabilities at $900.

Hume, Ill.—McCaull & Co., stoves and tinware, have made an assignment to O. H. Rogers. Liabilities, $2114 and assets $1000.

Johnstown, N. Y.—Fred. W. Partiss has assigned to Nellis Getman. Assets are reported at $3500 with liabilities somewhat less.

Washington, D. C.—The Pate Hardware & Harness Co., has made an assignment to George G. Eaton. Assets are reported at $6435 and liabilities at $4039.

West Newton, Pa.—Stewart Mfg. Co., agricultural implements, a receiver has been appointed.

Recent Burglaries.

Alexandria, Minn.—Morrissey, Wegener & Alton, loss $40.

Andover, S. D.—B. Carpenter, loss $50.

Antigo, Wis.—H. A. Kohl Co., loss $50.

Ashland, Wis.—B. Garnichts, loss $200.

Cincinnati, Ohio.—Howell, Gano & Co., cutlery, etc., to a large amount.

Collinsville, Conn.—C. S. Smith & Son, loss $25.

Edgerton, Ohio.—F. A. Fasselman, loss $100.

Elk Creek, Neb.—George Kirkner, loss $100.

Herman, Neb.—D. H. Harper, loss $150.

Latrobe, Pa.—N. Ores Hardware store, loss $100.

New Albany, Ky.—Plumer & Co., loss $15.

Omaha, Neb.—Cole & Cole, loss $25.

South Bend, Ind.—Shidler Bros., loss $150.

Sterling, Kans.—J. Hanna & Co., loss $250.

Sumner, Wash.—Baker & Foster, loss $50.

Tacoma, Wash.—Brown & Foster, loss $45.

Wayne, Mich.—Henry Loss, loss $50.

Recent Fires.

De Kalb Junction, N. Y.—Walker's Hardware store was badly damaged by fire in a conflagration the total loss of which is estimated at $40,000, with insurance of $21,000. Six houses and twelve business places were burned.

Pascoag, R. I.—George A. Joslin, damaged by fire.

Pawtucket, R. I.—F. Eugene Barker & Co., stock in warehouse damaged to the extent of $1500; fully insured.

Union Bridge, Md.—Repp & Haines, damage to building and stock $2500; fully covered by insurance.

Utica, Ohio.—D. A. Bricker, total loss; partially insured.

Venedocia, Ohio.—Jones & Jones, Hardware, destroyed by fire.

West Newton, Mass.—The Fiske Hardware store destroyed by fire.

Whitewright, Tex.—C. W. Melson, destroyed by fire.

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers, the country over are requested to contribute to this page. News of new factories or companies, changes, improvements, etc, will be gladly received, and promptly published.

New Companies, Etc.

Augusta, Me.—The Standard Mfg. Co., has been organized for the purpose of manufacturing electroplated wares and goods of all kinds in which wood, paper, britannia, iron, steel, brass and other metals form component parts, with $50,000 capital stock. The officers are: President, W. A. Perkins of Augusta; treasurer, L. E. Burleigh of Augusta.

Cleveland, Ohio.—The Cleveland Brass Co. has been incorporated to manufacture all kinds of castings in brass, copper, bronze and aluminum; capital stock, $25,000. The headquarters of the company are to be in Cleveland. The incorporators are John L. Caven, Albert Bray, Charles Bahr, W. H. Bosworth and W. P. Mount.

Cleveland, Ohio.—The Cleveland Lock, Nut & Bolt Co., of Cleveland, has been incorporated; capital stock, $10,000. The company is to manufacture bolts, nuts, nut locks and railway equipment. The incorporators are Loftus Cuddy, George G. Sowden, John W. May, George R. Miller, Jr., and F. L. Wanke.

Davenport, Ia.—The Hartman-Eldridge Mfg. Co. has been organized to manufacture the Hartman washing machine, the Hartman egg carrier and the U. S. shade adjuster. The promoters of the new firm are two of Davenport's well-known business men, John R. Hartman and M. L. Eldridge. They have leased the three upper stories of building No. 3 in the Bazaar Block on Brady Street between Front Street and the Levee, and will begin active operations this month. They will also manufacture any wood-work novelties that may come their way. The building was leased and extends over a period of several years. The capital stock of the company has been placed at $20,000. The factory will employ from ten to twenty men.

Dayton, Ohio.—The Patterson Tool & Supply Co. succeed to the business of Callender & Patterson, dealers in iron and wood-working machinery, mechanics tools, and manufacturers supplies. Capital stock, $40,000.

Pittsburg, Pa.—The American Ax & Tool Co., a concern with $2,000,000 capital and no funded debt, was granted a charter under the laws of Pennsylvania by Secretary of the Commonwealth Reeder. This company had a charter under the laws of Kentucky, but the recent corporation laws of that State caused it to seek another State. The concern manufactures tools of iron and steel, and has a large works on Butler Street, Pittsburg. C. W. Hubbard, Jr., is president and the directors are C. W. Hubbard, Jr., Pittsburg; F. T. Howell, Jamestown, N. Y.; Ethan Rogers, Ballston Spa, N. Y.; A. C. and Robert Mann, Mill Hall; Jas. H. Mann, Lewistown; G. T. Lane, Troy, N. Y.; C. W. Hubbard, Pittsburg; Frank E. Mann, Lewistown; G. Hannay, East Orange, N. J.; H. Knickerbacher, New York; C. H. Wier, Baltimore; S. A. Rankin and J. H. Lockhart, Pittsburg, and C. W. Mackey, New York.

Portland, Me.—The Depew Mfg. Co., organized at Portland, for the purpose of manufacturing and doing a general business in mowing machines, lawn mowers, reapers, etc., with $1,000,000 capital stock, of which $800 is paid in. The officers are: President, C. H. Hutchins of Worcester; treasurer, J. Carstensen of New York.

Youngstown, Ohio.—The Girard Stove & Foundry Co., a foreign corporation, organized under the laws of West Virginia, with principal office located at Youngstown, Ohio, has complied with the act of May 16, 1894, relating to foreign corporations, capital stock $50,000, all of which is represented by property owned in this State.

Improved Conditions.

Ashland, Wis.—One of the plants for the Superior Handle Co. has already arrived at Butternut and two more are expected in a few days. It is expected that by the middle of August they will have six of these plants in operation near Butternut, manufacturing the hardwood timber into handles of all kinds. This company has been organized by Col. C. T. Bowen, G. W. Peck, Dr. N. Booth and others and the capital stock of the concern is $25,000, all paid up. The company own 10,000 acres of hardwood timber near Butternut, and when all the plants are in operation they expect to manufacture 100,000 handles daily.

Fort Wayne, Ind.—The Ft. Wayne Lamp Co., headed by R. T. McDonald, will make a specialty of manufacturing incandescent lamps, electric lamp trimmings and fixtures, and it has purchased the plant of the Adams-Bagnal Co., of Cleveland, Ohio, and will remove the same to this city. Henry J. Miller, of this city, and Samuel Insull, of Chicago, with Mr. McDonald are the directors.

Hollidaysburg, Pa.—The rolling mills of the Eleanor Iron Works, which have been idle for a month on account of the puddlers refusing to accept a reduction in wages, resumed operations in all departments the morning after the Fourth. The puddlers went back to work at the company's terms, $2.75 per ton. Two hundred people are affected by the resumption of work.

Lebanon, Pa.—The chain works of the West End Rolling Mill Co., are now running to their full capacity. A large number of additional men have been put to work.

South Bend, Ind. — The South Bend Chilled Plow Co., one of the largest plow concerns in the world, has recently booked among other orders one for twenty-six cars of plows to be sent to Texas. Another order recently received is for 2300 plows to be sent abroad. Arthur D. Baker, head of the growing concern, says that the evidences of returning better times are unmistakable. Their business shows it in every way, and reports which they are constantly receiving lead to the same conclusions.

Stratford, Ont.—The provisional directors of the Perth Flax & Cordage Co. have secured a site here and propose erecting a brick cordage factory, a frame flax mill and a rope walk. The cordage factory will be erected first and plans have been prepared. The building will be 36x114 feet, with a one-story adjunct as an engine room. The contract has been awarded to local firms and the work will be pushed on as fast as possible. It is calculated that at least 200 men will find employment in the works.

Recent Embarrassments.

Boston, Mass.—In the United States Circuit Court, Judge Colt authorized the receivers of the Atlas Tack Co. to pay creditors a dividend of twenty per cent.

Buffalo, N. Y.—The large firm of Plumb, Burdict & Barnard, nut and bolt manufacturers, at North Tonawanda, with offices at No. 75 White Building, is to be dissolved. Attorneys Bissell, Carey & Cooke, representing a majority of the stockholders, appeared before Justice Lambert in Special Term of the Supreme Court and made formal application for a dissolution. They stated to the Court that the business of the firm was so poor that it would not be wise to continue it any longer, and to protect stockholders and creditors it was considered advisable to wind up its affairs. Papers were submitted showing that its nominal assets aggregated $100,000. The amount of its liabilities were not stated. Justice Lambert made an order requiring all persons interested in the concern to show cause on September 20th next why it should not be dissolved, and appointed Charles H. Avery to take proof of all claims against the firm. Homer E. Dudley was appointed temporary receiver of the firm. He was ordered to give a bond of $50,000.

New York, N. Y.—The schedule of assets and liabilities of the firm of Joshua H. Cort & Son, manufacturers of gas and oil stoves at No. 41 Adams Street, Brooklyn, was filed in the County Clerk's office by Assignee Rufus O. Catlin. The liabilities amount to $39,923.69 and the assets $41,863.03.

Sandwich, Ill.—The Sandwich Enterprise Co., manufacturers of windmills, cotton planters, and farm machinery, has made an assignment to D. K. Crawfoot of this city. The liabilities are placed at $200,000. Prior to filing the articles of assignment the company confessed judgment for $50,000, of which amount $38,000 is in favor of the Sedgwick Bank of Sandwich.

Recent Fires.

Bellaire, Mich.—The large woodenware manufacturing plant of Bechtold & Richards is destroyed by fire. Cause unknown; loss, $15,000; partially insured. Seventy men are thrown out of employment. The works will be immediately rebuilt. The town was saved only by great labor.

BICYCLE TRADE RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores.

Chester, Pa.—Sam'l Evans has opened a bicycle repair shop at Second and Market Streets, Marcus Hook.

Colorado Springs, Colo.—George Mayer, bicycles and Hardware, will establish a branch house.

Fairhaven, N. J.—R. D. Chandler has opened a bicycle emporium in the store formerly occupied by F. Little.

Meilnor, N. D.—H. K. Pennington & Co., Hardware, sporting goods, etc., have opened a new store.

Okome, Pa.—G. W. Dennison & Son have opened a large bicycle repair shop.

Pontiac, Ill.—The Coleman Cycle Co. is newly established on Madison Street, one block west of the square, and is conducted by F. S. Coleman, who has for some time been engaged in the same line of business at Marion, Ind.

Tempe, Idaho.—Fred. C. Mock, Hardware, sporting goods, etc., has just commenced business.

New Companies, Agencies, Etc.

Buffalo, N. Y.—Buffalo is to have another bicycle factory. The new company is to be known as the Union Cycle Works of Buffalo, N. Y. A long lease of the building at No. 319-321 Ellicott Street has been secured and it is being fitted up as a model place. At present the ovens in which the enameling is to be done are being constructed. Workmen, union workmen, are the prime movers in this concern. They are the stockholders and promoters. It is to be a strictly co-operative company and the workingmen will have everything to do with the management of the company.

Des Moines, Iowa.—The Rubber Tire Wheel Co., of Springfield, has opened a branch house in this city.

Knoxville, Tenn.—The Knoxville Cycle Co. is the name adopted by the successors of the Bayzarian Cycle Co. at No. 312 North Gay Street in the Caswell Building. S. J. Morton will be in charge. Mr. Morton has secured the services of C. E. Howson, who will have charge of all work. Mr. Howson is an expert bicycle man, having been three years in the Crawford factory at Hagerstown, Md., as model wheel builder.

New York, N. Y.—Garfield Cycle Co. has been incorporated by Robert Goeller, John F. Hessen and R. Llewellyn Rees. Capital stock $1000.

Philadelphia, Pa.—The Tiger Cycle Co., No. 1121 Market Street, have moved into their new store at No. 1534 Market Street.

Philadelphia, Pa.—The Provident Bicycle Association, has been formed for insurance of bicycles against loss by theft.

St. Louis, Mo.—The Cycle Frame Coaster Co. has been incorporated by W. E. Grayson, L. P. Curtis, and John W. McCargo. Capital stock $10,000.

Toledo, Ohio.—The Kirk-Young Mfg. Co., H. J. Young has disposed of his interest to his partners, and will organize a new company for the manufacture of bicycles.

Washington, D. C.—The Sylph-Winton Agency, bicycles, Sixth and F Streets, N. W., have made addition to their store. They will do a rental business, which will be under the management of Mr. Harry Seamark.

Winona, Minn.—Lalor & Co., carriage makers, who recently added a bicycle factory, are manufacturing a wheel known as the "New Winona."

Changes and Improvements.

Bayshore, N. Y.—Willey & Oakley, bicycles, sporting goods, etc., succeeded by A. A. Willey.

Charleston, S. C.—Charleston Cycle Co. succeeded by the Southern Cycle Supply Co.

Dallas, Tex.—The Young Cycle Co. has closed out its business.

Darlington, S. C.—W. G. Dickson, bicycles, has enlarged his quarters and will manufacture, sell and repair wheels of all kinds.

Denver, Colo.—A. Lillyblade, furniture, bicycles, etc., No. 1717-1723 Lawrence Street, closing out stock.

Emporia, Kans.—J. L. Suppe & Co., bicycles, etc., will move their stock to Joplin, Mo.

Franklin, Ind.—Van Vleet & Lacy, bicycles and sporting goods, succeeded by Van Vleet & Van Vleet.

Lebanon, Pa.—Keystone M. & M. Co., West Walnut Street, extensive improvements are being made in factory, so as to increase the manufacture of bicycles.

Middlesboro, Ky.—George M. Stains reported to have sold to Arthur E. Crone.

Modesto, Cal.—Minnear & Young, bicycles, have dissolved partnership, Mr. Minnear retiring and Mr. Young continuing the business.

Toledo, Ohio.—One of the best known firms in the bicycle sundry business in America and foreign countries is F. W. France & Co., with headquarters at Rochester, N. Y. Mr. France has been in the city on several occasions and has made a deal with A. U. Betts, of the firm of A. U. Betts & Co., the well-known bicycle sundry dealers located in the Marine Building, at the corner of Water and Jefferson Streets. As a result of the deal the firm of A. U. Betts & Co. passes into the hands of his firm.

Toledo, Ohio.—The Ojisto Cycle Co. plant and machinery purchased by Uhl Bros.

Toronto, Ont.—McLean & Oakley, bicycles, will close out business. The break in the price of high grade United States wheels will prevent their firm from continuing manufacturing at a profit. It is said that several other Canadian firms will follow their example.

Washington, D. C.—Parsons & McGee reported to have dissolved partnership.

Recent Embarrassments.

Hazleton, Pa.—George N. Lord, bicycles and novelties, has failed. Liabilities, $2000.

Indianapolis, Ind.—On the application of the Indianapolis Chain & Stamping Co., Judge Carter appointed Charles E. Rockwood receiver of the Central Cycle Mfg. Co., manufacturers of the Ben-Hur bicycle. The receiver was ordered to continue the business of the company, and all orders on hand will be filled without interruption. Lucius M. Wainwright, president of the company, expressed the hope that the company would be able to recover from the business depression that led to the receivership. The estimated liabilities of the company are about $94,000, with assets worth about $125,000, including a plant valued at $40,000, accounts and bills receivable amounting to $45,000, with real estate, materials and stock on hand to bring the total up to the figure mentioned.

Kansas City, Mo.—Lawrrance Bros. Cycle Co. reported to have made an assignment.

Milwaukee, Wis.—Moscrip & Holt Co., bicycles and vehicles, reported to have made an assignment.

New York, N. Y.—New York Bicycle Equipment Co., No. 257 Broadway, Samuel B. Lawrence appointed permanent receiver by Judge Lawrence, of the Supreme Court, who also granted an order dissolving the corporation. The liabilities are $10,597; assets, $5507.

New York, N. Y.—Oliver & Strauss, dealers in bicycle supplies at No. 23 Park Row; schedules show direct liabilities, $55,293; contingent liabilities, $32,049; nominal assets, $97,920; actual assets, $6351. The contingent liabilities are indorsements on notes.

Woodstock, Ont.—The New Barnes Cycle Co., Limited, are in the hands of a receiver. The assets are probably more than $60,000, showing an estimated deficiency of about $10,000. There is also due some wages, which will amount to from two to three thousand dollars.

Worcester, Mass.—The Worcester Cycle Mfg. Co., Frank Sullivan Smith, receiver, has taken possession. Mr. Smith said he had a contract for 450 wheels to send abroad, and the purchasers had agreed to put up bonds for payment as soon as the wheels were ready for shipment. He had also a number of other orders, and had no doubt but that the company could pay 100 cents on a dollar in a short time.

Recent Fires.

Boston, Mass.—O. J. Faxon, bicycle manufacturer, etc., damaged by fire to the extent of $15,000.

Boston, Mass.—The Ideal Trading Co., dealers in bicycle supplies, damaged by fire.

New Orleans, La.—Walter H. More, sporting goods, damaged by water.

Vancouver, Wash.—Walter W. Wintler bicycles, destroyed by fire.

STERLING BELLS.

One Best THE Sterling.

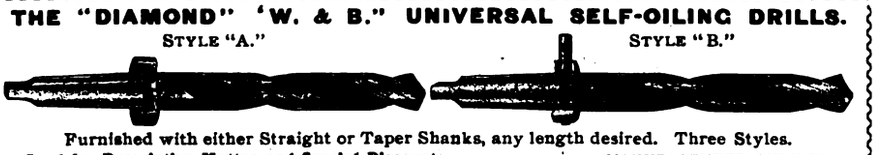
Bells of all Description.
Send for Catalogue.

N. N. HILL BRASS CO.,
East Hampton, Conn.

Bells.

The bells of the ball on her escort leaned,
And so very happy the dear girl seemed,
That he took her aside to a cosy retreat
And told her the story that's always so sweet.

She perked up her lips, so enticing and fair,
And his own were reaching the heaven that's there,
When she said, "Dear boy, this is only a sell.
You'll first have to buy me that 'Climax' bell."



The new 1897 model "CLIMAX" Bell possesses without doubt the most improved Lock Clamp known. Can be adjusted to the Handle Bar quickly without removing the screw, thus saving all vexatious worriment in the operation, and at the same time presents a more attractive appearance than any other kind of an attachment.

We have just published a handsome little booklet to be carried in the vest pocket, containing lots of valuable information for the benefit of wheelmen. Send us a two-cent stamp and we will mail you a copy.

CONDENSED BUSINESS WISDOM.

"THE BEST OF ITS CLASS."

John M. Holladay, Holladay, Va.: HARDWARE is so nicely gotten up, and so well edited, giving such a variety of information, yet costs so little, that I cannot see how any dealer in Hardware can afford to be without it. It is the best paper of its class.

"A HELP TO OUR BUSINESS."

N. G. Bickford & Son, Mount Holly, N. J.: Please send us HARDWARE for one year from January 1st. Enclosed you will find the price of subscription. After examining the copy sent us we find the paper will be a help in our business.

"THE MOST HELPFUL AID."

Pike Mfg. Co., Pike Station, N. H. [*Whetstones, Oil Stones, etc.*]: We like to keep our name and our wares before the public in a modest way. We have found HARDWARE the most helpful aid toward accomplishing that purpose.

"VERY USEFUL TO US."

J. A. Ross & Co., Boston, Mass.: We find HARDWARE very useful to us, as well as interesting. Considering the quantity and quality of matter in each issue, the subscription price is very low for a semi-monthly magazine.

"THE BEST THING OF ITS KIND."

W. L. L. Morrow, Purdy, Mo.: I regard HARDWARE as the very best thing of its kind I have ever seen, and really at the low price of subscription, I cannot see why it is not in the hands of every dealer in Hardware.

"SUBSCRIBE WITH PLEASURE."

Brown & Gilbert, Boston, Mass.: Please find enclosed $1 in payment for HARDWARE. We have found HARDWARE very useful and instructive, and subscribe for the coming year with pleasure.

"IS JUST RIGHT."

Alling & Lodge, Madison, Ind.: We enclose $1 to pay for our subscription to HARDWARE for one year from date. Your paper is just right; don't make it too big so one can't find anything in it.

"WORTH DOLLARS TO DEALERS."

J. T. Morris, Cleveland, Ohio: HARDWARE is a bright, spicy journal, and I look forward to its arrival as one of the family. The Prices Current quoted by it are worth dollars to any dealer.

"OF INTEREST TO LIVE DEALERS."

Van Voorhis & McNair, Crawford, Neb.: We like the journal very much. It always comes to our desk full of bright, sound matter, that cannot but be of interest to all good live dealers.

"IN YOUR COLUMNS FROM THE FIRST."

Van Wagoner & Williams Hardware Co., New York and Cleveland. [*Hinges, Anvils, etc.*]: Having been represented in your columns almost from the first issue, we have a feeling of pride and pleasure in your achievements.

"ADVERTISEMENTS HAVE GIVEN RESULTS.

W. C. Heller & Co., Montclair, N. J. [*Mail Boxes, Grips, Plows, etc.*]. Our advertisements in your columns have given results that assure us that they are closely watched by the trade.

"BEYOND CRITICISM."

Wm. Jessop & Sons, New York. [*Steel manufacturers*]: Another five years as proportionately successful as HARDWARE's last will place it almost beyond the criticism of friends or competitors.

"MUCH PLEASED WITH IT."

Chas. N. Vittum, Laconia, N. H.: I am pleased to be one of your subscribers, as I am very much pleased with HARDWARE. I think it a very useful and interesting journal.

"VERY MUCH PLEASED."

The Banks Hardware Co., Henderson, Ky.: Enclosed find Post Office order for $1, our subscription to HARDWARE. We are very much pleased with the publication.

"A VALUABLE ADVERTISING MEDIUM."

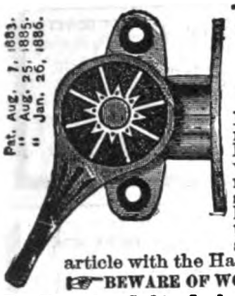
Harvey Hubbell, Bridgeport, Conn. [*Machinery and Tools*]: We are very much pleased with your paper, and consider it a valuable advertising medium.

"JUST THE PAPER RETAILERS WANT."

Henry E. P. Pritchard, Philadelphia, Pa.: Enclosed find $1 for which please send me HARDWARE for one year. It's just the paper retailers want.

"EXPERIENCE MOST SATISFACTORY."

Partrick & Carter Co., Philadelphia, Pa. [*Electrical Goods*]: Our experience as advertisers with you has been of a most satisfactory character.



"WORTH WHAT IT COSTS."

Spence & Co., Keene, N. H.: Enclosed find $1 to pay for HARDWARE for one year. We think it well worth what it costs.

"WELL PLEASED WITH IT."

Jacob Schmitt, Louisville, Ky.: I am very well pleased with your paper, and find some very interesting reading in it.

ADVERTISERS.

Gilbert & Bennett Mfg. Co., Chicago and New York. [*Wire Goods*]: You have reason to be proud of HARDWARE'S success both as a journal of interest and of usefulness to your readers, and as a profitable medium to the numerous advertisers. From the fact that our card has been steadily published in its columns from the first number, it must be concluded that we have found you a satisfactory medium.

OUTFITS

Digitized by Google

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

CRONK'S

Combination Fencing Plier.

This newly invented fencing tool is needed by all people that build or have occasion to remove or repair wire fence, as it is made with two staple pullers, two hammers and two button cutters. They are the same heft as the 1¼ Maydole Hammer, and they are made of forged tool steel. No good farmer will be without one. They are warranted to cut No. 8 hard or No. 6 soft wire. Like the celebrated Cronk Plier they are fully warranted in all respects. No. 12, 11 in. long, $12.00. Dis. . . .

Manufactured by

North Bros. Mfg. Co., Philadelphia, Pa.

New York Agents: John H. Graham & Co., 113 Chambers St.

Colwell Lead Co.

63 Centre St.
NEW YORK CITY.

Manufacturers of

LEAD PIPE
SHEET LEAD

American Standard

DROP **SHOT** BUCK

Also Wholesale Jobbers in

Wrought Iron Pipe, Cast Iron Soil Pipe, Water Closets, Brass Plumbing Goods, and everything else to plumb a house from cellar to garret.

RESERVOIR PUNCH

For Euchre and Whist Parties.

This Pocket catches the pieces punched from Tally Cards, thus preventing a littering of the carpet.
Is hinged, can be opened, emptied and closed in an instant.
Of great value to Railroads as it prevents the replacing of pieces punched out of monthly or commutation tickets.
Also valuable in Restaurants where punch tickets are used.

PATENT APPLIED FOR.

THE ONLY "PERFECTION" WATER ELEVATOR AND PURIFYING PUMP

Dealers, get in line and sell your trade an article you can guarantee for ten years. The chain or buckets is the principal factor in any elevator. The **Perfection Bucket** is cut by die in one piece of **Black Open Hearth Steel** folded together by double lap seams, and the entire chain **Galvanized** after **Construction.** Others are made of several pieces of galvanized iron soldered together. Simply this one feature is a sufficient guarantee that the **Perfection** has no equal. It is handled by all leading jobbers throughout the world. Call for the **Perfection.** Take no substitute.

For full particulars, circulars, etc., address the sole manufacturers.

Factories: GEORGETOWN, CONN. CHICAGO, ILL.
ESTABLISHED 1818.

THE OLDEST AND LEADING MANUFACTURERS OF GALVANIZED WIRE GOODS IN AMERICA.

"Pennsylvania" Fruit Picker

This Cut almost speaks for itself—the device being so much like the human hand, shows at once the utility of the article.

AS A FRUIT PICKER IT HAS NO SUPERIOR.

It is made of Heavy Galvanized Wire, and Easily Adjusted to a Pole. It has been sold for several years, and the demand (as it is becoming known) is steadily increasing. The difficulty of detaching fruit and securing it unbruised is apparent to everyone so engaged. This overcomes the difficulty, and saves the finest fruit which commands the highest prices.

THE LOW PRICE AT WHICH IT IS SOLD

brings it within the reach of those who have but little fruit to gather as well as those who have large quantities. *Price, per dozen, $5.00.* It will gather Apples, Peaches, Pears, etc.

MANUFACTURED BY **EDWARD DARBY & SONS,**

233-235 Arch Street, PHILADELPHIA, PA.

A GOOD THING.

IT'S IN THE TEETH.

The Patent "REFORM" Curry Comb is composed of three shallow, oval trays, with corrugated edges. The parts are struck up from a fine grade of cold rolled steel, heavily tinned and bronze lacquered, firmly riveted together and warranted not to rust. The outer dimensions are 6½x4¼ inches and by reason of the large cleaning surface and peculiar arrangement of teeth, the comb will do its work with a large saving of time and labor, cleaning with equal thoroughness both long and short coats. There are no places to accumulate hair and it will not tear or injure the brush, the comb being quickly freed from accumulation by giving its face a gentle tap.

"EVERYTHING IS COMING UP."

BUSINESS IS BETTER AND THERE WILL BE A LARGER DEMAND THAN EVER FOR OUR

Sheep Skin Mitten.

Acknowledged to be the best article for polishing stoves, as it does away with the old time dirtiness of the work, making this work a pleasure. Also invaluable for polishing brass or glass, or silverware, which it does not scratch. For tan shoes and cleaning bicycles it has demonstrated itself a conspicuous success.

PLEASED with RESULTS.

John N. Hager, Fort Atkinson, Wis. [*Fork, Shovel, Rake and Hoe Brackets*]: Am well pleased with the results of my advertisement in HARDWARE.

Digitized by Google

To Bicycle Riders.

WE MAKE OUR TUBE
OF FIFTY CARBON STEEL

Because a Tube like this of our .50% CARBON STEEL is just as strong as a Tube like this of .25% CARBON STEEL

While weight for weight in a Bicycle our FIFTY CARBON Steel will last so long [redacted] and TWENTY-FIVE CARBON Steel will last only so long [redacted]

NOTE THE FULL IMPORT OF THE PARALLEL LINES.

The comparison which they graphically make indicates the result of the prolonged investigations of the most practical experts of the world.

That the tests in our own laboratory corroborate these results is merely so much to its credit; that the same is true of actual trial on the road equally proves the trial to have been made in bicycles of correct design and construction. THE FACT REMAINS.

The margin of safety is greatly increased by the use of this tube. Every bicycle manufacturer should use it; every dealer should insist on having it; every rider should demand it. Send for catalogue.

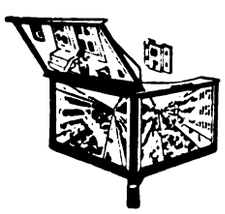
Did you ever see the like?

Seven men on one ladder—and it a small Step Ladder too—and it would carry as many more if they could get on it.

You know it keeps the old style Step Ladder busy to carry one good sized man or woman without breaking down; and they last but a year or two at best. . . . . .

This Step Ladder Will Carry All You Want to Put On It,



and will last a lifetime if you treat it half decent. . . . . .

There is but One Step Ladder made for mechanics, and

THIS IS THE ONE.

We manufacture
Single Ladders, Extension Ladders,
Single Bent Rung Step Ladders,
Which are all covered by patents.
No person else manufactures them but us. Write for Prices and Discounts.

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted to the Hardware Trade.

Editorial Trade Review.

It is very gratifying to receive from our correspondents in the leading cities, the encouraging statements that business invariably shows signs of permanent improvement, increased demands being perceptible on every side. Crops already harvesting are bringing prices far in advance of the anticipations of a few months ago, and purchases of farm machinery for July are reported as being the largest in many years.

The future prospects for good business seem well assured and on a firm foundation, and now that the tariff is removed from daily discussions formerly full of apprehension, the conservative merchant can expect stability for the future, and formu ate plans to accomplish profitable results.

Imported Hardware having been advanced in value by the increased duties demanded, is gradually being marked up in price to establish a standard of cost based on the new tariff with its many changes. The stocks of these goods are at present very full in many lines, which during the long debate in Wsshington was shown would be seriously affected by the new bill; these goods, under the general pressure to sell, will not be held too firmly at the new advanced cost; concessions will naturally be made under one pretext and another, on such lines as are not subject to any mutual agreement between importers governing prices; but the influence which the unloading of these extensive stocks will exert in trade channels during the approaching revival in general business, will be sufficient to handicap large sales of similar products from our own factories, until these foreign wares are distributed and prices become more settled.

Many heavy goods, which have been quoted recently at prices too low to afford a satisfactory advance on cost, are bracing up under conditions promising a steady demand, and an advancing market will ere long catch the wary buyers who are too deliberate in their movements when a prompt decision is desirable.

The stocks in jobbers hands in every direction are invariably in a condition favoring purchases, but the experiences of the past few years have been of a character to create conservative buying, when each succeeding season ended with lower quotations being made that were obtainable at the outset.

Many manufacturing concerns have closed July 1st. Their last year's business and their statements have not been of a kind that show increasing dividends over recent years; in fact in too many cases the profit column was minus and afforded no inspiration to continue during another season, any such unsatisfactory conditions under any pretext. This will be found to have its influence upon stiffening the quotations that have been abnormally low too long, and a continuance of which would make trust conditions play too prominent a part in the business of the future now opening up so hopefully for the manufacturing interests of the country.

Trouble Ahead for Ohio.

The news from Ohio is not reassuring.

If recent newspaper dispatches can be depended upon, a political campaign is to be conducted in that unfortunate State this fall, that will throw into the shade every previous effort in years past when only State issues were to be presented to the consideration of the voter.

And all this for the purpose of re-electing Mark Hanna a member of the United States Senate.

We have the highest respect for Mr. Hanna as a political leader, a business man, and a patriotic citizen, but we do not believe that his elevation to the Senate is so demanded by the destinies of the country, that a great State must be kept in turmoil for several months for the purpose of continuing his able and patriotic services to the nation.

The country at large, and Ohio especially, had begun to congratulate themselves upon having reached a breathing spell, when the farmer, the mechanic and the business man could forget politics and politicians for a time, and unite in one long and strong pull for the general salvation of the country. All through 1896 values were unsettled, business destroyed, and enterprises delayed, because of the national election. Everybody was looking about anxiously to discover where he and his neighbor stood, and the general hope was, that after the voter should have expressed his decree at the polls in November, affairs would settle themselves, and the country get down to a solid business basis, and the skies brighten for the future. The verdict of the people was all that could have been expected, and the country took a fresh breath, and each man said to himself: "Now we shall have better times."

Then came the extra session of Congress, and the long turmoil over the tariff question. That has been settled, and business men everywhere are beginning to get a new grip upon themselves and their affairs, and are looking forward to the surely brightening future, when politics shall be forgotten and politicians at rest. Now comes the fateful news from Ohio. From now until the November election, the State is to be ripped

Digitized by Google

and torn into shreds by wandering politicians, who are to fill every school house, and infest every country cross road, in their endeavor to persuade the voters that Ohio will go to ruin, and the country to the d——, if Mr. Hanna is not returned to the United States Senate. Prominent speakers from all parts of the country are to shadow the by-lanes and the cow paths of the most ru al districts, by day and by night, and it is even threatened that the chief executive of our country is to make half-hour stands through the State, and address the populace from the tail end of a sleeping car

All this is to be deplored. Ohio needs a rest. The country needs a rest. The Ohio voter, above all men in the world, needs a rest. He should have a few hours this summer and fall to devote himself to the farm, the work-shop, the mine, and the office, to the legitimate business of increasing the prosperity of the country, and of himself. The political orator needs a rest. The political theorist needs a rest. The editors need a rest. Even our able friend, Mr. Hanna, needs a rest.

We believe that the voters of Ohio know pretty nearly where they stand, and that all this fanfare of trumpets, and the beating of tom-toms, is a useless waste of time and money, and will keep business prosperity out of Ohio just one year longer than is necessary. If the magnificent resources of that State are to be developed, and her splendid industrial opportunities are to be used to their fullest extent, it will not be through the eloquence of orators, or the deep soundings of the brass band, but by attention to business, and a season of rest from office giving or from office seeking.

By all means give Mr. Hanna a chance, and let Ohio reward in the most fitting manner his political services to his party and to the country, but for the sake of Ohio herself, and for her best commercial and manufacturing interests, do not let this be done at the expense of a reviving business, and to the delaying of prosperity.

We have altogether too much of politics.

Important News from Bissell Carpet Sweeper Co.

On the 2nd ult. the Bissell Carpet Sweeper Co. made the following announcement to the trade:

"For twenty years the Bissell sweeper has steadily grown in popularity, until to-day, out of all the sweepers manufactured and sold throughout the civilized world, the Bissell constitutes at least four fifths of the entire product. Go where you will to-day in any quarter of the globe, wherever civilization is sufficiently advanced to make the use of carpets possible, and there you will find the Bissell sweeper.

"The city of Grand Rapids may justly feel proud of the reputation it enjoys throughout Christendom, as the peerless furniture city of the world, and it may be said with equal emphasis that no one product has done so much to advertise our city abroad, as Bissell's 'Grand Rapids' sweeper, for the reason that this sweeper has reached hundreds of trade centers throughout the world where Grand Rapids furniture is still unknown.

"The success of the Bissell sweeper is easily accounted for. From the time of its introduction on the market over twenty years ago, it was at once recognized as the only carpet sweeper that had ever given entire satisfaction to the dealer and consumer alike, and constantly being improved, it has maintained its hold upon the trade, until to-day, with the recent additions of cyco-bearings and dust proof axle tubes, unquestionably the two greatest improvements ever made in carpet sweepers, the Bissell enjoys a prestige unequalled in its history.

"While the sales of high grade Bissell sweepers have been eminently satisfactory to ourselves and our trade, yet many of our customers have urged that their sales of carpet sweepers could be largely increased if we would reduce our fixed retail prices, and thus place within the more easy reach of every housewife a genuine latest improved Cyco-Bearing Bissell Sweeper. In making a thorough canvas of the question through correspondence with many of our customers, as well as through our salesmen who visit every section of the country we are convinced that $2.50 and $3 are the popular prices for high grade Bissell sweepers, hence after fully considering the matter, we have decided to reduce our fixed retail prices on all high grade nickel trimmed machines from $3.50 to $3, and on the Grand Rapids japanned, from $3 to $2.50; and in order to still insure our customers in a good margin of profit in the sale of our goods, we have also concluded to reduce the list on all high grade nickel machines from $27 per dozen to $24, and on Grand Rapids, japanned, from $24 to $22, allowing rebates for quantity; terms sixty days net, 2% ten.

"While reducing the prices on high grade sweepers, we desire to assure the trade that the high character of our goods, as regards finish, construction, etc., will be strictly maintained. The above prices will take effect at once, and with the extremely favorable terms named on the latest improved Cyco Bearing Bissell's, and in fixing popular retail prices on these goods, their sales are bound to largely increase, which cannot fail to redound to the advantage of all concerned, namely: the dealer, the consumer and ourselves. With high grade Bissell sweepers retailing at popular prices, the trade will have little use for cheap sweepers, for experience has taught the dealer that cheap sweepers never give satifaction, have no fixed value on the market, and absolutely fail in every essential requirement.

"We shall continue to meet any competition in our line with goods of a similar quality, but it should be apparent to the trade that with high grade Bissell sweepers retailing at popular prices, there will be little or no demand for cheap sweepers.

"Hoping to secure your orders, we remain

"Yours truly,

"BISSELL CARPET SWEEPER CO.

"Grand Rapids, Mich."

W. E. Bayer, of Bayer & Co., No. 28 North Thirteenth Street, Philadelphia, was in New York some days since, arousing interest in his wonderful Window Mirror, which is rapidly finding its way upon nearly every house front in the City of Brotherly Love. It is an article that contains a great deal of possible profit, and Mr. Bayer wants to get hold of a live agent in every town and city in the country. An illustration of the article itself may be seen on page 10 of this issue.

On the morning of August 3rd, the large and well-known Hardware store of C. C. Snyder, Canton, Ohio, was almost totally destroyed by fire, entailing a loss of from $75,000 to $100,000. An employe went into the cellar carrying a lighted lamp, and in some way a barrel of turpentine took fire, and the flames shot up the stairway. The establishment was one of the oldest in that section of the West, having commenced business nearly a half century ago.

If you wish to have fun
Ride a wheel made for one;
But if looking for trouble
Ride one that's built double.

And thus to be happy,
Stay single through life;
But if looking for trouble,
Just get you a wife!—B. A. CHELOR.

Office Comforts.*

BY NATH'L C. FOWLER, JR., DOCTOR OF PUBLICITY.

Some years ago I listened with much pleasure and profit to a summer sermon by Professor Churchill, of Andover. The speaker began with the axiomatic statement that there are twenty-four hours in the day, and on this foundation, he built up a practical, argumentative discourse on the use and abuse of each hour in the twenty-four.

I shall simply appropriate his subject and not his words, and shall attempt to discuss, in a practical way, the best use of the hours we have at our disposal.

The average businesss man is at his office eight hours a day; this leaves him sixteen hours. He spends about one hour a day going to and from his office, and sleeps about eight hours.

Assuming that he spends one hour a day dressing and undressing, there is left to him but six hours a day for home and social pleasures.

It is fair to assume that every business man is out driving, walking or attending some entertainment at least three hours in a day, which leaves him three hours of unoccupied home-time against eight hours of business time. That is, the business man is in his office nearly three times as much as he is in his home.

Fully one-half of the offices are neither comfortable, commodious, nor pleasant.

It is true that some of the greatest men have written the greatest books, and accomplished the greatest deeds, in garrets, and have burned the midnight oil amid cobwebs and bare walls, but no sensible man will claim that an unattractive environment is conducive to the best mental or physical labor.

Luxurious offices may be in bad taste, but they are in no worse taste than the poorly furnished and uninviting offices, when the owners can afford office comforts.

In everything, appropriateness is conducive to the best results.

The dress at the seashore should not resemble the theatre gown, nor should the piazza chair be like that in the parlor.

But there is certainly no reason why an office should be a barn, a shed, or a dark corner in the warehouse.

No one of sense would suggest that there should be a fountain in the centre of the office or counting room, nor that it should be like a winter garden; but there is a vast difference between these extremes and the barreness of the average office.

A few potted plants cost nothing, and if they are of hardy species, require but little care.

Few men seem to appreciate the necessity of an awning or curtain, and constantly try their eyes by reading sunlighted letters and papers.

An office, as I see it, should be the business home, not the headquarters of the business treadmill. Everything that will contribute to the comfort of the eye and the body should be there.

The clerks work better if surrounded with comforts, and with pleasing effects. The business man feels more cheerful, and the visitor is much more likely to be brought into the trading frame of mind if he is comfortable.

Extravagance in office furnishings is to be condemned as much as barrenness. It almost invariably is a cloak, and is used as a sort of business trap, but office comforts are sensible, and necessary; and they are needed for the best and most economical conduct of business.

Many a business man locates his office in the most unattractive corner of his warehouse, when there is light to spare in other corners. Of course, there are many cases in which this cannot be avoided, but I am speaking of these men that can afford to have office comforts, and do not seem to appreciate the necessity of them or their value to business.

It is the business of the business man's wife to be as much interested in the care of the office as she is in the care of the home, or in the care of her husband's clothes.

Nobody wants a meddling wife around, nor does a wife desire to have her husband assist in the cooking; but there is a great difference between meddling and interest.

The business man makes suggestions to his wife at home, and she respects, even if she does not follow those suggestions; in return, it is her business to make suggestions about home comforts for the office-home.

Yale & Towne Mfg. Co.'s New "Vulcan" Line.

The Yale & Towne Mfg. Co., Stamford, Conn., and Nos. 84 and 86 Chambers Street, New York, have commenced the manufacture of an entirely new line of wrought steel door locks, embodying many and radical changes and improvements, which will at once focus the attention of the builders' Hardware trade and create discussion as to possible merits. Radically revolutionizing former conventional methods of construction, so long and persistently followed by lock makers, in the Vulcan Lock they challenge the investigation by experts among dealers and architects, especially of those new and unique features which are greatly in advance of even the high standards of skill which they have believed evident in every device stamped with their world-wide trade mark.

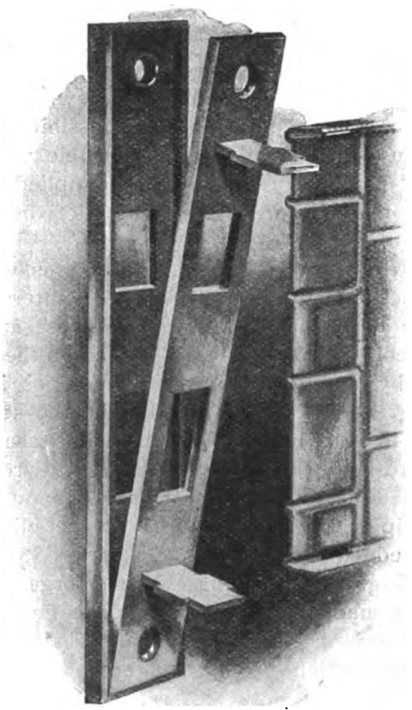

FIG. 1.

The line has been christened "The Yale Standard Vulcan Locks," and they are made of all wrought metal. In a very handsomely printed and finely illustrated booklet, now being distributed to the trade, the new principles, new designs and new mechanism underlying their original construction, are deftly delineated and intelligently described.

Among these practically original features may be named: The extreme rigidity of the wrought steel case; the unique construction of the front; and the cycloid knob action on the spindle, making the "easy spring" motion apparent when knob is turned in either direction. The improved triple spindle is retained in the Vulcan Locks after an experience in other Yale methods covering several years; this would seem to clinch the fact of its superiority having been abundantly proved to the satisfaction of their patrons.

Digitized by Google

Even the one little change—so long desired and previously overlooked—of the compensating hub, will be appreciated by the dealers as overcoming much of adverse criticism on the working of a lock when the binding action of the hub through the shrinking of the wood, was the only fault.

From the detailed description clearly presented in this interesting booklet, the points of excellence dwelt upon

FIG. 2.

by the company are as follows: All the various parts are manufactured by machinery from wrought materials, the special advantage of which is that every part is thus made interchangeable, lessening the possibilities of slight variations in construction, creating trouble when in use. The use of machinery to the extent implied puts every economy of manufacture within reach of the company's plant.

We illustrate herewith the salient features which make this construction of the Vulcan Lock interesting from a Hardware dealer's standpoint. The case and cap are made from cold rolled steel, each flanged on the outer edge and ribbed by corrugations in transverse lines, in order to obtain the greatest rigidity possible in the softer metal used, which in other respects promises increased strength. As shown in Fig. 1, the front consists of a wrought steel base, attached to the case by two cheeks, over which is drawn a skelp or cover of wrought bronze clinched over the tapered edges of the base.

The key, Fig. 2, is of solid steel, cold forged from open hearth metal, made in one piece, machine finished, nickel-plated and polished. The bit is tapered, being thickest at the outer edge, which produces a smooth action on the

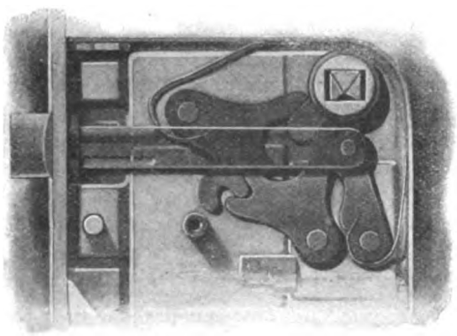

FIG. 3.

tumblers and bolts. A new principle involved in the construction of this improved line of locks is called by the makers the cycloid knob action, and is illustrated in detail in Fig. 3. It will be noticed the sliding action formerly used has been discarded, and pivotal motions substituted which are assisted in their action by intergeared levers; all of these important and interchangeable parts being made from wrought metal. The hub, by which the rotary action of the knob is transmitted, has a single arm or cam projecting diagonally downwards. Bearing against each side of this cam are two pivoted levers, geared together at their other ends, so that motion of the cam in either direction produces the same effect upon the levers, causing the lower one to move backward, carrying with it the third lever, to which is pivoted the end of the latch-bolt.

In its construction, the holes or trunnions in the lock case are flanged inward, providing a broad bearing for the ends of the hub, and the bearings for the key are formed in like manner. In the dead bolt construction the bottom edge is flanged to give it stiffness, and its rear end is thickened by a reinforcement, so as to give a broad bearing for the key in the "talon," the motion being guided and checked by a stud attached to the case and fitting within a guide slot in the bolt-tail,

In Fig. 3 is shown the compensating hub, the use of which precludes the possibility of the knobs binding if well fitted, from any natural shrinkage of the wood in the door. It will be noticed this hub opening is considerably elongated on its horizontal line, and is thus able to eliminate the usual disturbance caused by shrinkage from being an element of anxiety.

The triplex spindle already in use with the Yale locks will be used also with the Vulcan Locks. It consists of three triangular rods which, when united, form a square spindle, to one end of which one knob is permanently pinned. The other knob carries a set screw, which

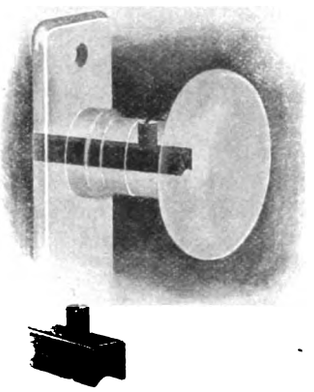

FIG. 4.

bears on the spindle, as shown in Fig. 4. The tightening of this screw expands the spindle and forces it into frictional engagement with the knob shank, thus holding the knob securely at any point, affording perfect adjustment without resort to washers, and eliminating all looseness or rattle of the knobs.

As the company state, in their catalogue these changes and improvements are the outcome of many years of experiment, aided by facilities second to none; and they firmly believe their advanced ideas will be welcomed by those made cognizant of their importance.

The Yale & Towne Mfg. Co. have issued a complete catalogue of the Vulcan Locks, showing them with every variety of trim, separate or put up in sets, many of the designs being entirely new and the list of finishes applicable to the same, full and complete.

James Leffel & Co., Springfield, Ohio, have issued a neat, new pamphlet "D" replete with numerous illustrations and descriptions of the throttling and automatic engines, with portable and stationary boilers, which they are building in a variety of sizes and styles. Copy is sent free to parties interested, on application to the company.

They have a successful organization in Montreal, Can., known as the Hardware Clerks' Association. It was decided at a recent meeting to give a formal banquet some time in October.

THE WISCONSIN HARDWARE ASSOCIATION.

The gathering of the Wisconsin Retail Hardware Association, in Milwaukee, for their semi-annual session of July 20th and 21st, was one of exceeding interest. The Association was formed early in this year, and now numbers a large and important membership. The gathering was held at the Republican House, and was called to order by President John Hughes, at 2:30 P.M., on the afternoon of Tuesday, the 20th. After a speech of welcome, and of congratulation to the Association upon the progress made, the report of the secretary was read, showing that the membership had more than doubled in six months. The report of the treasurer, William H. Hay, was next read, showing that the Association is in first-class financial condition.

The following resolution was offered by Mr. Peck, the secretary, and was unanimously adopted:

Resolved, That any traveling Hardware salesman in this State shall be entitled to membership in this Association without the paymennt of dues and without the right to vote.

A short speech was made by the Hon. A. T. Stebbins, vice-president of the Minnesota Retail Hardware Association, in which he spoke of the necessity of co-operation among merchants, and of the desirability of a National Hardware Association.

A number of papers had been prepared for presentation, and the first one was read by J. A. Wilkie, of Fond du Lac, as follows:

"SOME HARDWARE SNAGS AND HOW TO REMOVE THEM."

The Committee on Programme has honored me by putting me on for a paper or a few remarks. It must of necessity be a paper, for although my gray hairs testify that I am a veteran in Hardware experience, this is, nevertheless, my "maiden speech" before an organization of this kind, and were it not for the fact that my very brilliant and entirely new ideas on our particular mercantile pursuit were pinned down to this voluminous manuscript I should immediately become overwhelmed by the situation, stage struck, in other words, and all my ideas and cherished remarks would vanish into the empty air or perhaps be scattered helter skelter among this audience, to the confusion, or, may be, to the entire upsetting of some other individual's carefully prepared impromptu (?) speech. Hence, my friends, this paper.

To begin, I would say, we as a body represent one of the best lines of business in the United States, in that whatever the locality or community, whether it be a farming country largely, or a village, a thriving city, or a manufacturing centre, there is bound to be a greater or less demand for the goods we carry, for use in the homes, in the fields, in the shops, and in many kinds of labor. I do not mean to imply that we are all getting rich in the business.

At the present time we realize that there are many obstacles and hindrances in all lines of trade to such a much desired, and we are inclined to think fortunate, state of affairs. Trade has a great deal to contend with—the financial depressions of the times, owing in a large measure to the recent campaign, changes in administration, and unsettled political issues, opposition, competition and numerous other business evils, commonly called business snags, that must be encountered and overcome daily. A Hardwareman has to have capital, brains, experience and a good share of business enterprise and energy to get to the top these days. However, we do not despond, but anticipate better things for the future. Our fathers, mothers and teachers were ever wont to impress us with the fact that "the road to success is steep and strewn with many difficulties." Cheer up, then; we are undoubtedly on the right road.

Speaking of business snags, I regard competition as one of them. We recognize, of course, that there is such a thing as legitimate competition. We do not wish to be monopolists or "cock of the walk" in any community, realizing that a fair degree of competition is healthful, in that it is a stimulus in business and suggestive of enterprise in a thriving locality. There is, however, a reckless competition, and this is the snag I have reference to, a reckless competition that is indulged in by the demoralization of prices. We are all aware that there are dealers in some towns who, because they have capital, have no compunction about driving a rival out of business by a systematic cutting of prices on leading articles, and more especially on staple goods. They seem to be utterly wanting in the spirit of public, or, rather, local interest, that would tend for a regard for the business welfare which ought to be fostered and preserved among mercantile men in business centres

AS TO DEPARTMENT STORES.

This brings to mind another business snag or evil, one whose harassing influence has been felt throughout this country, more especially in the West, and which may be considered as perhaps our most formidable adversary. I refer to department stores. They have been the subject of much earnest consideration and consultation on the part of the business men of the Northwest. People generally seem to be in sympathy with the retail dealers, but not to the extent that they are willing to pay a few cents more for an article than they can get it for at the bargain counters of a department store. The universal sentiment is strong against this hindrance to legitimate business and local prosperity. Let me quote a few remarks on the subject from a trade paper:

The opposition to the great department stores is taking a tangible form that promises to array the best retail interests of the country against this giant monopoly. It is the universal sentiment that there is just at present especial need that efforts be made everywhere to revive trade and place our manufacturing, mercantile and financial interests on a firm footing. To such progress the department store is an obstacle, and legitimate business should not be hampered by the demoralizing policies of such establishments, which, avoiding the burdens and responsibilities common to the regular retailers, keep within no settled boundaries of action, depend on others to carry stock and pay expenses, destroy adjacent real estate values, and take the cream of the retail trade from the men who have built up and still maintain the real business of the country.

Thus it is evident that others realize how unequal is the contest and are anxious for a solution to the difficult problem. Has it not been proved more than once in the history of our country that centralization of power in one or a few individuals is not only contrary to all ideas of democracy, but also a threat against national power? The same argument holds good in reference to institutions that do business on piratical principles. They are a menace to trade. Therefore, for the sake of the many as opposed to the selfishness or cupidity of a few, department stores should be suppressed.

Another snag looms up in the interference with our trade on the part of manufacturers and jobbers. We are glad to say we personally have nothing to complain of.

Digitized by Google

Nevertheless, it is a grievance which some dealers have. The selling of goods and quoting of prices direct to the consumer constitute the worst kind of opposition and hurt the retailer more than hard times, crop failures or anything else.

Again, another evil, one that is not common to Hardware dealers only, but is a source of annoyance, if not worry, among merchants in various lines of business, is the lack on the part of the people of what may be termed local patriotism or loyalty, and I am sorry to say that business men are often to blame in that they often thoughtlessly encourage it. Take, for instance, a druggist who allows his wife to send to Milwaukee for a steel range and trimmings for a new house. A good Hardware house is right in the same block, pleasant relations otherwise existing between families or dealers, yet that druggist has a kick coming because the Hardwareman allows his wife to go to Green Bay to take advantage of a sale there, in buying wall paper for her new house.

We merchants are aware, or should be if we are not, that the prosperity of the place in which we live is of vital importance to us. Our influence should be directed toward strengthening and building up the resources of our own town and in the protection of home institutions. Not alone this, but we should impress that opinion upon our families and friends. How many here who do not know of instances where business men allow their wives and daughters to buy out of town, even encouraging them in the practice, because they can save a few dollars? Nevertheless, these same men expect the patronage of the wives and daughters of other local dealers. I tell you there is no surer way than this of destroying confidence and creating business jealousies in a community. So much, my friends, for business evils. Now comes the question: By what agency or medium may we avoid or counteract them?

Doubtless necessity has been, more than any other cause, the incentive to arouse and prompt the minds of men in devising inventions and practical methods. Certain it is that the realization in the minds of Hardware dealers of the necessity of devising some scheme of self-protection against these very evils which I have mentioned has resulted in what is known as our Retail Hardware Association. The object of the organization is to bring retailers, jobbers and manufacturers together, as we are here today, to discuss questions of mutual business interest, to correct abuses or annoyances common to both, and to impart to each other information derived from individual experience.

The influence thus secured by concerted action will prove to be the much needed medium of protection. And this influence which is to prove such a power and practical benefit to us will depend, of course, upon the active interest of individual members, by the general participation in its councils or conventions, as well as by a wise and conservative management of its affairs. As a representative from Fond du Lac, I am speaking now not so much from experience as conviction, seeing that our organization is still young, a conviction that this Association will prove to be of substantial benefit to dealers in our own city and throughout the State. A dealer cannot afford to miss a meeting held by the organization. The discussions are interesting and instructive, and at the same time they afford an opportunity for the members to become acquainted with one another, and a bond of social relationship is established and cultivated that is enjoyable and advantageous to all its constituents.

"THE HARDWARE BUSINESS OF TO-DAY."

A paper on "The Hardware Business of To-day," was next read by O. P. Shafer, of the Shafer Hardware Co., of Appleton, Wis. In his opinion the Hardware store of today differs vastly from the old one of twenty years ago. "I can picture," said he, "the average Hardware store of that time as dark, dingy, gloomy, poorly lighted and uninviting, and then note the contrast as you step into one of the Hardware stores they are building and arranging now. A Hardware store can and should be made as attractive and inviting, even to ladies, as a dry goods, millinery or jewelry store, and I am glad to note that every year there is a forward movement in the direction of making them so.

"This is a progressive age, and a man to keep up with the procession must study up and employ new methods to display and arrange his goods so as to attract the attention of the people. An attractive store front, with a tasty window display, which ought to be changed often, will make a favorable impression on a passer-by, invites him to come in, and once in, if properly handled, you can probably make a customer of him. Particular attention should be paid to keeping the stock clean and in order. There is always some time during the day when there are no customers to be waited on that can be employed in cleaning, dusting and rearranging goods on shelves or on the floor, and thereby help you to more quickly wait on customers in busy hours.

"The Hardware business of to-day could not be carried on successfully and profitably in the same manner it was twenty, fifteen or even ten years ago, as competition has been growing sharper and profits have been growing smaller year by year; in fact, so much so, that to-day many articles are being sold for less money than the profits formerly made on them. For instance, Universal Wringers used to retail at $8, leaving a profit of $1.75 to $2 each: to-day the retail price is $2 or less. I remember selling 6-quart plain IC pressed dairy pans at $4 per dozen, leaving 75 cents to $1 per dozen profit, while now they sell at 75 cents per dozen, netting 12 cents to 15 cents per dozen profit. The first barb wire I sold at 12 cents per pound, leaving 2 cents to 2½ cents per pound profit, and I could mention many similar items. Then, on the other hand, you take the growing tendency of dealers in other lines putting in some lines of Hardware, either to help keep up their diminishing profits or use as trade catchers. I know of instances of lumber dealers selling building paper, nails, paint and also house trimmings, and selling them at or nearly at cost in order to catch the order for lumber, on which they would make larger profits. Dry goods, grocery and notion stores have put in 5-cent and 10-cent counters of Hardware, besides pocket knives and tinware. Drug stores are selling cutlery and fishing tackle. Bicycles are sold in all kinds of stores and shops, even in butcher and barber shops, and last, but not least of all, is the department store, with almost everything in the Hardware line where there is any profit for the legitimate Hardware dealer."

At the session of Tuesday evening, a very able and interesting paper was read by C. W. Aldrich, of Minneapolis, Minn., upon the theme "What Can the Association do that will be of the Greatest Benefit to the Dealers?" The speaker said:

RETAILERS AND HARDWARE ASSOCIATIONS.

When I received an invitation from your secretary, Mr. Peck, to be present with you on this occasion and give you a little talk, or paper, on "What can the Association Do that Will Be of the Greatest Benefit to the Retailer?" I must confess I had some misgivings as to an acceptance, not because of ill faith in such organizations as yours, but because of the deep question involved, and a fear I might not be able to interest you or largely contribute to the aid of so good a cause. The deep earnestness I entertain for improved conditions in the line of retail merchandising prompted a favorable reply. I trust, however, abler hands may be induced to undertake the completion of the work.

My first proposition is that the retail merchant is today the most important factor of our commercial being. He is the common center around which cluster the consumers of every class. He is the pivotal point where the

Digitized by Google

manufacturer and wholesaler turn from the commercial highway to the consumer, depositing their wares, the products of the mill, the loom, the factory, full in the belief that he (the retailer) is the logical and intelligent distributor, the mediator between themselves and the consumer. In the prehistoric ages, whatever may have been the customs of exchanges is largely a matter of conjecture. For hundreds of years since the advent of civilized man there has always been a mediator, a distributor, an exchanger who parcelled out the larger stocks to the consumer, as his wants required. This same mediator, or middleman, has been largely instrumental in returning to the manufacturer the raw material, the product of the consumer. The retailer stands to-day where he has ever stood since civilized trading began, and where he must ever stand if our commercial being shall be preserved and made glorious.

How best, then, can we foster and preserve this most important factor—this factor without which the wholesaler must perish and the manufacturer become crippled—this prime factor alone the greatest element of strength to the commercial world, the man nearest to and most important to the consumer?

Men living to-day who have by a few years turned the half century mark have lived through 50 years of our country's greatest history. In the last 50 years we have made history faster, we have made more rapid strides, we have made larger development and pushed forward to a higher state of development than any known country of the world. Fifty years ago we were scarcely at the beginning. We were then in the primative days of our development. Soon thereafter the fell hand of internecine war was laid upon our industries, then slowly unfolding. Our energies were taxed for our greater needs, and closer application of man's inventive tact to meet the demand caused quickened energy, and in the shortest possible period we had grown from a small, young nation to one of the most powerful and resourceful of all the earth.

A MOST MARVELOUS DEVELOPMENT.

In 25 years we have seen very large manufacturing industries covering acres and acres of floor space built up, from small, little beginnings. In 11 years preceding 1890 ours was a mad, eager, breathless race of rapid development. In that time more than 1,000,000 emigrants came to us from the old countries. We builded nearly 90,000 miles of railroads. Quite 2,000,000 people from the denser populated portions of the East crossed the continent to the plains and California, building new homes, villages, towns and cities. Under man's tutelage our broad Western acres have yielded most bounteous harvests. Every industry—engineering, mining, manufacturing and agricultural—has laughed at man's touch and yielded a thousand fold.

This was the greatest and most rapid development and expansion ever known to the world. We had possessed all the elements needful to our development, but no cause had forced them to the front. With our greater development came greater want—one want begetting another. Four years of war and its demand created expansion, and made waste. Under expansion came constantly increasing and fictitious values. It was not necessary then to be an adept in business, and he who engaged in commercial trading was, if fairly attentive to business, usually successful. The waste of war necessitated reparation, which has gone on to its almost final completion, and with its completion comes a reaction from our too rapid development and expansion. The great army necessary to our development and the reparation of wasteful war has become an idle horde. Our home productions are many times greater than our consumption. The development of other countries in the same period as our own has largely closed the markets to our products and industries, and we awake from the period of great prosperity and industrial development to face the reality, and a more moderate pace for future advancement.

HAND LABOR AND MACHINERY.

From a period of hand labor and hand production we have, almost before the thought of time, stepped into a period of large and cheapened machinery productions, where a single little machine produces in less time the represented labor of 50 or 100 men. What means this changed condition of affairs? Retrenchment, reforms, lessened prices for our products because of lessened demands, lessened productions because of already overcrowded markets, lessened margins of profits because of enforced economy of living; even Mother Earth, because of a superabundance, is not of necessity called upon to yield her most bounteous supplies.

Under this changed condition of affairs must we of the present generation trim the commercial sails for a continued forward advancement. To no class of people is delegated greater or more important functions of meeting these conditions and guiding the commercial craft through troubled waters than to the retail merchants of to-day. The manufacturer does not heed, and seemingly will not realize our changed conditions. Wholesalers are trying to force our overburdened markets; schemes and all sorts of cunning are resorted to to win business from one channel to another. Down at the gateway, at the door of the consumer, stands the thoughtful retailer. He grasps the situation; he knows the consumer's wants; he knows the remedies; give to him the pleadings and he will find the solution To meet the issues and restore prosperous conditions he must:

1. Receive the aid and encouragement of manufacturer and wholesaler.

2. He must stand as he is, the only logical dispenser and administrator of the consumer's wants—the distributer of the commercial products.

During the few years of our too rapid development large industries were builded up and smaller ones begun. Our manufactured products multiplied under various forms of improved machinery, and a man's cunning produced beyond our requirements, until to-day we have a congested market, crowded to a limit beyond our conception. This state of affairs has led to scheming and all forms of intrigue to keep our factories in operation and their enormous products disseminated. Adulteration of food products, deceptive and false advertising, false scheming of all sorts have been brought to bear in the pull for business. Selfishness, avarice and greed have largely governed trading.

The consumer (the producer) has become restless under the influence of market depressions; his acres do not broaden, neither does the yield increase, while the constantly lessening prices play sad havoc with his earnings; hence he is constantly casting about for a better market for his purchases, and the ever alluring and gilded advertisement catches his eye, purloins his judgment, and he flies from supposed evils to ills he knows naught of. He turns down his best friend, the retail merchant, and embraces the supply man and department store, who will sell him a few staples at less than cost and take 100 per cent. profit on goods he knows little about.

During our development and the reparation period manufacturers were ever crowded with orders, and the question of being able to fill them was the only bother to their business. For like reasons the wholesalers were always building upon a growing and expanding business. The conditions which provided expanding markets to meet the constant demand have all too suddenly changed, and manufacturers and wholesalers are blinded to the facts, or will not concede them, and by every artifice known to man are trying to force the markets, only to the disadvantage of our commercial industries.

Digitized by Google

AS TO CORRECTION.

To the retailer must come the duty of correction. And why the retail merchant more than manufacturer or wholesaler? Because of his position in the trade, his close proximity to the consumer, his standing almost at the beginning and ending of commercial transactions. For hundreds of years the retail merchant has been the student of consumption's wants; to know the requirements, to prepare to meet them, is and has ever been his mission in trade. More earnestly now than ever before in our country's history must he address himself to the work before him. He must become not only a student, but an artist in the work of rebuilding our commercial industries upon strong lines of perpetuity. His labor must be unselfish, and single to the general good of our common country. His reward must be the honest increment of legitimate merchandising. A thousand little vices and ills have crept into the retail business unawares. To correct them requires application and united co-operation of all. State organizations should be effected; co-ordinate county organizations should also be instituted as aids to State associations. Several States should be constituted a district association, and from these district organizations should come a national association. The evils easily discovered should receive the remedial appliances which the best minds of your organization shall suggest. Co-operation with manufacturer and wholesaler, and not antagonism, will do much to perpetuate your associations.

Three simple remedial laws, enacted by the several States or the general government, would, no doubt, accomplish all these requirements. These laws can be offensive to no one, and must receive the sanction of every honest American citizen:

1. A law prohibiting and preventing all forms of food adulterations, so injurious to the general health of mankind.

2. A stringent law compelling the proper labeling or branding of all classes of goods and compounds made as substitutes, and so often advertised as the genuine article and sold at one-half the price.

3. A like law regulating all forms of business advertising, compelling advertisers to live up to the line and spirit of their advertisements, preventing fraud and deception of the credulous.

The first law would wipe out all injurious compounds known in the trade, as baking powders, spices, peppers, package coffees, impure teas, all nauseating and vicious compounds. The second law would make it impossible to sell inferior and poor goods to the consumer as genuine or equal to the genuine, because the proper labeling would be the evidence of untruth.

The third law would eliminate all the schemes and double proceedings of designing tradesmen, as well as play work of the consumer, who so frequently tries to play horse between dealers of his own or adjoining towns. It would also cut off many of those little jealousies which arise among neighboring dealers, marring the harmony and lending aid to the corrupting influences of good commercial business.

Each and every one of these laws would be a just one, wronging neither manufacturer, wholesaler, retailer, nor consumer, as they would do much toward a just correction of existing evils without injury to a single honest competitor in business.

I commend them to your organization to be adopted into your constitution and by-laws, with a further hope that all kindred organizations will embrace the same measures and that united and concerted action on the part of all true trade organizations will see that in the near future, as they may be reached by the several State legislatures, they shall be made a part of our common laws. Your little ills can be largely remedied by closer social relations and more thorough co-operation. To that end I endorse the Minnesota plan of county associations or assemblies of members of the State organization.

A CASH BUSINESS.

Another commendable measure, and one that will bring you greater relief, is a cash plan of business, buying and selling. When your customer goes to the department store or catalogue house it is with cash in hand. Why, then, should he not come to you with cash? You are ever ready to sell him for his spot cash at a less price than his time payments.

Adopt to the furthest extent the cash plan, and show your patron the wide difference between the strong and the weak factor in trade, and he will not long favor distant markets. Buying and selling for cash makes business pleasant, maintains friendship and saves money to manufacturer, seller and consumer, admitting of smaller margins of profit and larger net annual gains.

I commend to you the adoption of the cash system to the furthest limit in your business as retailers. Many manufacturers and jobbers who know your commercial worth would much prefer your time account than cash transactions, because the interest rate is so much less than the discount rate upon your purchases.

AS TO COMPETITION.

The course of every country merchant should be to encourage healthful competition, to further and aid all plans for improving the market conditions of our immense farm products. While studying your own interests you should not for a moment forget the interests of your patrons, and be ever ready to aid them in securing better prices and better market facilities for their surplus products. It is your duty, and you owe it to your patrons, to look squarely into the face of all competition and so shape your business dealings, as to meet, and meet honestly, all classes of commercial trading. The honorable competition you fear not. It is the dishonorable competition that robs you of your rightful share of the business, and your patrons of their cash.

It is your province to decline to do business with those who do not favor your policy of action, but I am inclined to think much can be accomplished for your association and its members by friendly conferences with the jobber and manufacturer. What is true of your organization will be also true of others. You can also do much for yourselves by an earnest effort to make yours a valuable account to those you buy from by prompt paying, and working to the closest possible line of cash transactions.

Confining your business to a smaller number of reputable business houses will materially aid you in the work and put you in the line of gilt edge credits.

CASH PURCHASES.

It is not always the largest or most pretentious house that will do you the better service. You should not seek for long time datings, or time purchases, but make strong efforts for the shortest prices, time, and frequent settlements. The house who shall receive your frequent requests for goods, followed by prompt settlements, will the more fully appreciate your worth than by larger requests and long drawn out settlements. You can always touch bottom prices with your cash, and cash brings you in touch with every market of the world, buying or selling. In your leasure moments figure out what your 1 and 2 per cent. ten days, or 5 per cent. 30 days costs you as an annual interest rate, and you will not long ask what is the dating, but what is the cash price; and if you do not have the cash, borrow from your banker, saving money by the transaction.

Another beneficial thing to the retailer is the home distribution of the consumer's cash. Buying and selling in the home market first circulates the cash among your own

Digitized by Google

people and gives every member of your community, directly or indirectly, a benefit from the transaction. Money earned at home and circulated abroad is most ruinous to your community. Few of you who have been in business for any number of years but what have accumulated more or less of so-called obsolete stock, out of date patterns, etc.

Much good will come to you and your business by cleaning out all such goods and converting them into cash at some price, the first loss being the better one. Profit is out of the question, and the longer such goods are held, so much the longer have you tied up a portion of your capital, encumbered your store and warehouse, and to no purpose. Every piece of obsolete and shop worn goods in your stock is a drawback to your business. Clean them out, and freshen your assortment by newer productions and better grades at modern prices. Taboo all obsolete and out-of-date goods, no matter what the allurements in price or blandishments of the traveling salesman. Let the manufacturer put them into the remelt.

Manufacturers whose utmost resources have been drawn upon in past years close their eyes to the inevitable fact that expansion has run its race. Wholesalers alike will not grasp the situation, and it devolves upon you, as retailers, to apply the remedies.

Manufacturers and wholesalers, to recover their lost volume of business, are in many cases trying the double act of wholesaling and retailing. You complain of this, and justly so. Concerted action through co-operation on the part of all individual members of your associations will remedy this evil; you will do this without antagonizing the manufacturer or wholesaler. You have no right to be arbitrary in your requests or demands, and should ever strive for the most harmonious dealings with those you buy from and to whom you sell. You should try to perfect yourself in the art of merchandising, and instruct your sons and daughters, who are most likely to follow you, in the best methods of trading, selling and accounting.

To-day the wholesaler's position is a more precarious one than that of the retailer, and he must cease to be a factor in the business if the present trend shall continue. The preservation of the wholesaler will also largely devolve upon the retailer. The retailer can go direct to the manufacturer, importer and producer. The wholesaler cannot successfully go to the consumer.

I commend to you, gentlemen, as means and measures the most conducive to success and as resultive of the greatest benefit to the retailer, the cash plan of business, cleaning out of all obsolete goods, a total abolition from your purchases of old pattern and out-of-date goods, thorough co-operation and affiliation among your membership by frequent local and State gatherings, and an earnest enlistment of manufacturers and jobbers in conjunctive work.

Gentlemen, may I not trespass upon your time for one word for the traveling salesman? For him I do not claim perfection, nor does he require any one to plead his cause. His mission is not one of trespass, or presumption, but to do the work of his employers. With all his faults or shortcomings, take him up one side and down the other and you will not find a better average among any class of men. While you cannot buy from all, nor the traveler sell to all, you can at all times give him a respectful hearing. He is your friend and conservitor, holding much of good or of ill to you in his keeping. Treat him kindly and only turn him away empty handed when trade conditions demand it.

Gentlemen of Wisconsin, from the Minnesota Retail Hardware Association I bring you kindly greeting.

With outstretched arms we pledge you unselfishly our aid and most hearty co-operation in every just and honorable movement that will tend to enhance the prosperity of retail merchandising. As between the Minnesota association and all other kindred organizations there shall be no bar. We will stand upon the common ground for the common good of all retailers, to the end that our internal commercial interests shall be bettered and made the most perfect, bringing a full measure of prosperity to retailer, wholesaler, manufacturer and consumer.

On Wednesday the following papers were read: "How to Make the Hardware Business More Profitable?" by William H. Munn, of Milwaukee, and "Hardware as a Business," by James Montgomery, of Wausau.

One suggestion made by Mr. Munn, in regard to the buying of staples, is worthy of reproduction and consideration. He said:

"There is another problem of interest that I wish to refer to—namely, the buying of your staple goods, as iron, tin plate and other metals, nails and screws. These items and others that could be mentioned, it seems to me, could be bought with considerable advantage at times by a co-operative plan.

"I am fully aware of the difficulties attending this method as a rule, but it does seem as if the following plan is entirely feasible:

"In the city of Chicago there are merchandise brokers who could attend to the business and be paid by commission from the sellers. The secretary of the Association should have blanks prepared, and each member be furnished with a supply. Take the item of galvanized sheet iron. Let members who use this in fair quantities—say ten bundles or more in a lot—form what might be called a subscription. Each one send to the secretary on one of these blanks a memorandum of kinds and amount desired, the secretary to forward to the broker all the blanks, provided of course, several hundred bundles are wanted. He can then secure a price based on the quantity and advise each subscriber. He would be interested in making the sale, and would secure as low a price as the market would afford, lower than any individual could get. If acceptable to the subscribers they could order their iron, and it would be shipped to and paid by each one individually. In case all did not accept, of course, the broker might have to decline the order, and in case a subscriber was unreasonable he should be barred from future participation. To large consumers of iron this plan might not be of much benefit, but to a large number in the trade who use a fair quantity it ought to save them money. But the main question to be considered is its development. What would the initiation of such a plan lead to? It seems to me if members would be interested and endeavor to make it a success good results would be secured. It would lead, I think, to the transaction at our annual and semi-annual meetings of considerable business. We would come prepared with our wants and meet representatives of manufacturers and others seeking trade."

At the conclusion of the second paper, the following resolutions were unanimously adopted:

Resolved, That permission be given kindred associations in adjoining States to receive as members dealers of Wisconsin living adjacent to them, upon their granting us permission to do the same.

Resolved, That the trade papers are almost a necessity to the retailer, not only for quotations but as an avenue of communication between this and other associations and the retailers.

The subject of a Northwestern Hardware Association, was taken up by Mr. Stebbins of Minneapolis. He urged the attendance of delegates at the meeting to be held in Minneapolis, in February next. The matter was referred to the executive committee, with power to act. A resolution in favor of notifying manufacturers to be present at the next meeting of the association was adopted, after which the convention adjourned to meet in the same place on the first Wednesday in February next.

DEATH OF JOHN P. LOVELL.

In the last preceding issue of *Hardware*, mention was made of the serious illness of John P. Lovell, founder of the John P. Lovell Arms Co., Boston, Mass., at his summer home in Cottage City, Martha's Vineyard. He was stricken suddenly with apoplexy, and after sixteen days of illness, peacefully passed away, on July 29th. The remains were taken to East Weymouth, where they were interred, in Fairmount Cemetery.

John P. Lovell was a native or Massachussetts, having been born in East Braintree, on July 25, 1820, the son of John P. and Esther (Derby) Lovell.

In many respects he was a notable man. He was to all intents and purposes a business man, and his long business

JOHN P. LOVELL.

career was marked all along the line by perseverance, activity and honor.

His seventy-seven years of life were full of incident. He began the battle of life early. He was obliged to struggle for his education. He became acquainted with sorrow early in life, when he lost his father. Thrown upon his own resources, he fearlessly entered the arena of toil and strife. He worked in a cotton factory, then in a gunsmith's store, next as a grocer's boy, then as a tailor. From the tailor shop he went back to the cotton factory, then he became a drover's boy, and next an auctioneer.

So this commercial veteran of later years gained his experience, and in this rough school of varied work laid the foundation of his future character.

At the age of sixteen he returned to the gun store and remained there for the rest of his days, beginning as an apprentice and becoming one of the leaders in his branch of commerce.

At the age of nineteen he was made a foreman of his shop, and a year later became a member of the firm. Scarcely had he become a member of the firm when his partner died. Then came difficulties, hardships, dull times and other business handicaps, but he struggled bravely on.

He was an admirable specimen of a well-preserved manhood, and until very recent years could have been seen almost daily at his place of business. His name stood out boldly, firmly knit with courage, ability, integrity, a good old solid New England name.

John P. Lovell was a prominent secret society man, a Mason and an Odd Fellow. He was a charter member of Crescent Lodge, a member of Wompatuck Encampment, 18, Orphan's Hope Lodge, F. and A. M., Pentalpha Chapter, R. A. M., South Shore Commandery, K. T.

He was also a member of the Massachusetts Mechanics' Charitable Institution. He was the first president of the East Weymouth Savings Bank, holding the position fifteen years. For twenty years he was a director of the Weymouth National Bank, and he was also a director of the South Shore Masonic Mutual Relief Association.

In 1864 he represented the Weymouth district in the legislature, but declined to run for senator. He held the oldest policy of the New England Mutual Life Insurance Co., it having run over half a century.

During the past fifty-seven years Mr. Lovell resided in East Weymouth, where he had a charming rural residence on Station Street within easy distance of the railroad station and the residence of his son, Col. Benjamin S. Lovell.

The life of this remarkable man is worth telling in detail. His father came of old Cape Cod stock, and was a native of Osterville. He was a well-known shipmaster and commanded a ship belonging to the late Robert G. Shaw, then a noted merchant. While on a trip to the East Indies, during the year of his son's birth, Capt. Lovell was stricken with yellow fever and died.

John P. Lovell attended school until he was eleven years old, eighteen months of his tuition being at the Weymouth Academy. Leaving school he entered the cotton factory at East Braintree, of which Mr. Vickery was superintendent. He worked for one year, when his mother removed to Boston. He attended school at the old Hawkins Street schoolhouse for about a year, and then went to work for A. B. Fairbanks, a gunsmith, whose store was at the corner of Exchange Street and Dock Square. He remained with Fairbanks about three months, his principal occupation being the hardening of his muscles by manipulating the blacksmith's bellows. Upon leaving the gunsmith's, he entered the grocery store of Frederick Smith, situated at the corner of Court Square and Williams Court, where Young's Hotel now stands.

After about eight months' experience as clerk, he secured a situation with a tailor at the corner of State and Devonshire Streets. He spent six months learning the rudiments of the trade and then retired fully satisfied with his experience. At this time Representative Fuller, from Holland, who was attending general court, and boarded with Mrs. Lovell, invited young Lovell to go to his home with him. The invitation was accepted, and Lovell accompanied the rural legislator to his abode. He entered a cotton factory in Holland, and remained there three months. At the end of this time he became homesick and desired to return to Boston. Being without money he obtained permission from a

Digitized by Google

drover who was taking a flock of sheep to the city to accompany him, and walked the entire distance from Holland to Boston.

Upon his return he again went to work for Mr. Fairbanks, and remained with him for some time, when he left and entered the service of the late Jabez Hatch, a well known auctioneer on Congress Street. He remained with Hatch till January 1836, when Jabez was succeeded in the business by his brother, Samuel Hatch, one of Boston's best known and popular auctioneers of the present time.

Mr. Lovell remained three months after the succession of Samuel Hatch, during which period there sprang up an intimacy between them, which the friendship of a lifetime only served to more firmly cement in the bonds of fraternity.

The duties of an auctioneer not proving congenial to the tastes of young Lovell, he severed his connection with Hatch and returned to his first love, the gunsmith's shop of Mr. Fairbanks. He apprenticed himself to Mr. Fairbanks until his majority, and was to receive $2 per week and $25 for clothing the first year, with an increase of 50 cents a week per year and clothing allowance of $10 per year until he was twenty-one.

Young Lovell was advised by a friend to apply himself assiduously to his chosen vocation and to prove himself in every way worthy of his master's esteem and confidence and to render his services so valuable to him that he could not dispense with them.

This advice, coming from the source it did, made a deep and lasting impression upon the susceptible mind of the young apprentice. He conned it over in his brain and when he reentered the service of Mr. Fairbanks, he had fully resolved to profit by the kindly advice tendered him. With this high-minded purpose in view he began a career of honorable prosperity. He applied himself closely to his trade, and by steadfastness was so far successful in establishing himself in the good graces of his employer as to merit and receive the latter's strongest commendation.

Mr. Fairbanks was so well pleased with his apprentice and so strongly impressed with his business tact and reliability that, finding him perfectly competent to fill the position, he placed him in charge of the shop, two years before his apprenticeship expired. A year later Mr. Fairbanks offered Lovell a partnership, Mr. Fairbanks to furnish the full amount of capital and give Lovell a half interest in the business. At this time young Lovell hadn't a dollar to his name and was $63 in debt to a relative.

Mr. Lovell accepted the offer and the firm became Fairbanks & Lovell. Many wiseacres in business circles thought it an unwise thing to take an inexperienced apprentice into the business and give him full control, but Mr. Fairbanks said "Lovell can make $3 where I can't make $2." Lovell's profits the first year were more than $700, and the business prospered under his management.

In the midst of the brightest prospects for Mr. Lovell his partner died, August 27, 1841. This event greatly discouraged Mr. Lovell, who had but recently married, and who was now in serious danger of being thrown out of business, as his partner's heirs did not wish to continue it.

At this juncture, however, a friend offered Mr. Lovell the necessary financial assistance, and in company with Leonard Grover, a fellow workman, he acquired the entire plant. They formed a partnership under the style of Grover & Lovell. The partnership continued until 1844, when it was dissolved by Mr. Lovell buying out his partner's interest and assuming complete control. As the the profits increased the stock was extended, and from this humble beginning grew a mammoth business.

John P. Lovell, as a business man, was the soul of honor. His was the spirit behind the throne in the firm which in its line has achieved remarkable things. John P. Lovell from early childhood had been inoculated with all the sturdy qualities of the robust New Englander.

He was industrious, frugal, honest and slowly but surely piloted his business through the inevitable vicissitudes which come to most business men and too often wreck them. He was a man of vigor and keenness, he lived a hardy life and died at a ripened old age, respected by all who knew him.

Mr. Lovell had a virile personality. He was always blessed with good health, and his smoothly shaven face was brown and unwrinkled, while he was as sturdy in body as he was in mind and morals.

He was a man who did not fear to review the past, and he could point to a record unsullied and a character unblemished during a long and successful career in the busy marts of trade.

The story of his life is full of suggestion to the youth of America and points the way for them amid the temptations of a hard and competitive business career to make their names synonymous with honor and integrity.

At a meeting of the Hardware and gun trade held in Boston, the following resolution was passed:

Whereas, it has pleased Divine Providence to remove our late business associate, John P. Lovell, therefore

Resolved, That in his death we mourn the loss of one who by many years of business efforts has merited our esteem, and we recognize in his career the faithful merchant and affable friend.

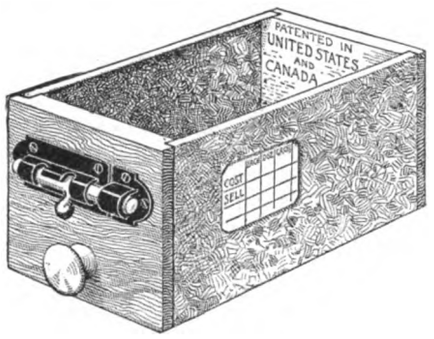
Fayette R. Plumb, Incorporated.

Fayette R. Plumb, Philadelphia, who has for years been known, the world over, as a leading manufacturer of fine edge tools, hammers, railroad tools, etc., has taken an advance step in the line of incorporation. His entire plant, including real estate, machinery, merchandize, and book accounts, has been sold to a stock company of unusual financial strength, to be known as Fayette R. Plumb, Incorporated. The new concern took possession on August 2nd. It is needless to say that as president of the new concern, Mr. Plumb will be in active control as before, and that in co-operation with a board of directors which contains the name of Samuel Disston, he will push the great business he established to a degree of success even greater than that of the past. The new concern commences its business career with largely increased capital, and no liabilities of any kind. Mr. Plumb retains a controlling interest, and proposes to give the company his personal and undivided attention.

It Has Struck Cleveland.

How pleased are they in beautiful Cleveland to see the wheels go 'round! The wheels, in this instance are those of the Cleveland Rolling Mills, one of the mammoth iron concerns of the world, and a certain index of the business prosperity of the country.

A dispatch from Cleveland under date of August 2nd, says: "The great plant of the Cleveland Rolling Mill, the city's greatest manufacturing concern, started up to-day. It resulted in a scene of activity such as has not been witnessed in the iron wards of the city in years. The mill reopened in all departments. Twenty-two hundred men went to work to-day. By Thursday, General Manager Wilson Chisholm says, 3500 men will be at work. This is the first time all of the departments have been in operation in years."



A bar of chrome steel half an inch square and five inches long has a strength of 141,000 pounds per square inch, being thirty-seven per cent. more than carbon steel. The nominal strength of steel is thirty tons per square inch.—*Michigan Tradesman.*

NEW GOODS AND SPECIALTIES.

The Heller Hardware Steel Shelf Box.

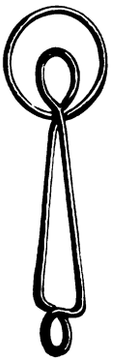
W. C. Heller & Co., Montclair, N. J., are the manufacturers of the Hardware Store Shelf Box, which we illustrate herewith, and which has met the approbation of the trade and become extremely popular. The Heller Steel Shelf Box is the offspring of necessity, being the invention of a practical Hardwareman of twenty-three years' experience, who had looked in vain for the ideal box for his purpose, and so harnessed up his inventive faculties and made what was wanted. That it was the proper thing, his subsequent success has abundantly demonstrated. The boxes are

made with pine, whitewood, oak, ash, walnut or cherry fronts and backs, painted, stained, varnished or in the white if desired, to suit the existing fixtures of the store. The sides and bottom are stamped of one piece of smooth finished galvanized steel. The edge of the steel is embedded in the wooden ends and secured by brads, driven from the inside. A depression on one side near the front is enamelled, upon which the cost and selling price of the contents of the box can be marked, and the marks can be rubbed off and changed at any time without injuring the enamel. With these shelf boxes any dealer can keep a full stock of shelf goods in a very small space, and at the same time display them on front of the boxes to which they can be easily and firmly attached, as the wooden front is ¼ of an inch thick, and will not split when a screw or nail is driven in to hold a sample. In this manner the whole assortment of a dealer's shelf goods can be in plain sight and stimulate a customer's wants; and as the boxes are made for long service, the cost can be averaged over a number of years use of them. These boxes are made for heavy as well as light Hardware; the fronts are all sandpapered smooth and have no rough edges or nails to come out on the outside to tear the shelving. The prices should not be compared with the cheap unfinished boxes in the market, but if quality, finish and wearing durability is considered, they are claimed to be the cheapest box on the market. The steel is not painted or japanned, but is the best patented smooth finish galvanized steel, the kind which does not rust. Sample boxes will be mailed upon receipt of twenty cents, and the manufacturers state they will be pleased to answer all inquiries as to cost promptly upon request.

The Family Steam Laundry.

W. R. Harrison & Co., Massillon, Ohio, are placing upon the market, and for which purpose they solicit the agency of the retail Hardware dealers of the country, the most complete steam laundry combination of a portable character, we have had our attention called to. It is intended especially for family use and, as will be noticed, it is so constructed that it furnishes in a single complete portable plant, a washing machine, with stove connected, having a boiler and steam chest, wringer attachment, clothes tray, etc., so that it may be relied upon to wash, boil steam, rinse and blue the clothes during the operation of laundering, and by the aid of which the starch may be prepared, the irons heated, aud if found necessary, even the dinner may be cooked, all upon the one portable plant. It is claimed by the makers that its use enables an ordinary washing to be disposed of in a couple of hours that usually consumes the entire day by the customary facilities. The use of this machine dispenses with the drudgery inseparable from the old fashioned methods of performing this necessary domestic employment. The system does away with the need of any washboards, as the steam expansion loosening the dirt contained in the clothes, it is readily freed in the agitation which forms part of the cleansing operations. The Family Steam Laundry is, as the name indicates, a complete portable steam laundry for family use, including two tubs (holding about half a barrel each), a washer, and a boiler and steam chest (which are also used as bluing and rinsing tubs), agitators which do away entirely with washboards, a complete first-class adjustable three-burner gas or gasoline stove under the tubs, to wash, boil and steam the clothes, or swung out bodily (without being detached) from under the tubs, and available for ironing, and all kinds of cooking and heating purposes; an adjustable attachment for the wringer, which avoids all lifting or handling of the wringer; and a clothes tray—all combined. The machine is built to last. The tubs are of cypress wood, jointed in white lead, and bolted together with steel rods; the legs and braces of 1¼x¼-inch iron; the bottoms of heavy galvanized sheet steel, laid in asbestos dipped in white lead; the agitator pins and handles of white maple; with standard brass faucets, having a screw-thread for attaching hose; and improved gas or gasoline burners attached. It is claimed that the machinery is constructed of the best materials and fitted by skilled ma-

chinists. All the parts exposed to water heavily galvanized, and the whole put together by hand by first-class workmen, in a strong and durable manner. The manufacturers would be pleased to furnish upon request, any information desired, together with many testimonials from those who are familiar with its lasting advantages and undoubted benefits.

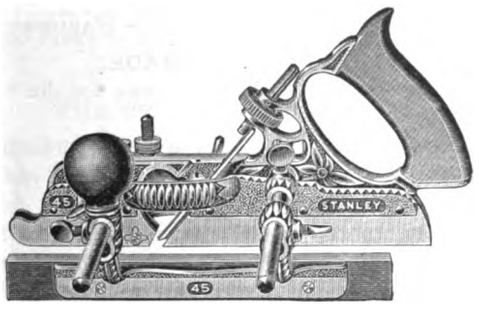


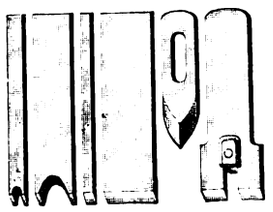
The Midget Trousers Guard

Among the numerous minor specialties called into being by the requirements of the bicycle rider, one that conduces materially to the riders' comfort is an acceptable device to keep the legs of his trousers properly guarded when wearing his ordinary every-day business suit. Miller & Van Winkle, No. 18 Bridge Street, Brooklyn, N. Y., have recently placed upon the market the "Midget Trousers Guard," which we illustrate herewith, and which seems to possess the requisite simplicity in construction and ease

Digitized by Google

in adjustment to meet every possible requirement at a low cost; they are made of steel wire, highly tempered and neatly japanned. The Midget is designed to slip up under and over the folds of the trousers, holding them se-

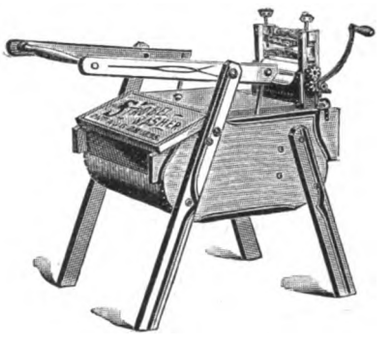




curely and with no possibility of slipping. They are of a small size that would permit of their being carried in the vest pocket without inconvenience when not in use, and are intended to be retailed at ten cents a pair.

Stanley's Adjustable Planes.

The reputation of the Stanley Rule & Level Co., New Britain, Conn., and No. 29 Chambers Street, New York, has become world-wide from the fact of their advanced position in the manufacture of superior specialties for the use of carpenters and woodworkers generally, their continued efforts being pledged to produce a grade of tools acceptable to skilled mechanics throughout the world. To the intelligent woodworker the changes from the old tools, so indispensable in the past, but now discarded, must seem almost limitless. To-day the tools formerly filling a tool chest are frequently embodied in the uses of a single tool. One of the tools of this character we illustrate below, which is made by the Stanley Rule & Level Co., and is known as their "Improved No. 45 Beading Rabbet Slitting and Matching Plane." This plane embraces in a compact and practical form: (1) Beading and Centre Beading Plane; (2) Rabbet and Filletser; (3) Dado; (4) Plow; (5) Matching Plane; and (6) a superior Slitting Plane. In each of its several forms this plane is designed to do perfect work, even in the hands of an ordinary mechanic—its simplicity of construction and adaptation of parts making it



easily understood. Each plane is accompanied by seven Beading Tools and nine Plow and Dado Bits, a Slitting Tool and a Tonguing Tool. Combined, sent with this improved plane, is an additional plow and dado bit and a sash tool, making twenty available tools in the whole combination. The cutters are adjusted by a screw, and also the depth gauge has a screw adjustment; both of these features add greatly to the precision with which the plane can be worked. As illustrated, a removable rosewood face is attached to the fence. The plane is nickel-plated and is sent out already set up for working, packed singly in a neat wooden box.

The Strobel Washing Machine.

The Strobel Mfg. Co., Marion, Ohio, are introducing through the medium of the Hardware trade their principal specialty, the Strobel Washing Machine, which is claimed to be constructed on principles which place it in the fore front of these labor-saving appliances. The illustration of the Strobel Washing Machine is given herewith. The Hardware dealers throughout the country handling as they do so many articles that appeal to the advanced ideas of the up-to-date housekeeper, make natural agents for the sale of a washing machine possessing merit to recommend it. The drudgery surrounding the old-fashioned wash day will soon lose its terrors, when a machine that can do the work required more perfectly than it can possibly be done by hand, is successfully introduced. Among the other housekeeping specialties manufactured by this company, the Marion "Double Cog" Clothes Wringer makes a good second to the washing ma-

chine, and completes the outfit required. They also manufacture the "New Yankee" Mop Stick which, constructed under recent patents, is claimed to meet the requirements of the trade in all respects.

The Joseph Dixon Crucible Co. Pamphlets.

Among the many and various publications which in the shape of pamphlets the Joseph Dixon Crucible Co., Jersey City, N. J., and No. 62 Reade Street, New York, are favoring those in the trade who are interested in their productions, we have received recently one on "The Merits of Lead Paints Compared with Dixon's Silica-Graphite Paint," prepared by this company.

It will be found interesting reading for all those who are large dealers in the goods referred to, and will, no doubt, largely aid in stimulating a wider distribution of this graphite production for surface covering. The number of points given of its manifest economy and superiority, over other productions for the purposes indicated, being cogently and succinctly stated and convincing as to argument. These pamphlets are valuable contributions to trade literature and should be regularly read by intelligent dealers. We quoted largely in a recent issue from one on "The Making of Crucibles," which was from the pen of the vice-president and general manager of the company, Mr. John A. Walker; it was an entertaining, instructive and well written article; and the carefully printed manner in which these pamphlets reach the general reader, could well be imitated by other manufacturers in more ways than one.

E. T. Barnum, Detroit, Mich., the extensive manufacturer of iron and wire fencing, iron stairs, fire escapes, bank and office railings, stable fixtures, jail cells, and all other kinds of wire, iron and brass work, has ready for the fall trade a large line of flower pot stands. This firm has a great many new designs of these useful and ornamental articles, which they will supply to the trade promptly and at most reasonable prices.

Review of the Markets.

The most noticeable feature having relation to conditions of trade, is that in every direction the merchants are elated with the belief that prosperity is at last within our reach In almost every section the most encouraging information is to be had, particularly in the great wheat and corn producing belt, where the crops are unusually large and prices bid fair to reach a record even higher than the present. Many travelers are preparing to start out and get the orders they are satisfied will this season be gladly given. The volume of business does not yet indicate in any decisive manner the increase so confidently looked for, but with many prices showing strong signs of stiffening up, with manufacturers less eager to accept orders on which the late prevailing quotations promise little profit, we may soon look for less hesitancy on the part of the well-posted buyer, and a more extensive movement in seasonable supplies will then be noted.

Wire Nails: As nearly all the mills have again resumed manufacturing, the stocks will soon be in shape for promptly filling orders, which it is anticipated will be large. At present no very surprising demand exists, the buyers are evidently in no fear of any immediate change in price. New York prices remain as previously quoted: Carload lots on dock, $1.40; smaller lots from store, $1.50 to $1.60 in accordance with quantity required.

Cut Nails: While an increasing enquiry is noted, no large transactions have resulted therefrom, the business being only moderate, with prices remaining as previously quoted. New York prices: Carload lots on dock, $1.30; smaller lots from store, $1.40.

German Hardware: On account of the advances made in the duties in the Dingley Tariff a general advance will be made on all such goods as are affected thereby. The following new and revised list on German chains has already been adopted under date of July 24:

HALTER CHAINS.

	4 0	3-0	2-0	0	1	2	3	4	5	6	7	8	
4½ ft....	$9.00	7.80	6.80	5 80	5 00	4 70	4.50	4.30		4.20			doz.
6 ft....	12.50	9 80	8.60	7.40	6.80	6 20	5.80	5.70		5.60			doz.

COIL CHAIN.

	6-0	5-0	4-0	3 0	2-0	0	1	2	3	4	5	6
Per 100 feet ..	$18.00	15.50	13.00	11.00	10.00	8.80	7 80	7.20	6.80	6.60	6.50	

MACHINE CHAIN.

	6-0	5-0	4-0	3-0	2-0	0	1	2	3	4	5
Per 100 feet ..	$21.00	18 00	15.00	14.00	13.00	12 50	12.00	11.50	11.00	10.80	10.80

This new list is subject to a discount on Coil and Halter chain of 60&10&5 per cent., and on Machine chain of 40 & 5 to 40&10 per cent.

Stubs Tapers: The new list on Stubs tapers made necessary by tariff changes is as follows:

2½	3	3½	4	4½	5	5½	6	8	inch.
$1.80	2.20	2.30	2.50	2.80	3.40	3.60	3.80	6.20	doz.

subject to a discount of 30 to 33⅓ per cent.

Linseed Oil: Under date of August 5, the Dean Linseed Oil Co. quote advanced prices as follows: In lots of less than 5 barrels, 34 cents per gallon; in lots of 5 barrels or more, 33 cents per gallon, Boiled linseed oil, 2 cents per gallon higher. Calcutta oil, 52 cents per gallon.

A BUSINESS MAN'S VIEW.

In place of our usual business letter from the Joseph Dixon Crucible Co., we are permitted to publish the following, from tne pen of the vice-president and treasurer of that company:

The temper of the American is to spend as he earns; the air, so to speak, prompts this temper. Having no self-recognized peasantry here, and the prevailing thought being that one man is as good as another, each spends to rival his neighbor. Thus, Americans are good spenders. They say "The Indian don't eat pork only when he can't get it," so the average American only stops spending when the supply runs dry.

For the past five years we have lived the lesson of an enforced economy. The wage earners have not had their full wages; the bondholder has not had his usual interest, and dividends have often failed.

Every day is reported a revival of industry. Wheels long idle begin to buzz. Success begets success. Hope is father to the fruition. Soon we will forget the seven years of famine and we will have seven years of plenty. We number now 70,000,000, with 26,000,000 wage earners. Every year a 1,500,000 is added to the population. Every year of these a new 500,000 are added to the wage earners; a new 1,500,000 of people each year, plus the present number, means 300,000 new houses for them to live in, clothing, and food for this new addition, over and above the last year's amount of food and clothing. So with such numbers, such increases and such demands, the buzz of industry in the land must soon rise above the wail of pessimistic despondency. JOHN A. WALKER.

THE ST. PAUL TRADE.

The reports that we are receiving from the territory tributary to this market, which embraces, substantially, the great wheat country of the Northwest, are that the prospects for a fine crop were never better than now. Harvesting will have commenced when this in print, and the golden sheaves which will soon be converted into golden coin, will be standing thick in the fields. With the price about 25 cents a bushel higher than it was a year ago, it means from $300 to $500 extra to every grower of 100 acres of wheat. Estimating the crop of Minnesota and the Dakotas at 100,000,000 bushels, it gives $25,000,000 to be distributed in these three States, in excess over last year.

The country merchants are looking forward to a very active business, and if their expectations are realized, it means corresponding activity for the jobber. What we want now, is to see some advances, even if slight, in manufactured articles, to correspond in some measure with the advance in farm products. At present no buyer seems to have any confidence in any prices that may be named, for his experience is that the next offer will be slightly less.

It is to be hoped that an active business will at least steady the market, and restore confidence in values. This is needed to fully realize anticipated prosperity.

Trade in haying and harvesting tools has been very large during the past season, and now fall and winter goods are beginning to move freely.

C. W. HACKETT HARDWARE CO.

THE CHICAGO TRADE.

There has been a most decided change for the better in our July business.

In fact, for several years we have not experienced such a marked revival in orders at this season of the year as we are enjoying at present.

Our travelers report splendid growing crops, fairly good prices for hay, grain, cattle and sheep; money more plentiful in the hands of consumers and retailers, and Hardware dealers decidedly in favor of keeping up their stocks in anticipation of a good fall trade.

Collections are good, and unless all signs fail, we shall be working nights on orders before this month is over.

WELLS & NELLEGAR CO.

THE DAVENPORT TRADE.

There is already a speculative demand for wire nails. Some buyers are anticipating their wants in barb wire. There are conservative dealers who believe steel goods will be higher next season. Stove boards have advanced fully seventy-five per cent. We are not aware of any changes in cost of material that would justify this sudden advance, and hope it is based upon higher wages being paid the operatives employed in their manufacture.

If good crops, propitious weather for harvesting, plenty of money in banks, higher prices for wheat, light stocks in hands of dealers, forecast improvement in trade, we can surely expect it in this neck of the woods. We think pros-

Digitized by Google

perity is coming this way, and will be here as soon as the coal strike ends and the vacation season is over. If county fairs, political conventions and mass meetings could be induced to suspend business for a while, it might remain until Congress convenes again.

SICKELS, PRESTON & NUTTING CO.

THE BIRMINGHAM TRADE.

July has proven a good month for us, our sales being about fifteen per cent. advance over the same month of last year. Our crop prospects are fair, and the farmers feel encouraged, and we are encouraged to expect a good trade this fall and winter. It is true they have had to buy more corn than usual this season, but the demand will be less from this time on, being supplemented by fruit, green corn, etc.

The architects have more work than usual, and this increases the demand for builders' material. The building of the railroad across the State from Columbus, Miss., to Montgomery, Ala., is also giving employment to labor and improving the trade in contractors' supplies.

We are glad Congress has adjourned, but do not look for any permanent good from the Dingley-Jones bill.

MOORE & HANDLEY HARDWARE CO.

THE PITTSBURG TRADE.

Vacation time is nearing an end. Travelers are preparing for the road, and the prospect for business is much brighter than for a long time past. The condition of the country is certainly favorable; good crops and good prices for them, made by a good foreign demand; a tariff that secures the home market to our manufactures, and yet price of manufactures low enough to meet foreign competitors; capital in abundance for all legitimate enterprises, and confidence fully restored. What more can we ask?

Locally, we report great disturbance among the coal miners. The strike is for uniformity of wages. This seems to be almost an impossibility, as the conditions are so varied. Difference in thickness of vein, difference in location of mine, different State laws, etc., all have to be taken into consideration. A good strong market demand will solve the problem by giving work for all, and as this great industry has been unremunerative for several years to both capital and labor, we trust such a demand will soon set in, and make prices better for both.

LOGAN-GREGG HARDWARE CO.

THE PHILADELPHIA TRADE.

With the beginning of August most of the business world seems to be taking a brighter hue, and the feeling of hopefulness is not only becoming general, but has greatly strengthened within the last few days.

The settlement of the tariff question, the advance in the price of wheat, the large exports and the higher prices being paid to farmers for their produce, all tend to strengthen the faint hearted, and already some evidences are seen of returning business.

Nowhere is this more noticeable than in the stock market, where prices have already advanced generally, and values are firmly held.

In Hardware, while only a few advances can be recorded, still the general tone is one of certainty—the bottom appears to have been reached, and any changes which are made are likely to be in the direction of higher prices. Not that Hardwaremen are looking for a boom; on the contrary, there is a general wish expressed that this may not be the case, and what is wanted is a steady growth of prosperity, and we hope that the tide has now set in that direction.

As we have already said, very few changes in prices have occurred, although common carriage bolts, tire bolts, and stove bolts have all advanced, and other advances in prices of stable goods, which are confessedly below cost, may reasonably be expected.

Collections are fair, and those who have been long struggling against adverse circumstances and a depleted bank account, now hope that they have seen the end of their troubles.

Orders already show a better assortment of goods, and while merchants are still buying cautiously, they do not seem to be so much afraid of buying enough to cover their actual needs.

BIDDLE HARDWARE CO.

THE DENVER TRADE.

Under existing everyday business, there is very little that is of general interest to say in reference to local trade. We have referred to prospects of abundant crops a number of times, and these are realizing.

As to the future, we can only say that it looks more promising than at any time since 1893. Colorado is exceptionally conditioned in that her resources are so varied and extensive. Gold, silver, copper, stone, coal, all these are being mined extensively and profitably, and with an ever-increasing product. With irrigation the farmer does not depend on the weather, and is generally sure of his crops, enabling this State to supply the feeders of Kansas, Texas and other adjoining States. Fruit has become a giant interest, and with an immense yield and a market craving the quality which this locality alone seems able to supply, this interest was never more prosperous. With all these productive interests so actively engaged on a prosperous basis, we cannot predict for Colorado any other than a substantial and increased general trade during the remainder of this year at least.

GEORGE TRITCH HARDWARE CO.

Spokes, Handles, Etc., for the World.

Geo. S. Parkes & Co., Nashville, Tenn., with New York office at No. 64 Cortlandt Street, are now shipping large quantities of spokes, handles and carriage woodwork to all parts of the civilized world, and the exceedingly large number of orders that they are receiving, convinces them that the superior quality of their goods, as well as the low prices they are making, are being appreciated by the largest buyers.

It is a well-known fact that Tennessee is noted for its superior oak and hickory timber product. Their spokes comprise every variety in the American, English, Australian Patent and Shell Band Pattern, also Club Turned or Finished for wood hubs, in every size that can be made, and every spoke is warranted to be air-dried, and as perfect as good timber and experienced workmanship can make it. In handles they make all the patterns that are used in this and foreign countries, and guarantee the grading "to be the equal, if not superior, to any made." The carriage woodwork has the same care taken to secure the exact timber that is suited for making shafts, poles, oak and hickory rims, bows, cross bars and singletrees.

An Added Line.

The Smith & Egge Mfg. Co., Bridgeport, Conn., have acquired the right to manufacture the line of Burglar Proof Sash Supports and Bolts formerly made by the W. Haskell King Co., of New Haven, Conn. On September 1st, they will have goods ready for shipment to the trade, and will be pleased to hear from the customers of the old concern.

"Bridget," said her mistress, "have you broken another vahse?"

"Another which?" asked Bridget.

"Another vahse."

"No, mum," said Bridget. "Oi only smashed wan of thim chaney cooshpidoors on der mantel-pace, mum!"

Called Home.

The many friends of Alfred D. Clinch, of the firm of Underhill, Clinch & Co., of New York, will deeply sympathize with him in the recent loss of his mother, Mrs. Sophia Clinch, widow of Frederick Clinch. At the ripe age of seventy seven years, she was called away while on a visit at the home of her daughter, Mrs. William P. Uhler, at Belmar, N. J. She was a direct descendent of the DeMilts, one of the oldest families of New York, with their home at Albany. She was for seventy years a resident of New York and a member of the Dutch Reformed Church of Harlem. She was married in 1840 and leaves six children, two of her sons being in business in this city—Edward S. Clinch, a lawyer, at No. 115 Broadway, and Alfred D. Clinch, who has for years been one of the leaders of the Hardware trade in New York, and a prominent official of the Hardware Club. Her life was full of good deeds, and her memory will live in the hearts of her friends and children.

The Axe and The Hatchet.

What is an axe?

The office boy says: "A thing to chop wood with."

This seems somewhat incomplete, as one can chop with a hatchet or a chopping-knife.

The "Century Dictionary," which spells it both "Ax" and "Axe," giving preference to the former, says of it: "An instrument used for hewing timber and chopping wood, also a weapon of offense. The modern ax consists of a head of iron, with an arching edge of steel, and a helve or handle. The edge is in the plane of the sweep of the tool, thus differing from the adz, in which the edge is at the right angles to the plane of the sweep. As a weapon, the ax was in very common use from the earliest times until the general adoption of firearms. t was used by the Egyptians. By the Greeks, it was looked upon as a weapon of their own ancestors and of the Asiatic nations and so figured in works of Greek art. The northern nations who overthew the Roman Empire used many varieties of this weapon, and its use prevailed throughout the middle ages in Europe. A light ax was common among the Arabs and Moors. Axes of various kinds of stone, or entirely of copper or bronze, are found among prehistoric and ancient remains, and in use by barbarous races."

Further definitions relating to the word are: "Ax, to shape or trim with an ax. Ax-head, the head or iron of an ax. An ax to grind (illustration to a story told by Franklin), some private purpose to subserve, or selfish end to attain. Bull-head axe, a pole-axe with a small hammer head at the back, used in slaughter-houses. Sacred ax, a name given by collectors of China porcelain to an emblem or mark supposed to resemble an ax, and found either above, or as following part of the decoration of certain pieces said to be assigned to warriors. To put the ax in the helve, to solve a doubt; find out a puzzle."

As a hatchet is a small axe (we adhere to the usual form of spelling), a little information concerning it also will not be out of place here. It is described as "A small ax with a short handle, designed to be used with one hand." A person is called "hatchet-faced," when he has a face with sharp and prominent features. To "dig up the hatchet," is to make war; to "bury the hatchet," is to make peace; phrases derived from the customs of the North American Indians.

W. F. Brainerd, formerly identified with the Franklin Brass & Bronze Co., and well known to the trade in this city, has been appointed as selling agent for the Brass Goods Mfg. Co., Broklyn, N. Y., and will see the trade in the interest of that extensive factory, soliciting orders for wrought brass and bronze goods including all kinds of builders' Hardware, cabinet Hardware, box trimmings, hinges, etc. Having been long and favorably known in connection with similar lines, he will no doubt find an abundant success attend his efforts. His office, when in the city, will be at No. 110 Chambers Street.

The Use of Umbrellas.

The following interesting article on the care of umbrellas, is from the pen of Col. James H. Sprague, president of the Sprague Umbrella Co., Norwalk, Ohio:

The Ohio woman who used an umbrella to beat some sense into her husband's head may not have had a keen sense in regard to the abuse of umbrellas, but she had a distinct idea of a good way to use one. The great bane of the umbrella of to-day is continued close rolling. The innate desire of all classes of the American people to appear stylish makes work for the umbrella manufacturer and repairer. People buy cheap silk umbrellas and in their effort to make a close-roller out of a common article, wear the cloth out trying to roll it closely, and in a short time the umbrella shows the wear, and they are ready to return it to the merchant and swear it has not worn well. No umbrella should be rolled (closely or otherwise), unless it is absolutely necessary. Over 1,000,000 umbrellas are spoiled every year by close rolling. A fine silk will soon succumb to the tight grip of the amateur hand of the funny man who desires to show how closely he can roll his umbrella and how near like a shadow he can make it appear.

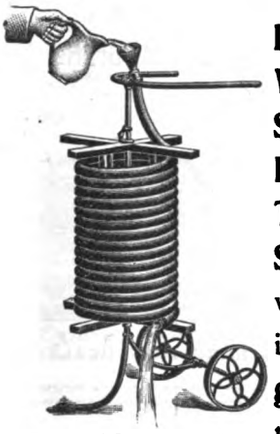
Rolling an umbrella is an art that few can attain. Not one merchant or clerk in a thousand can roll one so it will look as it did when it came from the factory, simply because he does not go at it in a proper way.

HOW TO ROLL AN UMBRELLA.

Seize the umbrella with the right hand by the tips or ends of the ribs, bringing them evenly around the shank (or handle), with the left hand straighten out all the folds, and see that none are left in a bunched or wrinkled shape. Then, with the left hand, commence at the top and bring the hand down on the folds, turning the umbrella with the right hand, keeping the tips or ends of the ribs distributed evenly around the stick. See that the folds roll evenly. Keep the left hand moving down gently toward the right past the tie or band. When the left hand meets the right, hold firmly with the left hand and button the tie with the right. If you desire a very close roll, hold it as before, and with the left hand straighten out the creases or folds, then roll down tightly until you get to the tie or band.

Then hold firmly with the left hand, unfasten the tie with the right hand, roll down past the tie, button the tie with the right hand. and if you are an expert you have a close roll on your umbrella. It will lay in neat folds and look as it does when it comes from the factory.

CAUSE OF HOLES IN UMBRELLAS.



One of the fruitful causes of holes in the folds of an umbrella is improper care when it is wet. To roll up a wet umbrella is to invite the dyes to rot it, and one of the banes of the umbrella manufacturer is loaded dye on silk. Out of 100 samples of silk submitted to the writer, not over ten were pure dye, and 50 per cent. of the silk thread submitted was overloaded with dye and would not stand our chemical test. This is a fruitful cause of trouble in umbrellas, and our concern insists on all the silk and silk threads standing a chemical test in this respect. When over-dyed silks are wet and the umbrellas rolled and set away, we find the owners complaining that their umbrellas are cracking in the folds. Fine holes appear and they are apt to return the umbrella to the merchant and claim damage.

IMPOSING ON THE DEALERS.

Aside from kid gloves, there is no article sold in connection with which merchants are so imposed upon by their "best" customers as umbrellas This is a tender theme. The tempers of the wives of our best customers are not to be trifled with, when it comes to returning half-worn gloves or umbrellas. With a dignity not attained on any other hemisphere in the habitable globe, she sails into the store of the merchant, slams down the battered relic that has acted as play-house and tent for the children of the neighborhood and demands a new umbrella for the "miserable apology sold her only three months ago." She declares it has only been used three times and only with the greatest care. The merchant has to accept this as final, offers her the choice of his stock, and she sallies forth with the air of a conqueror, conscious that she has triumphed. Then he pockets his loss and wonders what the next imposition will be; and people wonder why so many retail merchants fail or commit suicide. If an umbrella is properly made, of good material, and decently used, it will wear for years.

WHO BUYS FINE UMBRELLAS?

The blue cotton umbrellas of our fathers were never rolled closely and, consequently, such lasted for a generation. They were used as sun and rain protectors. But a swifter element now dominates our destinies and the people do not propose that "the rich and vulgar" shall abrogate to themselves all the style. The dear, good, every-

day people, their heirs and assigns, propose to be right in it in this Our America, and if any one has to take a back seat in style it won't be those who can't afford it. It is not the rich people who buy the fine umbrellas. altogether. The spirit of a progressive age has dressed the children of the tillers of the soil, the daughter of our washerwoman of a decade ago, in the latest fashion, and equipped them with the latest styles of parasols and umbrellas. 'Tis well that ancestry cuts no figure in free America. A man here is not to blame for his looks or relation. In a country where from shirtsleeves to shirtsleeves is hardly two generations, where fortunes come and go, where the washtub is the alpha and the landau the omega, we can afford to waste that others may save, and if people abuse umbrellas and toss them half worn to the junk dealer, we have the comforting assurance that it increases the umbrella and kindred industries, makes work for thousands of good people and cheerful homes for thousands who otherwise might have to crowd other industries. Let the good work go on

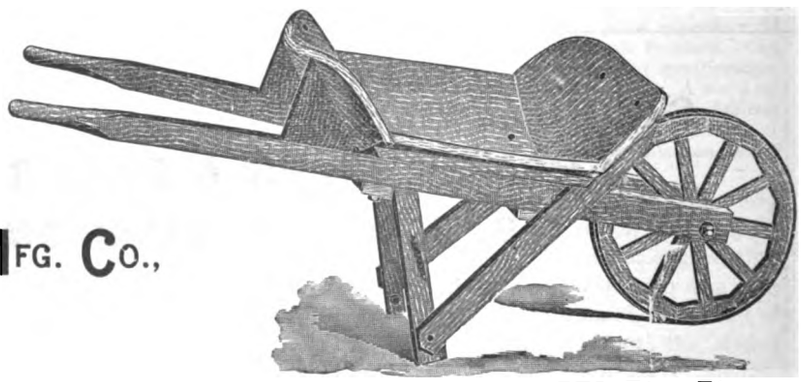
Lawyers make their money from fools and grit;
What the umbrella people make Ich weiss nicht.

Ames Sword Co.'s Bicycle Specialties.

The Ames Sword Co., Chicopee, Mass., is one of the oldest established manufacturing companies in the State of Massachusetts—having commenced business in 1828. For some time they have made the manufacturing of bicycle parts a prominent feature in their production.

Their bicycle fork sides have been on the market for the past five seasons, and in that time have been thoroughly tested. They, as stated by the manufacturers, are made from a fine grade of scabbard steel, with compressed or butted seams, polished all over, and rolled for hardening. They are large manufacturers of handle bars, which are made complete in their own shops from cold rolled scabbard steel, finely finished, copper plated and then nickel plated, furnished ready for the grips. T. and L. front and seat posts, and wood handle bar clips, having bronze clamps, are also among their largest productions. The clip is of the best bronze metal, and is cast directly on the stem; these handle bar clips cannot rust, are finely finished, and copper and nickel plated.

They solicit correspondence from bicycle manufacturers having reference to above specialties, and will furnish samples when requested.



A Business Opening.

The Enterprise Mfg. Co., Akron, Ohio, have a building 100 by 100 feet, with warehouse connected by side tracks of the leading railroads in the rear, and electric line in the front of the building, at North St. Paul, a prosperous suburb of the city, which would make an elegant factory for some harness manufacturer or manufacturer of saddlery specialties. The factory is at present occupied only for storage by an adjoining factory. The owners will open correspondence with some one on a reasonable rent for a term of years, or would entertain a sale or exchange for property. They solicit correspondence in reference to this. This factory has been used for some years as a sweat pad factory, and with the increased capacity of their line of goods at Akron, the company were obliged to take their attention from the Western branch.

It is said that the first nails were, without doubt, the sharp teeth of different animals. These in turn were followed by pieces of flint, pointed, so it is believed. Bronze was the first metal from which nails were manufactured. The nail with which Jael killed Sisera was a wooden tent pin, which was likely pointed with iron.—*Chattanooga Tradesman.*

Antiquity of the Steel Square.

The author of "The Steel Square and Its Uses" speaks of the antiquity of that useful tool as follows:

"Pliny says that Theodorus, a Greek of Samos, invented the square and level, but this cannot be, for the square figures were in the represented designs of the Tower of Babel, one of the earliest known structures. The city of Babylon was a perfect square, and the bricks used in its buildings and walls were square; so probably were those in Babel. Now, to form squares correctly, and to introduce them in endless combination into buildings, it needed a guiding instrument of some kind. So the square, as a constructive tool came into use. Among the ruins of Babylon, Nineveh and Petra it is said to have been represented. There are pictures and sculptures from the ruins of Thebes in Egypt showing the square in the hands of the artisan. Evidences of its use are also to be seen in ruins in India, which are thought by some to antedate those found in Egypt. Among the ruins of the Aztecs, or the people before them, in Peru and Brazil, it has also been found; and though tools of stone and flint, such as axes, hatchets, hammers, etc., were the first used by primitive man in these ruins that date back beyond history, the square is found, and specimens may be seen in the British Museum. The square was regarded by the ancients as a symbol of completeness. Simonides speaks of a man square as to his hands, feet and his mind, etc. Aristotle uses a similar expression." It now transpires says the *Scientific American*, that the square was known and used by the ancient Babylonians, as far back as 9000 years before Christ, if we are to place any confidence in the recent discoveries made at Nippur by Americans who are making excavations at that ancient city.

Jinks: "Have you selected a trade or a profession for your boy?"

Winks: "I shall make a plumber of him."

"Has he a bent that way?"

"He's born for it. Tell him to do a thing immediately and he won't think of it again for a week."—*Eagle.*

HIGH PRESSURES

Owing to its close, even texture and great flexibility rubber makes an admirable joint packing. But rubber alone has neither the strength nor heat-resistance requisite for gasket service under high steam pressures. For such work other materials must be added, which, while preserving the smoothness and flexibility, give extreme strength and heat-resistance. The materials in Ruby Packing are selected and compounded expressly for high pressure service, and make a tight and lasting joint on single, double or triple expansion plants. **Here is one practical man's experience: "I enclose sample of your Ruby Sheet Packing which has been in a flange joint on boiler, subjected to high steam pressure for one year. You will observe that it is yet pliable and in a good state of preservation.** It gives me pleasure to assure you that I have found your Ruby the most satisfactory sheet packing that I have used." ARTHUR RENDELL, Steam-fitter for Dexter Sulphite Pulp & Paper Co., Dexter, N. Y., June 22, 1897.

Best Class Trade From Hardware Line.

Sager Mfg. Co., Rochester, N. Y. [*Bicycle Saddles and Specialties*]: We have received a large proportion of the best class of trade from the Hardware line. We always regard it advisable to dispose of our goods wherever we can do so to advantage. We see no reason why the Hardware trade should be excepted. . . . . .

IS A GOOD ONE.

Morgan & Wright, Chicago, Ill. [*Bicycle Tires*]: There can be no question about the advisability of using the Hardware trade as a means of disposing of bicycles and bicycle parts, and as to the efficiency of HARDWARE, we can only say what we would say in reply to an inquiry from any other publisher, i. e., we have no direct means of knowing whether our "ads" do us good or not. If we insert an "ad," it is on our judgment that the publication is a good one.

CONDENSED BUSINESS WISDOM.

"ONE OF THE BEST MEDIUMS."

Lane Bros., Poughkeepsie, N.Y. [*Hardware Specialties*]: One thing we know—we get the trade, and have good reason to believe that HARDWARE has in the past been one of the best mediums for our large trade and the popularity of the Lane goods.

"NEARLY FROM THE BEGINNING."

Samson Cordage Works, Boston, Mass. [*Cordage*]: We have had our advertisement with you nearly from the beginning, and we know no reason why we should not continue it.

"WOULD NOT BE WITHOUT IT."

H. M. Seitzinger, Wilkesbarre, Pa.: Enclosed please find my check for $1 for renewal of subscription to HARDWARE. I would not be without your paper nor should any one handling electrical supplies.

"JUST WHAT HAS BEEN WANTED."

W. P. Walter's Son, Philadelphia, Pa: Enclosed please find $1 for renewal to HARDWARE. We think your paper is just what has been wanted for a long time for the retail Hardware trade.

"WELL PLEASED WITH 'HARDWARE.'"

W. W. Johnston, Bartlett, Ohio: Enclosed find $1 to pay my subscription to your journal. I am well pleased with the paper, and think it would pay all dealers in Hardware to take it.

"LIKES IT."

A. D. Matthews, Liberty, Me.: Enclosed find check for $1 to pay for HARDWARE for another year. The paper I like much.

"WELL WORTH THE MONEY."

A. A. Case, Pittsford, Mich.: Enclosed please find $1 to pay for my subscription to your paper. I think it well worth the money.

"ALL WANT TO READ IT."

H. E. Iseman, Prattsville, Mich.: The boys all want to read HARDWARE as soon as it reaches us, and are delighted with it.

"WHAT EVERY MAN WANTS."

C. A. Fisk, Helena, Mont.: HARDWARE is what every man wants, who hopes to gain success in the Hardware business.

"THE BEST OF ALL PAPERS."

S. I. King, Brighton, Mich.: I received a specimen copy of your paper dated October 10th, and I like it best of all the papers I have ever seen, devoted to the retail trade. Enclosed find $1 for which send me HARDWARE one year.

"A DOLLAR WELL INVESTED."

John T. Merimee, St. Mary's, Ky.: Enclosed please find $1 in payment for another year's subscription to your valuable paper—a dollar well invested, I believe, for it keeps me posted.

"CANNOT FAIL TO HELP OUR BUSINESS."

J. C. Tanger & Co., Hanover, Pa: Please find $1 enlosed for one year's subscription. After examining a specimen copy, we think it one of the best, and that it cannot fail to help us in our business.

"WOULD NOT BE WITHOUT IT."

H. D. Wyman, Mt. Dora, Fla.: You will please find enclosed check for one year's subscription to HARDWARE. I think a great deal of your paper, and would not be without it.

"NO JOURNAL ITS EQUAL."

Hendricks & Stall, Thayer, Kan.: While we are doing business a great number of miles from New York, we know of no journal that we consider the equal of your paper.

"PRIZED IT VERY HIGHLY."

A. J. Pellum, Ranger, Texas: Enclosed find money order for $1. Please credit my account with the same. I prize your paper very highly and cannot afford to be without it.

"USEFUL AS AN ADVERTISING MEDIUM."

Smith & Egge Mfg. Co., Bridgeport, Conn. [*Traps, Locks, Chains, Pulleys, etc.*]: We have found your paper very useful as an advertising medium.

"THE BEST WE HAVE SEEN."

Massey & Thompson, Monroe City, Mo.: Place our name on your subscription list. Your paper is the best thing we have seen in that line.

"CANNOT GET ALONG WITHOUT IT."

T. C. Lamson, Elizabethtown, N. Y.: Please find enclosed $1 for HARDWARE for one year. Can't get along without it.

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers, the country over are requested to contribute to this page. News of new factories or companies, changes, improvements, etc, will be gladly received, and promptly published.

New Companies, Etc.

Hammond, Ind.—Arrangements are being made to organize a local stock company to manufacture heating stoves after the J. H. Clare patent. Capital stock, $30,000.

Newburgh, N. Y.—The Palatine Wire Co. has been incorporated for the purpose of conducting the wire business lately carried on by the Newburgh Wire & Nail Co. It has leased from that company the mill known as the wire mill, only for a period of one year, with a privilege of renewal. The design of the company is to especially manufacture nails, barb wire, hay bands, etc. At a meeting of the new company held recently, the officers were elected as follows: President and Treasurer, Thomas J. Farrell of New York; Secretary, Allan Fraser of New York. These two gentlemen were present at the meeting, as was also Mr. McClung and Thomas W. Fitch, the last mentioned being a resident of Pittsburg, Pa. Mr. Fitch is a son-in-law of the late General William T. Sherman. He may be the manager for the new company.

New York, N. Y.—George Lane & Son of New York City, to manufacture Hardware; capital, $10,000. Directors, George Lane of City Island, George Lane, Jr., of Freeport, and Carrie A. Haurer of New York City.

New York, N. Y.—Union Harrow Co. has been incorporated by Charles La Dow, John M. Gardner and M. Sexton Northrup; to manufacture harrows and cultivators. Capital stock, $110,000.

Oneida, N. Y.—Schubert Bros. Co. has been incorporated by George Schubert, August Schubert and Emma B. Christina; to manufacture wagons, Hardware, etc. Capital stock, $17,000.

Philadelphia, Pa.—A company, which will be known as Fayette R. Plumb, Incorporated, of Philadelphia, has been organized to manufacture edge tools and tools for railroad and mining purposes. The capital stock is $350,000, which includes a plant of F. R. Plumb, valued at $315,000. The directors are F. R. Plumb, president; Samuel Disston, John W. Grange, Charles E. Grange and Walter T. Bradley.

Piqua, Ohio.—The Favorite Stove & Range Co., a foreign corporation, organized under the laws of West Virginia, with principal office located at Piqua, Ohio, complied with both acts relating to foreign corporations, capital stock, $250,000, all of which is represented by property owned and business done in Ohio; agent upon whom process may be served, X. E. W. Lape, Piqua, Ohio.

Portland, Me. — The Somerset Blind-Opener Co. has been incorporated for the purpose of manufacturing and selling blind and door fasteners, with capital stock of $30,000. The officers are: President, Morrill N. Drew of Portland; Treasurer, W. M. Priest of Braintree, Mass.

Rockport, Ohio.—The Norton Tool Co. has been incorporated by G. S. DuPeron, H. Dixon, W. T. Norton and others; to manufacture and deal in machinery, tools and Hardware. Capital stock, $50,000.

St. Joseph, Mo.—The old nail mills property will be utilized at once, the St. Joseph Bar & Axle Co. being now ready to begin operations. Sixty-five men will be employed at the start, nearly all of them skilled workmen. St. Joseph is a good nail market, the grocery and Hardware houses handling large quantities of them, and it is thought that through them alone a large part of the product of this factory can be disposed of. All kinds of bar and commercial iron will also be turned out.

Youngstown, Ohio.—The Ideal Stove & Foundry Works are building a large plant in Daleville, for the manufacture of stoves.

Improved Conditions.

Bloomington, Ill.—The Cooperative Stove Co., one of Bloomington's substantial institutions, is to resume work shortly, after a shut down of two months. There is a good prospect for work ahead.

Cleveland, Ohio.—A deal has been consummated in Cleveland, Ohio, which involves $1,000,000 and the transfer of one of Cleveland's leading manufacturing plants to a French syndicate. The plant is the Cleveland Machine Screw Co. It is to be sold at a figure between $950,000 and $1,000,000, and the first instalment, amounting to $50,000, was paid through the Cleveland Trust Co. Officers of the company say that the last year has been the most profitable period of production in the history of the plant, and that the indications for the next six months are for an immense increase in the output, giving the impression that the sale is not a forced one on account of business depression.

Duluth, Minn —Charles Roether, proprietor of the Twin City Willow Reed & Rattan Works of St. Paul, is thinking seriously of locating in this city, and the Chamber of Commerce is lending him all the encouragement that is possible. He is favorably disposed toward Duluth because all of the material that is used by him in his business comes from the East and he would have the full benefit of the low lake rates. Mr. Roether manufactures all kinds of willow work, including chairs, baby carriages, baskets, etc.

Eldred, Pa.—The Eldred Cutlery Co. has begun operations and expects to run steadily throughout the year. A number of families have arrived here, who will be employed in the works.

Indianapolis, Ind. — The Indianapolis Stove Co. is getting things in shape to move into the Indianapolis Cabinet Co. buildings. The stove company recently purchased the old plant, but it will be sixty days before everything will be in good running order. When started the plant will give employment to more men than ever before.

Indianapolis, Ind.—The Udell Woodenware Works, North Indianapolis, will start up again at once with a full force. Mr. Barnes says that the orders are coming in faster than he expected and indicate that prosperity is coming at last.

Mansfield, Ohio. — The Baxter Stove Works, employing 125 men, have resumed work on full time, with a full force of men; the first time the works had run full time for over a year.

Wheeling, W. Va.—An addition of 46x60 feet is being built at the Wheeling Hinge factory. The new building will be used as a storage room. H. W. Fair has the contract.

Recent Embarrassments.

Alliance, Ohio.—Charles Frederick, superintendent of the Columbiana Pump Co. has filed a deed of assignment to W. S. Potts of Lisbon. The property assigned consists of two lots and parts of three lots and personal property. Assets and liabilities not stated. The immediate cause of the assignment was the fact that Aaron Esterly, receiver of the Esterly bank, Columbiana, had taken judgment note against the company for $13,830.36.

Bellaire, Ohio.—The Bellaire Edge Tool Co. of this city has assigned to George B. Moore, attorney. This plant manufactured edge tools direct from pig iron by a process of their own.

Binghampton, N. Y.—O. U. Kellogg of Cortland, appeared before Supreme Court Justice George F. Lyon recently and made application for the appointment of a receiver for the Howe Ventilating Stove Co. of Cortland. William H. Clark, who was appointed temporary receiver, is president of the company and editor of the *Cortland Standard*. The liabilities of the firm are $75,000; the nominal assets are $50,000.

Rockford, Ill.—A bill has been filed in the Circuit Court asking for the appointment of a receiver for the Columbia Horse Nail Co. of New Milford, to wind up the affairs of the concern. It was organized in 1892, with a large number of Rockford people as stockholders. It has no money on deposit and no debts. It is the owner of valuable patents and machinery on which there is no incumbrance.

Terre Haute, Ind.—The creditors of the Sanford Fork & Tool Co., which went into the hands of a receiver a number of years ago, have been paid dividends of four and forty-six hundredths per cent. on their claims. This is the second distribution of a similar dividend and will wind up the matter. When the tool works failed there were several claims preferred by the directors who had advanced their own funds and executed to themselves a mortgage. After long years of litigation this mortgage was set aside and they will receive the same probate share of the proceeds as the other creditors. The company was organized years ago by a new company the Terre Haute Shovel & Tool Co., which bought the plant of the receiver.

BICYCLE TRADE RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Companies, Agencies, Etc.

Asbury Park, N. J.—The Great Scott Paper Co., Limited, of Philadelphia, also bicycle manufacturers, have opened a branch store at the junction of Cookman and Asbury Avenues, where all the high grade wheels may be rented by the hour, day or week. Mr. C. W. Wood of Philadelphia, who understands the business thoroughly, has been placed in charge and anyone wishing to purchase or rent a wheel will receive courteous attention.

Cincinnati, Ohio.—The Cincinnati Metallic Mfg. Co., Massachusetts Avenue and Straight Street, make a specialty of bicycle frames in quantities, and would be pleased to hear from manufacturers of connections and tubing.

Indianapolis, Ind.—The Collins Mfg. Co. has been incorporated. Capital $30,000. The incorporators are C. W. Merrill, John J. Curtis, W. C. Bobbs, James Hooker and S. W. Collins. The company will manufacture bicycles and bicycle devices.

Jersey City, N. J.—Champion Bicycle Hanger Co. has been incorporated with a paid up capital stock of $10,000. The incorporators are K. K. Stearns, Jersey City; Charles S. Cowan and Benjamin Blum, New York.

Meriden, Conn.—Meriden Rubber Co. has been incorporated by Wilhelm A. Zickerman, H. George Talcott, L. H. Francis. Capital stock $10,000.

New York, N. Y.—Esmond Cycle Saddle Co. has been incorporated by Alfred Castro, Preble Tucker, William A. Abbott, Gustave Reimberg and H. G. Ward. Capital stock, $100,000.

Norfolk, Va.—The Sears Para Rubber Co. has been incorporated by Richard F. Sears, president; Henry Earl, vice-president; B. F. Brenning, secretary; William J. Pilcher, treasurer. Capital stock, $1,000,000.

Plymouth, Ind.—The Smalley Cycle Co. has been incorporated. Capital $50,000. The directors J. H. Bass, R. T. McDonald and James M. Barrett.

Sacramento, Cal.—The Golden Gate Bicycle Brake Co. has been incorporated. Principal place of business, San Francisco. Capital stock $10,000, all subscribed, with Thomas Williams, Horace W. Bowman, Francis C. Williams, John H. Cavat and Lewis H. Bailey of San Francisco as directors.

Springfield, Ohio. — The Rubber Tire Wheel Co. have opened a branch office and plant at No. 240 Penn Avenue, Pittsburg, Pa., where they have every facility for furnishing Springfield tires.

Springfield, Ohio.—William N. Whitely, the "ex-Reaper King," will shortly commence the manufacture of bicycles in the new Champion shops.

St. Paul, Minn.—W. J. McGuiggan, sporting goods, etc., has opened a new store on Jackson Street, near Seventh.

Toledo, Ohio.—Samuel Snell, it is stated, will organize a company for the manufacture of motor cycles.

Wallingford, Conn.—Treat Mfg. Co. has been incorporated by Erma T. Linsley, Charles Hill, Charles C. Treat; to manufacture and deal in bicycle parts. Capital stock, $3000.

Changes and Improvements.

Akron, Ohio.—The Whitman & Barnes Mfg. Co., manufacturers of rubber goods, will erect a plant for the manufacture of their goods, and will manufacture bicycle tires.

Baltimore, Md.—The Mt. Royal Cycle Co. business has been taken out of the hands of William P. Harvey, receiver, and will, in future, be conducted by O. H. Harvey.

Canton, Ohio.—H. J. Lehman, bicycles, etc., sold to Suteur & Co., of Cleveland.

Chicago, Ill.—A new bicycle called the "Cygnet," has made its appearance in this city. It is made in Dayton, Ohio, by the manufacturers of the Tiger wheel, the Stoddard Mfg. Co.

Derby, Conn.—Biever & Clark, bicycles, succeeded by D. N. Clark.

Great Falls, Mont.—Richard Barry, Hardware, sporting goods, etc., closing out business.

Logansport, Ind.—Burgman Cycle Co., bicycles, succeeded by Lawrence Cycle Co.

Louisville, Ky.—The Aquila Bicycle Mfg. Co., W. H. McKown, proprietor, has moved into its new building, and will put in considerable machinery.

Nyack, N. Y.—Chamberlain & Co., the bicycle firm which has done business in Depew Place for two or three seasons, have sold out to the World Cycle Exchange, No. 720 Lexington Avenue, corner Fifty-eighth Street, New York City, where all the effects will be removed. W. A. Nash, who has had charge of the place this season, has been employed by the Exchange people and will remove to the city.

Mauch Chunk, Pa.—William Glover, Jr., of Hazleton, purchased the contents of the defunct Weatherly bicycle plant, consisting of 125 bicycles and all the machinery necessary to their manufacture. The whole business has been moved to Hazleton.

Reading, Pa.—The Acme Mfg. Co. received an order from its New York exporters, James S. Barron & Co. for 2400 bicycles for Germany, to be delivered as early as possible. In consequence there is a boom again at the plant of the Acme, which had slacked off somewhat, and the place is working day and night with 400 hands employed, who are turning out 200 wheels a day.

South Portland, Me.—The Lovell bicycle plant will not be sold. The Lovell's are negotiating for the purchase of land adjoining the factory upon which a large building will be erected, to be used for the manufacture of rifles, etc. In a short time they will also manufacture sporting goods at this concern in South Portland.

Thompsonville, Conn.—The Lozier Mfg. Co. closed for the month of July, the company having enough finished stock on hand for its 1897 output. The 1898 model will not be decided upon until the return of H. A. Lozier from Europe.

Tipton, Ind.—The Tipton Tubing Works, which was destroyed by fire last April, will be rebuilt.

Recent Embarrassments.

Amesbury, Mass.—The Eastern Cycle Mfg. Co. has made an assignment. It was incorporated December 31, 1895, with a capital stock of $20,000.

Chicago, Ill.—The Mason & Mason Co., manufacturers of bicycles, have made an assignment. The liabilities are placed at $60,000 and the assets at $75,000. The affairs of the company are said to be in such condition that it may resume business within a very short time.

Everett, Mass.—Everett Cycle Co. has made an assignment. It was incorporated in January, 1894, and had a capital of $50,000.

Hazleton, Pa.—George N. Lord, bicycles, etc., has made an assignment. Liabilities, $2000.

Indianapolis, Ind.—The Central Cycle Co., manufacturers of bicycles, reported to have appointed a receiver.

Kansas City, Mo.—Brax V. Lawrance, bicycle repairer, No. 1214 Walnut Street, has made a general assignment for the benefit of creditors. No creditors are preferred and no statement of assets or liabilities is given.

New York, N. Y.—Dean Tire Co., No. 25 Warren Street and No. 409 East Ninety-first Street, Wm. McBride appointed temporary receiver, with a bond of $5000.

New York, N. Y.—G. Minturn Worden Cycle Co. No. 79 Nassau Street, James J. Nealis appointed receiver. The company was incorporated in March last, with a capital stock of $5000.

Philadelphia, Pa.—The Cornelius & Rowland Co., dealers in bicycles, etc., Harry H. Sawyer appointed receiver.

St. Paul, Minn.—The E. M. Hallowell Co., dealers in bicycles, No. 382 St. Peter Street, has made an assignment to Frederick W. Romer. The assets of the company do not exceed $2500.

Thorold, Ont.—Jones & Durkee, bicycles, reported to have assigned.

Toronto, Ont.—McLean & Oakley, manufacturers of bicycles, meeting of creditors. Assigned.

Recent Fires.

Middletown, Conn.—Kirby Mfg. Co., bicycles bells, etc., damaged by fire; insured.

Niagara Fall, Ont.—Sam Ward, bicycles, Lang Block, destroyed by fire at a loss of $2000; insured for $1400.

Ottawa, Ont.—Currie & Graham, bicycles and bicycle sundries, destroyed by fire at a loss of about $1900; insured.

Vancouver, Wash.—W. W. Wintler, bicycles, destroyed by fire; insured.

STERLING BELLS.

One Best THE Sterling.

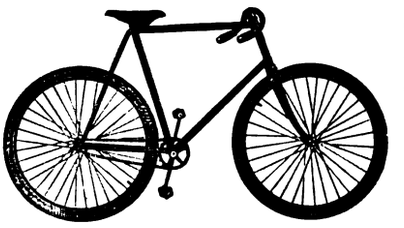
Bells of all Description.
Send for Catalogue.

N. N. HILL BRASS CO.,
East Hampton, Conn.

Bells.

The belle of the ball on her escort leaned,
And so very happy the dear girl seemed,
That he took her aside to a cozy retreat
And told her the story that's always so sweet.

She perked up her lips, so enticing and fair,
And his own were reaching the heaven that's there,
When she said, "Dear boy, this is only a sell.
You'll first have to buy me that 'Climax' bell."



The new 1897 model "CLIMAX" Bell possesses without doubt the most improved Lock Clamp known. Can be adjusted to the Handle Bar quickly without removing the screw, thus saving all vexatious worriment in the operation, and at the same time presents a more attractive appearance than any other kind of an attachment.

We have just published a handsome little booklet to be carried in the vest pocket, containing lots of valuable information for the benefit of wheelmen. Send us a two-cent stamp and we will mail you a copy.

Climax Bell Co., 403 Washington St., Boston, Mass

"TOO VALUABLE TO BE WITHOUT."

Charles T. Mitchell, Baltimore, Md.: HARDWARE is too valuable to be without.

"INTERESTING AND INSTRUCTIVE."

Strong, Bush & Handwerk, Joliet, Ill.: Your paper is very interesting and instructive.

"IMPROVES AS IT GROWS OLDER."

Geo. P. Crans, Brooklyn, N. Y.: HARDWARE improves in quality as it grows older. I am well pleased with it.

Digitized by Google

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

CRONK'S

Combination Fencing Plier.

This newly invented fencing tool is needed by all people that build or have occasion to remove or repair wire fence, as it is made with two staple pullers, two hammers and two button cutters. They are the same heft as the 1½ Maydole Hammer, and they are made of forged tool steel. No good farmer will be without one. They are warranted to cut No. 8 hard or No. 6 soft wire. Like the celebrated Cronk Plier they are fully warranted in all respects. No. 12, 11 in. long, $12.00. Dis. . . .

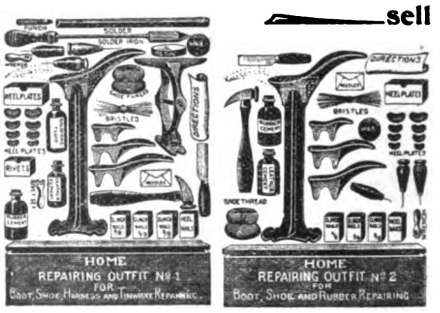
DROP SHOT BUCK

Also Wholesale Jobbers in

Wrought Iron Pipe, Cast Iron Soil Pipe, Water Closets, Brass Plumbing Goods, and everything else to plumb a house from cellar to garret.

RESERVOIR PUNCH



For Euchre and Whist Parties.

This Pocket catches the pieces punched from Tally Cards, thus preventing a littering of the carpet.
Is hinged, can be opened, emptied and closed in an instant.
Of great value to Railroads as it prevents the replacing of pieces punched out of monthly or commutation tickets.
Also valuable in Restaurants where punch tickets are used.

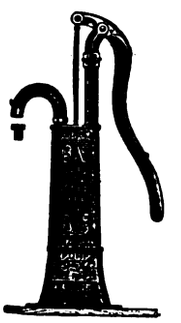
THE ONLY "PERFECTION" WATER ELEVATOR AND PURIFYING PUMP

Dealers, get in line and sell your trade an article you can guarantee for ten years. The chain or buckets is the principal factor in any elevator. The **Perfection Bucket** is cut by die in one piece of **Black Open Hearth Steel** folded together by double lap seams, and the entire chain **Galvanized** after **Construction.** Others are made of several pieces of galvanized iron soldered together. Simply this one feature is a sufficient guarantee that the **Perfection** has no equal. It is handled by all leading jobbers throughout the world. Call for the **Perfection.** Take no substitute.

It is the simplest structure for raising water on the continent; guaranteed never to freeze. . .

For full particulars, circulars, etc., address the sole manufacturers.



St. Joseph Pump & Mfg. Co., St. Joseph, Mo., U. S. A.

148 Lake Street, CHICAGO.
Factories: GEORGETOWN, CONN. CHICAGO, ILL.
ESTABLISHED 1818.

THE OLDEST AND LEADING MANUFACTURERS OF GALVANIZED WIRE GOODS IN AMERICA.

"Pennsylvania" Fruit Picker

This Cut almost speaks for itself—the device being so much like the human hand, shows at once the utility of the article.

AS A FRUIT PICKER IT HAS NO SUPERIOR.

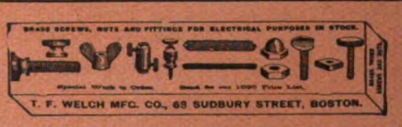
It is made of Heavy Galvanized Wire, and Easily Adjusted to a Pole. It has been sold for several years, and the demand (as it is becoming known) is steadily increasing. The difficulty of detaching fruit and securing it unbruised is apparent to everyone so engaged. This overcomes the difficulty, and saves the finest fruit which commands the highest prices.

THE LOW PRICE AT WHICH IT IS SOLD

brings it within the reach of those who have but little fruit to gather as well as those who have large quantities. *Price, per dozen, $5.00.* It will gather Apples, Peaches, Pears, etc.

MANUFACTURED BY **EDWARD DARBY & SONS,**

233-235 Arch Street, PHILADELPHIA, PA.



"Goodell's" Turret Head Glass Cutters.

(Patented March 31, 1896)

A GOOD THING.

IT'S IN THE TEETH.

The Patent "REFORM" Curry Comb is composed of three shallow, oval trays, with corrugated edges. The parts are struck up from a fine grade of cold rolled steel, heavily tinned and bronze lacquered, firmly riveted together and warranted not to rust. The outer dimensions are 6½x4¼ inches and by reason of the large cleaning surface and peculiar arrangement of teeth, the comb will do its work with a large saving of time and labor, cleaning with equal thoroughness both long and short coats. There are no places to accumulate hair and it will not tear or injure the brush, the comb being quickly freed from accumulation by giving its face a gentle tap.

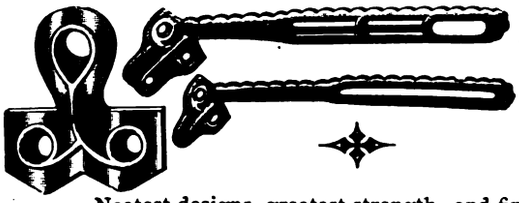
"EVERYTHING IS COMING UP."

BUSINESS IS BETTER AND THERE WILL BE A LARGER DEMAND THAN EVER FOR OUR



Sheep Skin Mitten.

Acknowledged to be the best article for polishing stoves, as it does away with the old time dirtiness of the work, making this work a pleasure. Also invaluable for polishing brass or glass, or silverware, which it does not scratch. For tan shoes and cleaning bicycles it has demonstrated itself a conspicuous success.

Diamond Hardware Co.,

PLEASED with RESULTS.

John N. Hager, Fort Atkinson, Wis. [*Fork, Shovel, Rake and Hoe Brackets*]: Am well pleased with the results of my advertisement in HARDWARE.

Digitized by Google

To Bicycle Riders.

WE MAKE OUR TUBE
OF FIFTY CARBON STEEL

Because a Tube like this of our Is just as strong as a Tube like this of

.50% CARBON STEEL

.25% CARBON STEEL

While weight for weight in a Bicycle our FIFTY CARBON Steel will last so long [redacted] and TWENTY-FIVE CARBON Steel will last only so long [redacted]

NOTE THE FULL IMPORT OF THE PARALLEL LINES.

The comparison which they graphically make indicates the result of the prolonged investigations of the most practical experts of the world.

That the tests in our own laboratory coroborate these results is merely so much to its credit; that the same is true of actual trial on the road equally proves the trial to have been made in bicycles of correct design and construction. THE FACT REMAINS.

The margin of safety is greatly increased by the use of this tube. Every bicycle manufacturer should use it; every dealer should insist on having it; every rider should demand it. Send for catalogue.

STOP

Did you ever see the like?

Seven men on one ladder—and it a small Step Ladder too—and it would carry as many more if they could get on it.

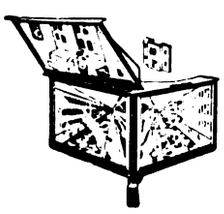
You know it keeps the old style Step Ladder busy to carry one good sized man or woman without breaking down; and they last but a year or two at best. . . . . .

This Step Ladder Will Carry All You Want to Put On It,

and will last a lifetime if you treat it half decent. . . . . .

There is but One Step Ladder made for mechanics, and

THIS IS THE ONE.



We manufacture—

Single Ladders, Extension Ladders, Single Bent Rung Step Ladders,

Which are all covered by patents.

No person else manufactures them but us. Write for Prices and Discounts.

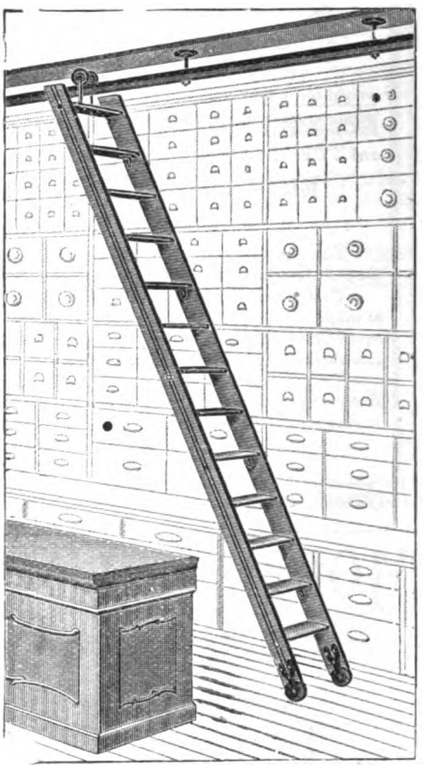
Indiana Ladder Company, Indiana, Pa., U.S.A.

WINDOW MIRRORS

Enables a person to see up and down the street, eight to ten blocks, and who's on the door step. Can be attached to any house. . . .

THE BEST MADE, "THE PERFECTION."

We want live agents in every town in the United States and Canada. . . . Write us



BAYER & CO., *28 North 13th St., PHILADELPHIA, PA.*

The Chicago Rolling Ladder

Especially Adapted for Hardware Stores.

THE CHICAGO ROLLING LADDER.

The first requisite for a store ladder is **ease of operation.** The Chicago is the only ladder of the style shown above that does work easily. If you would save one-half your labor, fit your store up with either the **Chicago or Bicycle Step Ladder** system. Write for Catalogue illustrating our 4 distinct ladder systems to

THE ONLY "PERFECTION" WATER ELEVATOR AND PURIFYING PUMP

Dealers, get in line and sell your trade an article you can guarantee for ten years. The chain or buckets is the principal factor in any elevator. The **Perfection Bucket** is cut by die in one piece of **Black Open Hearth Steel** folded together by double lap seams, and the entire chain **Galvanized** after **Construction.** Others are made of several pieces of galvanized iron soldered together. Simply this one feature is a sufficient guarantee that the **Perfection** has no equal. It is handled by all leading jobbers throughout the world. Call for the **Perfection.** Take no substitute.

It is the simplest structure for raising water on the continent; guaranteed never to freeze. . .

HARDWARE

VOL. XV. AUGUST 25, 1897. NO. 10.

HARDWARE is a Review of the American Hardware Market, specially devoted to the Retail Trade. Published the 10th and 25th of each month, by the HARDWARE PUBLISHING CO., No. 143 CHAMBERS ST., NEW YORK.

BRANCH OFFICES: CHICAGO, - - - - - ASHLAND BLOCK. BOSTON, - - No. 33 EQUITABLE BUILDING. CINCINNATI, No. 103 LINCOLN INN COURT BLDG.

Subscription, $1.00 per year. Subscription, Foreign, $1.50 per year.

JAMES H. KENNEDY, - Editor and Manager.
HENRY HOPKINS, - - Associate Editor.
FRANK REIFSNIDER, - Western Manager.

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted to the Hardware Trade.

Editorial Trade Review.

Encouraging reports continue from all over the land, almost without a discordant note to disturb the harmony of the prosperous conditions which surround every industry.

"It's in the air," and many factories without having orders ahead for months of product to justify the action, are wide-awake enough to replenish their diminished stocks, and engaged in preparing for the volume of trade which will undoubtedly follow.

Few brighter stars can be shown in the sky of our nation's prosperity than the bright one that shines for "dollar wheat." The most glorious imagination after the depressing experience of the past few years, could scarcely have dreamed a vision of so much brilliancy for our commercial future as is indicated in that shibboleth, "dollar wheat."

The independence usually associated with the characteristics of an American farmer once again stiffens his backbone, and he looks his creditors in the face, pays off the mortgage which for years has made him feel his fertile farm possessed no equity for him, and for 1898 will be found increasing his area of cultivation by the aid of new machinery which he will buy and pay for.

Under this inspiration, our agricultural nation draws a full breath, and vitality is felt in every industrial corner throughout the country.

Changes of prices in manufactured Hardware have as yet done no more than brace up the unsettled conditions too long their most important feature.

The extreme low prices prevailing on heavy Hardware are no longer obtainable, having been withdrawn as speedily as the manufacturer—who has seen no dividends for a year or more—is able to realize there is a strong probability of doing again a remunerative business. He does not want his order book filled up with a pile of orders from the prices on which it would puzzle the proverbial Philadelphia lawyer to figure a profit.

A number of early orders have already been received from the jobbers direct, by the manufacturers and their commission houses; but the old-fashioned stock orders are still held in abeyance until the present prosperous outlook is confirmed beyond all peradventure.

Confidence has been described as a plant of tardy growth, but it is already planted in the rich and fertile soil of "improved conditions," and the full fruition of its growth is not far distant.

The Advantages Of Organized Effort.

The wonderful growth of the Merchants' Association, of this city, which has recently completed the second month since its incorporation, is without a paralell; the enterprising and energetic members through whose initial efforts the association was formed, deserve the highest praise from their associate members and the other merchants of New York, for the success they have achieved and the corresponding impetus toward a good business now felt in all channels of trade.

Only a few months ago and the movement existed only as a possibility; to-day it is an assured fact, and over 800 resident members and an army composed o nearly 25,000 non-resident members make full and frank acknowledgment of its sphere of usefulness. Every resident member can be relied upon to give to the work in hand his time and best energies, in order to extend the utility of the association and aid in increasing the commercial importance of our unrivaled city.

Thousands of buyers, many of them visiting our city for the first time, have already become familiar with the vast resources controlled by the New York markets. The register at the rooms of the association, in the New York Life Building, is daily becoming filled with the representative names of visiting merchants, already exceeding 1500, who have availed themselves of the low rates of fare made possible by the association's tireless exertions, and by their presence here in such large numbers have enabled its officers to secure concessions of railroad freight rates in addition, which will be felt and appreciated by the dealers and their customers in every state represented A glad welcome has been extended to the accession of buyers who have already started to receive benefit from our metropolitan advantages.

The names already registered give but a faint idea of the number of merchants who have been brought here by the association; many buyers for personal reasons do not wish to place their names on the record until their buying is completed and they are prepared to return home. But all those who have been seen at the rooms express their highest gratification at the extent of the markets in all lines noticeable at this time. It is the hope and expectation of the association to increase the membership of the resident and non-resident members to 65,000 in a very short time; when it so succeeds in doing, it will become the largest organization of its kind in the world.

There are many thousands of merchants yet to be

Digitized by Google

reached, many of whom even among our own merchants have not had their forceful attention called to this important organization and its vast field of labor. We regret to say that occasionally some old fogy is found belittling the efforts, deriding the sentiment, ignoring the patriotism and undervaluing the importance which so great a step as this possesses for the good of New York; a movement so fraught with significance in the upholding of our prestige, and so suggestive of future profit, in consequence of the increasing outlet naturally to be anticipated, when the present race of progressive buyers shall have explored the many and vast resources of the leading commercial city of the nation.

John J. Tower's Trip Abroad.

John J. Tower returned on Aug. 6 from a two months' vacation abroad which, accompanied by his daughter, he passed in England and Scotland, visiting every place of importance from Abbotsford to Stratford-on-Avon, and having an extremely enjoyable period of rest to which he was well entitled after many years of devotion to business. This trip, especially on the voyage out, was pleasant and free from annoyance even of the slightest character, finding a welcome hospitality displayed on the *Anchoria* by the captain and his staff, that made every moment one of enjoyment and filled with delightful experiences. The health of Mr. Tower's daughter, for the improvement of which more than anything else the visit abroad was made, showed signs of great benefit, and she remained in England to enjoy for a longer period the health-producing latitudes of the English lakes. Mr. Tower returns with renewed confidence in the extension of our export trade, especially in the improved tools of Yankee manufacture. While the field of observation was of a limited character, confined more particularly to England and Scotland, he was greatly impressed by what he saw, as in every Hardware establishment visited the signs of progress were manifested to a great degree by noticing a large assortment of American made goods, showing that the mechanics of Great Britain were no longer so hidebound and opinionated as to see no benefit in improved methods or advanced ideas in the line of American mechanical progress. Extreme conservatism and frugality of expenditure are the characteristics of a large majority of the business houses he visited, many, even of the larger emporiums, being found in houses that were formerly used as dwellings, and without any extravagant outlay for outer adornment of display only. The feeling among the merchants with whom he came in contact, was of a growing cordiality toward this country, and with a welcome hand extended toward our products, where a chance existed for making a profit in handling them. A little slower, perhaps, to grasp the ideas we desire to convey, but they keep on thinking it out, and finally "get there and stay there" when they do. As this was Mr. Tower's first trip abroad, let us hope the enjoyment afforded him by his friendly experience will prepare him to take a similar trip annually, in the interests of the many progressive lines of goods associated with which there is no name in the country more familiar to the trade than that of John J. Tower, of Tower & Lyon, New York.

H. L. Daughtry, who was for twenty-five years buyer for the Hardware house of A. W. Lightfoot, will open, about September 15th, a Hardware store in the stand formerly occupied by T. C. Pinkard, in Opelika, Ala.

Buy with confidence and judgment and sell with profit and honesty.—*Exchange.*

"Will" Graham At Home Again.

William A. Graham, of the firm of John H. Graham & Co., accompanied by his wife, returned from a ten weeks' trip abroad, on Saturday, 14th inst. They returned on the steamer *Paris*, having had a very agreeable voyage, and without suffering any of the unpleasantness usually associated with "crossing the big pond." Being greatly improved by his vacation, and considerably stouter, Mr. Graham looks more like himself than he has in some time; it was a season of rest and recuperation, notwithstanding he did not know while abroad an idle moment, being constantly on the go, either in London or on the Continent during his entire absence. He returns in season to welcome the prosperous conditions surrounding the Hardware business, which he has long anticipated.

The late Theodore Havemeyer, the New York millionaire, in speaking of the causes of his success in business, once said: "For twenty-five years I was at work at seven A.M., and did not leave the refinery until seven P.M. I never went to bed at night until I had gone through the whole establishment. Many times I worked all the night long. While I was a single man my expenses never exceeded $50 a month. Pilot bread and cheese made for me many a meal. A canvas suit was my daily apparel, and there was no part of the business at which I and my brother did not work; no part we considered too dirty or too arduous or beneath us." In short, industry and frugality were the foundation stones of fortune in this as in countless other cases; yet the professional agitators, who rail against wealth as a crime, will never believe that it is simply the natural and material increment of the exercise of such virtues.—*Exchange.*

E. C. Van Glahn, of White, Van Glahn & Co., New York, is once more seen at the Hardware Club, filled with reminisences of his five weeks' tour to the Pacific Coast, proud of the size and greatness of his country, as he saw it from the car windows, but satisfied that, as a place for home and business, New York is good enough for him. He secured the rest and change he was after, and has come back fully prepared to grapple with his share of the coming national prosperity.

DRUMMERS' MISERIES.

Almost half the people connected with any established industry like the Hardware business, imagine that the traveling representatives have one prolonged picnic, all the time they are away on the road doing their level best to encourage the customers of the house to buy something, so the firm can make a small profit over the outlay for clerk hire and other expenses. The member of the firm not traveling himself, who believes the drummer has an easy time of it, is advised to take a short trip himself of a couple of hundreds of miles in either direction, and learn just how restful an occupation it is to assume the persuasive manner and coax out of the buyer the few orders the firms are on the anxious seat to get.

At the Club the other day, when a half dozen of us got together to rehearse the many unenjoyable scenes that lingered in our memories with a flavor of unpleasant consequences, I asked them each and all to contribute a sample of those moments of misery, and below I present them, firmly believing they will find an echo in the heart of many a brother traveler who can say "that sounds natural; I've been there many a time and oft."

This is what No. 1 contributed:

"Hire a horse and wagon to go twelve miles from the railroad to see an old customer, which you do, but quit at so late an hour you have no wish to return before morning. You start the next morning to go back, and are confident you know the road so well that you have no desire to display your ignorance by inquiring about your route. All of a sudden, as you are plodding along with your old plug of a horse, you strike a bend in the road that is decidedly unfamiliar, not having passed it the day previous; the cold sweat of doubt makes goose flesh all over your sensitive hide, as you inquire from a passing wayfarer if this isn't the road to ———, naming the town you have no wish to reach, and find out in a moment that all your doubts are removed when the wayfaring man answers 'Yes.' Six miles out of your way—oh, me! oh, my! You regretfully retrace your traveling, and try to hurry by your informant, but not quick enough to avoid his query: 'What's the matter, stranger, lost something?' Well, I should say so."

How is this for No. 2:

"Getting home from a ten weeks' trip two days ahead of time, on purpose to surprise your wife, who from recent letters telling how lonely the flat was without you, almost gave you the fear she was sick a-bed. You find the flat hermetically sealed when you reach home at 9 P.M., and the neighbors on the floor above, hearing your impatient knocking, inform you that 'your wife has gone to the theatre with her brother'—the only one she has lives in Florida, and you begin to have vague fears. Rather than keep the neighbors asking questions, you say you will sit on the stoop and await her return, which, as the hours go by, does not keep you in a happy condition. After smoking up all the cigars you have left from your expense account, your better half shows up in good health about 12:45 A.M., and with her Florida brother from the sands of Tampa, sure enough. Of course, it makes you hungry to hear her describe the luscious bivalves she stopped at Dorlon's to enjoy, and which occasioned her late arrival. She presents a knockout disclaimer when she says: 'You ought to have telegraphed, dear; you always did before.'"

Then No. 3 said "I can fairly match that in the following:

"Find, on arriving home unexpectedly, two days ahead of your schedule programme, that the house is all locked up so tightly that 'Nosey Gibbons,' the burglar, couldn't have effected an entrance. Then learn from neighbors that at her mother's unexpected invitation, dearest is spending a week at Asbury Park, and will be home with the baby tomorrow evening, 'which is one day before the time you said you would arrive.' You are compelled to go to a hotel to sleep that night, 'all the other places being shut up.'"

No. 4 contributed three of a kind:

"Taking a freight train to go ten miles, and save time. Have it meet with a series of unheard of mishaps, which compel it, after going half the distance, to lay up on a side track, until the passenger train which you ought to have taken dashes by with 'Empire State' velocity, and you reach your destination on the 'fast freight' one hour later. Compelled to put up at a so-called hotel close to the depot, because there is no conveyance by which you can get to the town wanted—distant two miles.

"Getting on a train at the station, at a time when the hotel opposite is just ringing the gong for supper, and you actually hungry for the first time in two days. Due at your station at 11:30, too late to get anything to eat, even if you could find anybody up except the porter.

"Getting the points of the compass so badly mixed, that having to get on one of two trains standing at the depot, you board the wrong one, and do not find how great a chump you are until you complacently hand the conductor your ticket, and he as serenely informs you 'this train goes South.' Fare, $1.20, to the next stopping place, your present train being an express. You sleep that night 130 miles away from your trunks, and swear yourself to sleep."

Then No. 5 gave us a good one.

"Arriving at a town never before visited, for the express purpose of calling on an 'old customer' who has sent no orders in some time, and you feel must have a grievance which you can explain away: you find on your arrival at the station that the town is on the other side of the river, reached only by a ferry which is quarter of a mile away. Reaching the other side you find the place you seek is at 'the village,' which a native informs you is a mile up the road; you start hopefully, find the country mile is more nearly a mile and a half, all up hill at that, and when you have arrived at the Hardware store, which you do finally, you learn the man you are in quest of has been 'out of business' some months, leaving a successor who is so infernally deaf you could not make him hear without a megaphone, to save your neck. You avoid drumming him, really for fear you would be obliged to sell him."

Then he added: "Here's a little one that occurred as recently as last week:

"Handing a dealer your card, which by the way was an artistically handsome one, and using all your eloquence to create a favorable impression, the only result of which seems to be that you create in him a hypnotic state of mental abstraction, during which he tears your card up into very small pieces, and you cannot nerve yourself to embarrass him by giving him another one."

Just at this moment the party was compelled to postpone further post prandial reminiscences by one of the boys being summoned by telephone, two Southern buyers having arrived.

HOP.

The "Oldman's" Corner.

Editor Hardware: Just back from my summer vacation, and ready to take a new hold on business. Times are much brighter, and all of us up this way are preparing for the big fall trade.

I spent a week at Martha's Vineyard. Was brought up in the Methodist church, and am even yet counted as a sort of brother-in-law in that denomination, therefore gravitated naturally to the spot where Methodists prenominate, and where Cottage City is a living monument to the enterprise and denominational power of that great church organization.

As I sat on the veranda of my hotel the other day, a good brother came up and said to me: "Oldman, don't you want to take part in a game of croquet?"

As I used to play with the children a great deal, I assented. He led me over to the edge of the town, where I expected to see a greensward covered with hoops as large as those on a barrel, and people pounding each other all over creation. Instead of this, they showed me a piece of pounded sand about the size of a billiard table, with rubber cushions around the sides and hoops about two inches apart. The balls were just large enough to squeeze through the wickets by a tight shave, and the mallets were so short that a man had to lean over and break his back to reach the ball. There was more science in the game than in any billiards ever played, and before I had made two strokes they laughed me off the ground.

The fact is, that this seemingly childish game of croquet has been developed into a real science, and must be played in a scientific manner. Among the players, I met my old friend Corbin, of New Britain, and Jennings, of Deep River, Conn. As my other friend, George Hart, of the Stanley Works, has been visiting Mr. Corbin, it is to be presumed that he has had a very lively summer. Among the adepts in this great game, whom I also met, were Mr. Rand, the map man of Chicago; Mr. Tuffts, of soda-water fountain fame, Boston, and J. S. Babcock, the well-known stationery manufacturer of New York. These "old boys" went into the game with blood in their eyes, and when they were playing it was a good time for amateurs to stand in the background and make no suggestions.

ONE ON THE GROCER.

They are telling a good story on my friend, the grocer, next door. The other day a woman came in and said: "I want two dozen hen's eggs. They must all be eggs laid by *black hens.*"

The grocer said: "Madam, I am willing to accommodate you, but you have got the best of me this time. I don't know how to tell the eggs of a black hen from those of a speckled or white one."

Said she: "I can tell the difference, mighty quick."

"If that is so, madam, will you kindly pick out the eggs for yourself?"

She did so, and when the two dozen were counted into her basket, the grocer looked at them and said suggestively: "Well, madam, it seems as though *the black hens laid all the big eggs.*"

"Yes," said she, "that's the way you tell them."

A POINTER FOR CLERKS.

I once had two clerks. Eames was getting twelve dollars a week, and Roberts fifteen. Eames asked for a raise. I told him that his services would not, as yet, justify it, and that the business could not afford it. He was not satisfied, even after I told him I would do better by him just as soon as I could.

A few days afterwards, Roberts had occasion to criticise his associate for a very apparent lack of interest in the job in hand. Eames answered, "Well, I guess I do it well enough for twelve dollars a week."

It was in that spirit his work was done. He was getting only twelve dollars, and was determined to earn no more until paid more. Roberts, on the other hand, put in his best efforts, and tried to make himself more valuable with every day that passed.

I am to-day paying Roberts $2100 per year, while I was compelled to discharge Eames at the end of his first year.

WHAT IS CONFIDENCE?

"What constitutes a return of business confidence?" asked the man on the nail keg, in my store, the other evening.

The 'Squire, some years ago, learned it all; and what he does not know, he makes up.

"Business confidence?" responded this walking cyclopedia of opinions. "It is only a general agreement among business men, to let her go!"

"For instance?" I asked.

"Just this way. Suppose I had here in my trousers pocket one thousand dollars—"

"Can we imagine that?" asked the little fellow by the stove.

"And suppose I hold on to that thousand, because I am afraid to spend it. I lack confidence you see—am afraid I won't get it back, because times are hard. After a while something happens—they pass a tariff bill, or get up a war in Africa, or I see the moon over my left shoulder—and I say to myself: I guess it will be safe to send that wad where it will be doing some good. So I take it out, and pay Bill that ten dollars I owe him—"

"Shall I write the receipt, Squire?" asked Bill.

"And then I go to Smith and order a new harness, and buy a keg of nails of Oldman here, and get a new suit of clothes, and lay in my coal. That thousand dollars gets into the arteries of trade, and circulates through the system politic, and does a lot of good. Each man who gets a portion of it feels better. He takes it, and pays some one he owes, or purchases something he needs. That's all there is to it."

"Then the whole country depends on you, does it? When do you propose to set her going, Squire?" asked the man on the nail keg.

"Fellows with your microscopic minds," answered the old man with dignity, "fail so often in their intellects, because they don't generalize. Everybody here except you, knows that I used myself only as an example. A return of confidence comes, when seven out of every ten men, the country over, say to themselves, 'Why better times are here at last!' and act accordingly. They begin to buy and to pay, and there she is. Before you know it, the whole thing is on a swing. Factories open, stores stock up, freight rushes to the railroads, wages are paid out, consumers begin to purchase, and the depression is over. That's what it is, and that is all there is to it."

I guess that, for once, the old man was right. The next drummer who strikes this store, will get an order, sure!

A. N. Oldman.

One hen is equal to an acre of land, according to the calculations of a Central Branch, Kans., farmer, who figures that whereas the ground produces in a year twenty bushels of corn, worth $2, the hen, which costs less to take care of, lays ten dozen eggs, worth $1.50.—*Stoves and Hardware Reporter.*

Nine-tenths of the whisk brooms sold and used in the United States are made from broom corn grown in Kansas. Most of the brooms are manufactured in Rochester and other eastern cities, but the raw material comes from Kansas.

A poor ad. in a good position won't sell goods. A good ad. in any old position will sell goods.—*Exchange.*

Machinery vs. Labor.

The readers of *Hardware* will bear in mind the statements recently made by Bisop Potter, of New York, in regard to the evil effects of machinery, upon the lives and fortunes of the laboring man.

The Rev. N. B. Hillis, of Chicago, takes an entirely opposite view to that expressed by the good Bishop, and in a recent sermon declared that God had given to each century some special gift, and that to this era He had given inventions. He sketched the various inventions of this century, and their practical application to the every-day affairs of the world, showing that they had brought more ease and leisure to men and women, and had had a good effect upon the manners aud morals of the community. In closing he took issue with Bishop Potter on the subject of machinery, and said:

"The eminent author and orator, Bishop Potter, has affirmed that 'labor-saving machinery is a curse to laboring men.' Once slavery was patriarchal, now it is said to be industrial; once the machine was the accident of the man; now man is the mere incident of the machine. Bishop Potter reminds us the time was when the shoemaker toiled over his last during the morning hours, spent his afternoons in the orchard and garden, his evenings at the town meetings or with the school board, his Sundays in worship and reflection and was at once workman, worshipper and student. But, analyzed, the statement that machinery is an enemy to happiness and is destroying individuality and character is misleading and, quite aside from the facts in the case, calculated to disturb the happiness of each workman and to embitter his life. So far from tools degrading men, they represent the uttermost of kindness and divine benefaction.

"There are a few ten-talent men, a few five talent men, more two-talent men, while most represent one-talent. Now, in an age when civilization has become complex and highly organized, the great multitudes representing one talent are in danger of falling out of the race. The strong and wise advanced so swiftly that the one-talent man could not keep up; nor was he able to work with sufficient rapidity to hold his place.

"Now, in the interest of this one-talent man, inventors were raised up to create tools. To make a modern shoe requires sixty different workmen. From these sixty different tasks the one-talent workman selects something he can do, and, doing that one thing, he too becomes a creator, retains his self-respect by being a producer, and where, without tools, he would have been heartbroken, with his tools he stands upon his own feet and makes his own contribution to our civilization.

"God gave the tool as an act of uttermost tenderness and kindness. Search all modern life through and there shall not be found one single element that represents a form of ministry to the weak and the poor that is so beneficient as the fact that machinery hath so divided a toil as to enable the humblest man to become a self-supporting worker and have his own place in civilized life.

"And when the tool has made a place for the one-talent man through nine hours of toil, it goes on to give him four times the wages his father enjoyed, by means of which he purchases a newspaper, the book, the picture, the ride to the park or lake or into the country—influences that redeem him from drudgery and obscurity and make him the child of variety and growth.

"Doing with one's might what one's hand finds to do is the sole secret of happiness, and he who uses his toil to further the happiness of others is said to have a partnership in God's plan. Side by side with the thinker in color and stone stands the thinker in poem, in oration, and law; stands the thinker in wood and iron, in stone and steel; and happy indeed shall our world be when once again men shall that Watt and Stephenson march side by side with Shakespeare and Milton, and that equal honor attaches to artisan and artist. For in God's providence the working classes are to achieve their progress by means of tools. Machines are to make the deserted fields of Europe productive again for starving peasants. Tools are to save what is now wasted to make poor men to be rich. Tools are to redeem men out of poverty and cold.

"Within the next century, it is believed, tools are to make the school and college as free and open for young men and maidens as public schools are now for boys and girls. Machinery is to increase intelligence and refinement, to put comforts and conveniences with instruments of beauty with those now called the poor and the weak. Through machinery, wealth, that now like snow sometimes comes together in drifts, is to be diffused and scattered evenly over the land. Tools are to become the almoner of universal bounty toward the church, the school, the library, the gallery, the Christian home."

How to Gain Success.

Editor Hardware: There are many young men of to-day, yes, and old men, too, for that matter, who seem to think that the chief thing their employers keep them for, is to put in time, a sort of bric-a-brac as it were. That is, they get to work early in the morning, on time, perhaps, watch the clock all day, and are among the first to leave the place at night. Many times they leave a little piece of work for the next day that would have taken but a few moments to finish. Of course, they pat themselves on the back and try to square things by saying they are not paid for overtime, but when the time arrives when they think they should be getting a raise in salary, they find the employer generally looks to their worth to him and not to the length of service. If the young man of to-day would have success, he must come as near as his position will allow him to being his employer's right-hand man. His desire must be to please. He must study to make his employer feel that he is a necessity from a personal as well as from a business standpoint.

As an apprentice or office-boy, he must be among the first at the office in the morning, and the last to leave it at night. He should learn all he can of the business, show himself willing and anxious to please all above him, improve himself mentally, try not to forget what has once been shown him, and, whenever called upon to do anything not to his especial liking, which he will be many times, do it cheerfully.

When in a higher position, he should study his employer's interests. Try and find the short cuts, don't be wasteful, take a little responsibility upon his own shoulders sometimes, let his employer see and feel that he can trust him in matters of business that require mental as well as physical ability. Don't be a machine. If he studies his employer's interests, there will be no fear but that his will be taken care of by the employer.

There is one thing that might be well to consider in reference to the foregoing, as to what success is. Success doesn't necessarily signify the accumulation of great riches. Many a man who has been born rich, has been anything but a success in life. Success means more than this. It signifies the ability to make and hold a position in this life, with the power to command an income sufficient to support oneself and home with all the necessities, and with a feeling of security as to whatever might happen, barring ill-health or death. In any case always live within your income. Many a young man has lost both good name and friends, as well as elegant opportunities, through getting into debt. W. A. M.

Alfred D. Clinch, of Underhill, Clinch & Co , New York, has been spending his vacation on the borders of Deal Lake, Asbury Park.

The Early History of Cast Iron Pipe.

Cast iron was known to Holland in the thirteenth century, and stoves were cast at Elass in 1400. But tradition has it, which an ancient Roman writer records, that the temple of the "Great Mother," at Sparta, is said to have been built by Theodorus, who first discovered the art of casting and making statues in iron. As with the metal itself, so its discovery in the form of cast iron was an accident which occurred at one of the early iron works in the Rhine Provinces, where a part of the "running" one day was found to be of different texture, and it was a problem for some time what to do with the strange stuff.

The first blast furnaces appeared in the Thuringian Mountains, which were almost identical in principle with the present furnaces, with the exception that hand or tread mill bellows were used for the blast, from which the present mechanical blowers are an evolution. In 1377 the first cast-iron gun was cast in Erfurt, and the famous Krupp was casting guns in 1818, so that it appears iron was mostly used for destructive and not Samaritan purposes through many centuries of its history. In 1685 the first cast-iron pipes were used for the water service of Versailles, followed by screwed and flanged pipes. In 1708 the Quaker, Darby, patented the system of box casting, and in the following year started the famous Coalbrookdale foundry, which in 1780 turned out the first cast-iron bridge. The first casting in the United States is said to have been made at Lynn, Mass.—a cast-iron pot, which was exhibited at the World's Fair at Chicago.

In the region of Alba Longa, buried by the volcanic eruption which drove the Albans to the present site of Rome, no trace of iron is found, and its absence is still notable in the archaic tombs of Rome. The metal for their implements, of whatever kind, was of bronze, and the early Roman religious sentiment shows such an abhorrence of iron as to make it a profane innovation to use it in almost any form, especially in and around their sacred temples. This superstition continued after the Christian era, even down to fall of the Empire. In their religious rites, if iron had in any way approached a temple or shrine, sacrifices were instituted to expiate the profanation, so that we can hardly wonder that their attention was not turned to it as a substitute for lead pipe. When iron tools came to be used for engraving, and were so employed on altar inscriptions, penitential sacrifices were afterwards offered by slaying a cow or a sheep on the altar. Bronze ploughs were used long after the introduction of iron ploughs. The high priests of Rome would not shave or have the hair cut with iron instruments.

The first mention of iron pipes was in an elaborate system built at Marli, near Paris, and set to work in 1682. The account says: "They drew the water by short suction pipes from the river Seine, and forced it through iron pipes up the hill. They climbed to a height of 533 feet by a series of reservoirs and pumps, but this system came to be known as a 'monument of ignorance,'" probably after cast iron established confidence as a pressure pipe. Agricola makes no mention of cast iron pipes, although he shows three-legged pots of cast iron. Ranselli, about the same period, describes a hand mill of a portable character, whose casing, he says, is made of iron, and its form and ornamentation are such that there is little doubt it was made of cast iron.

Peter Maurice, a German engineer, in 1582 erected, under the arches of London Bridge, sixteen pumps, 7 inches in diameter and 30 inches stroke, driven by a water wheel, and these were of cast iron, flanged at their lower end, bolted to a valve chest.

In 1835 it was estimated that over 1000 miles of iron pipe were in use in the various systems of London waterworks, the first iron pipes having been laid in 1746. Later on we find that cast-iron pipes, 9 feet in length and 15 inches in diameter, with ball and socket flexible joints, were laid by James Watt across the Clyde for the conveyance of water to Glasgow, and another of the same size in 1818, and a little later on another of similar construction of 36 inches diameter.—*Mechanical World.*

The Rubber Man's Vacation.

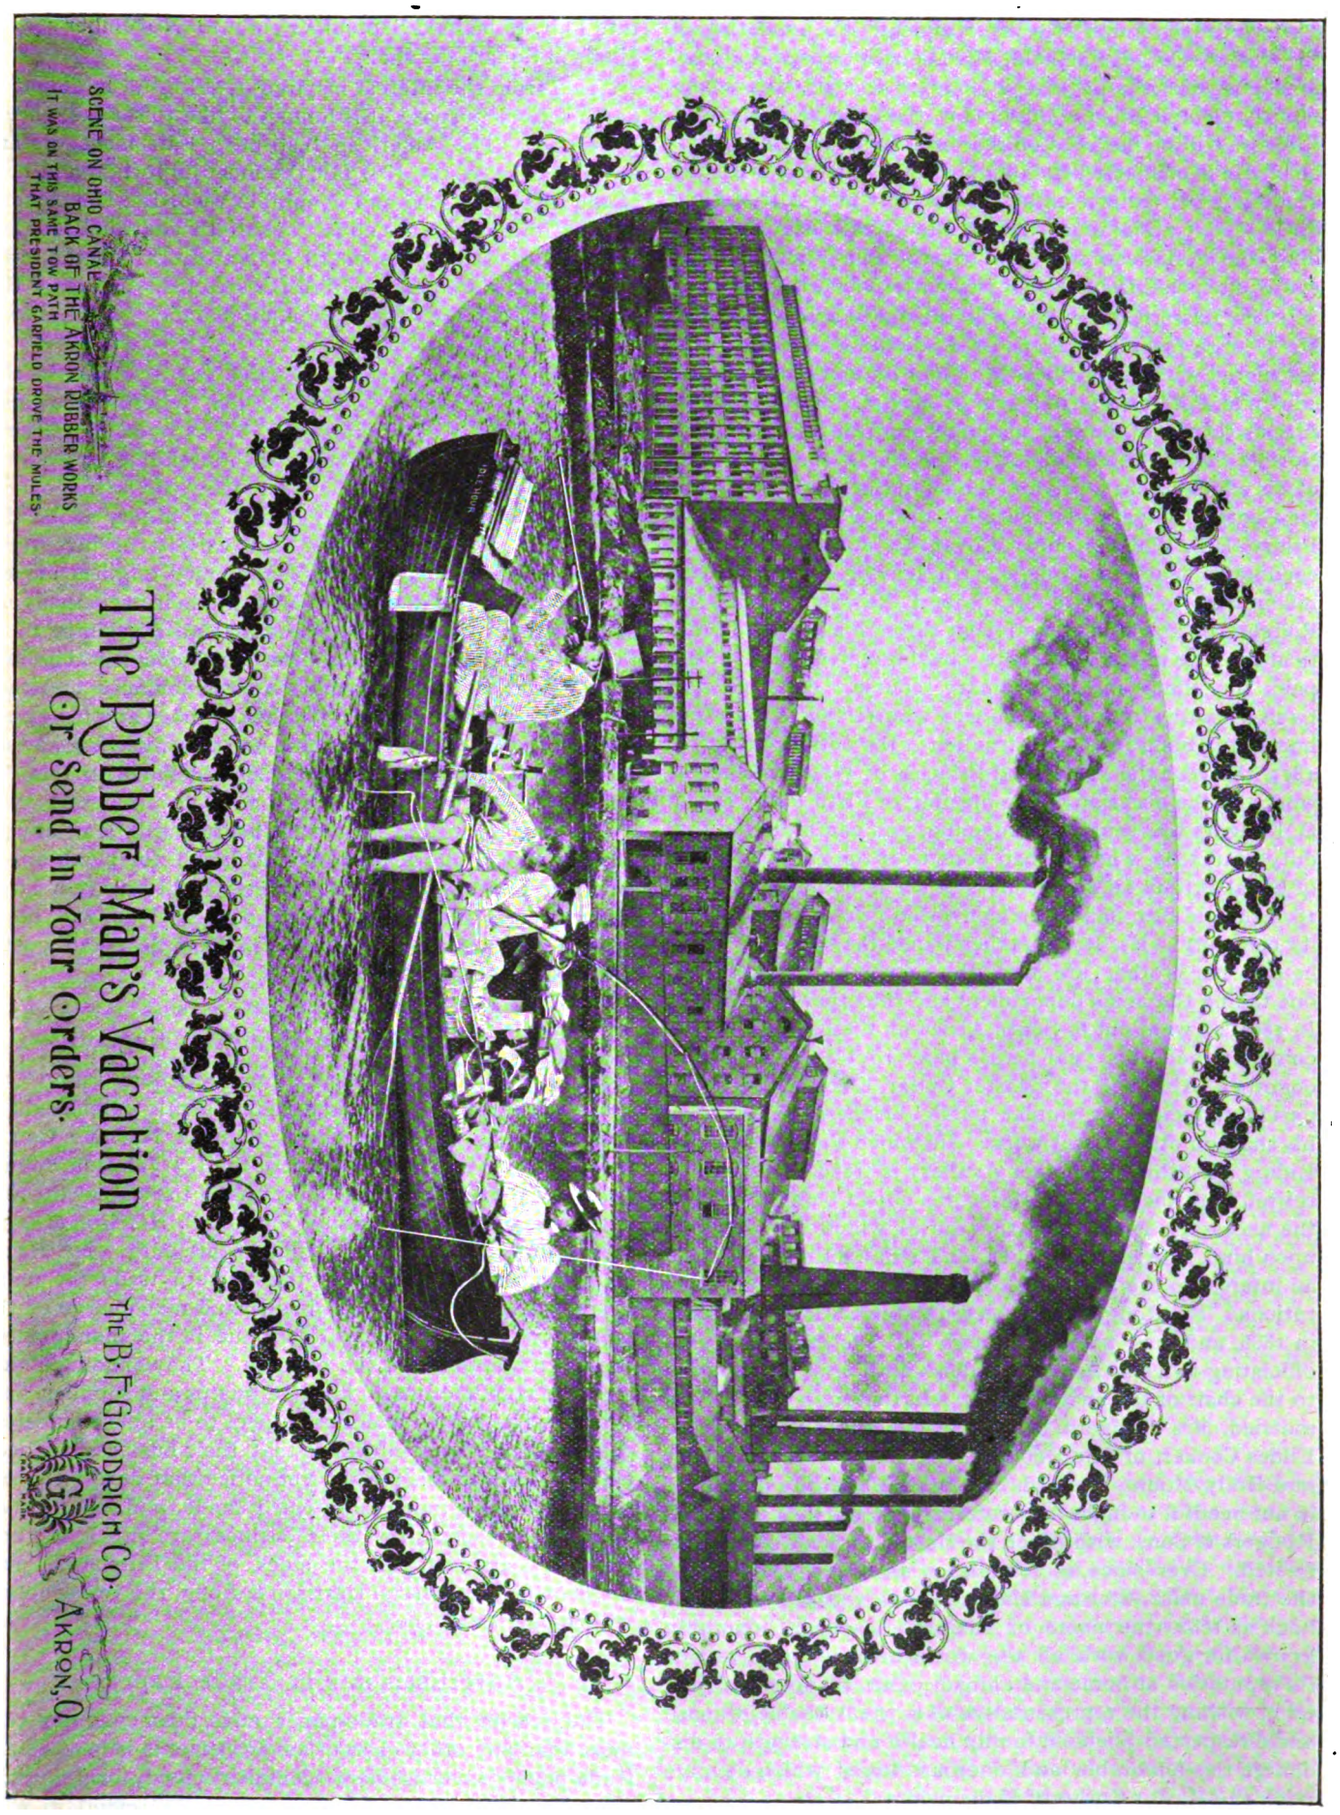
They must be having pleasant times out in Ohio. Down in the busy city of Akron there is a raging volume of water, known to history as the Ohio canal. On one of its banks stands the busy and prosperous concern known everywhere as the B. F. Goodrich Co. Usually all of the employes and officers of this company are so busy in putting forth goods, and hauling in dollars, that they have no time for sport of any kind—not even for politics, which is usually the dearest delight of the Ohio man.

But there comes a time when even a rubber man must have a vacation. Does he hie away to the mountains or the seashore, as do other men, or lose himself in the wilderness of the Northwestern lakes? Judging from a handsome specimen of art work, which to-day occupies a position of honor behind the editor's desk, the rubber man cannot stretch his business conscience sufficientlv to go out of sight of the works, and so he takes his vacation at home.

The scene to which we refer, combines business and pleasure to a remarkable degree. With the busy works of the Rubber Co. as a background, and the waves of the raging canal in the foreground, we have an adjunct in the shape of the "Idle Hour," a small boat which contains about as varied an assortment of interests and diversions as one craft could well carry.

In the way of live stock, Messrs. W. A. Clarke and R. C. Masten of the advertising department are the principal attractions, while a jaunty female stenographer and an errand boy are carried—for ballast. Sandwiched in here and there are ledgers, order books, typewriter, waste basket, correspondence, fishing-poles, guns, etc., and the necessity for dry docking is precluded by ample perishable freight in the form of champagne, cigars, etc.

While the distribution of this handsome photograph will of course aid in the sale of goods, their chief mission is to show that the Ohio rubber man is able to enjoy his vacation, and at the same time keep an eye upon his works. The only question that will trouble other manufacturers, in these hard times, is, "Where in the world did any man make a sufficient raise to buy champagne?"



This charming rubber-nautical scene is shown, in all its beauty, on the opposite page.

Old Metal From Cuba.

It is stated by the New York *Journal of Commerce* that the importation of old metal from Cuba has recently assumed quite large proportions. The destruction of so many plantations, distilleries, and other works throughout the island containing machinery made of brass and copper, accounts for these heavy consignments of old metal. One firm alone, the Nassau Smelting & Refining Works, of New York, claim to have purchased so far this season about $500,000 in old metals from Cuba, principally brass and copper. Even 30,000 pounds of old church bells were bought the other day by this concern. If it were not for the duty imposed on old iron, it is said the quantities that could be brought from this island would prove to what extent destruction has been carried on during the war. Notwithstanding the duty that has to be paid on this old brass and copper, it pays to import them, and prompt sales are said to be quite the usual thing.

It is said that the division of labor has been carried to such an extent, that in some cases seventy workmen handle one knife in the course of its manufacture. This does not include the man who borrows it from you, and forgets to bring it back.

Elected Master Cutler.

We learn from the Sheffield (England) *Daily Telegraph* of August 4th, of a high honor in the cutlery trade, being conferred upon a most worthy recipient. At a meeting of the Cutlery Co., of Sheffield, Mr. Maurice George Rodgers, managing director of Joseph Rodgers & Sons, was unanimously elected Master Cutler for the ensuing year. Mr. Rodgers will be installed on the first Thursday in September. He is connected in a high official capacity with the great and well-known cutlery house of which Alfred Field & Co., No. 93 Chambers Street, New York, have been so long the American representatives. The Sheffield *Telegraph*, in speaking of the master cutler-elect, says:

"The Master Cutler Elect is the eldest son of the late Mr. George Joseph Rodgers, of Endcliffe Crescent, and is associated with his brother, Mr. John Rodgers, in the well-known and old-established firm of Messrs. Joseph Rodgers & Sons (Limited), cutlery manufacturers and silversmiths, Norfolk Street, Sheffield. After receiving the rudiments of his education at a private school in Sheffield, Mr. Maurice George Rodgers went with his brother to the school at Priory Hill, Wolston, near Coventry, subsequently proceeding to Malvern College. On leaving college he was indentured to the late Mr. Robert Newbold, of Messrs. Rodgers' establishment, and went through a course of practical training in the workshops, making knives and getting paid for them in the ordinary course. After serving twelve months in this way he was transferred to the warehouse, to obtain further instruction in the cutlery craft. In 1875, the year the Prince and Princess of Wales visited the works on the occasion of the opening of Firth Park, Mr. M G. Rodgers was sent out traveling, and continued at that duty until 1886, when he had gone over the greater portion of Great Britain on the business of the famous 'No. 6.' In 1870 the old firm had been converted into a limited liability company. Mr. Rodgers then joined the board, of which he and his brother are now the managing directors, the one taking the home department and the other the foreign. In 1891 he went out to South Africa on the business of the company, and this year he has paid a return visit to that country. Although the Master Cutler Elect has taken no part in municipal or similar public business, he has done his share in other useful work. He joined the Fourth West Riding Yorkshire Volunteer Artillery in 1879, and has just retired with the rank of Major, his object being to obtain the necessary leisure for the duties which now devolve upon him. He has also taken, and still continues to take, an interest in the Sheffield Royal Hospital and other institutions. Mr. Rodgers was elected to the Cutlers' Company in 1886, and has passed through the successive stages—officiating twice as Senior Warden—until now he succeeds to the chair of the ancient guild. In the same year he was married, Mrs. Rodgers being the daughter of Mr. Thos. Fildes Cooker, of The Rookery, Broomhall Park, Sheffield, and Holly Mount, Retford. In the Hallamshire district it is not needful to make any reference to the firm of Joseph Rodgers & Sons, with which the Master Cutler Elect is connected. Ever since its foundation, over 200 years ago—the trade mark, Star and Maltese Cross, was granted as far back as 1682—the name of Rodgers has been honorably known for good work all the world over, and still retains its reputation at home and abroad. Our readers will join us in wishing the representative of a great Sheffield house and a respected Sheffield family health and strength to discharge the honorable and onerous duties which devolve upon the Master Cutler of Hallamshire."

At Coggins' mill, near Sisson, Cal., the loggers cut a tree a short time ago which was 404 years of age. It was eight feet in diameter, and produced 15,000 feet of lumber.—*Exchange.*

Machinery in Motion.

Process and product; machinery in motion will probably prove the most popular phase of the 1897 American Institute Fair, to be held September 20th to November 4th, at Madison Square garden.

Aside from the interest inspired by a higher intelligence and a serious purpose, it is human to like to see the wheels go round. The American Institute's Fair managers are striving to make the 1897 fair the most important and best in the Institute's long and honorable record. The American Institute is verging on its seventieth year, but judging from the hustling the board of managers and the fair's general superintendent, Alfred Chasseaurd, are doing, the Institute is like Dr. Oliver Wendell Holmes said he was, "seventy years young."

General Superintendent Chasseaud has an office in the tower of the Madison Square Garden, where he is busy with the details of organizing a big show and arranging the location and extent of space with intending exhibitors.

Of all departments of the 1897 fair, the management earnestly desires that of engines and machinery to be the strongest. It embraces the vast variety of inventions which include as main features stationary engines moved by steam, gas, water or wind, and all their accompanying contrivances, pumping machinery and all pertaining to it, including steam fire engines, iron and wood working machinery and tools, textile and paper machinery and that used for the manufacture of leather, rubber and for grinding and crushing mineral, grain and spices, gearing and all elements of moving machinery are included in this department.

The 1897 fair of the American Institute will be of unusual value to exhibitors, providing, as it will, forty exhibition days and features of unusual interest will ensure a large attendance. The Flower Show adjunct alone will be in several respects the most beautiful, complete and costly ever held in the United States.

An Advance in Pump Making.

M. C. Harrison, President of the Pittsburg Pump Co., and T. E. Long, the secretary, have recently purchased the entire plant of the Columbiania Pump & Machine Co., of Columbiania, Ohio, and also that of the J. J. Johnson Foundry Co., of the same place. They intend to conduct the new enterprise as the Columbiania Pump Co., Harrison & Long proprietors, with their main office in Pittsburg. Mr. Harrison, who has had charge of the Eastern trade for many years, will remove to Columbiania and take charge of the factory, while Mr. Long will continue in the management of the Pittsburg end of the concern. They announce that they will manufacture all kinds of pumps and supplies, and, with their increased facilities, expect to be able to meet all competition. They inform us that their business has been very good so far this season, yet notice that during the last month, sales are much more easily made, and, taking it all in all, the prospects for their business are much brighter than for years past. As the stock of the Pittsburg Pump Co. is owned by Messrs. Harrison & Long, the two concerns will co-operate as one.

Advertisements in Trade Papers.

The reason that trade-paper advertisements are read more than any other class of advertisements is because the trade-paper advertisement contains money-bringing information, and everybody in trade is interested in what everybody else in the same trade has to say to the public, and the trade paper advertisement is the cheapest, easiest and most sensible method for the man who makes and sells anything to tell the man who buys that something, that he has the article to sell.—*Roller Mill.*

Topical Western Mention.

Editor Hardware: An enterprising Cleveland newspaper started out to interview the local Hardware manufacturers as to the conditions of trade now developing. In every instance the reports were of a sanguine nature. These reports are no mere gab, for they come from men who are eminently capable of diagnozing the business situation, and iron still being King at Cleveland, they cover the entire business situation thoroughly.

The coal strike is somewhat hampering operations, and as the prices of fuel are going up, the cost of manufacture will necessarily increase. But the strike is not doing the trade any injury. It will rather have the opposite effect. Stocks are now being rapidly cleared up, and by the time the strike is settled, which will prospectively be two weeks hence, autumnal movements will be on "full head," and then our dealers and manufacturers will get the benefit of the reaction. The dilatory behavior of the market at present is in no way connected with, or will influence, the business situation which will develop in the latter part of September. There isn't a dealer but who has the fullest confidence in the near future, and this confidence is not based on intangible reasonings either.

AS TO WHEELS.

The chainless bicycle bugaboo doesn't scare worth a cent, and an idiot is he who gave out the report that the present demoralization of prices is due to the advent of that novelty. Remnant prices always rule at this season of the year, and where some manufacturers make sacrifices now, they do it in anticipation of a big cycle trade in 1898, which to share in it needs a lot of ready capital and room to accommodate.

IN THE SOUTH.

Reports from the South are certainly of a reassuring nature. The South is rejuvenating, is the verdict of all close observers. The wholesome influences of the new tariff are apparent everywhere. The agricultural situation has never been so bright. Nothing lacks animation but the whisky industry, and that will speedily mend under the impetus of the generally improving conditions. A new commodity, cigar leaf, has been added to Southern agricultural interests since the Cuban exclusion act, and very important it promises to become. Here's what some Southern dealers have to say:

Bruce Keener, C. M. Clung & Co., Knoxville: "We are certainly on the eve of a great trade revival in the South, which alone is evidenced by the ardent interest shown lately in our affairs by our Cincinnati competitors. When Cincinnati is looking over the situation before we get ready to move, you may rest assured that they are scenting business."

Col. W. W. Woodruff, W. W. Woodruff & Co., Knoxville: "There is every indication of a good fall trade, and a continued streak of prosperity. The South is in advance of the movement for better times."

A. D. Langstaff, Langstaff Hardware Co., Memphis: "This town may be bankrupt, but Southern business is showing a healthier tone now than for years. We are undoubtedly pacing towards good times."

Major Edward Buford, Buford Bros., Nashville: "We can say that conditions are better now than for a long time since. The Southern farmer is encouraged by these conditions, and lines that lacked interest for years will soon boom. Agricultural implements will be greatly benefitted, and so will the vehicle industry of the West and North. Carriage factors of Columbus and Cincinnati have already been looking over the ground preparatory to sharing in the liberal investments which will be made in the South and Southwest from this time forth."

O. B. Barker, B. B. & J. Hardware Co., Lynchburg: "The evidences of better business are everywhere, and while movements are still dilatory, we rely on a good fall trade and look for normal conditions by next spring."

M. L. Ott, Ott Bros., Wheeling: "We are glad the miners of the State did not join the strikers, for the greatly increased activity in the mines of the State has brought us a lot of business. The situation on the whole is good, and we are actually experiencing the effects of the better times now."

Lee Richardson, Lee Richardson & Co., Vicksburg: "The Mississippi region is regaining its old thrift and industry, and crops and times have been so favorable that we may look for a healthy trade henceforth. The farmers throughout the South are modernizing their implements and are liberal buyers in the market otherwise."

Col. B. F. Eshleman, Stauffer, Eshleman & Co., New Orleans: "Business is greatly improved, and the demand from the interior shows that better times are actually come."

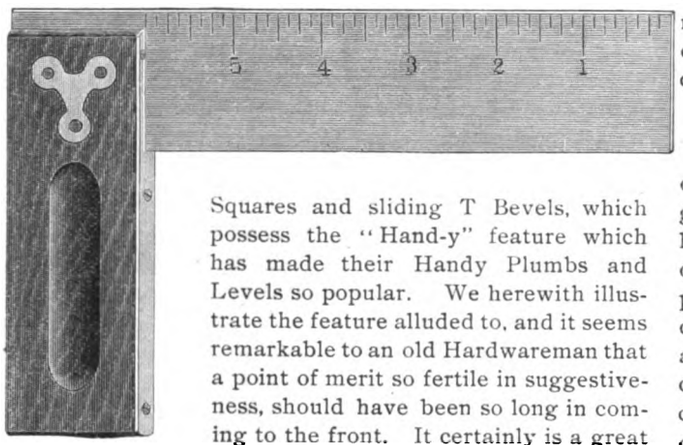
J. B. RINDFLEISCH.

Holding Customers.

In a paper entitled "How to Get and Hold Customers," read by S. Bricker, of Listowell, Ont., at the annual meeting of the Ontario Hardware Association, he said: "The business man who looks at delivering his goods and getting his money as the only thing which is related to each transaction, has a very important lesson to learn. No doubt, there are some who differ with me in this particular, and say: Business is business, and friendship forms no part of it. Admitting that it is all business, and that the customer gets value equal to his money, his future patronage is nevertheless to be considered and solicited, apart from his money. Between the two we may not be able to make the distinction very quickly; but there is a distinction, nevertheless; and he who has carefully studied the philosophy of trade can readily define it. A customer's money is only a matter of the moment, and has reference to a particular transaction. His patronage, his good will, his influence, however, are of paramount importance, for which we should be willing to forego very much that he may be retained with the house. A customer who buys but one bill is not profitable except to the extent of his purchase. When we get a chance to sell to a party one bill we are in duty bound to our business to treat him so well that when he leaves us he will say: 'When I require anything more in this line I will buy it from this man.' Since we are so inevitably dependent upon each other, and necessarily helpers of each other, it would be very unwise, and almost certain ruin, for a merchant to establish the rule that he will do just as he pleases, and not solicit the good will or favor of any one. Ability to satisfy a customer with your goods will induce him to buy; politeness and honest treatment will induce him to buy again."

The "Steel Age."

The "bronze age" of antiquity has gone, the "iron age" of the nineteenth century is waning, but the "steel age" is in the growth of vigorous childhood. All the steel works in the Midlands are in full activity, and day by day there is an increasing volume of evidence to the effect that for almost all purposes steel is superseding iron by leaps and bounds. Steel tubes are very wonderfully to the fore, and steel plate for bridge, girder and boiler work are almost always specified in contracts by engineers, who until recently preferred best Staffordshire iron to anything under the sun. If South Staffordshire is to maintain the reputation which it has held since the days of Dud Dudley, it must reorganize its iron mills and forges and produce steel in every variety of shape and size to meet the growing requirements of the day.—*Ironmongery.*



HARDWARE costs only One Dollar a year.

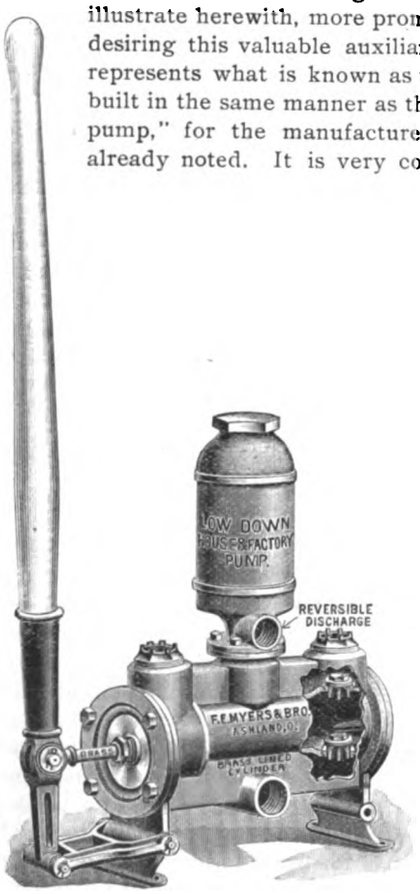
NEW GOODS AND SPECIALTIES.

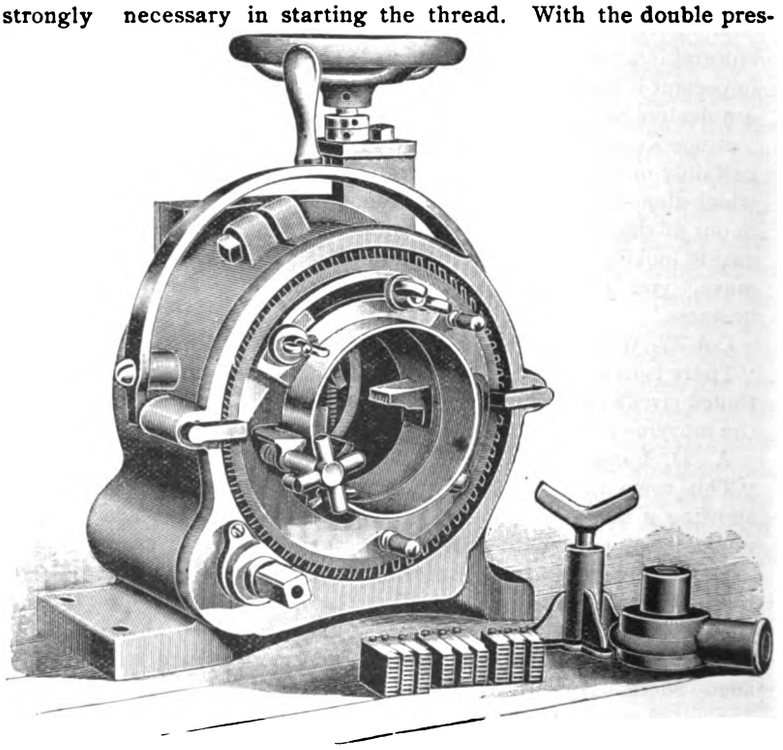
"Handy" Try Squares and T Bevels.



The Stanley Rule & Level Co., New Britain, Conn., and No. 29 Chambers Street, New York, are manufacturing Try

Squares and sliding T Bevels, which possess the "Hand-y" feature which has made their Handy Plumbs and Levels so popular. We herewith illustrate the feature alluded to, and it seems remarkable to an old Hardwareman that a point of merit so fertile in suggestiveness, should have been so long in coming to the front. It certainly is a great convenience and must eventually supersede the old fashioned shape, when the improvement becomes thoroughly well known to practical mechanics.

Myers Low Down Double-Acting Force Pump.



F. E. Myers & Bro. Ashland, Ohio, to whose new and complete catalogue we gave an extended notice in a recent issue, have recently made improvements that will bring their Low Down Double-Acting Force Pump which we illustrate herewith, more prominently before those desiring this valuable auxiliary. The illustration represents what is known as their Fig. 724, being built in the same manner as their "low down tank pump," for the manufacture of which they are already noted. It is very compact and strongly

constructed, has brass lined cylinder, metal valves and 13-16 inch brass piston rod, with large stuffing box. The openings are exceptionally large in order to permit a free passage of the water. As the pump is double acting it takes and discharges water on either stroke of the lever. It is designed for use in the basement of a house for the purpose of forcing water into an elevated tank, or drawing water from springs and forcing the same to a higher elevation. This makes it a very valuable acquisition to factories, mills or warehouses and it will also be found very convenient on board of vessels. It is sent out fitted for pipe, but can be furnished with hose connections, when so ordered.

Improved Forbes Patent Die Stock.

Curtis & Curtis, Bridgeport, Conn., are manufacturers of the Forbes Patent Die Stock, an illustration of which is given in this column. This machine, which is the No. 44 hand machine as at present constructed, having a range of one to four inches, right and left, embodies a series of important improvements which have been added in each succeeding year, until it stands at present as nearly perfect as a piece of mechanism could expect to be made. The machine is too well known to the pipe fitters throughout the country to require a general description, so we will confine ourselves to the improvements which have recently been added to it. These machines have been manufactured since 1882, and like all machines that are up to date they have constantly been improved from time to time. Among the most recent improvements is the double pressure bar. Formerly the pressure feed pressed on the die carrying gear in only one place. This worked well as long as the machine was new and the gear a close fit in the shell. But experience soon taught that after the gear became worn, the pressure of the feed coming in only one place on its surface would tend to tip the gear slightly which would, consequently, prevent the dies from tracking and thus produce a "drunken" thread. Especially was this the case when the dies became dull and considerable pressure was necessary in starting the thread. With the double pres-

sure system, shown in the illustration, the pressure applied at two points on the face of the gear, and opposite each other, prevents the gear from tipping no matter how strong the pressure or how large the gear may be in the shell. Another change which the firm considers very important,

Digitized by Google

is the adjustable shell. The great trouble with all machines made in this style, viz: "A die carrying gear surrounded and supported by a casing" is, that sooner or later the gear will wear itself loose, it being immaterial whether the gear teeth bear on the inside of the casing or not; thus making a loose fit and rendering the machine useless. Heretofore when this occurred, it was necessary to supply either a new shell or a new gear, either of which was expensive. On all sizes of their machines they now put an adjusting screw on the shells shown in the cut, with which any wear can be taken up and the gear always kept a good working fit in the shell. This they consider very important as it greatly increases the life of the machine. This adjustment can also be applied to old machines, making it possible to repair them at much less expense than formerly. Messrs. Curtis & Curtis have covered these improvements with patents which will amply protect them from the imitations on the market of their design of machines.

Line of Safety.*

BY NATH'L C. FOWLER, JR., DOCTOR OF PUBLICITY.

In progress there is originality.

In originality there is progress.

No new thing was ever built by a wholly conservative builder.

No new thing was ever built by a wholly original builder.

Success in business is neither in over-originality, nor in over-conservatism.

The monument of success is made of equal parts of conservatism and progressive originality.

The fool can be original.

The fool can be conservative.

It is the wise man who uses both of these successful elements, so mixing them that the good of each enhances the value of the other, and the bad in each dissolves by the bad in the other.

The writer recalls the days of military discipline, when he served both in and out of the ranks.

He remembers the always cheery order, "Order arms; in place, rest!"

Then every man did as he pleased; he could talk, he could laugh, he could reach out with his arms, but one foot must be on the line, and stay on the line, so that when the order came, "Attention!" every soldier had but to draw a part of himself into position, for part of himself was already in position.

There is a lesson here for business men.

Keep on the line of safety.

Branch out with your arms.

Reach into the visionary sky of experiment.

But keep one foot on the line of conservative success, so that there cannot be total failure everywhere, and one can draw the unsuccessful part back to the successful part when discretion calls a halt.

Boardman's "Congress" Pattern.

Among the new and handsome designs in the line of flat silver plated ware, few surpass in artistic symmetry and gracefulness of outline, the "Congress," recently placed upon the market by Luther Boardman & Son, East Haddam, Conn. These goods have a base possessing full 18 per cent. nickel silver, and are extra heavily plated with pure silver, the goods being all hand burnished. This old manufacturing firm was established in 1840, and it may safely be said there is no Hardware firm in the United States, but what at some time or other, has handled some of its unrivalled productions.

Push and industry, spiced with confidence, is the best remedy for trade depression.—*Exchange.*

*Copyright, 1897, by Nath'l C. Fowler, Jr.

Points of Business Law.

A seller retaining the right to elect to take the goods remaining unsold by the merchant is not the owner of same till after he has made such election.

Where a contract provides for payment in instalments, recovery of the full price can not be had in an action brought when the first instalment only is due.

One who signs a lease as surety, at the same time with the other parties, and without any conditions, is liable for the rent, though he never occupies the premises.

A carrier is liable, in the absence of statutory law to the contrary, until notice to the consignee of the arrival of the goods, and reasonable time to inspect and remove them.

A note without grace, made payable at a bank, and placed there for collection, may be sued on after banking hours of the day it falls due, if such hours are known to the maker.

An employe, on engaging in business for himself, may advertise himself as late of the firm by which he was employed, the sign not being painted so as to mislead the public.

Where one buys goods, knowing the sale is in fraud of creditors, and mingles them with his own, and refuses to point them out, the seller's creditors can levy on enough of the mixed goods to equal those of the seller.—*China, Lamps and Glass.*

Inventions vs. Industries.

Sir Henry Bessemer and Sir William Siemens have been reproached with inventing and introducing processes that have practically ruined the manufactured iron industry of the United Kingdom, says an English exchange. To a large extent this has no doubt been the case. The production of wrought iron during the last fifteen years has dropped from two and three-quarters to one and one-fifth million tons, while the production of steel has more than doubled. But even this movement, revolutionary and disastrous as it has been, has not been unattended with its compensations. The basic process of steel making is now largely carried on by the aid of puddler's tap, which would otherwise have been a waste product, but which is now eagerly bought by the basic steel manufacturers at 5s to 6s per ton. It is usual to employ from 50 to 70 per cent. of puddler's tap per ton of basic iron produced in the blast furnace. This substance usually contains from 45 to 55 per cent. of iron, and from 3 to 6 per cent. of phosphorous, and it is the latter metalloid, otherwise not only useless but deleterious, that chiefly makes the product valuable. It is the presence of the large reserves of puddlers tap in Staffordshire, etc., that has enabled the pig iron trade in these districts to keep alive.

Nothing Like Persistency.

In 1864, "Jim" Knibbs, as we all called him then—and perhaps now—engineer of a steam fire engine at Troy, N. Y., patented a relief valve, a run-around we always called it, for pumps. The design of this was to, in quick-running pumps, permit some of the water to pass around from the pump cylinder into the suction, relieving the parts from unnatural shocks and jars, and possible breakage. Knibbs, so far as I know, never made anything of consequence from his patent. The city of New York, so it was claimed, infringed Knibbs' patent, and in 1877 suit was begun against the city. A decision has just been rendered awarding the patentee damages to the extent of $818,074.32. The patentee had, however, assigned his claims. It is a rather remarkable instance of following up a patent case that had never seemed to amount to very much.—*Tradesman.*

The Bank of England employes about 1,100 men and has a salary list, including pensions, of about $1,500,000 per annum.—*Exchange.*

RECENT TRADE PUBLICATIONS

The Union Metallic Cartridge Co., of No. 313 Broadway, New York, and Bridgeport, Conn., have prepared a work which must find the greatest favor with sportsmen in this country and Canada, as it combines in a very compact manner, capable of being carried in the pocket, the game laws of the United States and Canada. The title and title page of this little work are as follows:

The Game ....Laws

OF THE

UNITED STATES AND CANADA

A compilation of the Gunning Laws, with special reference to seasons, and other provisions and restrictions in force in the various States and Territories of the United States and the Provinces of Canada,

INCLUDING ALL 1897 LEGISLATION

EXCLUSIVELY ISSUED AND COPYRIGHTED

BY

THE UNION METALLIC CARTRIDGE CO.

BRIDGEPORT, CONN

..1897..

It contains 80 pages, and any sportsman who wishes to shoot or fish anywhere between Maine and the Yellowstone Park, or Manitoba to New Brunswick, can discover at a glance just what game he may kill, and when he may kill it. He will also discover what he cannot kill, and the cost or penalty for violation of the law in any section. A glance through the work furnishes some interesting information as to the extent of the ground which has been so carefully covered. Some of the points we note, are unlawful possession of game, boundaries, close season, the killing of game for export, gunning methods, laws applying to residents and non-residents, chasing of game with dogs, wild cat bounties, the laws relating to guides, etc., etc. The Union Metallic Cartridge Co. have shown great enterprise in preparing this work. That it has been with them a labor of love, is evidenced by the fact that they will take pleasure in sending free a copy of these game laws to any reader of *Hardware*, who will indicate a desire for same.

W. S. Adams, No. 180 High Street, Holyoke, Mass., has just issued a directory of American manufacturers of heating and cooking apparatus which also contains a list of stove foundries in the United States, also a list of stoves, ranges and furnaces, and by whom manufactured, and information for ordering repairs. This is the first edition of a publication, the want of which, corrected up to date, has been severely felt by the trade for some time, on account of the annually increasing number of names representing the recent product of stove foundries, together with the data connected with the extensive list of others previously popular which is here given having reference to the latest editions of the manufacturers' catalogues, in which these names appear. It is a volume of 240 pages, well printed on good paper, and neatly bound in cloth, and is not encumbered with the usual every-other-page advertising so prominent a feature in publications of a similar character. The directory is provided with a good index, referring to the detailed information regarding the manufacturers. The list of stoves, ranges and furnaces under their respective names, is indexed alphabetically with an abbreviation denoting the particular style of stove, etc., which is known by the name noted, and opposite is given the name of the manufacturer; the information wanted is obtained at a glance, with no reference to some other part of the work. There is no stove dealer in the country, wholesale or retail, but would find this volume of great convenience on too many occasions in the course of business. The price at which it is published is $1.50.

The Bureau of American Republics, Washington, D. C., has in an advanced stage of preparation a commercial directory of the American Republics, and the European dependencies in Central and South America, and the West Indies. The volume will be a handsome quarto, nine by twelve inches, of over twelve hundred pages, and will embrace, in its contents, the following information:

1. Reliable descriptive, geographical, industrial, commercial and statistical data and map of each country.
2. The addresses and lines of business of the commercial houses of Latin America and the Hawaiian islands.
3. The names of five thousand or more representative manufacturers, merchants, shippers and bankers of the United States, interested in foreign trade, classified under proper headings.
4. The names of the trade and commercial organizations, associations and unions of the countries embraced in the International Union of American Republics.
5. Valuable data of transportation companies, and trade routes by land and water; railway, telegraph and cable facilities, and particulars as to shipping, port regulations, tariffs and custom laws, patent, trade-mark and copyright laws, and commercial licences, passports and postal regulations.

The above information it is stated has been secured from the most reliable sources, with a view to accuracy and completeness, and the Bureau feels assured it will meet the specific requirements of all lines having and seeking foreign trade. To all who apply, specimen pages and subscription blanks will be forwarded.

Charles Morrill, No. 35 Warren Street, New York, has just issued his new catalogue for 1897 covering the line of important specialties associated with that well-known name. Among these valuable tools, etc., will be found Morrill's "Perfect" Saw Set, which in its assortment now includes, with many improved features, Nos. 1, 10, 11 and

Digitized by Google

95, replacing the old Nos. ½ and 1, which were so well established with the trade. Morrill's saw sets Nos. 3 and 4, are intended for cross cut and circular saws, No. 4 being used especially on Champion and M tooth saws. No. 5 saw sets are 15 inches in length and are designed for use on timber and board saws, the size of the saw in circumference making no difference. Included in its pages are Morrill's Perfected Bench Stop Nos. 1 and 2, and Universal punch Nos. 1 and 2 for hand work, which is claimed to be the most complete punching instrument before the trade, successfully punching any thickness, from tissue to ¼ inch, of leather, rubber, paper, pasteboard, cloth, celluloid, veneering, etc., and also thin, soft sheet metal, punching holes from 1-16 to 5-16 inch. The No. 2 metal punches are used largely by electricians, tinsmiths and other sheet metal workers, and can be made to punch holes varying from ⅛ to 5-16 inch in either copper, brass, iron or steel. The Perfect cutting pliers, shown in the catalogue, are in two sizes, Nos. 2 and 3; they are recommended as being a superior article, with cutting jaws capable of cutting piano wire. All parts being interchangeable can be replaced at small expense. Mr. Morrill also manufactures car sealers, which are known as lead seal presses, and made in two sizes, Nos. 1 and 2, carrying respectively a plane surface of 9-16 and 3-16 of an inch. They are used by express companies and shippers of sealed merchandise.

The Lufkin Rule Co., Saginaw, Mich., with New York office at No. 290 Stewart Building, have sent us a copy of their complete catalogue just issued. They state that they have very largely increased their line, and are "now making what we think is the most complete and largest line of measuring tapes in the market." The book is finely printed and bound in heavy cardboard binding, and lettered with gold. It contains a complete list of their measuring tapes, rules, marking sticks, lumber markers, glass boards, etc. The illustrations are finely printed, and the prices are given upon each article. It is, in short, a complete compendium of rules and tapes, and some idea of the value of its contents may be found from the following index, which appears in this work, which will be sent on application: Steel tapes, reliable; steel tapes, Paine pattern, leather case; steel tapes, Paine pattern, with frame; steel tapes, Rival; steel tapes, pocket; metallic tapes, flush handle; metallic tapes, folding handle; linen tapes sterling; ass skin tapes; patent leather tapes; bend leather tapes; steel rules folding pocket; steel rules folding; steel rules, surveyors; steel rules straight; steel yard measures; steel counter rules; steel rules, metric; magic pattern rules; tinners' rules; circumference rule; steel board rules; hickory board rules; hickory log rules; log tables, comparisons of; log calipers; cotton calipers; marking sticks, lumber gauges; boot calks; calk sets and punches; glass boards; glaziers' rules.

The George Tritch Hardware Co., Denver, Col., are distributing to their customers their 1897 and 1898 catalogue of stoves and store Hardware; a copy has just been received, and an inspection of its contents gives an excellent idea of the large stock of such goods which the above firm carry constantly in stock. The stoves alone in this catalogue represent the production of thirteen different factories, which enables the company to select just such styles as will be found desirable by their patrons. The catalogue of 150 pages, bound in cloth, is printed in two colors on excellent paper, ornamental designs forming the top and bottom of every page. Its varied contents include every description of stove, from the ordinary "Globe" stove, in which any kind of coal can be used, to the more elaborate "Radiant Home" parlor heater, and double oven steel ranges, weighing over 2500 pounds. All the complete outfit necessary for a first-class hotel is pictured on its pages—sand ovens, steam tables, carving tables, portable broilers, roasting ovens, gas heated cake griddles, etc. The "Royal" line of oil cooking stoves are largely in evidence, as well as oil lamp stoves and oil heaters. All the necessary furniture for the kitchen or household is catalogued and illustrated, including roasters and bakers, coal hods, stove boards, shovels and elbows, registers, etc., making as complete a catalogue of such goods as any dealer in this especial line would need to select his winter stock from.

Edw. K. Tryon, Jr. & Co., Nos. 10 and 12 N. Sixth Street, Philadelphia, Pa., have issued a complete catalogue of their firearms, and everything connected therewith. It contains 114 pages, each one of which is 9x12 inches in size. It would be an impossibility to attempt an enumeration of any portion of the goods which they handle, as one whole page of very small type is taken up with the general index alone. There does not seem to be anything connected with guns, revolvers, ammunition, clothing for hunters or fishers, bicyclists, or sporting goods of any character, which any could possibly want that is not found herein. The work has been carefully prepared, and everything is arranged so conveniently, that the character and price of any one article desired, can be understood at a glance. This enterprising house never do anything by halves, and this fact has been carried out in connection with this catalogue.

The Campbell Cutlery Co., Syracuse, N. Y., are distributing a folding card catalogue of their practical sliding display trays which conveys full information in regard to their undoubted merits, and several fac simile letters from customers who express the highest satisfaction at the attractive display they make when placed in position and filled with cutlery. When it is stated that a show case only 10 inches high, takes 5 patent loop trays high, or 3 framed trays high, in each door of show case; and about same proportion up to 30 inch high cases taking 15 patent loop trays high in each show case door, or 6 or more framed trays high, the popularity they have attained may readily be understood by dealers; as a very limited stock of cutlery, by comparison with any other method, can make the most attractive display imaginable and with much less necessity for handling to make a sale under any circumstances.

The Simmons Hardware Co., of St. Louis, Mo., have issued a catalogue for the season of 1897-98 of their lamp department. It is a very handsome publication, containing 218 pages, fully illustrated, many of the illustrations being shown in colors. It would be difficult to get together a larger collection of handsome lamps, than are here shown, and the artistic work is first class in every respect, the finished shadings upon the globes and lamp shades being shown in the utmost detail.

Vapor Stove Men

The annual meeting of the Vapor Stove Manufacturers Association, which was announced to be held in Cleveland, Ohio, on August 3rd, adjourned to Little Mountain, which is a most delightful spot a few miles from Painesville, Ohio. The members combined business and pleasure in choice quantities, and elected the following officers for the ensuing year:

President, Isaac Kinsey, Dayton Mfg. Co.

Vice-President, D. E. Dangler, Dangler Stove & Mfg. Co.

Commissioner, F. L. Alcott, Standard Lighting Co.

At the same place and time, there was a meeting of the United Vapor Stove Manufacturers Association. The following officers were chosen for the ensuing year:

President, Paul Schneider, Schneider & Trenkamp Co.

Vice-President, O. P. Moon, National Vapor Stove & Mfg. Co.

Commissioner, F. L. Alcott.

A Maine man, who earns 90 cents a day, has nine children and five dogs, is saving up to buy a bicycle.—*Ex.*

Progress of Iron.

In an old book the other day, writes "Vulcan" in *Ironmonger*, I came across some figures which, when placed in comparison with those of the current period, strikingly illustrate the progress of the English and Scotch iron trades during the past hundred years or so. In 1740 the production of pig iron in England was 17,350 tons, in 1788, 61,300 tons; in 1796, 108,793 tons; in 1806, 250,000 tons; in 1820, 386,000 tons; in 1827, 654,000 tons, and in 1845, 1,250,000 tons. The average production per furnace per week was only 5 tons 13 cwt. in 1740, 15 tons 6 cwt. in 1788, 47 tons 6 cwt. in 1827, and 100 tons in 1845.

The first furnaces erected in Scotland were those put up at Carron in 1767. In 1786 furnaces were constructed at Clyde and Wilsontoun, in 1790 at Omoa, Muirkirk, and Devon. In 1825 the Monkland works were erected, in 1830 Gartsherrie, and in 1834 the Dundyvom works. In October, 1845, statistics showed that there were 106 furnaces in existence in Scotland, eighty-five being in blast, and twenty-five more were being built or in contemplation. The production in Scotland of pig iron had grown from 7000 tons in 1788 to 280,000 in 1843, and 400,000 tons in 1845.

Of the furnaces enumerated as being in existence in 1845 many are now in the limbo of forgotten things, or are, at all events, no longer in operation. Where now, for instance, are the Garscube, Omoa, Wilsontoun, Cessnock, Househill and Devon works? On the other hand, several of the furnaces which were famous in 1845 are still to the fore—as, for instance, Gartsherrie (which had then fifteen furnaces in blast out of a total of sixteen), Carnbroe, Langloan, Glengarnock and Carron. The hot blast process of Neilson, it should be remembered, was only patented in 1828, and was not in general use before about 1833.

The enormous development of the iron and steel trades during the past half-century may be inferred from the following statistics showing the make of pig iron in 1844: Great Britain, 1,500,00; France, 350,000; Russia, 320,000; Germany, 150,000; Austria, 100,000; Belgium, 150,000; Sweden, 30,000; other parts of Europe, 50,000; total, 2,700,000 tons. The United States is not mentioned at all, nor are Spain, Canada and Italy; whereas now the United States alone produces some 8,000,000 tons per annum, and the production of the world is probably some 30,000,000 tons per annum. The figures are almost startling as a record of what has been done in fifty years.

America Ahead.

"American builders' Hardware has just taken a fall out of the English article," says Orville Ewing, manager of a big local concern. "Some months ago an old Scotch captain dropped into my office and asked to see hinges, etc. He said he was building a house at Dunoon, Scotland, and that his wife had taken such a fancy to the American made locks and hinges on his steamer that she wanted to take them off and put them in the new house. To save his ship, the captain had promised to bring back the American article on his next trip, and he soon selected a quantity of building Hardware of different kinds.

"That was last fall; but a couple of days ago the captain made me a second visit and brought with him the plans of his handsome residence and selected Hardware fittings for every part of the building from the parlor to the coalhouse. He said that the articles he had previously carried with him were extravagantly admired by all who saw them, and that it was impossible to secure anything approaching them in style and finished in England. With that, the fittings in question were of the quality generally put into New Orleans houses erected at a cost of two or three thousand dollars." The captain in question is Capt John Simpson, of the steamer *Inch Marie*, now loading grain at the Stuyvesant Docks.—*New Orleans, Times-Democrat.*

Review of the Markets.

The presence in our city of so many buyers from all over the country, while not affecting to any large extent the Hardware industry, leaves still an air of strength and vitality in business circles that makes our merchants appear smiling and contented to wait patiently until our delegation arrives next month with their volume of wants. The orders coming in from the boys on the road and those sent out by the jobbers, are of a character and variety to prove that a general overhauling of stocks will be a feature this fall, freshening up the general stock and disposing of old shop keepers without much regard for anything except to get rid of them Improved tools are again made a subject for inquiry and will be found among the sales at a later day. The large sales already made of farm machinery, indicate the use that will be made of surplus money when the prosperous conditions of the workers—be they farmers or mechanics—leave a little leeway beyond the requirements of the day, and an encouraging prospect for continued employment can be seen ahead.

The Builders' Hardware trade, there is every reason to believe, will be greatly stimulated this fall; conditions favorable to an increased demand are becoming evident in many directions. The markets for general Hardware are being watched closely by the buyers, and much further stiffening of prices will cause a movement to "cover the shorts."

Wire Nails: The market on wire nails has received the benefit of a sustained inquiry, and quite a number of orders for delivery within 30 days. The market has visibly strengthened under the influence of this state of affairs, and the low quotations lately obtainable have all been withdrawn. The continuance of strike conditions is beginning to be felt, as the probable scarcity of coal and naturally advanced prices of its by-products are apprehended. Orders for future delivery beyond September are not obtainable, as the mills are confident that present quotations cannot be maintained much longer. We quote for carload lots at mill, $1.30; carload loads on dock, New York, $1.45; smaller lots from store, $1.55@$1.60, according to quantity.

Cut Nails: Following in the wake of the firmer movement in wire nails, the cut nail product is improving, demand being better and prices firmer. We quote as an extreme price for carload lots at mill, $1.20 base, New York prices being: Carload lots on dock, $1.30; smaller lots from store, $1.40.

Carriage and Machine Bolts, etc.: The advance recently of about 10 per cent. on stove and tire bolts and Eagle carriage bolts has had a good effect on the market for these goods, which is firmer in tone than for some time. It is thought the heavier grade of bolts, such as machine bolts, coach and lag screws, etc., the prices of which have been so long in an unsettled condition, will soon be made the subject of some agreement that will materially affect the price.

Linseed Oil: A number of advances have been made since our last issue; the Dean Linseed Oil Co., under date of August 21, quote as follows: In lots of less than 5 barrels, 42 cents per gallon; in lots of 5 barrels or more, 41 cents per gallon, Boiled linseed oil, 2 cents per gallon higher. Calcutta oil, 54 cents per gallon. Above prices are subject to change without notice.

THE DAVENPORT TRADE.

The immediate result of the passage of the tariff bill is a settled condition of business. Whether we approve or disapprove of the law as it now stands, we recognize the fact that it is the law, and will continue as such for at least four or five years to come, and that we must direct our business plans accordingly.

It is impossible to write of the effect this change will

Digitized by Google

have, or is having, on the welfare of our locality, without seeming to be politically biased. *Hardware* does not permit political discussion in its columns, and being a national trade paper, it should not do so; but when we note that our factories are all running, "that have long been standing still;" that the people who have been for many years standing on the street corners seeking work, have obtained it; that, having obtained an opportunity to earn money, they are earning it; having money, they are spending it—they are living better and hence have increased the demand for farm prodects; the increased demand has advanced prices; receiving higher prices has given the farmer more money, with which he is paying his debts, repairing his buildings or fences or making new. When we note that confidence and trust have taken the place of distrust among our capitalists, our own sales increasing, our margin of profit widening, and collections improving, we fear your readers will conclude we are prejudiced in favor of the change which has given such an impetus to business and has added so much to the commercial prosperity of this locality.

SICKELS, PRESTON & NUTTING CO.

THE BOSTON TRADE.

It is certainly encouraging to learn the widespread reports from our Western friends of revival in the demand for merchandise and other products, the actual increase being such as to demand general recognition.

From newspaper reports, we learn in many Western cities buyers are more numerous than in years past, bringing such statements of the situation at their homes as to warrant heavy purchases. We congratulate our friends in the West upon this state of affairs, but we cannot say that the boom has reached the jobbing center of New England. However, such reports are welcome signs, and business conditions throughout the country seem to be on the mend. Although it cannot be said that there is any immediate prospect of an incoming tide of prosperity, yet the outlook is certainly flattering, and the coming year promises to eclipse its predecessor.

The farmer is getting higher prices, and the condition of crops throughout the world is favorable to our own producer. Good crops, higher prices, increased demand in the West, mean busy factories and a prosperous time for the East.

Since the close of our spring trade, the tariff question has been settled, and what effect it will have on the general business is still problematical. There is no doubt that certain great industries will be stimulated by the protectionist character of the measure, and we hope this will more than balance certain objectionable features which have already become evident. The mere fact that for the next four years we have the assurance that we are to be free from tariff changes is an impetus to business, and we trust that before we have any more tariff reforms we shall have a reform in tariff making. FRYE, PHIPPS & CO.

THE PHILADELPHIA TRADE.

The regular fall trade may now be considered as under way, and the encouraging reports which are received from many parts of the country tend to a greater feeling of hopefulness, and it is very noticeable that this hope is not confined to any set of men or section of country. All hope to share in the general prospect and good times, which we now feel are coming.

How far the "new" tariff is responsible for this state of affairs we cannot say, but we know that the feeling of confidence which comes from a settlement of the question has been a great blessing, and is now greatly helping the situation. As far as prices are concerned, the "new" tariff has had but little direct effect, excepting in cutlery, where, in some cases, the advance has been quite heavy.

Dealers, as usual, protest greatly against these new prices, and the hardest kind of pressure is brought to bear to induce jobbers to sell at old prices, which, of course, cannot be done, as a jobber can purchase only on "new" tariff prices and must sell his goods accordingly.

It always takes a little time for the market to right itself under such conditions, but it will doubtless settle down to fixed values in the course of a few weeks.

In some lines trade has been increased by the "special" inducements offered by the Philadelphia Trades League for merchants' excursions from various parts of the country to Philadelphia. This circular sets forth that Philadelphia is the greatest manufacturing city in the country, and that buyers who visit other cities are frequently only buying Philadelphia goods at second-hand. It is said that over four thousand excursionists arrived on the first of these excursions, and that dry goods houses especially report a large amount of business in consequence.

Hardwaremen, as a rule, are not greatly given to travel —perhaps because our goods are staple and not subject to the caprices of fashion, and so this cause does not apply very much to the Hardware lines.

The natural increase of business, however, in the fall, is having its effect on orders, which are larger in volume and more numerous.

As for prices, the market shows a little change, although there are many indications that nails will be higher before this writing sees the light.

Collections are improving, and, on the whole, the outlook is decidedly better. BIDDLE HARDWARE CO.

THE OMAHA TRADE.

August trade up to the present time shows a material increase over the corresponding period of a year ago, and the generally improved feeling both among merchants and consumers, argues even better for future business than the present figures show.

In the territory tributary to this market, conditions have not been as favorable for a prosperous year's business since 1892. Produce of all kinds is bringing good returns to the producer, and the yield has never been excelled and seldom equalled.

The new tariff law will have no material effect on business in this locality. The fact of the contemplated change did not induce any advance buying, and the improved trade conditions appear to be due mainly to local causes, although the advance in the price of produce is due to general conditions and not local ones.

RECTOR & WILHELMY CO.

THE PITTSBURG TRADE.

We have to report a very fair volume of business for this time of year, although while conditions still continue favorable and the prospects are seemingly as bright as ever, the increase is hardly as marked as was hoped for.

Traveling men report their trade as feeling very hopeful, but not yet ready to place orders in excess of their immediate wants. Everyone seems to be keenly on the alert to capture the long expected orders, and the result is a competition which divides the benefits and tends to keep prices at their present low level.

There is, however, some evidence of an advance in the iron market which should have a bracing effect.

While the passage of the tariff bill has not directly affected to any great extent the principal industries of this section, with the possible exception of glass and pottery manufactures, it has helped to restore confidence by the assurance that the agitation on this subject is now over for some time at least.

Most of the mills are running full time, and during the present month a number of those that have been previously wholly or partially idle have resumed operations or increased their working hours.

So far as stimulating trade by influencing the merchant to buy in the hope of anticipating the advance which must

Digitized by Google

soon be felt in some items, notably cutlery and firearms, very little effect is noticeable.

The local conditions are, moreover, decidedly unfavorable to immediate improvement. The long continuance of the coal strike cannot but exert a depressing effect. Its influence is felt both in the fact that its continuance for a short time longer will probably result in the shutting down or at best the curtailing of the operations of a number of manufacturers, on account of a lack of fuel, as well as by the almost complete stagnation of country trade in the mining districts. Possibly this stagnation is responsible for most of the deficiency in the expected improvement, and the very fair amount of business doing in spite of such adverse conditions should be regarded as encouraging, indicating that only the bettering of local conditions is necessary to produce a satisfactory volume of trade.

At the present writing there seems to be no indication of an early settlement of the strike, but since matters have been taken into the courts, it may be that one or other of the parties will be put in such a position that they will be compelled, in self defense, to make concessions that will lead to an adjustment of the present difficulties. On whichever side our sympathies may be enlisted, we cannot but wish for an early ending of the strike and an arrangement whereby steady work may be secured to the miners at wages which will be a just remuneration for the labor performed, and at the same time, fair to the operator.

When this disturbing element is removed, we may confidently predict, in view of the present conditions, a much better business for this vicinity this fall than a year ago.

LOGAN-GREGG HARDWARE CO.

THE CLEVELAND TRADE.

For some time trade in this section has been in such a condition that it seems almost useless to make any report of it. Quiet has reigned, and hand-to-mouth buying, which has characterized the past two or three years, has continued without change. We are glad, however, to be able to chronicle a very much better state of feeling at the present time, but regret that thus far it is only a state of feeling. As a matter of fact, the purchases are not much more liberal than they have been in the past. Buyers are timid, fearing that the advances that are now promised them will fail to materialize, just as they have done in the past.

In taking this view, we think that they are mistaken, as we have a basis of prosperity now that has not existed for several years back.

We are building upon a solid foundation. The products of the ground are bounteous and are being sold for good prices. The benefit of this good price is being derived by the producer, and not by the speculator. Of this great community, probably the farmers are in better shape finnacially, than they have been for years.

It is unreasonable to suppose that large results will show in the Hardware trade during the fall, as the class of goods sold by Hardwaremen is of a character where improvements enter into the matter. As the winter is now very near at hand, it is difficult to carry out these improvements before cold weather overtakes the workers. We feel quite sure that the spring of 1898 will show a remarkable activity, and that we shall commence to reap the rewards of patient watching and waiting, through which we have passed during the past four years.

In this review of the conditions we are, of course, governed largely by local coloring, yet, if we may believe what we hear, the same conditions that exist in our vicinity, are prevalent all over the country.

The first sign of an improvement came in the nature of an advance on the staples, wire and nails, which will have gone into effect before this communication reaches you.

We think that this is the opening gun, and that the advance thus made may be considered a legitimate one brought about by the laws of demand and supply. Even at the slight advance that has been made the value is still very low, and an increase in price considerably beyond the present market can be obtained without the slightest hardship to the consumer.

Let us hope that all values will be established upon a fair basis, that our manufacturers will be successful enough to avoid overproduction, unnecessary extension of their works, and all the other evils peculiar to the American people.

We have certainly been taught some very severe lessons during the past four years, and a return of caution at this time, when prosperity seems to be at our very door, is not out of place. Rigid economy in business administration and personal living, which has been compelled by necessity for some time back, should be continued in order to avoid a repetition of the disastrous times just passed.

This advice is probably not necessary to those who have summered and wintered many years, but it may be taken to heart by the younger members of the trade who will probably be the ones to become lax and practice extravagance with prosperous times.

THE MCINTOSH-HUNTINGTON CO.

THE COLUMBUS TRADE.

Trade is quiet, as it always is this time in the year. Several of our people are taking their annual vacation, and only a part of our salesmen are on the road: We can say, however, that mail orders are fully up to former years in July and August, and trade up to August shows a very satisfactory increase over 1896, and if there is any virtue in signs, we will surely have a very satisfactory fall trade. We can see nothing in the near future to prevent it. Farmers had an abundant crop of grass, wheat and oats, and the prospect for corn was never better. Prices are certainly good when the price of manufactured and other merchandise is considered. Wheat is selling at 80 to 85 cents; corn, 25 to 30 cents per bushel; hay, $6 to $6.50 per ton. These prices are paid by the local buyer, so the farmer is at but little expense in getting his products to market. In fact, everything the farmer has to sell is a better price than a year ago. Cattle, hogs and sheep are higher. Wool is at least 50 per cent. higher. With good crops and good prices we must have good trade.

The new tariff will help the farmers in this community on hay and wool. It is a well-known fact that in years gone by Ohio was close to the Banner State as a wool producer. Wool was one of the best, if not the most profitable products of the farm, but when the Wilson bill was passed it virtually killed the sheep industry. Now it is looking up again, and sheep begin to act and look as though they were worth something more than mutton. The lambs seem to wiggle their tails more gleefully, and the old buck dares you to get over the fence. Our factories are in better shape than for a long time, and we hear of but few complaints. Most of them are well supplied with orders. The King, Gilbert & Warner Co. have completed their new furnace, and you can see a red glow in the heavens over their extensive plant every night. The Columbus Buggy Co. have reorganized, and are running full time with a force of about 350 hands. The Halwood Cash Register Co. cannot keep up with their orders, and are increasing their facilities from month to month.

The railroads are doing a good business in passenger traffic and farm products, also manufactured goods, but the roads that have to depend on the coal trade (and we have several) are doing but little. Their passenger business is not heavy in the southern part of the State, and when the mines are not in operation they have but little merchandise to haul, and now scarcely any coal. The side tracks are lined with empty coal cars awaiting a settlement of the big strike, which does not seem to be near

Digitized by Google

at hand. We have not talked with a single Ohio coal operator who is not in sympathy with the strikers, and would be glad to pay the price asked by the miners if the Pennsylvania operators would do the same. We find it makes a big difference in our business, as the Hocking territory is good territory for Columbus. Prices are showing an upward tendency. Nails are higher than they were the first of the month. Wire is $1 per ton higher. Glass is five per cent. higher. In fact, a number of articles are bringing better prices.

The writer returned from his fishing trip, and has the 125 pound fish with him. I caught a number during my trip, but the one I brought home with me is the only one I cared to keep. It was a very lucky catch and I am perfectly satisfied. I confess I am surprised that the bait lured such a prize. But you can't always account for a woman's tastes. I must correct an impression that must have been made by the notice in your valuable journal July 20th. The article stated that I was the senior member of the firm. Now that is a gross libel. I am the only boy in the firm; my brother is older and has less hair on his head than I. I think the last time we counted I had a gross more hairs than he had. The secretary and treasurer of the firm are both well along in years (nearly as far along as myself). If I die with old age, they can make their wills, because they will have to follow very soon. I wanted to have the matter corrected, as I don't want my friends to think I am growing old; I would especially dislike to have my wife find it out.

THE SMITH BROS. HARDWARE CO.
J. H. Smith.

THE CHICAGO TRADE.

The new tariff law does not materially affect many lines of goods which we carry, for the reason that of late years most of the Hardware, tin-plate and cutlery is manufactured in this country. We note some changes in table and pocket cutlery, chains, plyers and other small German Hardware, measuring tapes, guns and sheep shears. But what is contributing more towards a revival of business in Chicago at the present time, and helping our salesmen wonderfully, is the high prices being paid for wheat, corn, cattle, provisions and hay.

Very often on other occasions advances have been made that elevator men and speculators have reaped the advantages of, but at this time the farmers of the country are receiving the high prices for crops, that are most bountiful.

In the cities, investors have had their stocks and bonds appreciated largely, so that the entire Western country seems to be in a very prosperous condition; money is plenty, and we are receiving liberal orders for both present and future delivery.

In the past two weeks we note advances that have been made in carriage bolts, sheet steel, sheet iron, tire bolts, stove bolts, coil chain, halter chain, stamped and retinned pans, and understand more are to follow.

As soon as the corn crop is past the danger from frost, we expect the retail Hardware dealer will be ready to purchase his fall and winter requirements in large quantities, and, as a matter of fact, we believe present prospects indicate that purchases of goods in the Hardware line will prove very satisfactory, even if stocks have to be carried a long ways in the future.

Goods were never so cheap, never so well made, and the purchasing power of the country never so great.

Our salesmen are busy, hopeful and happy.

WELLS & NELLEGAR CO.

The toothpicks of orange wood, which come from Japan, are made by hand. It is said that Japanese workman can whittle from twelve to twenty dozen a day.—*Exchange.*

The Ancient Hardware Dealer.

From the statements made by a contemporaneous archæologist, the stocks of mechanics' tools and even of some housefurnishing goods carried by the Hardware dealers of ancient Pompeii and Herculaneum, if such stores existed, did not differ so widely from those of to-day. On looking at the iron tools grouped together in an old factory there, this man, Professor Goodman, says he could almost imagine he was gazing into a modern tool shop, except for the fact that there was a coating of rust on the iron. Sickles, bill hooks, rakes, forks, axes, spades, blacksmith's tongs, hammers, soldering irons, planes, shovels, etc., are much like those used to-day. Incredible as it may appear, the Pompeiians had wire ropes of perfect construction. Their bronzes reveal great skill and artistic talent. The bronze brazier and kitchener had boilers at the side, and taps for running off the hot water. Ewers and urns have been discovered with interior tubes and furnaces precisely like the arrangement now in vogue in steam boilers. Metal safes had substantial locks. Many of the locks and keys are most ingenious, and some very complex.—*Industrial World.*

An Effective Call.

A Hardware "drummer" who put up for the night at the leading hotel in a small town, had, before retiring, left explicit instructions to be called for an early train. He was very earnest about the matter, and threatened the clerk with all manner of punishment if that duty was neglected. Early in the morning the guest was disturbed by a lively tatoo upon the door. "Well?" he demanded sleepily. "I've got an important message for you," replied the bell-boy. The guest was up in an instant, opened the door and received from the boy a large envelope. He tore open the envelope hastily, and inside found a slip of paper on which was written in large letters: "Why don't you get up?" He got up.—*Home Magazine.*

According to the traditions of the Greeks, the first discovery of iron by the human race was made on Mount Ida, by the tribe called Dactyles. It is said that the forest was set on fire by lightning, and so intense was the heat of the great masses of fallen trees that the bed of iron beneath was melted and trickled in small streams down into the valley.

The yearly consumption of sugar in the United States is about 2,000,000 tons, or 4,000,000,000 pounds, which is equivalent to about sixty pounds to every man, woman and child in the country. The quantity of salt consumed is about 1,900,000 tons, or 2,000,000 pounds less than the weight of the sugar used.

With the assistance of the latest machines a piece of leather can be transformed into a pair of boots in thirty-four minutes, in which time it passes through the hands of sixty-three people, and through fifteen machines.

If the armies of Europe should march at an eight-mile gait, five abreast, fifteen inches apart, it would require nine and one-half days for them to pass a given point.—*Exchange.*

Only seventy years have elapsed since the first railway in the world was finished. During that comparatively brief period 400,000 miles have been constructed.

In each eye of the common house fly there are about 4,000 facets. They are so minute that they can only be detected under the microscope.—*Exchange.*

In 1883 Japan had only eighty-three factories with machinery. Ten years later their number was 1163.

Some Stoves of the Past.

Recently our genial and efficient postmaster at Riegelsville, G. W. Fackenthall, Esq., presented several artistic cast iron stove plates to the local geologist, Charles Laubach, of Durham, to be placed in the Museum of Archæology and Paleontology, connected with the University of Pennsylvania, Philadelphia.

The plates are profusely embellished and bear the date 1785, cast by Richard Backhouse, Durham, who was proprietor of the Durham furnace from 1779 until his death in the winter of 1792–'93. The earliest patterns of stoves cast here dated 1741, was the so-called Adam and Eve pattern. This stove was designed by its inventor to instruct, as well as to supply comfort when the chilly blasts of winter reigned supreme. It was of box shape, about two feet square, without side or oven doors, having merely an opening in front to supply it with fuel, and a hole on top for the exit of smoke. Stove pipes were seldom used on this pattern of stove. The sides of the stove had the date 1741 inscribed in raised characters, surrounded with fine scroll work; above this on the side plates were raised figures representing Adam and Eve, the serpent, several trees and animals in the background, the whole embellishment being of an interesting nature.

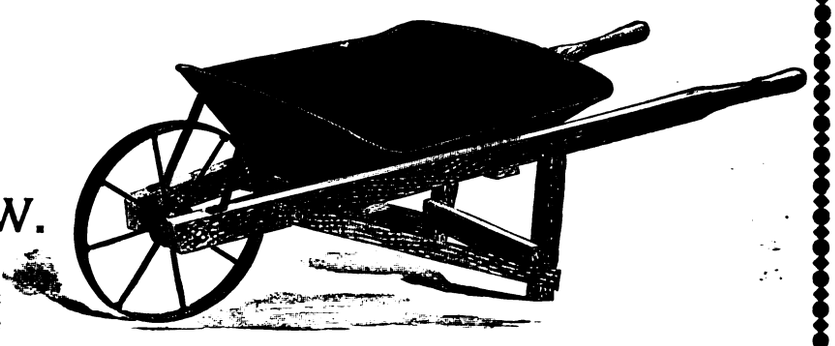
The pattern (1742) was in use but a short time, as in 1745 Dr. Franklin invented the famous Franklin stove, which, owing to the prominence of its inventor, was universally adopted and extensively maaufactured at Durham until the furnace blew out in 1792. Various improvements were made upon the Franklin stoves, by the various manufactures, especially in the embellishing line.

In 1756 many stoves with Swedish inscriptions and copious ornamentation were cast at the furnace and the New Jersey forges connected with the Durham furnace. In 1774, George Taylor, the signer, had a model of a stove constructed with the inscription, "Durham Furnace, 1774," thereon. This inscription was surrounded with a wreath of fine scroll work. In 1789 Captain Valentine Eckert had a pattern of a stove manufactured embellished with an eagle bearing a wreath, on which was the motto, "E Pluribus Unum." In 1790, Mr. Pettibine, of Philadelphia, patented a stove designed for heating large buildings. Thus we find that the stove, as everything else, gradually evolved from a lower to a higher plane, and at present has attained an ornamental and useful status.—*Doylestown, Pa., Democrat.*

How Emery is Quarried.

Co-operators may be pleased to know that among the few trades of the world in the hands of the laborers is that of the emery quarryman. Emery comes from the Island of Naxos in the Eastern Mediterranean, whence it has been exported for the last two centuries or more. The beds are in the northeast of the island, the deposits decending into some of the neighboring islands, the emery being found in lenticular masses. resting on layers of schist in limestone, almost identical with Parian marble, the finest marble known, which comes from the Island of Paros close by.

There are about three hundred men engaged in the trade, all of whom have to be married before they are admitted to the fraternity. The material is much too hard to be dug out, or even blasted. Great fires are lighted around the blocks till the natural cracks expand with the heat, and levers are then inserted to pry them apart.



This system is continued until the blocks are reduced in size to masses of a cubic foot or less, and they are then shipped as if they were coal. There are said to be 20,000,000 tons yet available at Naxos, and last year's export was 3950 tons. It is one of the hardest substances known.—*Dispatch, Pittsburg, Pa.*

They send no glittering statements out,
When a bank goes to smash in China;
To show 'tis solvent beyond a doubt,
When a bank goes to smash in China.
No pitying tears you see them shed,
But they take a big cheeseknife instead
And amputate the president's head;
And banks never break in China.

—*Michigan Tradesman.*

Ancient Glass Makers.

The glass blowers of ancient Thebes are known to have been as proficient in that particular art as the most scientific craftsmen of the same trade of the present day, after a lapse of forty centuries of so-called "progress." They were well acquainted with the art of staining glass, and are known to have produced that commodity in great profusion and perfection. Rossellini gives an illustration of a piece of stained glass known to be 4000 years old, which displayed artistic taste of a high order, both in tint and design. In this case the color is struck through the vitrified structure, and he mentions designs struck entirely in pieces from one-half inch to three-quarter inch thick, the color being perfectly incorporated with the structure of the piece, and exactly the same on both the obverse and the reverse sides. The priests of Ptah, at Memphis, were adepts in the glass makers' art, and not only did they have factories for manufacturing the common crystal variety, but they had learned the vitrifying of the different colors, and the imitating of precious stones to perfection. Their imitations of the amethyst and of the various other colored gems were so true to nature that even now, after they have lain in the desert sands from 2000 to 4000 years, it takes an expert to distinguish the genuine articles from the spurious. It has been shown that, besides being experts in glass making and glass coloring, they used the diamond in cutting and engraving glass. In the British Museum there is a beautiful piece of stained glass with an engraved emblazonment of the monarch Thothmes III, who lived 3400 years ago.—*Ironmongers' Chronicle.*

A New Use for Tin Scrap.

A two-horse load of tin clippings was being transferred to the rear basement of a prominent hotel, says the Philadelphia *Record*. It had come from a can factory, and the narrow, curling strips had become so twisted and intertwined as to form a conglomerate mass that was moved with the greatest difficulty by two sturdy fellows with stable forks. A bystander who was curious enough to enquire what use a swell hotel had for such truck was answered by an attache of the house: "We use it for the rats; I mean the big, gray fellows with whiskers. The hotel rat is bigger, bolder and wiser than any other rat. He laughs at traps, fattens on poison, and the killing or chasing of dogs, cats and ferrets is his pet diversion. Even when energetic measures have rid us of the pests they are with us again in augmented force within a day or two. They will tunnel through almost anything for incredible distances. It is their boring ability that has given us so much trouble hitherto. No matter how we closed up their passageways the routes were promptly reopened. Filling the holes with broken glass was considered a good scheme until we found that, with marvelous patience, they removed the glass piece by piece. But we think we've got them now. With this tangled-up tin we construct a sort of abatis, covering all places where the beasts are likely to enter our cellars. They can't get through it. They can't chew it, and they can't carry it away as they do broken bottles, for when Mr. Rat takes hold of a single strip of the tin he finds it an inseparable part of a net-work weighing many pounds."

Trade Paper Advertising.

A successful manufacturer, when asked why he patronized trade papers so largely, to the neglect of other methods of advertising, replied: "Men who do not read their trade papers and keep posted in their business are usually poor customers. If I sell them a good lot of machinery, they do not know how to use it, and report a failure, or we have to run after them, lose time and money to get them going and make the sale stick. But those who read and are posted know how, and succeed. Such men would not read circulars if I were to mail circulars to them. They see my advertisement regularly in the trade paper and know I have an established business, and when they want anything in my line write me, and don't whine about prices or what time they can get from others, but buy, try, and have no trouble, and pay the bill. Give me such a class of customers as I can get by judicious advertising all the time."—*National Provisioner*.

"Bright and Newsy."

Biddle Hardware Co., Philadelphia, Pa. [*General Hardware and Bicycles*]: In season and out, we have claimed that the Hardware trade was the proper medium for the disposal of bicycles and bicycle sundries throughout the country, and our opinion on this point is so well known, that it does not seem as if we could strengthen it materially by saying it again. Of course large cities may be able to support a few exclusive bicycle men, but in the majority of towns and cities throughout the country the man must have other business in order to make it pay. We appreciate the fact that from the first HARDWARE has held the same views, and we think they have been fully justified by the trend of events. HARDWARE is always welcome in our office, and its bright and newsy columns are often a relief amid the cares of business.

Getting Back Lost Customers.

A dealer sometimes loses sight of his customers. He does not know what has become of them, but is perfectly well aware that they have ceased to favor him with their orders, and that their absence means a falling off in business unless others equally valuable have taken their place. Then why not try to bring them back? They may have left the neighborhood, but unless this is known as a fact they are still worth searching for. If, says *Hardware and Stoves Reporter*, they have gone to a competitor—a fact which hurts both the pride and the pocket-book—they may be brought back by the exercise of a litte patient endeavor, and even if they have left the whole world forever they may have executors or successors who do not know how well the merchant's former customer was pleased with his goods. It never pays to lose a customer, even if a fitting substitute is found. The substitute would probably have come along, anyway, and as no increase in trade results, there has been a step backward, since any business that stands still has practically made a recession. Hunting out old customers and regaining their trade is even better than finding new ones, as in the former case the merchant knows their wants and personal peculiarities and has a better chance for pleasing them.

John P. Buckley, an inventor of New Orleans, has applied for a patent on an "egg boiler" that is a novelty. This little invention can be manufactured and sold for a few cents, and will shortly be put on the market by a stock company comprised of well-known business men of New Orleans. This egg boiler is a small contrivance that fastens on the cover of a kettle or pot, a needle points to the figures that indicate how long the eggs are to be cooked. When the eggs have boiled that length of time a bell rings and the cook is assured the eggs are cooked just as she wished them. This invention is generally conceded to be one of the most serviceable yet invented by Mr. Buckley.

HAVEN'T YOU NOTICED

That some days selling goods comes easier than others? Hasn't it always been when you were interested—enthusiastic? Did you ever try to "enthuse" over a roll of "cheap" belt? Pretty hard work, isn't it? That's always the trouble with goods you don't believe in—a man must believe before he can interest himself or interest others. It's easy to do both when handling high-grade goods—**1846 PARA** and **DOUBLE DIAMOND BELTS** belong to the 'easy" class.

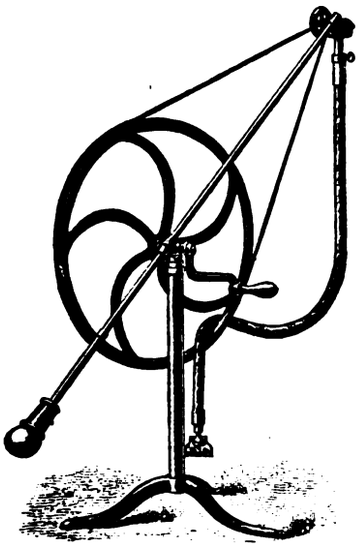
THE FULTON SIGN and PRICE MARKERS



Are the best, most complete and cheapest outfits for Business men to make their own Show and Price Cards, to print Shelf Labels, mark Boxes, Barrels, etc., etc. There is in fact no business where they cannot be used to advantage. Newspapers are using them for their Bulletin Boards, Ministers for Church Notices. Theatres for Announcements, Restaurants for Bills of Fare, etc. Their price in comparison to their usefulness amounts to almost nothing; it saves the cost of Sign Painters and Ticket Writers. A Boy can do all the lettering required in the largest Department Store. They last a lifetime and can be used for every language. We have

50 DIFFERENT STYLES

to select from in sizes from ½ to 4-inch letters. For marking Boxes and Barrels for shipping, or labels, they are far superior to adjustable stencils; the work is done quicker and neater and without blurring, making it look as if printed on a printing press. Nearly 100,000 sets of the **Fulton Sign Marker** have been sold, and they are in use daily by all large wholesale and retail business houses in the United States. Goods can be bought direct from us, or through your nearest wholesale house. Complete catalogues in English and Spanish sent free. Address

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers, the country over are requested to contribute to this page. News of new factories or companies, changes, improvements, etc, will be gladly received, and promptly published.

New Companies, Etc.

Appleton, Wis.—The Appleton Ventilated Woodenware Co. has been incorporated with a capital stock of $10,000. The incorporators are George McNamee, J. A. Hawes, and E. G. Jones. They have purchased the plant of the Pratt & Brown Mfg. Co. of Lansing, Mich., have reorganized under the new name, and the machinery is being prepared for shipment to this city.

Chicago, Ill.—Parkhurst & Wilkinson Co. of Chicago, capital stock $300,000 has been incorporated to manufacture, purchase and sell steel, iron, Hardware, wagon material, mining supplies, etc. Incorporators, Arthur J. Eaton, Anson H. Watson and Henry J. Warner.

Des Moines, Ia.—Cruzan & Co., extensive manufacturers of shovel boards or end gates for wagons, and dealers in agricultural implements, recently of Decatur, Ill., have removed to this city and leased one of the three story brick warehouses of S. A. Robertson on Fifth Street, near the Rock Island tracks, which Mr. Cruzan is fitting up for occupancy for his business. In conversation with a reporter recently, Mr. Cruzan stated that the company manufactured 20,000 shovel boards at Decatur last year, but that he had removed the factory to this city and would begin their manufacture here as soon as he can get the machinery in operation.

Gainesville, Ga.—The car factory is an assured success. Enough stock has been subscribed and the machinery will be ordered in a few days. Besides manufacturing refrigerator car doors, express refrigerator cars, etc., the company will make axe handles, baseball bats, and other wooden articles. They will give employment to many men, and will place much money in circulation.

Florence, N. Y.—A representative of E. B. Estes & Son of New York, one of the largest dealers of wood-turned goods in the world, has been in town and made a fifteen-year contract with a company to be organized to manufacture woodenware. It is understood that about forty hands will be employed. Part of the machinery has arrived, and it is expected that the mill will be in operation within sixty days.

New York, N. Y.—Pond Seal Lock Co. of New York City, has been incorporated to manufacture seal padlocks; capital stock, $25,000; directors, Alexander McNeill of New York City, Nathan C. Pond and Louis K. Pond of Port Chester, Westchester County.

San Francisco, Cal.—The Simpson Brush & Broom Co. have been incorporated, principal place of business San Francisco, capital stock $100,000, C. L. Ebner, A. B. Smith, J. S. Mellon, J. Kelbor and W. G. Wood of San Francisco, are directors.

Warren, Mass.—An effort is being made to organize the Warren Specialty Mfg. Co., for the manufacture of Hardware specialties and several valuable patents.

Winchester, Mass.—A certificate of the organization of the Highland Mfg. Co. has been filed in the State secretary's office. The company has a capital of $500 in 20 shares of $25 each. The subscribers are: S. G. Howd, W. I. Sparks, W. L. Curtiss, James F. Rowley and J. E. Larkin, all of Winsted.

Improved Conditions.

Allentown, Pa.—By a majority vote of the stockholders recently, the Allentown Hardware Works decided to issue 240 shares of common stock, par value of $50 each, as preferred stock The money will be applied to working capital in order to introduce the manufacture of spindle knobs.

Columbus, Ohio.—The Davis & Egan Machine Tool Co. recently increased its capital stock from $100,000 to $500,000.

Fairhaven, Mass.—The tack factory at this place is running full time. Some of the machines that were received from Whitman have been operated for some time by Benjamin Battles, who formerly ran the shoe nail machines of the American Tack Co., but these were taken to Taunton; the tide seems now to have turned Fairhavenward, and Mr. Battles finds pleasure again in operating shoe-nail machines. Recently a car load of tack machines was received at the depot, having been shipped from Whitman to be placed in the works here. It has been decided to remove all of the machinery from the Dunbar, Hobart & Co. factory, Taunton, which factory was leased for ten years by the Atlas Tack Co. The trustees of the reorganized company decided to terminate the lease and remove the machinery, which is owned by the company.

Galion, Ohio.—The strike of the molders in the Born Range Works, which affected 130 men, has been settled by E. J. Denney, secretary of the Iron Moulders' Union of North America. Mr. Denny came here a short time ago to investigate the trouble, and soon gave out a statement that the men were wrong, and ordered them back to work. The works have resumed.

Louisville, Ky.—B. F. Avery & Sons, the plow manufacturers at Fifteenth and Main Streets, have notified their employes who were laid off several weeks ago, to report for work at the factory. It is understood that 700 men will be given steady employment. An addition is being built to one of the departments in which the number of laborers will be greatly increased. The machinery in several departments of the plant has already been started.

Indianapolis, Ind.—A. A. Barnes, proprietor of the Udell woodenware works, says that in two weeks he has had more orders for the goods they manufacture than in any two months in the last two years. The works, which employ nearly two hundred people, are running on full time and full-handed. The weekly pay rolls of the Parry Mfg. Co. are now the largest since the works were established, and while working the full complement of men and in some departments overtime, the company is behind in filling orders.

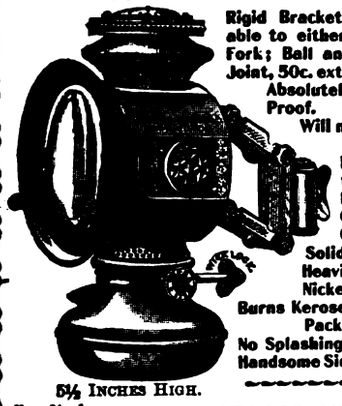
Meriden, Conn.—The hollow-ware department at the Britannia shop started up recently and will run eight hours a day. The outlook for a good fall trade is very promising. All the departments are now running at this factory. The Wilcox Silver Plate Co.'s factory started up also on eight hours. The glass department at the Meriden Silver Plate Co.'s plant is running ten hours a day. The rest of the factory is running eight hours a day. The Silver City Plate Co.'s works are running on full time.

Pawtucket, R. I.—As another evidence of the tendency of trade to improve, a large addition is being made to the works of the Pawtucket Mfg. Co. on Pine Street. The works are commonly known as "Webb's bolt shop," Mr. Webb being the proprietor of the extensive plant. Owing to the demand upon the works it has been necessary to erect an addition which will be located in the rear of the building on Pine Street It will be a two-story building, 64x61 feet.

Racine, Wis.—The J. I. Case Plow Co. reports that orders are coming in so fast that they cannot be filled. The factory is running ten hours a day, and with an increased number of hands, and prospects of an immense fall trade were never better.

Rochester, N. Y.—The Olive Stove Co. of this place, has let the contract for an addition. The improvement is made necessary by the largely increased business of the firm. which is a co-operative concern and has run steadily through the business depression.

Salem, Ohio.—J. Woodruff & Sons and the Victor Stove Works resumed operations recently running full force and full time in all departments, after running for some months on short time and but few men employed. It is understood that enough orders are on hand at both establishments to keep them busy for some time. This fact, in connection with the generally improved trade in the stove line, will probably keep them at work on steady time for some months at least.



Utica, N. Y.—T. H. Russell has purchased the property of the S. C. Millard Mfg. Co. at Clayville, and is in possession. At this manufactory, which is well known and which was prominent in industrial circles before the war, hoes, forks and rakes are manufactured. Mr. Russell has also purchased a controlling interest in the Utica Tool Co., the plant of which is located in Washington Mills. He will conduct both enterprises. Mr. Russell, whose home is in Nashville, Tenn., came to this section February 15th. He began the management of the Utica Tool Co. He is a keen, shrewd, energetic business man of middle age, and has been twenty-two years in the business. He resides in Utica.

"NO BETTER MEDIUM."

U. S. Mfg. Co., Fond du Lac, Wis. [*Cyclometers, Lamp Brackets.*]: Manufacturers of bicycles and bicycle sundries find their best customers among the Hardware trade. To reach this trade, we know of no better advertising medium than HARDWARE. Our adververtising in HARDWARE has been of an effective character.

COULD NOT KEEP HOUSE WITHOUT IT.

Sickels, Preston & Nutting Co., Davenport, Iowa. [*Wholesale Hardware*]: We would not know how to keep house without HARDWARE. The review of the Hardware markets, trade reports and editorials are frequently read before letters are opened that are received in the same mail with HARDWARE.

BICYCLE TRADE RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Companies, Agencies, Etc.

Chicago, Ill.—The Bicycle Mfg. Co. has been incorporated by D. D. Emanual, T. E. Fraher and Hamilton R. Johnstone. Capital stock $25,000.

Cleveland, Ohio.—The Grant Ball Co. has been incorporated by J. R. Garfield, H. A. Garfield, Robert H. Grant, Frank J. Pool, and M. J. Fox to make and deal in balls, ball-bearings, etc. Capital stock, $100.000.

Jersey City, N. J.—The Owen Cycle Co. has been incorporated by Geo. Stockbridge and Willis Fowler of New York, and R. W. Pope of Elizabeth, to manufacture and sell bicycles. Capital stock $10,000.

Meriden, Conn.—Ives, Upham & Rand have been appointed agents in this city for the Pope Mfg. Co. of Hartford.

Toronto, Ont.—The Rational Bicycle Seat Co. of Toronto, limited, has been incorporated by F. W. Scott, A. P. Murray, J. G. Merick and others. Capital stock $45,000.

Changes and Improvements.

Atlanta, Ga.—Willingham & Castle, reported to have sold out.

Boonton, N. J.—The Bicycle Electric Lamp Co. is a new establishment in this place. It will employ about twenty-five hands.

Dover, N. J.—The Allen Bicycle Co. has added a bicycle repair shop to their business. Calvin Lawrence, who was formerly with the Liberty Bicycle Co. is in charge.

Fralingham, Mass.—Merrill & Ridlon, reported to have dissolved partnership.

Freehold, N. J.—The Zimmerman Bicycle factory at this place which cost the company $27,000 has been sold to a party of Freehold men for about one-half that sum. It is intended to continue business and about twenty hands will be employed.

Hackensack, N. J.—Kerby & Cane reported to have dissolved partnership.

Hagerstown, Md.—The Crawford Bicycle Works will be in full blast by September 1st. There will be 500 men employed, while later in the season they will have use for 800. Chainless bicycles and motor cycles will be built this season together with the regular Crawford wheels.

Hartford, Conn.—The Veeder Mfg. Co., manufacturers of bicycle cyclometers, etc., will erect a new factory on Sargeant Street, corner of Garden. It is expected that the new plant will be completed by September 1st.

Lebanon, N. H.— Clapp Bros., reported to have dissolved. Charles Clapp continues.

Northampton, Mass.—The Northampton Cycle Co. are enlarging their bicycle factory.

Plainfield, N. J.—The Bard Cycle Co. has elected Geo. L. Colgate president, and G. W. Wrennick secretary. The company was recently incorporated with a capital stock of $5000 of which $2500 is paid in. Its specialty is the Keating bicycle.

Thompsonville, Conn.—The Lozier Mfg. Co. has started up its factory after a shut down of four weeks. For the present only a part of the hands will be employed. Work on next year's wheels will be pushed rapidly and it is expected that all the departments will be running in a few weeks.

Toledo, Ohio.—The Yost Mfg. Co., succeeded by J. L. Yost.

Utica, N. Y.—The Fisher Bicycle Works at Fort Plain which were closed July 12th, upon the owner giving a bill of sale, have been removed to this city, and will become permanently located. Bicycles and knitting machines will be manufactured and forty men employed. The name of the bicycle to be produced has not been settled upon. Inducements to locate were offered from Hackensack, but the propositions from Utica were more favorable.

Waterbury, Conn.—E. H. Gaylord & Son are advertising to close out.

Westbrook, Me.—Dr. C. R. Anderson has sold out his share of the bicycle business to his partner, City Marshall Knight.

Whittier, Col.—Butterfield & Coryell, reported to have been succeeded by F. Coryell.

Recent Embarrassments.

Amesbury, Mass.—Eastern Cycle Mfg. Co. reported to have made an assignment.

Avoca, N. Y.—The Schad Wheel Co. is in the hands of the sheriff under six judgments aggregating $10,718.57 in favor of two banks of Bath, N. Y. The company has been located in Avoca for some years past and has been considered as doing a prosperous business. It was one of the main industries of the village and if the present difficulties of the corporation indicate a suspension, it will be a serious blow to the prosperity of the place.

Beaver Falls, Pa.—The Morado Bicycle Co. is in the possession of the sheriff under executions amounting to $10,000.

Chicago, Ill.—The Chicago Combination Machine Co. has assigned to Roscoe Fulghum. The firm has carried on business at No. 28 W. Washington Street for about three years, dealing in and manufacturing bicycling supplies. Liabilities are stated at $15,000 while assets are placed at $10,000.

Cincinnati, Ohio.—Shaw & Davies are reported to have made an assignment.

Clinton, Ia.—H. J. Rumble & Sons have made an assignment. Liabilities, $2132 24; assets, $4576.44.

Ft. Wayne, Ind.—The Randall Cycle Co. are in the hands of receiver E. C. Miller, to protect creditors to the amount of $12,000. The liabilities will probably reach $15,000; the assets are slightly less.

Grand Rapids, Mich.—The Hamilton-Kenwood Cycle Co. have asked for a receiver. The company was organized one year ago with $200,000 capital, and the inventory shows assets $171,000 and liabilities $101,070.

Ingersoll, Ont.—F. Bowman & Co. have assigned to James Brady.

Lancaster, Pa.—Bard & McElroy, dealers in bicycles, dry goods, etc., closed by the sheriff on executions of $9000.

Louisville, Ky.—Louisville Rubber Co. reported to have made an assignment.

Meriden, Conn.—Irving W. Wilcox reported to have made an assignment.

Milwaukee, Wis.—J. A. Rappel reported to have made an assignment.

Milwaukee, Wis.—The Juneau Cycle Mfg. Co. has assigned to Edward N. Roth, who is one of the oldest cycle dealers in the city. The embarrassment of the company promises to be but temporary, as the collectable outstanding accounts alone are estimated to amount to more than twice the liabilities, in addition to which there is a considerable amount of stock and machinery.

Milwaukee, Wis.—The Wisconsin International Water Cycle Co., application for a receiver has been made. John N. Salentine, president of the company, has been appointed receiver.

Montreal, Can.—Alexander & Leffevre have assigned to Kent & Torcotte. Liabilities about $800; assets not given.

New York, N. Y.—Elmwood Cycle Co., No. 55 Park Place, in the hands of receiver Frank S. Parmelee who was treasurer and general manager. The liabilities are $4300; assets $922. The company was incorporated on December 10, 1895, with a capital stock of $12,000.

New York, N. Y.—The Weaver Cycle Material Co., No. 956 Eighth Avenue, have been attached by the sheriff. That official found he could do nothing as there had been a bill of sale. The business was started three years ago and incorporated on February 3, 1897, with a capital stock of $100,000. The bill of sale was given to J. A. Weaver for $12,629. Thos. F. Kennedy was president of the company,

Philadelphia, Pa.—The F. M. Dampman Cycle Co., No. 44 N. 10th Street, has assigned, giving preference to Rouse, Hazard & Co., Peoria, Ill., and the Kirk, Young Co. of Toledo, Ohio, the former company being their largest creditor, having a claim of $10,000. The amount of liabilities or assets has not been given.

Rochester, N. Y.—The Punnett Cycle Mfg. Co., Frank J. Hone appointed receiver of all the property, assets and effects of the company for the benefit of the creditors of said company and of the stockholders thereof.

Stamford, Conn.—Seeley & Adams have made an assignment. They have a branch store at Portchester, N. Y.

Toronto, Ont.—Cutler Bros. assigned.

Toronto, Ont.—Ranger Cycle Co. of Toronto, limited, assigned.

Toronto, Ont.—The New Barnes Cycle Co. of Woodstock, statement shows liabilities $59,300 and assets $59,800. E. W. Nesbitt has been appointed permanent liquidator by the creditors. He states that there has been no application for the purchase of the estate.

CONDENSED BUSINESS WISDOM.

"THE BEST OF ITS CLASS."

John M. Holladay, Holladay, Va.: HARDWARE is so nicely gotten up, and so well edited, giving such a variety of information, yet costs so little, that I cannot see how any dealer in Hardware can afford to be without it. It is the best paper of its class.

"A HELP TO OUR BUSINESS."

N. G. Bickford & Son, Mount Holly, N. J.: Please send us HARDWARE for one year from January 1st. Enclosed you will find the price of subscription. After examining the copy sent us we find the paper will be a help in our business.

"THE MOST HELPFUL AID."

Pike Mfg. Co., Pike Station, N. H. [*Whetstones, Oil Stones, etc.*]: We like to keep our name and our wares before the public in a modest way. We have found HARDWARE the most helpful aid toward accomplishing that purpose.

"VERY USEFUL TO US."

J. A. Ross & Co., Boston, Mass.: We find HARDWARE very useful to us, as well as interesting. Considering the quantity and quality of matter in each issue, the subscription price is very low for a semi-monthly magazine.

"THE BEST THING OF ITS KIND."

W. L. L. Morrow, Purdy, Mo.: I regard HARDWARE as the very best thing of its kind I have ever seen, and really at the low price of subscription. I cannot see why it is not in the hands of every dealer in Hardware.

"SUBSCRIBE WITH PLEASURE."

Brown & Gilbert, Boston, Mass.: Please find enclosed $1 in payment for HARDWARE. We have found HARDWARE very useful and instructive, and subscribe for the coming year with pleasure.

"IS JUST RIGHT."

Alling & Lodge, Madison, Ind.: We enclose $1 to pay for our subscription to HARDWARE for one year from date. Your paper is just right; don't make it too big so one can't find anything in it.

"WORTH DOLLARS TO DEALERS."

J. T Morris Cleveland, Ohio: HARDWARE is a bright, spicy journal and I look forward to its arrival as one of the family. Th Prices Current quoted by it are worth dollars to any dealer.

"OF INTEREST TO LIVE DEALERS."

Van Voorhis & McNair, Crawford, Neb.: We like the journal very much. It always comes to our desk full of bright, sound matter, that cannot but be of interest to all good live dealers

"IN YOUR COLUMNS FROM THE FIRST."

Van Wagoner & Williams Hardware Co., New York and Cleveland. [*Hinges, Anvils, etc.*]: Having been represented in your columns almost from the first issue, we have a feeling of pride and pleasure in your achievements.

"ADVERTISEMENTS HAVE GIVEN RESULTS.

W. C. Heller & Co., Montclair, N. J. [*Mail Boxes, Grips, Plows, etc.*]. Our advertisements in your columns have given results that assure us that they are closely watched by the trade.

"BEYOND CRITICISM."

Wm. Jessop & Sons, New York. [*Steel manufacturers*]: Another five years as proportionately successful as HARDWARE's last will place it almost beyond the criticism of friends or competitors.

"MUCH PLEASED WITH IT."

Chas. N. Vittum, Laconia, N. H.: I am pleased to be one of your subscribers, as I am very much pleased with HARDWARE. I think it a very useful and interesting journal.

"VERY MUCH PLEASED."

The Banks Hardware Co., Henderson, Ky.: Enclosed find Post Office order for $1, our subscription to HARDWARE. We are very much pleased with the publication.

"A VALUABLE ADVERTISING MEDIUM."

Harvey Hubbell, Bridgeport, Conn. [*Machinery and Tools*]: We are very much pleased with your paper, and consider it a valuable advertising medium.

"JUST THE PAPER RETAILERS WANT."

Henry E. P. Pritchard, Philadelphia, Pa.: Enclosed find $1 for which please send me HARDWARE for one year. It's just the paper retailers want.

"EXPERIENCE MOST SATISFACTORY."

Partrick & Carter Co., Philadelphia, Pa. [*Electrical Goods*]: Our experience as advertisers with you has been of a most satisfactory character.

"WORTH WHAT IT COSTS."

Spence & Co., Keene, N. H.: Enclosed find $1 to pay for HARDWARE for one year. We think it well worth what it costs.

"WELL PLEASED WITH IT."

Jacob Schmitt, Louisville, Ky.: I am very well pleased with your paper, and find some very interesting reading in it.

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

CRONK'S

Combination Fencing Plier.

This newly invented fencing tool is needed by all people that build or have occasion to remove or repair wire fence, as it is made with two staple pullers, two hammers and two button cutters. They are the same heft as the 1½ Maydole Hammer, and they are made of forged tool steel. No good farmer will be without one. They are warranted to cut No. 8 hard or No. 6 soft wire. Like the celebrated Cronk Plier they are fully warranted in all respects. No. 12, 11 in. long, $12.00. Dis. . . .

Goodell Company, Antrim, N. H.

There was a time when, because our prices were a little below normal, it seemed very natural for some dealers to believe what they were often told; namely: that our goods were "hardly up to the standard." We don't have trouble that way now, because most dealers have eyes of their own and think for themselves. **We invite comparison. . . .**

WIRE LATHING WITH HAMMOND'S METAL FURRING.

44 Cliff Street. NEW YORK.
148 Lake Street, CHICAGO:
Factories: GEORGETOWN, CONN. CHICAGO, ILL.
ESTABLISHED 1818.

THE OLDEST AND LEADING MANUFACTURERS OF GALVANIZED WIRE GOODS IN AMERICA.

"Pennsylvania" Fruit Picker

This Cut almost speaks for itself—the device being so much like the human hand, shows at once the utility of the article.

AS A FRUIT PICKER IT HAS NO SUPERIOR.

It is made of Heavy Galvanized Wire, and Easily Adjusted to a Pole. It has been sold for several years, and the demand (as it is becoming known) is steadily increasing. The difficulty of detaching fruit and securing it unbruised is apparent to everyone so engaged. This overcomes the difficulty, and saves the finest fruit which commands the highest prices.

THE LOW PRICE AT WHICH IT IS SOLD

brings it within the reach of those who have but little fruit to gather as well as those who have large quantities. *Price, per dozen, $5.00.* It will gather Apples, Peaches, Pears, etc.

MANUFACTURED BY **EDWARD DARBY & SONS,**

233-235 Arch Street, PHILADELPHIA, PA.

"Goodell's" Turret Head Glass Cutters.

(Patented March 31, 1896.)

SIX CUTTERS. Carefully Hardened, Ground and Tested before mounting. Nickeled Frame, Rosewood Finish Handle.

H. H. Mayhew Co., *Shelburne Falls, Mass., U. S. A.*

"Happy Thought" Tack Puller.

Patented.

Made of polished steel. Will pull all size tacks, and the construction and shape makes it easy to pull the tack without breaking the heads off. The bottom hook which serves as the lever in drawing the tack is also convenient to lift the carpet from the floor. One trial will prove that the "Happy Thought" is the best. The price, 10 cents, brings it in reach of all. For sale by all leading Hardware dealers. This is a fine seller, and we will send a sample to the trade on receipt of a two-cent stamp. Manufactured by the

"Replies From All Sections."

McIntosh-Huntington Co., Cleveland, Ohio. [*General Hardware and Bicycles*]: As an advertising medium, we have recently had occasion to test HARDWARE in a manner that would give us some idea as to how successful it can be used. Our advertisement did not occupy a very prominent position, but was of a character to excite the cupidity of the reader. We found that within two days after your paper came out, we commenced to receive replies from all sections of the country to the advertisement. This would seem to be sufficient proof that yours is a good medium.

THE ONLY "PERFECTION" WATER ELEVATOR AND PURIFYING PUMP

Dealers, get in line and sell your trade an article you can guarantee for ten years. The chain or buckets is the principal factor in any elevator. The **Perfection Bucket** is cut by die in one piece of **Black Open Hearth Steel** folded together by double lap seams, and the entire chain **Galvanized** after **Construction.** Others are made of several pieces of galvanized iron soldered together. Simply this one feature is a sufficient guarantee that the **Perfection** has no equal. It is handled by all leading jobbers throughout the world. Call for the **Perfection.** Take no substitute.

It is the simplest structure for raising water on the continent; guaranteed never to freeze. . .

A GOOD THING.

IT'S IN THE TEETH.

The Patent "REFORM" Curry Comb is composed of three shallow, oval trays, with corrugated edges. The parts are struck up from a fine grade of cold rolled steel, heavily tinned and bronze lacquered, firmly riveted together and warranted not to rust. The outer dimensions are 6½x4¼ inches and by reason of the large cleaning surface and peculiar arrangement of teeth, the comb will do its work with a large saving of time and labor, cleaning with equal thoroughness both long and short coats. There are no places to accumulate hair and it will not tear or injure the brush, the comb being quickly freed from accumulation by giving its face a gentle tap.

MODERN CLIMAX. NEW STEEL RANGE.

In both Portable and Flush Reservoir style. Popular sizes.

Taplin, Rice & Co., Mfrs., Akron, Ohio.

To Bicycle Riders.

WE MAKE OUR TUBE OF FIFTY CARBON STEEL

Because a Tube like this of our .50% CARBON STEEL Is just as strong as a Tube like this of .25% CARBON STEEL

While weight for weight in a Bicycle our FIFTY CARBON Steel will last so long [redacted] and TWENTY-FIVE CARBON Steel will last only so long [redacted]

NOTE THE FULL IMPORT OF THE PARALLEL LINES.

The comparison which they graphically make indicates the result of the prolonged investigations of the most practical experts of the world.

That the tests in our own laboratory corroborate these results is merely so much to its credit; that the same is true of actual trial on the road equally proves the trial to have been made in bicycles of correct design and construction. THE FACT REMAINS.

The margin of safety is greatly increased by the use of this tube. Every bicycle manufacturer should use it; every dealer should insist on having it; every rider should demand it. Send for catalogue.

PUTNAM NAIL COMPANY

NEW DEPARTURE.

In consequence of the action of the National Hardware Association, we now propose to sell direct to the general jobbers of the country. . . . . .

All restrictions have been removed as to quotations to be made by the trade from ocean to ocean. . . .

The high quality of the Putnam Nail makes it an easier seller at an advanced price over nails made by rolling and shearing. . . . . .

In case local dealer does not handle our goods, address

The Putnam Nail Co., ***Neponset, Boston, Mass.***

235 Lake St., Chicago, Ill.

12-14 Drum St., San Francisco, Cal.

HENRY HOPKINS, - - Associate Editor.
FRANK REIFSNIDER, - Western Manager.

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted to the Hardware Trade.

Editorial Trade Review.

While no great number of large buyers of Hardware exclusively have as yet crowded around the registers of the Merchants' Association in their local headquarters, still the fact that many of them will reach the city a little later, has become a recorded fact, and the trade gladly awaits their arrival

Orders are coming in for special wants on early deliveries, especially from the jobbing houses that act as feeders for the States which have been so greatly benefited by their phenomenal grain crops, with their still more phenomenal advent when prices are at the highest. It is certain that the stocks of Hardware in such localities will for the first time in years reach a fullness in scope and ample variety which will prevent any sales being lost through lack of material. The stocks will be on hand with which to supply requisitions that represent positive wants.

Manufacturers are everywhere awakening from lethargic influences, and will be found prepared to sustain any demand that may be made upon their respective plants. Never in the history of our foreign trade have such encouraging hopes been fostered upon the conditions of trade which have made it easy for us to establish distributing points in all the leading countries with which our national relations are of an amicable and trade-fostering character. It is the desire of our manufacturers to retain in every instance the markets so opened. Operations originally developed and entertained for the disposal only of a surplus stock when our own home markets were stagnated, and dullness reigned supreme, have now become the foundation of a future traffic, sustained through the conceded excellence of our manufactured goods. Thus from a makeshift planting of virile seed will spring a crop, which, surpassing all previous records as to extent and volume, will yet create new fields of wealth for our manufacturing plants, and become an outlet in periods of over-production, when the glut in our own markets jeopardizes the stability of current quotations. The general trade increases but slowly as to volume, but steady and definite in tone. Prices are constantly improving and no weakness is anywhere manifested along the line; and this affects every important department, from nails and heavy Hardware to finer goods like cutlery and plated ware. No serious advances in price are contemplated, as the bracing up of the markets, and relieving them from features of uncertainty and indefinite conditions, will prove of sufficient benefit until the pressure of an increased volume of orders will make advances on staple goods politic or healthful. There is no great desire to book orders at current low prices for unspecified future delivery, makers preferring to get a share of the better business which conservative methods should ensure. Every indication points to the certainty that 1898 will be the record-breaking year, and the remainder of this year will be utilized in holding the trade already secured, so as to be "in it" largely when it arrives.

Business Men on Business.

When a business man sits down to write, in a businesslike way, in regard to something with which he is thoroughly conversant, and in which everybody is interested, he is certain to say something worthy of being placed on record.

This thought has often come into mind, when going over the trade letters which *Hardware* publishes with every issue, over the signatures of a number of the largest and most influential Hardware houses of the country. In these letters the entire land is covered, from Denver and Davenport on the West, from Birmingham and Charleston on the South, from Boston on the East, and from the other great cities lying between these various points. No one can peruse these letters without learning a great deal of value concerning the business conditions of the country, the outlook for the future, the various conditions which work together for the results that are there recorded, and, mingled with it all, a great deal of good advice and sound wisdom, to which manufacturers, jobbers, retailers and consumers, can well give heed.

It is an interesting commentary on the modesty of the average business man, when we say that several of our to-day most useful and valued correspondents hesitated before undertaking the task which they now so well enjoy, lest they should be unable to do it with credit to themselves and to their houses. The opinion was often expressed that there was nothing that could be written about, and that the one whose services had been solicited felt himself unequal to the task of saying something original, or of making his letters of interest to the public at large.

The instability of this position has been thoroughly demonstrated. If the reader will turn to the pages in to-day's issue which are devoted to these letters, he will see that there are ample grounds for our statement. These letters of to-day are but samples of those which appear twice each month, and the large variety of subjects discussed, and the bright and fresh manner in which the discussion is conducted, are evidences that the writers have not mistaken their mission, and that each one of them has something to say which ought to have been said, and is well said. There is, also,

Digitized by Google

another interesting feature about the letters of to-day which should be specially noted. A spirit of hope and of fulfilled prophecy runs through them all. The skies are brightening, not only in Chicago, but in Baltimore and Philadelphia; no one is looking for a boom, and no one seems to wish for one, but all are satisfied that the conditions lead to certain prosperity, and that a successful season is just ahead.

This view of the situation seems to be fully justified. No one may be able to say that this one cause or that has brought about this desired result. The powers that rule the destinies of Nature and of the world, seem to have permitted the clouds to rise and the sunshine to fall upon the waiting earth. The harvests have been plentiful, and the situation is such that large prices are possible for the same. The earth has opened its richness to the pick of the miner in many sections. The hum of busy wheels is heard where there was silence before. Law makers are enjoying a vacation at home, and it is not possible for them to raise questions which shall disturb the commercial and industrial harmony. The people everywhere seem to have taken heart, and money is flowing from the banks and the vaults of the safe deposit companies into the hands of the merchants, and artisans, and farmers everywhere. The permanence of this prosperous era depends largely upon the faith and good will of the people.

No Connection With Magnolia Metal.

Herbert Gray Torrey, United States assayer, at No. 30 Wall Street, was arrested at 6 o'clock last evening as he stepped from a railroad train at his home, in Stirling, N. J., charged with wilfully entering the factory of the Magnolia Metal Co., and also with malicious mischief, larceny and assault.

The constable who awaited Mr. Torrey's arrival at the station also served a warrant on Mr. Torrey's son, J. Gray Torrey, and another on Abram Cornish, a young lawyer, who had driven up to take the assayer to his home. Besides, the constable had warrants for Richard Thomas, of Stirling, and Charles Taylor an employe of the New York assay office, who lives in Brooklyn, but neither was about.

Mr. Torrey was employed by the Magnolia Co. for eight years as superintendent of its mill. The company makes a metal for the bearings of cars and machinery.

George E. Conkling, counsel for the Magnolia Co., told me that Mr. Torrey had sought to divert business from his client's factory to a mill about to be started by Mr. Torrey's son.

Edward C. Miller, vice-president of the company, said he severed his connection with Mr. Torrey on April 15th last, because the latter was not managing the mill with sufficient economy. Mr. Torrey, however, was allowed the use of the mill to manufacture railroad brasses. The company had obtained a lease of the property from Mr. Torrey. When he entered its employ Torrey had the lease from the Delaware and Passaic Railroad, and soon after he severed his connection with Mr. Miller he served him with a notice to vacate the property. Mr. Miller appealed to the railroad and was sustained in his lease.

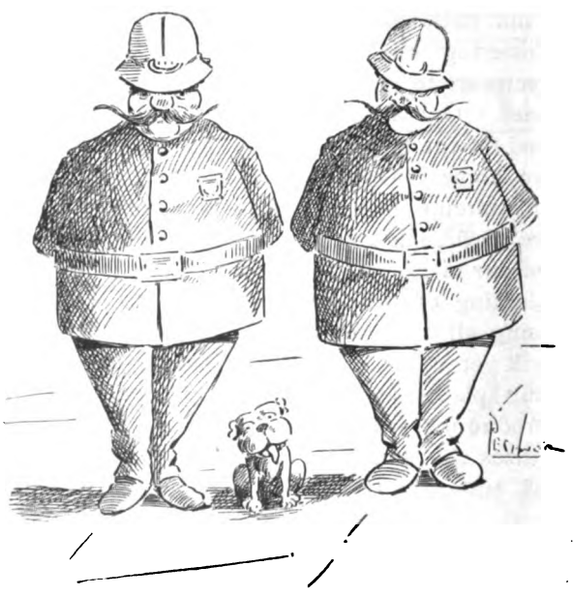
"We then ousted Torrey from the mill," said Mr. Miller, "but at six o'clock on the night of August 5th, his son, J. Gray Torrey and several others, went to our factory and assaulted our watchman, Charles F. Havey, who struck Torrey and knocked him down. Each caused the other's arrest for assault and battery, and Squire Hyer, of Logansville, before whom the case was tried, discharged Havey and held Torrey to answer to the Grand Jury.

"Early in the morning of August 6th, Herbert Gray Torrey and his son, with Charles Taylor, Abram Cornish, Richard Thomas, James Jaques and A. B. High, went to our factory. High is a constable, and he accompanied the party under a misapprehension. J. Gray Torrey told him that he had to have possession of the mill, and that he was afaid of being assaulted by Havey. Young Torrey smashed a window with an axe, and all climbed in, chased the watchman out and took possession of the factory.

"Herbert Gray Torrey went to the depot and got some test blocks, that had been sent to him from England, and tested the blocks on our machines until nine o'clock in the morning. His object was to demonstrate the inferiority of our metal, and to write to our enemies in England. We have a mill there and I have spent $30,000 in protecting my patents abroad.

"Before these men left the mill they carted away in a wagon a load of tools, moulds and other paraphernalia used in the manufacture of our metal.

"I was away at the time," said Mr. Miller, "and when I returned on August 9th, I received a telegram from Mr. Torrey informing me that he had vacated the factory and was ready to deliver to me the key."



Mr. Torrey had time to say, before his hurried departure to get bail, that he had been in the United States mint service for thirty-six years, and his father before him. He had contracts and documents which proved his right to take the action he had. He declared that he took from the mill only such tools as belonged to him. The mill had made thousands of dollars on the reputation it gained through his connection with it, he said. He made all the formulas and attended to all the important correspondence.

"If I want to make metal," he said, "I'll make it, but I can't make their metal because it is patented. Mr. Miller has threatened to go to Washington and make charges against me to the Secretary of the Treasury. Let him try it."—*New York Herald.*

The Magnolia Metal Co., Nos. 266 and 267 West Street, New York, whose product is famous the world over, authorize the announcement that none of the parties above named have any connection with their business, their relations with H. G. Torrey and J. Gray Torrey having been severed on April 15, 1897.

J. P. Bryan & Co., Baltimore, Md., have been incorporated for the sale of raw materials and manufactured goods, and have an authorized capital stock of $10,000. This is an advance step in the road of prosperity, which will be welcomed by their many friends.

Seasonable Suggestions.

Crops are generally good.
Everywhere they are ample.
Here and there superabundant.
Dollar wheat is already a possibility.
That means actually, not politically:
Better times!
Prosperity!
The business situation is improving.
So report
Dun's,
Bradstreet's.
They are our authorities.
Our regular commercial indexers.
But you can see for yourself.
It's in the air.
The tired feeling is leaving you.
The whole land seems convalescent.
Now What?
The fall season is at hand.
You want to do business.
Share in booms and boomlets.
You must do business.
The opportunities are here.
You must retrieve this Fall.
How to do it?
Let 'em know you are still in business.
But be quick about it.
Be a leader, not a follower.
The rush for trade will be great.
Business cupidity was never greater.
They are hungry for trade.
Become an advertiser.
You must advertise.
Realize that now.
Reach out for trade while it's yet to be had.
The fall season will be over in a jiffy.
Procrastination can't be considered.
Business has been flat.
Trade dull, dead.
So says the non-advertiser.
So says the inert advertiser.
The occasional spasmodic advertiser.
The regular advertiser is still doing business.
He always does.
He is now flooded with inquiries by prospective Fall buyers.
That's his advantage.
And what an advantage.
The non-advertiser, the inert advertiser receives no inquiries.
That's the reason he croaks and is quasi dead to business development.
He fails to see the signs of life, of prosperity.
He is in peril of losing his opportunities.
Of being outdone, outclassed, marshalled from the field.
A preventative is better than a cure.
There may be no cure.
Then, hark!
Advertise!
Get ready to advertise now.
Wise advertisers,
Shrewd advertisers,
Time-tried advertisers,
All would counsel this.
Watch them!
Daily they set you a practical example,
Join the ranks of the leaders.
Imitate success.
Advertise.
Advertise well.

Follow the precepts of successful advertisers and yours will be an investment in equity. J. B. RINDFLEISCH.

An Instance of Southern Development.

No one who watches the course of modern events can complain that the South is a laggard in the race of natural material development. Cotton may still be king, but is compelled to share his throne with the modern manufacturer, who is creating wealth for his section, by the steadily increasing development of the splendid natural resources of the South.

Nature has been especially lavish in giving to Tennessee a magnificent endowment of natural hard woods, in which hickory and oak of a superior quality predominate. An enterprising company, Geo. S. Parkes & Co., of Nashville, have seized upon the opportunity this fact presents, and are making a great use of the same. They are turning this timber to the use for which it is best designed, and are shipping to all parts of the world immense quantities of spokes, handles and carriage woodwork. To a material exceptionally fitted for a first-class article, they have added skill and the use of first-class modern machinery, and are turning out a line of goods that have given perfect satisfaction in every quarter. They are receiving large orders from both the home and foreign markets, and their prices are such as commend them to the largest and closest buyers.

A representative of *Hardware* had the pleasure of looking through their work, and closely examining the finished products. In spokes, they make every variety in the American, English, Australian Patent and Shell Band Pattern, also the Club Turned or finished for wood hubs, in every size that can be made. Every spoke is warranted to be air-dried, and as near perfection as good timber and first-class and experienced workmanship can make it. They make all the patterns of Handles that are used in this or foreign lands, and guarantee the grading to be the equal, in all respects, of anything made. Their carriage woodwork receives the same care, to secure the exact timber that is suited for making shafts, poles, oak and hickory rims, bows, cross bars and singletrees.

While the headquarters of this successful exponent of the new manufacturing development of the South are at Nashville, Tenn., they have a New York office at No. 64 Cortlandt Street. Inquiries addressed to either place, as to prices etc,, will receive a cordial and prompt reply.

Brazing Graphite.

Not a little of the expense in brazing is due to the cost of removing the brass which has stuck to the metal where it is not wanted. The removal of this brass is usually attained only by patience and diligent filing. Now comes to the aid of the brazier that unique mineral, graphite, which is not affected by acids, alkalies, heat or cold. Braziers who have made use of Dixon's Pure Flour of Graphite pronounce it worth its weight in gold. A sample will be sent without charge by the Joseph Dixon Crucible Co., Jersey City, N. J., who are the only manufacturers.

C. M. Fairchild has been engaged as general manager of the Olive Wheel Co., of Syracuse, N. Y. For twelve years he has been allied with the cycle and acccssory trade, and for the past four years as manager of the New York Tire Co.'s Western business. Conscientious, brainy, and sincere, the Olive Wheel Co. have secured in Mr. Fairchild a manager whose worth will be made plainly apparent during the next few months' struggle for supremacy. As secretary of the Century Road Club of America, Mr. Fairchild enjoys an extensive acquaintance in the trade and among the riders of this country.

SELLING FOR SPOT CASH.

Editor Hardware: Smith and I have run a general country store out here for six years, and have done reasonably well. We have, of course, lost something because of bad accounts, but on the whole have made money.

Smith is a great hand for theories. He reads all the "Advice to Merchants" and "Hints to Business Men" he sees in the trade and other journals, and gives them all a trial, when my influence fails to prevent him. Some of them have cost us money, while others have lost us customers. This does not prevent his turning up, fresh and smiling, with a new one, about every other day.

Last summer he became very much impressed with the absolute necessity of our doing business upon a strictly cash basis. Said he had been reading Adam Smith and a lot of those other old chaps who write on political economy, and after studying the matter over had come to the conclusion that 25 per cent. of the business done in this country, was lost through poor accounts. That the whole sum could be saved, if everybody would pay spot cash on the delivery of the goods. That as the leading merchants of Bundysburgh, we were in a position to give the matter a thorough test, and show the world at large that the great bulk of commercial business was done upon a wrong basis. That by paying spot cash ourselves, we could purchase goods much cheaper than at present, and sell for lower prices. That everybody who had money would come to us, while those who ran accounts, would go to our competitors. In short, he argued with such spirit and vehemence, and had such a formidable array of figures upon his side, that after a month's protest and hesitation, I finally acceeded to his view of the matter, and agreed that hereafter the firm of Smith & Jones should do business only upon a Hard Money and Spot Cash basis. Our motto was, 'No trust to anybody; not even to our own grandmothers." If Mrs. Smith wished to purchase a lawn dress, she must come in and pay her money over the counter. If Jones' youthful son wished a sled, he would have to produce the coin of the realm, or its equivalent in greenbacks, before he could come into possession. There were to be no bad accounts, and no losses hereafter, and everything immediately took on a roseate hue.

On the 1st of September, 1896, we put up our sign "Absolutely No Trust to Anyone." We changed our card in the Bundysburg *Signal*, calling attention to the fact that hereafter goods would be sold for cash only, and that because of this new line of business conduct, we expected to sell goods 25 per cent. less than our neighbors could sell them.

Now don't understand me as condemning this system as a whole, or even criticising those who support and practice it. I simply wish to say that our experience has demonstrated the fact that in a small country town like Bundysburg, this method of business has its slight drawbacks, to say the least. In a great city where you know so few of your customers, and where so many of them are merely casual purchasers, it may work to a charm, but in a little town like this, personal and fraternal relations are so closely intertwined with those of a business character, that a merchant who makes this cash rule and enforces it, is apt to get himself occasionally disliked.

As our old customers came in and saw the sign, their comments varied from, "Well, I'll be gol darned," to "What the blankety-blank has got into you fellers, anyhow?" On the whole our customers seemed to endorse the move, and regard it as a commendable safeguard when applied to their friends and neighbors, but had their doubts about its availability or complete success when put into operation against themselves. Old Deacon Wolcott, who has traded with us ever since the store was opened, paying twice each year, and who was a customer of my father's before I was born, said to me in a confidential manner, "That's all right, Silas, you just go ahead and keep that sign up, and it will be a notice to a lot of these lazy good-for-nothing fellows, that they must pay as they go, or not go all. Of course, Silas, I know them fellers you and Jim are after, and that you never had a thought of applying this here notion to *me*."

I took the old man over into the corner, and let Jim talk political economy to him for half an hour. He looked a little dubious, but when Jim was through with him, he came down front and said to me, "I must have a pair of boots for the boy, and some goods for the old woman." I took great pleasure in waiting upon him, and when I was through, figured up the amount, which came to some $11.80. The old man gave an embarrassed laugh, and said, "You have got me this time, Silas. I haven't a darned cent with me, and unless you chalk her down for a few days, I will have to leave the goods until I come in again. I have got my old silver watch with me," with a low chuckle, "but I don't think at this time of day, you boys will make the old man put that up for $11.80."

It was a little embarrassing to have our first customer under the new rule put us in a box like this. We knew that the old man was as good as the gold, and at the price we had charged him, we could very well afford to carry his account for several months. But there was the rule, and I saw Jim looking at me sternly from the back end of the store over a pile of political economy books and of trade journals which insisted that every merchant should sell for cash.

I said to him, "Uncle Socrates, I cannot put this account upon the books, as it is against our rules, and we must treat one customer as we would another, but I'll tell you what I will do. I will lend you the $11.80 out of my own pocket, and you can pay me the next time you are in town."

"Well," said the old man dubiously, "I don't know as I care to go about town borrowing money, but under the circumstances, we will let her go at that."

I loaned the deacon $12 in cash out of my own pocket, and then he turned around and paid me $11.80, which went into the drawer.

Said he with a chuckle, "It looks now as though I was about 20 cents ahead of the game,"—which was rather a suggestive comparison for a deacon in the Presbyterian Church, but quite characteristic of the situation.

Our books show that during the past year, we have sold Deacon Wolcott just one-half what we sold him the year before. Figuring full legal interest on his account, I find that we have lost about $53.75 on the transaction, over what we would have made had we carried his account as in the olden days. There is another loss to be added to this, as the deacon's wife has got into the habit of carrying her butter and eggs to our rivals across the way, where she is running a book account wide open, and for all it is worth; and thus we have lost what we would have made in handling her produce.

The deacon had hardly gone out of the store, before little Johnny Seelye came in, and reaching a tin pail over the

Digitized by Google

counter said, "My mother, she wants two quarts of molasses."

Said I, "All right, Johnny, have you got the money?"

"Money?" said he. "Why hain't ma got a book account here? I have always got things when she sent me for them, and nobody ever said anything to me about money before."

With a mere hint of spite in my tone, I called to my partner, "Come here Jim, and load little Johnny up on political economy. He doesn't seem to grasp the situation with that philosophic touch to be expected of one who has studied Adam Smith and Richard Cobden."

Jim came down front, and explained the whole situation to Johnny, mollifying and emphasizing the same with a gift of a stick of Beeman's pepsin gum. The little man marched home again with his empty pail, promising to come back with the money in a few minutes.

In about a quarter of an hour, young Johnny stuck his towsled head through the front door, and with a grin, said, "Ma says she don't have to!" and then before we had an opportunity of answering him, he was over the way with his empty bucket.

I expect that these two samples of Deacon Wolcott and young Seelye, are simply two out of five hundred experiences that poor Jim and I have gone through during the past year. We have offended so many customers that our losses upon the business which they have withheld from us, have more than covered all the losses we would have sustained from poor book accounts. We find that people will buy more goods when they can have the same charged, than they will when they must pay cash for the same. Many a man will permit his wife and daughters to go to the store, and have goods charged, when they utterly refuse to go down into their pockets and hand out the necessary amount of money over to their feminine representatives, who are setting out upon a shopping tour. It seems to be a very difficult matter for the average farmer, to whom money comes in such small amounts, to part with a greenback until compelled to, while, on the other hand, they are very generous about increasing their credits—and I am talking about men who pay their debts, and whose credit is upon a gold basis.

Mind that I am not criticizing the system, nor am I finding fault with political economy, or with Jim. We have made some money this past year, but not as much as we would have made had we pursued the old system. I do not find that we can buy goods any cheaper than we did before, for the double reason that we are buying less now than we did a year ago, and have practically always paid cash for our goods in the past.

This I know. That on October 1, 1897, James Smith and Silas Jones, merchants at Bundysburg, Ohio, have decided to go back to the old system. We shall carefully scan all applications for book accounts, but hereafter whenever a solid merchant of this town or of Farmington, or of Parkman, wishes to buy goods upon credit, with the firm of Smith & Jones, he can do so. Adam Smith is all right, and so is political economy, and so are the trade journals which have advocated a spot cash system—but we boys down here on the edge of Swine Creek, have learned upon which side our bread is buttered, and intend hereafter to pursue the course of practical wisdom.

I would like to hear from some of the other fellows who have experimented in this direction, and learn what there experience has been. SILAS JONES.

Bundysburg, Ohio, September 7, 1897.

A newly rich Englishman sent this order to a bookseller: "I have sixty feet of shelving. I want ten feet of poetry, ten feet of history, ten feet of science, ten feet of religion, the same of novels, and fill up the rest with any kind of books."—*Stoves and Hardware Reporter.*

The Wilmot & Hobbs Co.'s Products.

The Wilmot & Hobbs Mfg. Co., of Bridgeport, Conn., have recently made large additions to all departments of their plant, and more especially in the department for the production of oilers, stove trimmings and other "Copperized" and nickel-plated specialties. These additions were rendered necessary on account of the vast amount of orders that poured in upon them during the spring.

The "Copperized" and nickel-plated steel oilers manufactured by this company are now too well-known to need comment, but we feel it due to this enterprising corporation to mention, that notwithstanding that they have been hardly a year in the stove trimming business, they number among their customers some of the oldest and best known stove manufacturers in this country, and are meeting with wonderful success on account of the special fit and finish of their "Swedoh" "Copperized" nickel-plated stove bands. We understand that this department is obliged to run considerably overtime already, and it is expected that during the fall and winter this happy condition will prevail throughout their business.

The accompanying illustration shows the latest success of this concern, they having, after many years of experimental work, succeeded in turning out what is described

as "the strongest tube ever made. It has remained for the Wilmot & Hobbs Mfg. Co. to demonstrate to the world that the patent Clincher Cycle Tubing is superior even to seamless tube, for the reason that it can be rolled with perfect accuracy as to gauge throughout, free from flaws of any description, is not subjected to a multiplicity of annealings, and the joint being thoroughly dove-tailed by lateral displacement in clinching of teeth, the result of perfect resistance of steel against steel to all strains is secured." The president of the company, F. A. Wilmot, who is the owner of this patent both in the United States and foreign countries, is at present in England at the request of some large concerns there who are seriously thinking of adopting this style of tubing, it being also capable of forming up into D-shape and fork sides, etc. It ought also to find a sure market in the bedstead business, as steel tubing has recently begun to supersede brass in the manufacture of bedsteads.

Moving to the Front.

The Detroit Twist Drill Co., Detroit, Mich., have engaged the services, on a five years' contract, of Peter J. Hoenscheid, formerly with the Whitman & Barnes Mfg. Co., Akron, Ohio, as superintendent of their twist drill department, and are enlarging their plant to manufacture full lines of twist drills.

They are putting in the finest improved machinery of modern design, and in a few months will be in the market with the best goods experience and ingenuity can bring out. Mr. Hoenscheid has been in the business for eighteen years, having been first with the Morse Twist Drill Co., a large Cleveland company, and for about seven years last past with the Akron Co. He has associated with him some of the most experienced of his former employees. N. G. Williams, Jr., will remain as general manager, secretary and treasurer of the company as before. A number of prominent and successful business men of Detroit are interested in the new departure as stockholders and directors. With this material strengthening the business the future of this well-known company is assured.

The National Safe Deposit Co. of N. Y.

Among the many attractive features which make the Mutual Life Building, in Nassau Street, extending from Liberty to Cedar Streets, New York, one of the most unique in construction of any building in America, may be mentioned the safety deposit vaults belonging to the National Safe Deposit Co., the entrance to which is at No. 32 Liberty Street, on the side of the immense building of which we give an illustration.

The problem of what to do with valuable papers, such as bonds, stocks, title deeds and wills, even valuable jewelry, not in use except on state occasions, has been solved by the safe deposit vaults, and they have multiplied, until to-day security for one's valuables can be readily found, where no "thieves can break through and steal," but where they can be placed conveniently, be perfectly accessible, and yet know a security not obtainable by any other method.

Within a few years great progress has been made in construction, and the latest additions to the strong rooms of the country, furnished by the National Safe Deposit Co. of New York, are so secure, convenient and cheap, as to make it a foolish proceeding for any person to worry over the safe keeping of his or her treasures. It isn't necessary to be very rich in order to have anxiety over the safe keeping of what you have; hence we find people putting some of

their valuables in the most out-of-the-way places, even inside of feather beds, or placing bank books under the carpets, and solid silver under the coal heap, all designed to baffle the wilful desires of conscienceless people who persist in believing that "the world owes them a living."

All this unavoidable anxiety can be saved by renting a box in a safety deposit vault where valuables are absolutely safe.

The National Safe Deposit Co. of New York occupies a large portion of the first floor and basement of the magnificent new addition to the office of the Mutual Life Insurance Co. of New York, the greatest financial institution in the world.

This is a very convenient location even for people who live far up-town. The elevated railroads are each within a short distance of the company's offices, and the Broadway cable cars pass within one short block.

The safes and vaults of this company are guarded by all the latest appliances of steel, steam, concrete and electricity.

The material of which the main vault is constructed weighs seven hundred and fifty tons. This vault is nine feet in height, fifteen feet six inches in width, and forty-three feet ten inches deep. Floor, ceiling and walls are composed of steel, three inches in thickness, backed by concrete one foot thick.

The boxes in this vault vary in size and cost, the cheapest being $5 per annum, the highest, $250.

They equal in size those furnished by any other safe deposit company. Each box is of steel, made by the Mosman Co., and contains a sliding inner box for the reception of valuables.

They have various styles of locks adapted to every requirement, and upon the larger boxes, combination locks, which persons renting can adjust to please themselves.

The entrance to the vault containing the boxes is protected by two immense doors, which are supplied with superb combination time locks. The inside door weighs two tons, and the outside door six tons. Above the outer door is placed an innocent looking piece of pipe; this is connected with the boilers in the great engine room of the Mutual Life Co. In case of riot, or any attempt by a mob to enter the vault, the steam from the boilers—heated night and day, winter and summer—can instantly be turned on; no human being could stand near it and live, and the entire apartment would be made untenable.

At night the vaults are protected by electric bells and clocks, and are under the constant supervision of the corps of watchmen, while the entrance to each vault is guarded by double gates of inch and a half steel.

There are special rooms provided for trunks, pictures, silverware, merchandise and other valuables, and there is a charm about the place, because it is so bright, light and airy, which is in strong contrast to many of the dingy quarters devoted to storage purposes elsewhere.

Mr. James C. Holden, for many years a trustee of the Mutual Life Insurance Co. of New York, is the president of the company. He is a thorough business man, energetic and indefatigable and ambitiously interested in this new enterprise. Under his wise administration of the company's business, success has been achieved in all its varied departments of usefulness, and its future stability becomes an assured fact.

The secretary and manager of the company, and upon whom falls the greater part of the detail work, is Mr. J. Lynch Pendergast. He was for many years assistant manager of the State Safe Deposit Co., his experience in which position enabled him to bring into his new management a practical knowledge of the business that has proved of immense benefit.

Since its establishment the public has taken kindly to the new depository on account of the cheapness, security, accessibility and convenience of its new quarters, all of which will be abundantly verified by an examination of the premises.

This Old Country.

Good times or bad times, we're with this country still;
With her on the mountain top or slidin' down the hill!
Don't care how corn's a-sellin', if cotton's high or low;
This old country, brethren, is the best one that we know!

Good times or bad times, we're with this country still;
Every time we feel her shake we have a friendly chill!
Don't care how things is goin', nor how the tempests blow,
This here old country, brethren, is the best one that we know!

Good times or bad times, we're with this country still;
With her when we sow the grain, an' when we go to mill.
Don't care what's in the future; we'll whistle as we go,
For this old country, brethren, is the best one that we know!

—*Atlanta Constitution.*

The man who makes and the man who sells the best things has not done his duty when he stops with making and selling. He must tell the people what he is doing. It is a duty he owes himself. It is a duty he owes the people. The makers and sellers of good things are not doing their full duty to society. They cannot expect people to come and hunt them out. They cannot expect people to think and become educated along lines when it is their duty to do this for them. The most of the people do things because others tell them to do it—not in response to command, but as a result of appeals to them in such a manner as plays to best advantage upon the foundations of activity, the emotions, the passions and ambitions.—*Michigan Tradesman.*

The Crown Gem Sectional Steam Heater.

The heating of modern houses has had more attention bestowed upon it of late years than is generally known, and the skilled productions in this line are numerous. Johnson & Co., Catskill, N. Y., with New York office at No. 84 John Street, are placing upon the market a line of steam and hot water heaters which, under the names of the Gem, Royal Gem and Crown Gem, have achieved marked popularity, and with the added improvements of the present year, will be found strictly up-to-date. We give below a description of the Crown Gem Sectional Steam Heater, a sectional cut of which is given in Fig. 1.

In the construction of this heater the form best calculated to utilize to the fullest extent the natural laws provided for our assistance, has been selected. The amount of grate surface in each size heater is claimed to be ample to maintain the most economical rate of combustion. The heating surface is arranged to absorb the greatest amount of heat produced by the fire; the disposition of the surface allows the fire to pass freely to the top of the heater, thus placing the intense heat of the fire at the upper part, where it is needed to insure a quick supply of dry steam. The water chambers are chambers of circulation; they are made for active business in every nook and corner of them. The water-ways are arranged in sheet form, shallow, and are entirely surrounded by heated gases, so that an enormous crown-sheet-surface is obtained. All joints are screwed joints, and are on outside of boiler, where they can be easily reached. The fire-box is deep and roomy, and is fitted with a large feed door, through which every part of

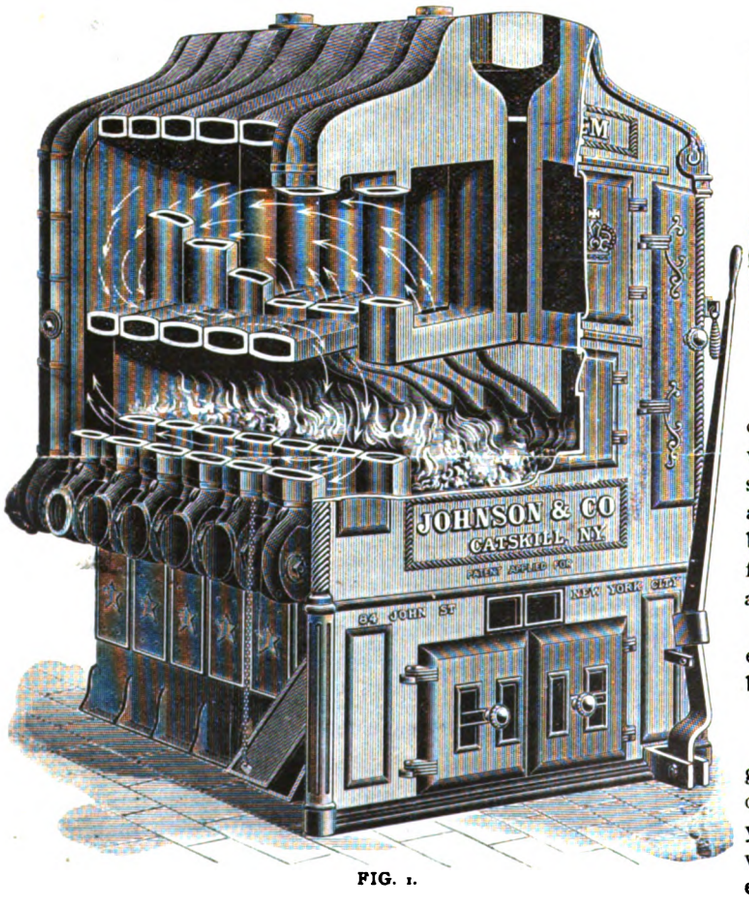

FIG. 1.

it can be reached. The fire is entirely surrounded by water, thus every inch of the fire-box is heating surface. The fire-travel is consequently most thorough: passing to the back, where it is compelled to divide and pass to the front through the upper side flues on each side, thence back through the lower side flues to rear of boiler, and finally through smoke-pipe collar to chimney. A direct-draft damper is provided for use in starting fresh fire. The boiler is fitted with a rocking grate, the bars of which can be removed and replaced through openings in side of ash-pit provided for that purpose. Clean-out doors are provided front and rear, through which the flues can be easily cleaned. Non-conducting material is furnished for covering each boiler, thus preventing any loss of heat.

In the construction of this popular heater, the fire-travel being on horizontal and the circulation on vertical lines, its capacity is largely increased.

Fig. 2 shows an intermediate section, a front and back water section, and the smoke drum. As will be seen,

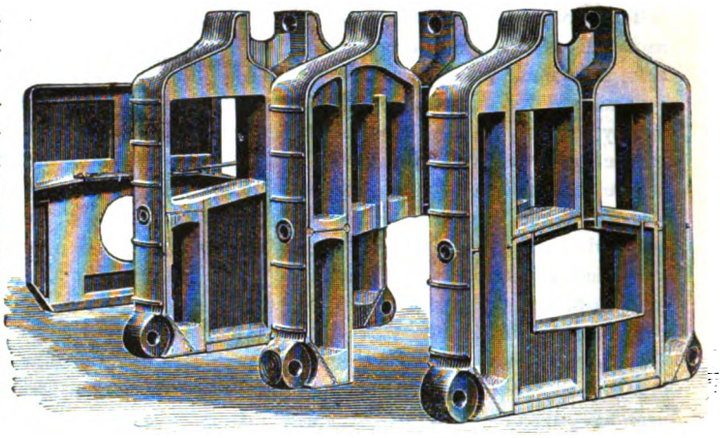

FIG. 2.

these sections present an immense amount of surface to the action of the fire. In Fig. 3 is shown the grate and base.

Perfect grates are not numerous, and it is conceded that the grate which sustains the fuel, admits air in proper

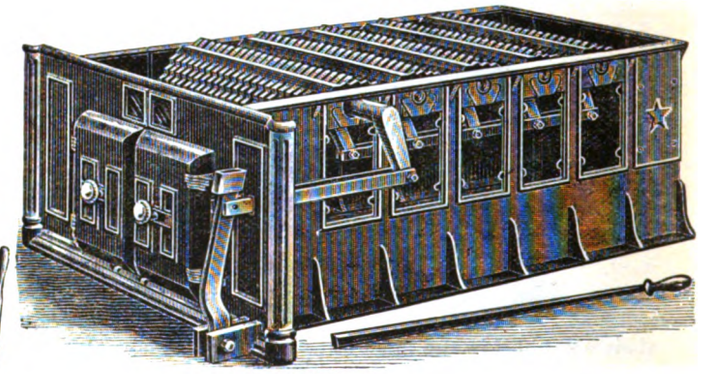

FIG. 3.

quantities and can keep the fire clean of ashes and clinkers when required, embodies all the desirable features necessary for a grate. The grate bars in the Crown Gem are accessible from both sides of the heater, being held in place by dovetails, and can be easily removed or replaced in a few minutes by simply taking off panels on either side of ash-pit.

Those interested in the subject of properly heating modern houses will do well to send for catalogue, which will be forwarded on request.

From a paper read by Col. E. D. Meier before the Engineers' Club of St. Louis: "I have compiled some statistics on boiler explosions. These show that for the fourteen years ending with 1892 there have been 2685 explosions, with 3384 deaths, and 5185 injuries. This means that every explosion causes 1.37 deaths and 1.93 injuries, or a total of 3.3 persons. Estimating the value of a life at $5000, and injuries the same, every explosion causes a loss to the community of $16,000, and the loss foots up $3,000,000 to $5,000,000 per year. Yet less than 4 per cent. of this loss occurs on steam vessels, the only boilers that are subject to inspection. This proves that inspection and regulation will reduce the loss to the minimum."

Homer mentions locks and keys, and Pliny attributed the invention of locks to Theodorus of Samos, B. C. 730.

Recent Trade Publications.

We have received from the Boston & Lockport Block Co. Boston, Mass., their illustrated catalogue and price list of "Star Brand" Blocks for 1897. It is the most complete catalogue of tackle blocks that we have seen, making a volume of 112 pages, well printed on fine paper and worthy of preservation by the dealer who may receive it. Among the various styles of blocks with which the catalogue is filled that are regular and well-known to the Hardware trade, we notice that the volume also embraces: Metaline, Fords and self-adjusting five-roller bushed wrought iron, steel and wooden blocks: Batts' patent differential hoists; Loud's patent diaphragm pumps; wire rope blocks and sheaves; warehouse trucks, lignumvitæ work, etc. The company are large and extensive manufacturers of store and warehouse trucks of every description, including in the assortment the New York, Boston and Western patterns, and railroad, barrel, cotton and steamboat trucks; hotel trucks, with rubber wheels; trunk carriers and baggage and express barrows. They illustrate fifty varieties of these goods, making their catalogue in this side line alone an extremely useful one to the Hardware dealer, and by the aid of which a dealer may frequently make a sale. They are also large manufacturers of mallets, both square and round. We notice a few original features in catalogue construction which will commend it to the dealer. At the foot of each page showing their varieties of blocks, they state whether the goods are made exclusively at their East Boston factory or at the Lockport factory, or are made in common at both factories. Recognizing the fact that the hook of a tackle block is the first part to give out, they have had tests of hooks and shackles made at the Watertown arsenal, which tests are given on page 105, and will prove very useful to the trade, as it conveys the idea that where heavy weights are being handled, shackles should be substituted for hooks wherever practicable. On page 21 they illustrate the usual yacht blocks, demanded by the trade, and in a compact form show twenty-two varieties of same. This extremely useful catalogue should be requested by every dealer handling this important line of goods that has not yet been favored with a copy.

From the Wm. Rogers Mfg. Co., Hartford, Conn., we have received their new catalogue No. 45, showing in detail the full line of "Rogers' Anchor Brand" Silver-plated Flat Ware. This catalogue is a carefully printed pamphlet of 120 pages, on good paper and fully illustrated. The necessity for issuing a new catalogue at the present time is stated "to be on account of the continuous originating of new designs, which show the results of riper knowledge and richer experience gained by supplying the wants of the world in this line." Among the many handsome designs with which the volume is filled, following closely as they do the various artistic styles associated only with solid silverware, we notice the beautiful pattern named "Plymouth," which would seem to meet all the requirements of a cultured taste in table adornment and enjoy the extended sale which its artistic outlines undoubtedly merit. Many other recent and desirable patterns continue to maintain their vantage ground with the trade, and are made prominent in this catalogue; among them we notice the "Shell," "Victoria," and "Chevalier," that continue their previous popularity. The catalogue should be in the hands of all Hardware dealers handling this style of goods.

Smith & Egge Mfg. Co., Bridgeport, Conn., have published for the Fall trade their 1897 catalogue No. 3, of Hardware, plumbers' and bicycle specialties, forming a pamphlet of 40 pages. It embraces in its varied contents, belt punches and tubes, Yankee rat and Wizard mouse traps, Giant metal and other steel sash chains, window sash pulleys, sash fixtures, and steel and copper cable chains, Eureka patent shears, Giant drill chucks, adjustable socket wrenches, government finish padlocks, closet pulls in great variety, plumber's chains, basin, bath and wash tray chains, split links and "eight" hooks, basin chain holders, and pipe straps in large variety. Among cycle sundries the company manufacture bicycle and sprocket padlocks, bicycle wrenches, hardened and finely finished, and "Giant" toe clips, with single or double bolt, and coasters and lamp brackets, made from cold rolled steel. The company state their long experience as manufacturers enables them to furnish goods which are regarded as "standard" for quality of material and perfection of workmanship. Their sash chains "having been in constant use for the past 20 years, have established a record for durability," certainly unquestioned by the trade. Catalogues furnished the trade on application.

From the Logan-Gregg Hardware Co., Nos. 125 to 131 Seventh Street, Pittsburg, Pa., we have received their autumn and winter catalogue for 1897–1898, which is a pamphlet of 130 pages, 9x12 inches in size, filled with excellent illustrations of seasonable goods, embracing in its contents: Shotguns, rifles and revolvers, ammunition, skates, sleds and sleigh bells; weather strips, door checks and thermometers, etc. Plated ware, pocket and table cutlery are also largely represented; in fact, it is a full compendium of seasonable wants of every description and will be found of great convenience by the customers of the enterprising house which issued it.

An Electric Show.

The development of practical electrical science will be illustrated in the next American Institute Fair by exhibits. The old American Institute, now in its seventieth year, is aggressive in its announcement of a strong and a long show at Madison Square Garden, to run from September 20 to November 4, 1897. The officers of the Board of Managers of the 1897 Fair are Dr. P. H. Murphy, chairman; Oliver Barratt, vice-chairman; Alfred Chasseaud, general superintendent, and George Whitefield, Jr., secretary. The American Institute rooms are at Nos. 111–115 West Thirty-eighth Street, but the general superintendent, until the Fair's close, will maintain an office at Madison Square Garden.

The Fair's management has planned as an especial attraction to the public a flower show which in extent and cost has never been equalled. It will be scientifically classified and a wide range of species of plants will be accessible to lovers of flowers. The show of fruits, nuts and vegetables. too, will be the most complete ever seen in New York City. The machinery exhibits will be numerous and will include new inventions of practical worth and unusual interest. There will be a choice collection of paintings and statuary representing the best efforts of America's greatest artists and daily concerts by the Old Guard Band.

It was the American Institute which, in one of its fairs, first demonstrated to the doubting world the practicability of Morse's electric telegraph and other lesser but important electrical inventions. The managers of the 1897 Fair would be pleased to see the electrical section made, if possible, the most important of all the Fair's departments, appreciating as they do the importance of electricity in the world of to-day and to-morrow.

The electrical section will include everything pertaining to telegraphs, telephones and their construction, signals and alarms, electrical, medical and surgical apparatus and instruments, motors, electric lighting devices, and models of or apparatus and instruments used in electrical processes. All inquiries should be addressed to Alfred Chasseaud, general superintendent of the Fair, at Madison Square Garden, New York City.

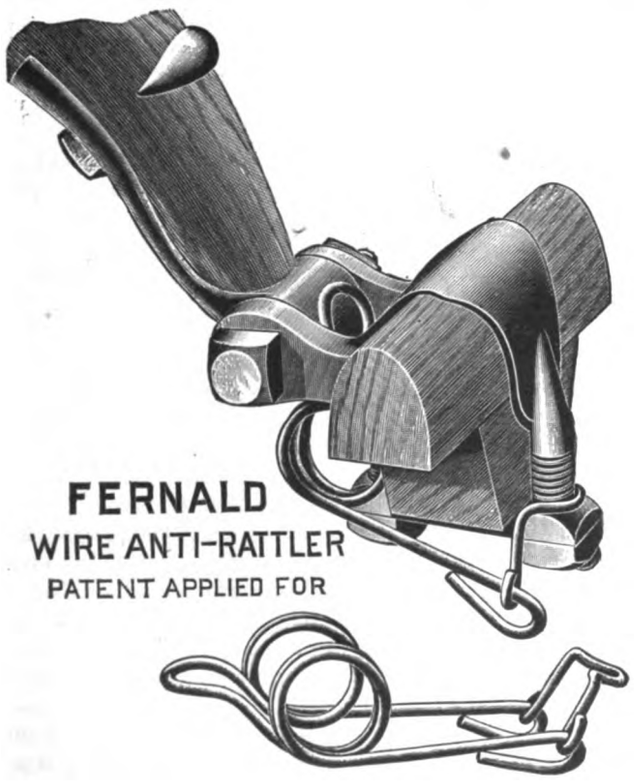
NEW GOODS AND SPECIALTIES.

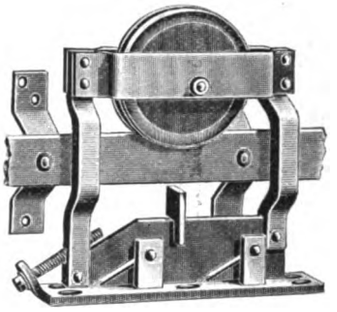
Pike's Mounted Sharpening and Scouring Stone.



The Pike Mfg. Co., Pike Station, N. H., and No. 151 Chambers Street, New York, have introduced a mounted sharpening and scouring stone for table, kitchen, butcher and similar knives, as shown in the accompanying illustration. It consists of a sharp grained sandstone about

8½x1½ inches in size, mounted in a neat box. It is recommended by the manufacturers as particularly useful in sharpening all knives that require a coarse, quick-cutting edge, and can be used also for scouring sinks and similar surfaces. The box, while making it more salable, protects the stone from breakage. The article is referred to as peculiarly suited to the house-furnishing and woodenware trades. It is designed to be retailed at 15 cents.

Fernald's New Wire Anti-Rattler.



The Fernald Mfg. Co., North East, Pa., are engaged in manufacturing the Wire Anti-Rattler of which we give an illustration below, and is one of their newest devices for this important use, and bids fair to supersede others less modern in construction which have hitherto been popular in the trade. This anti-rattler is extremely neat in appearance, very easily adjusted and sufficiently low in cost as to

enable it to be sold at a popular price that will create a wide distribution. The above company also manufacture Burton's Anti-Rattlers, Nos. 1, 2 and 3, and also the Wire Drive and Gem wire anti-rattlers, Dandy clothes racks, thill supports, etc., making a good line of salable specialties for Hardware trade.

Lane's "Ball-Bearing" Parlor Door Hanger.

Lane Bros., Poughkeepsie, N. Y., have recently added to their line of valuable specialties a new parlor door hanger which will attract attention from architects who recognize the advanced mechanical ideas prevalent at this

time. This new hanger, as will be seen from the illustration presented herewith, while retaining all the well-known valuable features of the Lane's Standard Parlor Door Hanger, with which the trade is so familiar, has been greatly improved by the adoption of the steel ball-bearings which have made bicycles so successful in ease of propulsion. A parlor door hanger constructed so conscientiously is more expensively made than by the usual methods, and is justified by the fact that its position in the frame work of the dwelling when in use, is so extremely inaccessible. The makers lay considerable emphasis upon the excellence of this bearing, which conforms in every particular to the latest bicycle practice, and they firmly believe the improvement will be highly regarded by all architects to whose attention it may be drawn, and be fully appreciated by the dealer.

The Fulton Sign and Price Markers.

The Fulton Stamp Works, No. 22 Beekman Street, New York, are introducing to the Hardware trade, through whose agency large sales can be made, the Fulton Sign and Price Marker, which we illustrate herewith. (Fig. 1.) It is really a remarkably complete outfit, costing but a nominal sum, for by the aid of which, any business is enabled to supply their own show and price cards for store and window use; being handsome and attractively made, in this

FIG. 1.

manner they greatly facilitate the sales of such goods to which they call attention. The outfit consists of a series of rubber stamps embracing every letter in the alphabet of the size selected, which may be any size from ⅛ to 4 inches; it also includes the complete set of numbers, a variety of ornamental figures can be added as well as other features which a perusal of their unique catalogue will suggest. The two most popular sizes of letters used in the outfits referred to, are shown in Fig. 2 and Fig. 3, being 1 inch and 1⅛ inch respectively. Boxes

Digitized by Google

and barrels can be very plainly marked by the aid of this useful outfit; bulletin boards for any line of business; bills of fare for restaurants; headings for sample cards in stores, and in a thousand and one ways they can be conveniently turned to profitable account, that would make them a valuable adjunct to the usual equipment for

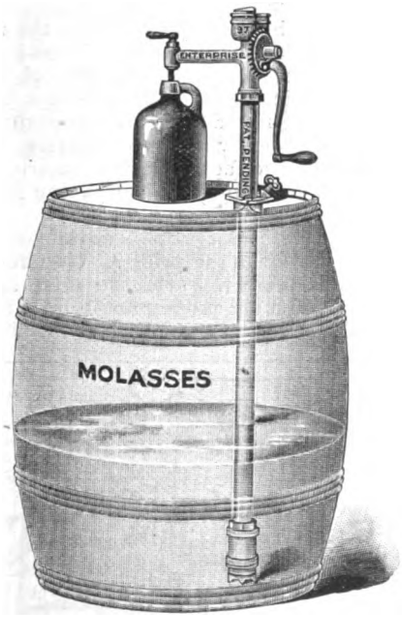


FIG. 2.

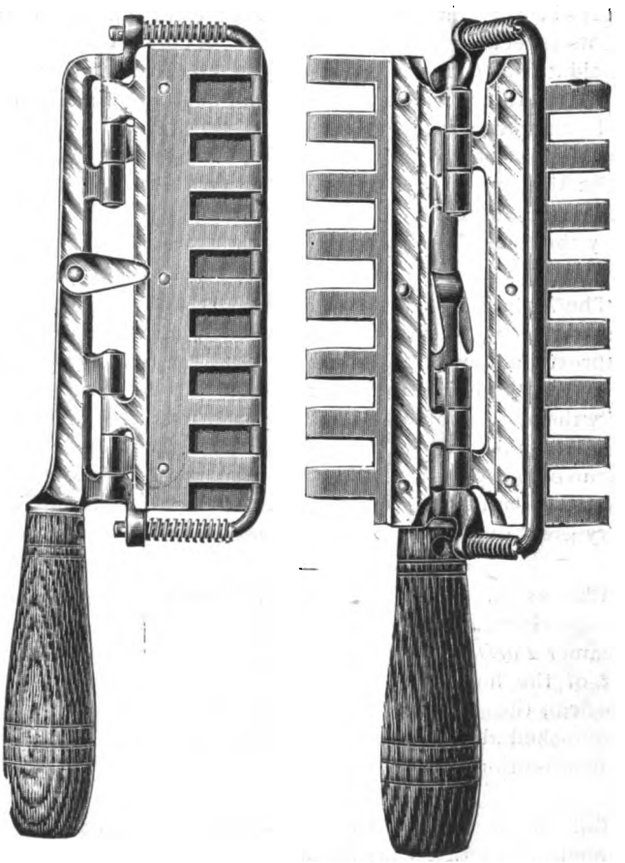
FIG. 3.

store use. They entirely supercede the use of stencils and the work is done more quickly and neatly, looking very much as though it was printed. The catalogue of these goods shows every style of letter and design which are obtainable. They can be used for every country, being suitable for any language. For the use of the export trade, catalogues are published both in English and Spanish, and will be supplied upon request of the manufacturer.

Enterprise Self-Priming and Measuring Pump.



The Enterprise Mfg. Co. of Pa., Philadelphia, Pa., are placing upon the market the Self-Priming and Measuring Pump of which we give an illustration herewith. It is designed for the measuring of molasses, heavy oils, tar and other thick liquids, and is claimed by the manufacturers to possess advantages and novel features not to be found in similar goods, among which may be stated the following: No priming is required, as the pump is ready for use

immediately after insertion into the barrel. It has a patented clamp, oparated by a thumb-screw only, by which it is fastened to the barrel. A special three-inch auger is furnished, to use for boring a suitable hole for inserting the pump. It will pump all the liquid out of the barrel. When desired, the manufacturer will furnish an extended tube, by the aid of which liquids may be pumped from the cellar to first floor. It will pump equally as well any heavy liquid, the self-measuring feature pumping a gill with each revolution of the crank, four turns giving a pint, etc., all of which is properly and carefully registered on the dial. The fact that the Enterprise pump requires no priming, will recommend it strongly to the general trade requiring this appliance, as the want of this description of pump has made its use in many ways more limited and restricted than will now be the case. As it is tinned throughout, its constant cleanliness is thereby assured.

The Peerless Meat Tenderer.

John Chatillon & Sons, Nos. 85 to 93 Cliff Street, New York, have enrolled themselves among the benefactors of the human race by placing upon the market the Peerless Meat Tenderer, which we illustrate herewith. It possesses all the advantages which have made less modern contrivances prepare the way for this perfect appliance, and enjoys the distinction of being easily opened, readily cleaned

and conveniently sharpened. The ease with which it can be cleaned prevents the lodgment of particles of meat, which, left only a short time, become very objectionable to taste and smell. It is opened by simply pressing aside the catch, and this should make the tool very popular, such a device being almost indispensable in hotels, restaurants and meat markets.

Unexpected Prize.

A traveling circus recently paid a visit to Clitheroe, and, as an attraction, offered a prize to the man who could, as the Lancastrians term it, "pull th' ugliest mug."

The rules laid down were that each person should have three tries. Consequently competition ran high. Some of the contortions were horrible to behold. After all had done their level best to win the prize, the clown, who acted as a judge for the competitors, coolly confronted a man sitting in the audience, who was noted for his ugliness, and said:

"Tha's won th' prize, owd mon."

"Me?" said the astonished individual. "Wha, aw worn't trying for't."

"Tha'd noa need to try. Tha's won it wi'out."—*London Telegraph.*

The Kearney & Foot Strike Ended.

The strike at the Kearney & Foot file factory, Paterson, N. J., came to an end on August 26, after the men had stayed out since April 15. The men return to work without conditions, being willing to accept the scale of wages they originally repudiated. About 100 men will have to remain out until they are sent for, as the works will not be ready before September 15, and owing to opening the branch factory at Kent, Ohio, the Paterson shop will employ fewer men than was customary before the strike.

L. D. Berger, manufacturer of tinners' Hardware and roofers' supplies, No. 59 North Second Street, Philadelphia, Pa., has issued two handsome cards, which illustrate several things in connection with his successful business. The first of these says "There's Money In It"—which means in Berger's Circle Eave Trough Hangers. The other points especially to "Two Things." These two points are elucidated as follows: "When you buy Roofing Tin, you want two things: First thing—good quality—tin that will last—tin that is made intelligently—tin that will stand the onslaughter of sun and rain and snow. Second thing—you want the price to be right. You get both those things when you buy of me. L. D. Berger's Old Method is not only the finest Roofing made, but the price is low."

The Armstrong Mfg. Co., Bridgeport, Conn., and No. 139 Centre Street, New York, have recently made a number of improvements wanted by the trade in their No. "O" Pipe Machine, ⅛ to 2 inches, and it is referred to as "unquestionably the most complete and universally liked tool of its kind on the market to-day." They are also making this machine to run by power as well as by hand, to suit the work of large shops and mills, and report that the demand for it has been very great during the last few months.

Charles E. Jennings, of C. E. Jennings & Co., No. 79 Reade Street, New York, started September 8, on the steamer *Paris*, upon his annual trip to Europe, in the interest of the important lines of special goods controlled by his firm, the growing markets for their products already established abroad through his efforts necessitating continuous attention.

Col. A. A. Pope, president of the Pope Mfg. Co., returned to America some days since on the American liner *Paris*, the picture of health and happiness. In response to the inquiries of a reporter, he spoke well of business conditions and the outlook for the future.

When values are hardening the heart of the mercantile man begins to soften.

Review of the Markets.

Trade circles in every part of the country show an impetus which for a long time to come will prove irresistible, and upon which predictions and prophecies have become certainties. Staples, such as nails and heavy Hardware, are feeling the effects of these improved conditions, and lead the procession in the confident stiffening of prices which will rapidly become more general in all the other leading lines.

Wire Nails: As our wire nails have now precedence over those of Germany, where both are known, large shipments have recently been made on export account, which, combined with unusually full requisitions from the jobbers to replenish their stocks, has had the effect of creating a degree of stiffness to the market gratifying to notice. The price will be well sustained and will undoubtedly touch higher figures, when the thousands of retailers make a movement to secure their supply for fall trade, this demand always coming late on account of the length of the season. The price has advanced and is firmly held as follows: Carload lots at mill, f. o. b, $1.40. New York prices: Carload lots on dock, $1.55; smaller lots from store, $1.65.

Cut Nails: The demand for cut nails strengthens in harmony with that of wire nails, and increasing sales are the result; prices have not materially advanced as yet, being held as follows: Carload lots on dock, New York, $1.33; smaller lots from store, $1.43.

Linseed Oil: Under date of August 30, the Dean Linseed Oil Co., No. 181 Front Street, New York, quote prices as follows: In lots of less than 5 barrels, 39 cents per gallon; in lots of 5 barrels or more, 38 cents per gallon. Boiled linseed oil, 2 cents per gallon higher. Calcutta oil, 54 cents per gallon.

THE BIRMINGHAM TRADE.

There has been a decided improvement in the manufacturing and commercial interests of this district. The mines and furnaces are working on full time, with a ready demand for their products, thus giving a full pay-roll which will distribute more money and improve the condition further. The machine shops and factories are behind with their orders, and our people are more cheerful. The architects are also busy and the contractors have work to do. Add to this the railroad building, which will give our State several hundred miles of new railroad, and also three large cotton factories now under construction, and you will see that our claims are not altogether theoretical, but based on good foundation. Perhaps the national lawmakers will conclude that because these are simultaneous with a raise in the tariff, that that is the producing cause, but this seems to us to be poor logic, since the law has not had time to prove what its effects will be. We might better reason as to the effect of the law by watching the results of a quarter of a century of high tariff, which has had the effect of lowering prices of merchandise and also of labor—since the duty on many articles has ceased to be a factor in the price which is now regulated by home competition, many of the articles being sold down approximately to the duty. This is also shown in the fact that the American manufacturers are exporting with profit, even paying freight to get into competitive territory.

Who can say that the duty on steel rails or steel billets or pig iron is any factor in the price? We understand that a high tariff is intended to raise the price and help the manufacturer sell for more money and to pay better prices to labor; once this was true, when we could not supply our

Digitized by Google

home demand, but since we have plenty and to spare the price is made by home competition and it is no longer true. Now the high tariff advocate is like a man rowing a boat—he looks in one direction and travels in the other. The doctrine of protection is wrong; it teaches the citizen to look to his government for aid, when the true doctrine is that the government must look to the citizen for support and leave the individual largely on his own resources, thus thoroughly developing the citizen and calling forth his best efforts. The sub-treasury plan of the farmer to borrow government money cheap grew out of the doctrine that he had equal rights with the manufacturer at the treasury of Uncle Sam, and who will say he has not? The Chicago convention is a more vigorous youth of the same school. Let the tariff-maker wait awhile before reaching conclusion too soon. It is true we see signs of prosperity, but a kind Providence, in furnishing large harvests and a heavy export demand, has done more than all of the lawmakers could ever do, by keeping the balance for Uncle Sam on the right side. The shallow doctrine that the volume of currency regulates the price seems to be well refuted. The effect is going in the natural channels from wheat, cotton, iron, etc., to the money instead of the money to the product. The rise in wheat and cotton will give us a large increase in the volume of currency, and that, too, of the best kind and not of a cheap, irredeemable kind. This has been the case, and will ever be, that when there is a substantial demand for money it usually comes, and comes only when there is work for it to do. We are hopeful and cheerful. Why not be?

MOORE & HANDLEY HARDWARE CO.

THE PITTSBURG TRADE.

The coal strike is the question of most interest in local affairs at present. The contending parties seem to be getting close to a settlement of their differences at this writing, and if this is effected within the next few days, the mercantile part of the community, at least, will be truly thankful. The public cannot enter into all the complexity of questions in such a contest as that now ending, but will be satisfied if a substantial basis is reached that will give living wages and steady work. We might say, however, that probably the underlying factor in the whole thing is, the big operator using machinery versus the small operator using hand labor, and it is not hard to say which will eventually win.

A fair volume of business is doing, but no great stir, and "prosperity" might strike us a good deal harder than it has, without injury.

A movement has been started to follow the example of the Eastern cities, in offering special inducements for merchants to visit our city during the Fall months.

We have a good deal to show people if we can get them here, and a visit will open the eyes of a good many people who think we have nothing to show but coal mines and iron works. We have these, and besides beautiful parks, and public and private buildings, worthy of the time spent in viewing them, besides merchants able to compete with any city East or West.

LOGAN-GREGG HARDWARE CO.

THE BALTIMORE TRADE.

Have you ever experienced the joy of meeting, after a long absence, some cherished friend? Of course you have. You are advised that he will reach the station at a certain hour. You make it a point to be there on time. You wish to be the first to greet him, and take up a position as near the gate as possible. In comes the train, the locomotive blowing and puffing like a thing of life. The passengers alight—slowly at first, then more swiftly—they pass through the gates. How eagerly you scan each travel-stained face, seeking for the long absent friend! They pass you by without sign of recognition; the gates are closed—your quest has been in vain. Your heart sinks at the disappointment—the anticipated pleasure, as a broken goblet, lies shattered at your feet. You turn to leave the depot when a voice calls out "Hello! Old Fellow," and before you stands the object of your search—taller than of old, broader and browner, but with the same glad light in his eyes, the same hearty clasp of the hand.

If the above recital appeals to the social side of your nature, there is another almost parallel which might interest the commercial part of your being. For the past twelve months the business world has been awaiting the coming of General Prosperity (portly, pompous old General Prosperity). At different times and in divers places his presence was announced; but upon investigation the reports proved fallacious. False prophets arose in the land proclaiming his advent from the housetop and editorial den. But he failed to materialize. Even with the help of an advance agent, the coy old codger, like some fractious prima donna, positively refused to put in an appearance. Weary with watching and waiting we turn to leave the station, when lo! he is in our midst. "How did he come in?" Opinions differ as to that. Some say via Klondike; but the writer's humble opinion is that he arrived on the Western limited with the first train load of dollar wheat.

Now to get down to business. Trade in this section has been very active, the closing days of August bringing in the largest volume of orders we have had for a long time. From all sections of territory tributary to this market (except the coal mining district) orders are coming in freely, quantities fair and well assorted. An active demand for seasonable goods and free purchases of staples and shelf hardware—guns, particularly in the cheaper grade of Belgian breech loaders, are moving rapidly, ammunition, without profit, being, of course, a prime favorite. Cutlery sales show a marked improvement.

A local cause for considerable gratification presents itself in the statistics of exports from this port. The month of August has been declared the banner month for exports from the port of Baltimore. The grain shipments exceeded nine million bushels, having a money value of $10,243,391.

While eighty-five foreign bound vessels and steamers were engaged in moving this vast export, it is with regret we admit that not one floated the American flag. This condition calls for some remedy.

Collections show continued improvements.

TABB & JENKINS HARDWARE CO.

THE CHICAGO TRADE.

We have but little time now which we can afford to devote to letter-writing. We are too busy buying Hardware to fill our orders, which, we are pleased to say, are more plentiful than they have been at any time during the past eighteen months.

Our August business was twenty per cent. greater in amount of goods billed than that of August, 1896, and on account of the differences in prices, it was probably twenty-five per cent. greater in bulk of goods shipped.

We think that the condition of our business fairly represents that of the Hardware trade of Chicago.

We can hardly see why, under the improved condition of trade, Hardware prices have not advanced more; perhaps Hardware manufacturers have learned prudence from past unsuccessful attempts to boom prices, and now err on the side of caution.

It seems to us that the present active demand for Hardware warrants more decided advance in prices. In this market prices of all other lines of merchandise, groceries, provisions, dry goods, leather, etc., have advanced more

than Hardware has, and merchants in all lines report good demand for their goods.

Of course, the market here for Hardware is strong and all changes which take place in prices are upward, but the fact remains that Hardware prices are low and have not advanced in proportion with other commodities, consequently we look for a gradual but constant improvement in this direction.

We feel that prosperity is near, and that if there remained six months more of 1897, instead of four, we would yet make a good and prosperous year of it.

WELLS & NELLEGAR CO.

THE BUFFALO TRADE.

It affords us great pleasure to be able to re-echo the glad tidings that the signs of improvement in business are gradually increasing.

There is no chance in the assertion that reports of late are welcome to all and are gratifying in the highest degree. As for ourselves, we have no fault to find with the first half of the year, nor can we really complain of the past two months; still they do not compare as favorably with the corresponding period of a year ago.

In pinning our faith to the continued improvement, we do not do so in the hopes of a boom. On the contrary, we earnestly hope that this will not occur. We much prefer a gradual and permanent increase. This would be a healthy state of affairs, and there would be no bad result to follow.

It appears to us that a great deal depends on the individual as to the permanency of the present business revival. That is, good business judgment must be the foundation. Manufacturers should be judicious and not overload the market; buyers should be cautious in their purchases, and not anticipate beyond their legitimate and apparent actual requirements. With these fundamental principles kept before us, and heeded, there will be less danger of evil results later on. The whys of this we need not enumerate, for the intelligence of the business men of to-day is too keen to require it. Suffice it to say that it is far more agreeable to have a demand for our wares at a fair profit, than it is to be continually forcing the goods on the market at slaughtering prices. With manufacturers fairly busy, competition is not so keen, the market firmer.

With the jobber supplied with orders, there is far less cutting in price.

It may be of interest to say a word in relation to the coming convention of the National Hardware Association of the United States, which will convene in our city early in November. We are looking forward to this occasion with no little degree of pleasure. It will bring to our city some of the most noted and successful business men of this country, and we shall then hear, from their own lips, something of the welcomed prosperity, which by that time will doubtless have reached all points of the country. The time for the meeting is most opportune, and we are most confident that the benefits derived will be profitable indeed.

It will give us great pleasure to greet each individual member of this Association or their representative, and to extend to them a most hearty and cordial welcome.

WEED & CO.

THE DAVENPORT TRADE.

Sales for August exceed those of same month in 1896. Linseeed oil advances became a little too hot, boiled over, and have settled two or three cents. Putty sticks at highest point reached. Pig lead is higher, and white lead corroders are squealing for a corresponding rise. Wire nails sustain about ten to twelve and a half cents greater market strength,

SOLD BY ALL HARDWARE DEALERS.

while cut steel nails are gradually increasing their hold on consumers here. A clear advance of ten per cent in window glass is maintained without a break. Increased cost of fibre has twisted rope up two or three points; it will stand a still greater strain. Drop shot has fallen about five cents per bag.

Hard times have left here, and will probably pick out Klondike for an abiding place.

SICKELS, PRESTON & NUTTING CO.

THE OMAHA TRADE.

The conditions of trade have never been more favorable in this locality since the spring of '92. A bountiful crop has been harvested in the line of small grain, and, unless in case of an early frost, the corn crop bids fair to be at least equal to anything that has been harvested in the past. The prices are such as to afford a handsome return to the producer. In fact, particularly in the western part of the State, where the crops appeared to be the heaviest, instances have been reported where the yield of winter wheat per acre was from thirty-five to forty bushels, and this, at a market price of sixty cents, yields a very handsome return on land that has been held to be worth in the neighborhood of $10 per acre. Mortgages and other obligations are being rapidly liquidated, and conditions are improving more rapidly than the most sanguine could have expected, and there appears to be nothing in the way of a fall trade that will tax to the utmost the capacity of the dealers to handle.

RECTOR & WILHELMY CO.

THE TOLEDO TRADE.

Although there have been no letters from Toledo for several issues, you do not want to take it for granted that we have been taking a vacation all this time; neither do you want to take it for granted that we were so busy that we could not have penned a few lines.

The fact of the matter is, we could not raise ambition enough to do anything except what had to be attended to. We were lazy.

In reviewing the trade for the last eight months, we find that we have handled considerable more merchandise in tonnage this year than the year before for the same period, but owing to the differences in valuation, and the extreme low prices at which goods have been sold this year, the same does not exceed last year's sales in dollars and cents.

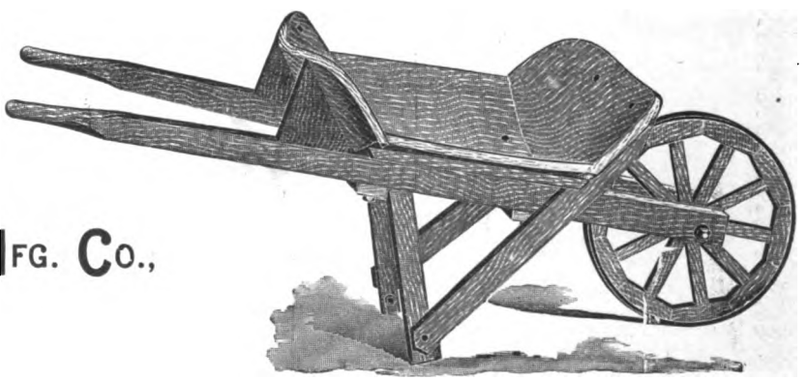
For the next four months we anticipate considerable of an increase in business over last year. Orders are coming in more plentifully, quantities are larger, and more items, so that we expect our old-time activity for the balance of the year.

Prices on staple lines are steadily advancing, which encourages buyers to purchase more liberally. Already we are having considerable difficulty in getting orders filled from the mauufacturers, which goes to prove that the manufacturers in the Hardware lines are busy.

Nails and wire have taken quite an upward jump. The price on bolts, screws, sheet iron and bar iron has stiffened, so that we believe the time of declines has passed, and that it will behoove dealers in general to keep a plentiful supply of goods on hand.

With abundant crops that are bringing good prices, and people employed, we have come to the conclusion that the good ship "Prosperity" has at last entered upon the Commercial Seas.

May she sail through placid waters, and not encounter any storms that might retard her progress!



STOLLBERG & CLAPP CO.

THE COLUMBUS TRADE.

Fall trade has started in very satisfactorily, and the orders average larger than they have for some time. The outlook is very encouraging for a big fall trade. Prices are more firm and many articles are higher. Nails and wire are steadily advancing by small degrees, which is better than one big leap. We hope neither one will go above a legitimate price, for the reason that they would soon drop back. We don't think they are too high yet, but with the stimulation in trade and the mills full of orders which they cannot bill promptly, there is danger of operators getting their ideas of profits a little too high. We hardly think they will lose sight of the fact that there are a great many idle nail machines that were in operation during the nail boom, that will be put in operation again if there is a good margin of profit offered. Rope has started on the up-grade also; sisal has advanced one cent from the lowest point. The corn crop will soon be made if the favorable weather that now prevails continues, and it will, no doubt, be very large, as there never was a more favorable outlook. Farmers are not complaining this fall, which is a very agreeable change. For two or three years they have been buying on credit; now they are paying cash in most cases. Last week in a neighboring town a lumber dealer had seventeen farmers' wagons at his yard buying lumber, and he

"SCIOTO" for R. R. or Canal Work.

said every one paid cash—a thing that had not been done for three years. Another merchant, a clothier in a small town, sold fifteen suits of clothes in one day and every one paid cash. We mention these instances to show that the long looked-for change from all charge to cash is a reality. In conversation with John F. Baker, of Dayton, Ohio, last week, he said he sold more tools in the last two weeks of August than he had from the first of the year up to that time. This is an indication that mechanics in Dayton have employment in sight. And we think it safe to say that every city can see a marked improvement in that branch of the Hardware business. An indication of the activity of Columbus factories is noticeable from the garden roofs in our city. A lady complained that her apartments had been very pleasant until lately; but now there was so much smoke from the factories that it is disagreeable; at the same time she was very glad to see the smoke. Another good showing is made in the cancellation of mortgages. A prominent attorney, and a strong Democrat, too, said that there had been over four million dollars of mortgages cancelled in Franklin County since January 1, 1897. These are certainly encouraging signs. We don't want to see a boom; but we do want, and expect to see a good business from this on. If we could be spared the blight of another presidential campaign for about eight years, it would, no doubt, be a blessing to the whole country. Some hungry office-seekers would feel bad; but that would not hurt business. Columbus was full of people last week during the State fair, and many out-of-town merchants were here and took in the fair, and also bought quite liberally. Columbus will have numerous attractions the rest of the month with low railroad rates, and, no doubt, many merchants will avail themselves of the opportunity of visiting the best jobbing city in the State. HIGH-GRADE RUBBER

Possesses a life and elasticity not found in low-grade at the start, and not to be imparted to it by any subsequent handling. A man can't give away what he hasn't got; neither can rubber—it is simply impossible for low or medium-grade goods to give the wear of high-grade. The wear of water-hose depends on the rubber tube; if the tube leaks, the duck next the tube rots and weakens the hose until it bursts. Leaks come from pin-holes or cracks; fine rubber prevents both—pin-holes, because it contains no foreign matter to interfere with the mixing—cracks because it is so full of life and elasticity that it is not injured by the continual bending and twisting of the hose. **1846 PARA AND DOUBLE DIAMOND HOSE HAVE UNUSUALLY FINE TUBES.**

MORRILL'S

Saw Sets, Bench Stops, Punches, Cutting Pliers, and Seal Presses.

TRADE MARK

This Trade Mark is stamped on all Saw Sets and other Hardware Specialties of my make.

MORRILL'S MASTER-PIECE, No. 95.

The revolving anvil with indicator sub-divided and marked with figures, the figures showing the number of teeth to the inch in the saw to be set; for example, if the saw has four teeth to the inch, turn the anvil until the figure 4 comes up directly in front of the plunger, and so on.

MORRILL'S UNIVERSAL PUNCH

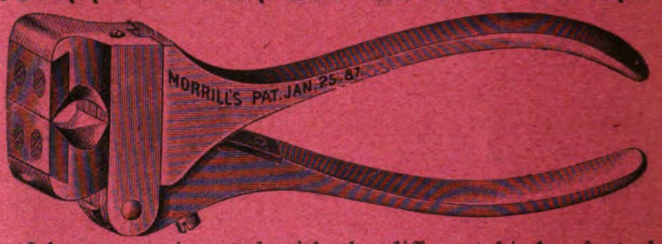
Seven and a quarter inches in length. An indispensable office tool. Powerful, simple, convenient, durable. Thousands now in use, with the highest satisfaction, in every branch of business.

MORRILL'S No. 5 SAW SET.

15 Inches in Length.

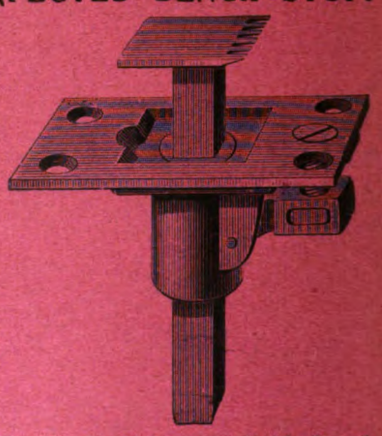
For Timber and Board Saws, from 6 to 14 gauge. The size of the saw in circumference makes no difference.

These sets are made strong, accurate and durable.



Saw teeth should never be twisted, but set at right angles to their points.

MORRILL'S No. 1 IMPROVED.



For Hand, Band and Jig Saws, from the widest made down to ¼ inch. The Sets are too well known for me to enlarge on them.

MORRILL'S PERFECT CUTTING PLIERS.

I have experimented with the different kinds of steel from all parts of the world, until reaching a satisfactory result, viz. Cutting *Piano Wire*. I now have the confidence to recommend the Cut Nippers over my signature, as being the best tool of the kind ever offered on sale.

MORRILL'S PERFECTED BENCH STOP.

No wood worker can afford to do without a reliable Bench Stop or hook, as it is sometimes called. The end that the screw is in should always be towards the operator. The spindle and working plate is of WROUGHT STEEL. The body is of malleable iron, rendering it the most durable and useful Bench Stop ever put on the market.

Write for Catalogue and obtain a complete list of specialties from which the few cuts above have been chosen.

RETAIL TRADE RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Hardware Stores.

Amherst, Mass.—Julius H. Trott.

Austin, Tex.—Caspary Hardware Co.

Bangor, Me.—Eugene Bradeen.

Fieldon, Ill.—F. Rowden. and F. Heitzig.

Gifford, Ill.—R. Carly.

Kansas City, Mo.—The Ferguson Implement Co. has been incorporated by W. R. Evans. Emma L. Ferguson and Gilbert J. Ferguson. Capital stock, $10,000.

Moline, Ill.—William Runge.

Nashville, Tenn.—The Woodruff Hardware Co.

Ontonagon, Mich.—G. Hillegass.

Port Henry, N. Y.—R. Langdon.

Walhalla, N. D.—McMurray Bros.

Williamsville, Ill.—Harley, Price & Co.

Changes and Removals

Barnard, Mo.—M. L. Parrish, succeeded by A. W. Strader.

Belfast, Me.—J. H. & J. W. Jones, Hardware dealers, have dissolved. The business will be continued at the old stand by Capt. J. W. Jones. J. H. Jones will continue as salesman for Baldwin, Robbins & Co , of Boston.

Delphos, Ohio.—Frank and Henry Gembe, of this city, and Chas. Busch, of Brookville, Ind., have purchased the Hardware store of George Auer, the finest and largest establishment of its kind in Delphos. The style of the firm name will be Gembe Bros. & Busch.

Frankfort, Ind.—Reed, McIntyre & Co. have dissolved. Mr. McIntyre will continue business at Frankfort, and Reed & Carter will run the implement store at Hillesburg.

Glasco, Kan.—Geiger & Co., succeeded by B. H. Geiger.

Hamilton, Va.—Bain & Paxson, corner King and Royal Streets, have dissolved, W. H. Bain having purchased the interest of Mr. Paxson.

Logansport, Ind.—Mrs. G. H. Prescott sold out to Mrs. J. Johnson.

New Hampton, Ia.—It is reported that A. F. Markel has purchased an interest in the implement and Hardware business of C. E. Marr.

Norwich, N. Y.—John W. Bingham has purchased the interest of Edward L. Rice in the firm of Holmes & Rice, entering the business September 1st. Mr. Bingham has been bookkeeper for the National Bank of Norwich for several years.

Pepin, Wis.—James Hallworth's stock has been purchased by C. F. Marcks.

Port Huron, Mich.—Sturmer Bros. have leased the Balmar block of Schoolcraft & Co. and will conduct business in same.

San Angelo, Tex.—John Findlater has sold to Haglestein Bros.

San Diego, Cal.—J. B. Daniel succeeded by Jason Hickey.

Stamford, Conn.—Tafft & Davenport succeeded to the business of J. G. Houghton, which they have acquired by purchase.

Stryker, Ohio.—Peter Charpist, whose large store was destroyed by fire last winter, intends erecting a fine new business block. Mr. Charpist has been in the Hardware business at this place for nearly forty years.

Terre Haute, Ind.—W. D. Morris & Co., No. 421 Main Street, have sold out their business to C. C. Smith's Sons' Co.

Union City, Mich.—Buell & Spring, stock purchased by Mr. Boise who will continue the business.

Van Couver, Wash.—Bennett & Co. have dissolved. J. B. Dupius continues.

Washington, D. C.—John B. Espay, No. 1010 Pennsylvania Avenue, has succeeded L. H. Schneider's Son.

Watkins, N. Y.—S. E. Banks of Ithaca, N. Y., has sold his interest in the Hardware firm of M. T. & S. E. Banks to A. C. Woodward, who for twelve years was clerk of Schuyler County.

Westerville, Ohio.—W. O. Bacon business purchased by W. C. Bale.

Williams, Ia.—Swanay & Utely succeeded by S. A. Allen.

Whitehall, Wis.—Peterson & Ekern, have dissolved partnership. They will be succeeded by Huleatt & Ekern.

Yankton, S. D.—W. H. Loeffler is moving his business to Armour.

Business Embarrassments

Chariton, Iowa.—James Gillespie, store closed by sheriff.

Chicago, Ill.—The C. H. Gurney Co., heavy Hardware, have failed. The liabilities are $60.000. Assets slightly more.

Clinton, Mass.—Bartlett & Johnson, stove dealers, composed of George A. Bartlett, of Holliston, and Fred. O. Joslyn, of Clinton, by their counsel, William H. Fay, have filed a voluntary petition in insolvency. The firm has been in business in Clinton since December, 1895, coming here from Holliston, where they were in the same line. The firm succeeded H. S. F. Sears. They did a small business, and the hard times had a serious effect upon them.

Cripple Creek, Col.—The Victor Hardware Co., the ownership of which was transferred to H. P. Roby, of Colorado Springs, has been closed under writs of attachment aggregating $25,000. The writs were issued from the United States District Court, and were served by United States Marshal Lovell, of Denver, who now has psssession of the store.

Cumby, Tex.—J. H. Blount, dealer in Hardware and farm machinery, made an assignment recently to M. M. Green for the benefit of his creditors. Liabilities, $2200; assets, $1000.

Scottdale, Pa.—O. A. Miller, store closed by the sheriff.

Iowa Falls, Iowa.—G. H. Wilson & Son, of this city, have made an assignment to the State Bank of this place for the benefit of their creditors. Their line is agricultural implements, and while they have done a good business, poor collections have necessitated their taking the step. The assets and liabilities are being computed and an invoice taken, but no figures have as yet been given out.

Nelsonville, Ohio.—E. D. Warren, store closed by sheriff under attachment. The inventory foots up $3800, and the claims already filed amount to $3500.

New York, N. Y.—Geo. V. Ellis, No. 245 West Twenty-sixth Street, has assigned to Edwin F. Stern without preference.

Princess Anne, Md.—E. P. Elsey, Hardware, made an assignment in favor of his creditors, naming P. M. Smith as trustee. Assets and liabilities unknown.

Seneca Falls, N. Y.—L. H. Cary, Hardware dealer, made an assignment to A. S. Pollard, for the benefit of creditors. Dull business and poor collections are said to be the cause of the failure.

Toronto, Canada.—L. H. Timmons & Bro., general store, Mattawa, have assigned to D. A. Dunlop.

Recent Burglaries.

Buffalo, N. Y.—Beals & Co. Loss, $500.

Conneautville, Pa.—J. S. Krick. Loss, $25.

Effingham, Iowa.—The Wallack Hardware store. Loss, $50.

Fairgrove, Mich.—H. W. Johnson. Loss, $25.

Flint, Mich.—Foote & Church. Loss, $50.

Greenville, Tex.—Collins Hardware store. Loss, $25.

Millersburg, Ohio.—A. B. Reedy & Sons. Loss, $50.

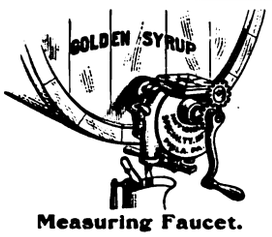
Orrville, Ohio.—J. F. Seas & Son. Loss, $800, in postage stamps belonging to Proctor Seas.

St. Louis, Mo.—Witte Hardware Co. Loss, $50.

Recent Fires.

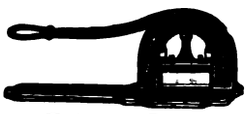
Ashley, Mich.—J. F. Busch, totally destroyed.

Catawba, Ohio.—C. F. McConkey; damage not stated.



Charleston, Tenn.—A peculiar accident occurred here August 6th, entailing heavy loss. Hall & Johnson, Hardware dealers, had their large frame store building, 80x36 feet, "jacked up" three feet, with the purpose of raising the building. On the evening of August 6th one of the jacks slipped from under the building, allowing it to collapse. The entire building was demolished, and the stock of goods was ruined. The loss will amount to several thousand dollars.

Cleveland, Ohio.—Worthington & Co. $3000 by the recent floods. They expect the city to make good their loss.



Greenwood, N. Y.—Willis Scribner, totally destroyed.

Ortonville, Mich.—C. F. James' Hardware store; damage, $1500. No insurance.

THE FULTON SIGN AND PRICE MARKERS

Are the best, most complete and cheapest outfits for Business men to make their own Show and Price Cards, to print Shelf Labels, mark Boxes, Barrels, etc., etc. There is in fact no business where they cannot be used to advantage. Newspapers are using them for their Bulletin Boards, Ministers for Church Notices. Theatres for Announcements, Restaurants for Bills of Fare, etc. Their price in comparison to their usefulness amounts to almost nothing; it saves the cost of Sign Painters and Ticket Writers. A Boy can do all the lettering required in the largest Department Store. They last a lifetime and can be used for every language. We have

50 DIFFERENT STYLES

to select from in sizes from ½ to 4-inch letters. For marking Boxes and Barrels for shipping, or labels, they are far superior to adjustable stencils; the work is done quicker and neater and without blurring, making it look as if printed on a printing press. Nearly 100,000 sets of the **Fulton Sign Marker** have been sold, and they are in use daily by all large wholesale and retail business houses in the United States. Goods can be bought direct from us, or through your nearest wholesale house. Complete catalogues in English and Spanish sent free. Address

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers, the country over, are requested to contribute to this page. News of new factories or companies, changes, improvements, etc, will be gladly received, and promptly published.

New Companies, Etc.

Buffalo, N. Y.—The Buffalo Bolt Co. was incorporated at Albany; the capital stock is $500,000, and the directors are Ralph H. Plumb, Robert C. Board and Herbert H. Hewitt, all of Buffalo. The corporation will continue the works of Plumb, Burdict & Barnard, recently purchased by J. J. Albright.

Canton, Ohio.—The Miller Pump Co. has been incorporated by W. H. Wagner, L. P. Vaisard, C. F. Shover and others, to manufacture steam pumps, etc. Capital stock, $1000.

Chattanooga, Tenn.—The Chattanooga Scale Co., Alexander Ford, proprietor, has commenced the manufacture of scales at No. 430 Boyce Street.

Chicago, Ill.—The Diamond Whip Co. has been incorporated at Chicago, to manufacture whips and vehicles. Capital stock, $10,000. Incorporators: L. E. Santer, Edward G. Henkel and Joseph Gramick.

Cincinnati, Ohio.—The Barker & Chard Machine Tool Co. has been incorporated by Wm. Barker, Nicholas D. Chard, Jesse Chard and others. Capital stock, $10,000.

Cleveland, Ohio.—The Moore Mfg. Co. has been incorporated by S. H. Chisholm, W. E. Cushing, A. La Juillard and J. H. Clarke, to manufacture and deal in Hardware and Hardware specialties. Capital stock, $50,000.

Cleveland, Ohio.—The Union Vapor Stove Co. has been incorporated with a capital stock of $10,000.

Decatur, Ill.—The F. E. Tait Mfg. Co. has been incorporated by F. E. Tait and R. W. Essick, to manufacture agricultural implements. Capital stock, $100,000.

Locke, N. Y.—The Locke Fence Supply Co. has been incorporated by Judson White, Fay Hewitt and Van Beuren Coggshall and others, to manufacture wood and iron fence posts. Capital stock, $500.

Los Angeles, Cal.—Matthews & Arnott Co. has been formed by Newell Matthews, W. E. Baxter, Geo. Arnott, Willard Arnott and C. F. German, to manufacture and deal in farm implements. Capital stock, $100,000. Stock subscribed for, $75,000.

New York, N. Y.—Roller-Sash Balance Co., of Northport, Suffolk County, has been incorporated to manufacture tools, machinery, Hardware, window sash balances, etc. Capital stock, $10,000. Directors: William J. Parsons, C. S. Corwin and H. M. Van Beuren, of New York City.

New York, N. Y.—The Hernsheim Architectural Iron Works has been incorporated by L. Hernsheim, Albert Anderson, Geo. H. Reese and others. Capital stock, $25,000.

Petaluma, Cal.—Western Refrigerator Co. has been incorporated. Principal place of business, Petaluma. Directors: Galen Burdell, M. A. Burdell, James B. Burdell, Burdells, Marin County; John M. Coleman and George Ortman, Petaluma. Capital stock, $100,000; subscribed stock, $15,000.

Plainwell, Mich.—The Ireland Mfg. Co. has been incorporated for the purpose of manufacturing Hardware specialties.

South Haven, Mich.—The Anchor Iron Fence Co. has been reorganized with a capital stock of $40,000.

Worcester, Mass.—Warren Specialty Mfg. Co, was organized recently. The capital stock is $6000. The concern will locate in Warren, and has rented a shop on Main Street owned by William H. Ramsdell. The company will manufacture steam packing tools, Hardware specialties, etc. The officers are: President, William B. Ramsdell; secretary and treasurer, Joseph G. Hastings; directors, William D. Ramsdell, Charles H. Packer, Henry S. Howe, Daniel G. Hitchcock and Joseph G. Hastings. The company intends to start September 1st.

Improved Conditions.

Anderson, Ohio.—The American Wire Nail Co. announces that its plant will start September 1st, with the old force of 750 men. Additions are being built.

Beaver Falls, Pa.—The rolling department of the H. M. Myers Shovel Co. started up in spite of the fact that this is the dull season in the shovel business. The axe factory is running full-handed again after a short shut-down. The new Keystone Axle factory is starting out encouragingly and will employ several hundred men.

Bridgeport, Conn.—The Bullard Machine Tool Co. closed its works until September 7th. The shut-down is necessary in order to get the factory into shape for the fall trade, repairs on the machinery and a general cleaning up being the rule at this time of year. There is a good list of orders already on hand, and the company predicts a season much busier than last year.

Canton, Ill.—The Parlin & Orendorff Co.'s plowshops started with a small force about ten days ago, expecting to run a couple of weeks. Owing to an increase of orders several hundred men are now employed and the works are running nearly to the full capacity.

Cleveland, Ohio.—It is reported that the Cleveland Machine Screw Co. has been sold to a French syndicate and that the new company will be capitalized for $3,000,000. It is stated that the plant will be enlarged. The price paid was a million. According to the report the French syndicate will take charge November 1st.

Dansville, N. Y.—The reaper and mower works of the Sweet Mfg. Co., that were recently destroyed by fire at this place, are to be built again very soon, The company has advertised for bids for the erection of the new plant.

New Castle, Del.—This place was made happy over the announcement that the Delaware Iron Works, most of the departments of which have been idle for some time, will resume operations at once with a force of 400 hands. Many of the people who live in New Castle depend on these works for a living.

Quincy, Ill.—The industrial situation in Quincy is one of gratifying activity. The shops and factories here are all running, and many of them have been compelled to put on two forces of men and run day and night to keep up with orders. This city is a fair index of the condition of affairs throughout the country, from the fact that there is a great diversity of interests here. There are over 400 shops and factories here, and the 6000 mechanics and operatives are employed in many different branches instead of in a few large plants. The Collins Plow Co. has been compelled to materially enlarge its plant, and is now running sixteen hours a day with a full force of men. William N. Brown, the president of the company, says they are crowded with orders for plows and hay presses.

Taunton, Mass.—Many changes for the better are taking place at Field's tack shop, including the removal of the old sluice way which has been of no use to anybody for many years. There is a proposition to erect a new building for storage purposes on the premises.

Troy, N. Y.—The Palmer Hardware Mfg. Co. have commenced operations in the foundry of the Empire Forge Co., which has been in disuse for some time. The Palmer Co. deals extensively in ironware, which has been cast in Pennsylvania and Ohio and shipped to the local firm. The new venture will insure more satisfactory workmanship and will at the same time furnish employment to residents of Lansingburgh, thus benefiting not alone the manufacturing company, but the village as well.

Recent Embarrassments.

Akron, Ohio.—John F. Seiberling, a veteran mower and reaper manufacturer, has assigned to his nephew, Francis Seiberling. The deed of assignment was drawn up and signed three months ago, before Mr. Seiberling went to the Pacific Coast, where he now is, but was held until August 20th. The property assigned consists of city and country property, on which there are mortgages of $73,000. Most of Mr. Seiberling's large holdings in local industries are already pledged as collateral. The total liabilities amount to a little less than $500,000, while the assets are only about $150,000.

Recent Fires.

Newark, N. J.—The saddlery Hardware shop of Matthias Grossner, inthe rear of No. 392 Bank Street, caught fire from an overheated furnace recently. An alarm was sent in and the firemen put out the blaze. The loss is estimated at $800.

Rockford, Ill.—The frame building occupied and owned by the Skandia Plow Co., located on Cedar Street just west of the Northwestern depot, was totally destroyed by fire recently—the loss being estimated at $6000. Insurance, $4500.

BICYCLE TRADE RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Companies, Agencies, Etc.

Charleston, S. C.—George J. Lanneau has just opened a bicycle agency and general repair shop at the corner of King and George Streets. The repairing department is complete in all its appointments.

Chester, Pa.—Taylor Bros., formerly of West Fifth Street, have opened the store and repair shop formerly kept by Mr. Swanger, on Eighth Street near Morton Avenue.

Lincoln, N. J.—This new and booming town already has an industry with a capital of $10,000. The Hollingshead Wertz & Granert Co. has been incorporated to manufacture bicycles. The capital of $10,000 is divided into 200 shares at $50 each, subscribed for by the following: Edgar Granert, Bound Brook; William R. Hollingshead, Brooklyn; Max F. Wertz, Arlington.

Riverside, Cal.—George F. Seger, bicycles, etc., sells carriages and implement stock.

San Francisco, Cal.—The Dorothy Lamp Co. has been incorporated by Daniel R. Williams, Jas. H. Jennings, Charles S. Burrell, Joseph B. Kennedy and Frank J. Burke; to manufacture and deal in lamps for house, bicycle and carriage use. Capital stock, $100,000, of which $25 has been subscribed.

Springfield, Mass.—C. Y. Jury, watches, clocks, etc., has opened new store at No. 771 South Main Street, and he will run a bicycle repairing department in the rear of store.

Springfield, Ill.—The Lincoln's Home Cycle Co., of this city, has been incorporated to manufacture and deal in bicycles. The capital stock of the new company is $2500, and the incorporators are H. W. Rokker, C. E. Saunders, Charles J. Ambs and C. W. Dines. For the present the offices will be at No. 319 South Fifth Street. The local company intends to begin the manufacture of bicycles some time in December.

Changes and Improvements.

Bridgeport, Conn.—The Yost factory will probably start up on full time with a full force on September 7th. This factory has been closed since July 1st. Only the tool makers have been kept at work.

Buffalo, N. Y.—W. C Boak, manufacturer and wholesale dealer in bicycle supplies at No. 61 Terrace, announces an early change in business, and is closing out his entire stock at reduced prices.

Chester, Pa.—Thomas Swanger, the bicycle manufacturer and repairer, is putting in a one-horse power electric motor at his factory on Market Street. It will be used chiefly for the running of the lathes.

Chicago, Ill.—The Gormully & Jeffery Mfg. Co., with branches in most of the leading cities of the country, made an important announcement in the reduction of the price of Ramblers to $65. The Rambler was among the first high grade wheels to sell for less than $100, and the '97 price of $80 has marketed more Ramblers than the firm has made in any previous one of their eighteen years' history. The new price of $65 will unquestionably keep the full factory force busy for the remainder of the year.

Jacksonville, Fla.—The Florida Cycle Co., present quarters are being enlarged.

Knoxville, Tenn.—The Bayzarian Cycle Co. are now in their new quarters, No. 320 North Gay Street (Matlock's grocery store) immediately across the street from their former place.

Lawrence, Mass.—W. J. Driscoll has closed his Hardware and bicycle store in the Musgrove Block.

Middletown, Conn.—Williams & Ives, bicycle repairers and jobbers, have dissolved. The business will be continued at the old stand.

Montclair, N. J.—The Power Mfg. Co., of which W. H. Power, of Upper Montclair, is president, has purchased the old Woodbridge mill property along the Delaware, Lackawanna & Western Railroad, at Glen Ridge, and will erect a factory for the manufacture of bicycle chains.

Springfield, Mass.—The Harris Mfg. Co., of New York, manufacturers of engines, Stanley bicycles, and also a horseless carriage, contemplate the removal of their business to this city. Representatives of the company have been in town negotiating for the lease of the Ames plant. The present quarters of the company are too small. If they can arrange suitable terms they will move to this city, and employ at least 100 men.

S Norwalk, Conn.—Bearse & Hoyt, succeeded by George F. Bearse.

St. Paul, Minn.—The St. Paul Cycle Co. are advertising to discontinue business.

Syracuse, N. Y.—The factory property in which the plant of the Olive Wheel Co. is located, was sold to Helen M. Gridley for $5000, subject to a first mortgage of $6000 and all unpaid taxes. The sale was made by deputy sheriff Whittle under foreclosure proceedings begun by Daniel W. Gridley against Frederic Dodge and others. The purchasing bid was the only one made.

Syracuse, N Y.—Weston, Mott & Co. have moved their bicycle shop to Utica

Recent Embarrassments.

Beaver Falls, Pa.—The Morado Bicycle Works, the bond of R. L. Sterling, who was appointed receiver for this company, approved.

Bridgeport, Conn.—The Premier Cycle Mfg. Co., Enoch P. Hinks appointed receiver in place of John C. Cassidy.

Chicago, Ill.—The Chicago Combination Machine Co., bicycles, reported to have made an assignment.

Fort Plain, N. Y.—M. J. Fisher, bicycle factory, near Little Falls, has been closed by creditors.

Fort Wayne, Ind.—The Randall Cycle Co. is in hands of Receiver E. C Miller, as trustee for the creditors to the amount of $11,000.

Grand Rapids, Mich.—The Hamilton Kenwood Cycle Co., T. J. O'Brien has been appointed receiver. The cycle company recently secured its creditors, by giving a trust mortgage to J. Frederick Baars, cashier of the National City Bank. That was followed by litigation between the stockholders and managers, and the outcome is the appointment of a receiver.

Ithaca, N. Y.—George E. Tailby, bicycles, reported to have made an assignment.

Milwaukee, Wis.—Janeau Cycle Mfg.Co., bicycles, reported assigned.

Montreal, Can.—Alexander & Lefebvre, bicycles, assigned to Kent & Tureotte, with liabilities of $800.

New Haven, Conn.—The Dole Bros'. Co., sporting goods, reported to have made an assignment.

New York, N. Y.—Hulbert Bros. & Co., dealers in bicycles, firearms and sporting goods, No. 26 West Twenty-third Street, Frederick P. Forster, temporary receiver, appointed permanent receiver. The company went into the hands of a receiver September 18th, with liabilities of $494.000. Nominal assets, $344,622; actual assets, $125 000.

Norfolk, Va.—Bonnot & Vanderberg, bicycles, reported to have made an assignment.

Philadelphia, Pa.—The F. M. Dampman Cycle Co. has made an assignment for the benefit of creditors, to Richard D. Michuals.

Portland, Me.—Forest City Cycle Emporium, left town, attached.

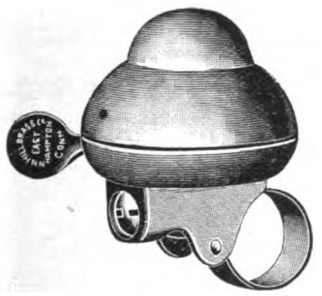
Portland, Ind.—Haynes Wheel Co., Stephen A. D. Whipple appointed receiver to take the place of Charles B. Feioleman, of Indianapolis. The new receiver will sell the plant instead of operating it.

Scranton, Pa.—Chase & Farrar, bicycle dealers, have made an assignment to J. W. Browning for the benefit of creditors.

Springfield, Mass.—Hendye & Nelson, bicycle factory, and E. A. Nelson, bicycle store, attachment for $10,000 placed on them. It is not settled whether either concern will go into insolvency, and whether this is done will depend to some extent upon the result of the inventories now in progress.

St. Louis, Mo.—The Hitchings Cycle Co. has made an assignment. The business was started in July, 1895, on a small scale.

St. Louis, Mo.—Western Bicycle Co., reported to have been attached.



Toledo, Ohio.—The Toledo Brazed Fork & Tube Co., reported to have appointed a receiver.

West Gardner, Mass.—J. B. Barnes, bicycles, attached.

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

CRONK'S

Combination Fencing Plier.

This newly invented fencing tool is needed by all people that build or have occasion to remove or repair wire fence, as it is made with two staple pullers, two hammers and two button cutters. They are the same heft as the 1½ Maydole Hammer, and they are made of forged tool steel. No good farmer will be without one. They are warranted to cut No. 8 hard or No. 6 soft wire. Like the celebrated Cronk Plier they are fully warranted in all respects. No. 12, 11 in. long, $12.00. Dis. . . .

Goodell Company, Antrim, N. H.

There was a time when, because our prices were a little below normal, it seemed very natural for some dealers to believe what they were often told; namely: that our goods were "hardly up to the standard." We don't have trouble that way now, because most dealers have eyes of their own and think for themselves. **We invite comparison. . . .**

RESERVOIR PUNCH

For Euchre and Whist Parties.

This Pocket catches the pieces punched from Tally Cards, thus preventing a littering of the carpet.
Is hinged, can be opened, emptied and closed in an instant.
Of great value to Railroads as it prevents the replacing of pieces punched out of monthly or commutation tickets.
Also valuable in Restaurants where punch tickets are used.

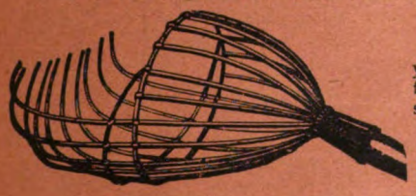
WIRE LATHING WITH HAMMOND'S METAL FURRING.



44 Cliff Street.
NEW YORK.
148 Lake Street,
CHICAGO:
Factories: GEORGETOWN, CONN. CHICAGO, ILL.
ESTABLISHED 1818.

THE OLDEST AND LEADING MANUFACTURERS OF GALVANIZED WIRE GOODS IN AMERICA.

"Pennsylvania" Fruit Picker

This Cut almost speaks for itself—the device being so much like the human hand, shows at once the utility of the article.

AS A FRUIT PICKER IT HAS NO SUPERIOR.

It is made of Heavy Galvanized Wire, and Easily Adjusted to a Pole. It has been sold for several years, and the demand (as it is becoming known) is steadily increasing. The difficulty of detaching fruit and securing it unbruised is apparent to everyone so engaged. This overcomes the difficulty, and saves the finest fruit which commands the highest prices.

THE LOW PRICE AT WHICH IT IS SOLD

brings it within the reach of those who have but little fruit to gather as well as those who have large quantities. *Price, per dozen, $5.00.* It will gather Apples, Peaches, Pears, etc.

MANUFACTURED BY **EDWARD DARBY & SONS,**

233-235 Arch Street, PHILADELPHIA, PA.

"Goodell's" Turret Head Glass Cutters.

(Patented March 31, 1896)

SIX CUTTERS. Carefully Hardened, Ground and Tested before mounting. Nickeled Frame, Rosewood Finish Handle.

H. H. Mayhew Co., *Shelburne Falls, Mass., U. S. A.*

"FOR YEARS."

Henry Disston & Sons, Philadelphia, Pa. [*Saws, Files, etc.*]: Our opinion of HARDWARE is contained in the fact of our having carried an advertisement in your paper for a period of years.

"Replies From All Sections."

McIntosh-Huntington Co., Cleveland, Ohio. [*General Hardware and Bicycles*]: As an advertising medium, we have recently had occasion to test HARDWARE in a manner that would give us some idea as to how successful it can be used. Our advertisement did not occupy a very prominent position, but was of a character to excite the cupidity of the reader. We found that within two days after your paper came out, we commenced to receive replies from all sections of the country to the advertisement. This would seem to be sufficient proof that yours is a good medium.

A GOOD THING.

IT'S IN THE TEETH.

The Patent "REFORM" Curry Comb is composed of three shallow, oval trays, with corrugated edges. The parts are struck up from a fine grade of cold rolled steel, heavily tinned and bronze lacquered, firmly riveted together and warranted not to rust. The outer dimensions are 6½x4¼ inches and by reason of the large cleaning surface and peculiar arrangement of teeth, the comb will do its work with a large saving of time and labor, cleaning with equal thoroughness both long and short coats. There are no places to accumulate hair and it will not tear or injure the brush, the comb being quickly freed from accumulation by giving its face a gentle tap.

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted to the Hardware Trade.

Editorial Trade Review.

Every week that passes increases the strength of the conviction that business at last has struck the upward groove, and f om now on nothing but encouraging conditions need be hoped or looked for. Prices are becoming settled under an increasing inquiry, so that the manufacturer is able to figure and find a fair profit underlying his bottom quotations.

The strikes which have for several months—fortunately the dullest in the year—unsettled the conditions of improvement contemplated by many plants, are now giving way to reasonable arguments and healthful arbitration, and under increasing orders and growing prosperity, the toilers will eventually receive without asking for them, the rewards of a conscientious devotion to the interest of employers, who are always ready to reciprocate loyalty and fidelity with increased compensation.

As prosperous conditions advance by the aid of generous crops, remunerative prices, and increasing incomes, to those who have large properties, more money is put afloat, more work is obtainable, every one who desires to labor finds an abundant opportunity, and the country once again breathes the healthy vigor of confidence born of conditions easily understood and sure of continued permanence.

The very gratifying exhibit made by the statistics of our foreign trade for August, strengthens the markets materially, the increase in the value of our exports and the decrease in the value of our imports, being prominent features. The exports for the month of August reached the promising figures of $80,820,393, which represent an increase of over $12,200,000 as compared with August of last year and marking the largest total for any corresponding month of which the Bureau of Statistics has any record.

An increased demand for money for speculative purposes has hardened the New York loan market considerably. The supply is still sufficient and the demands for commercial accommodation materially augmented causing a decrease in the surplus reserve of noticeable importance. Increased net earnings of the railroads indicate conditions of prosperity gratifying to witness, being fully 15 per cent. as compared with a year ago.

Staple lines in Hardware are gradually but firmly bracing up in price. In wire nails the quotations are constantly advancing under conditions that make the present the best time to place orders. The stopping of an important output like that of the Salem Wire Nail Co., which has been closed for two months, and other mills, has had a tendency to remove some hustling competitors and stiffen the advanced quotations already on record.

The large influx of buyers to this city in so many other branches of commercial activity, has effectually prepared the wholesale houses here and the manufacturers as well, for a season of prolonged energy; which in the case of Hardware is usually later in the season than that of dress goods, and can be relied upon to cover a longer time in its development and distribution. The eagerness and interest manifested in our markets by these intelligent visitors is in marked contrast to the listlessness which for the past few years has characterized the provincial buyers who found competition in purchasing of a more conventional nature.

Protection to the Worker.

Constantly recurring strike troubles are periodically fomented and encouraged by conditions that should be regulated under certain legal restraints which do not now seem to prevail in any instance. The right of a man in this free country to work and support himself and family should be an inalienable one to all laborers, workmen or skilled artisans, of any sort whatever, that have been encouraged to come here by our world-known progress in industrial affairs, and this right, whether asserted by an alien or citizen of the United States, should be supported and sustained by organized society in every part of our country. No sentimental nonsense should be thrust forward to prevent it, for there are paupers and tramps enough, God knows, who are unwilling to work at all, and who take every opportunity to avoid contact with labor of any kind. Let us sustain and enforce the right of a man to earn his living, and see that he be fully protected in doing so.

There are some restless and turbulent spirits in every large manufacturing plant who are inspired by disorder and anarchy in exacting demands impossible to be complied with.

There is nothing in the statutes that will prevent a man not under contract from making a fool of himself; and like the dog in the fable, letting go his hold on the chunk of meat he has already in his mouth, with the expectation and desire to clutch the piece he thinks he sees in the water.

At the foundation of every strike there are workmen who will not work themselves, neither will they permit other workmen to take their places at the wages they have rejected, and this is the phase of this strike business that must at some time or another be settled, to the satisfaction of the voters of this country, independent of the opinion of the alien demagogues who betray our workmen into becoming embryo anarchists,

Digitized by Google

in the interests of the manufacturers of countries with the less skillful labor of which we are constantly competing.

"Farmers all have a big roll of money this fall and are feeling well, and prosperity is certainly in the air, whether McKinley brought it or not. There is nothing that helps good times along so much as to talk about them, and for that reason I will not be a Populist or Pessimist any longer."

So writes, in a personal letter, an Ohioan who last year was both Populist and Pessimist. There is a wealth of golden wisdom in the above words. Confidence begets prosperity, and prosperous conditions beget renewed confidence.

What is Advertising?*

BY NATH'L C. FOWLER, JR., DOCTOR OF PUBLICITY.

Ask a hundred men, "What is Advertising?" and ninety-nine of them will say that advertising is—advertising.

Advertising, as I see it, is the announcement of anything by any medium of presentation.

Advertising is a commodity—as much so as dry goods, shoes, or flour.

Advertising is one of the five links in the chain of business.

The advertising that does not pay is almost always the advertising that has not been given a chance to pay.

The average user of advertising writes the advertisement with a blunt pencil upon a pad of paper upon his knee, or quickly scribbles off his name and address—and something else—upon a pad on his desk.

He pays good money for advertising space.

He fills that expensive space with the careless thought of a minute.

It is estimated that the world spends two thousand millions of dollars a year on advertising.

An intelligent estimate has not been able to assume that this same business world pays out more than one two-thousandth of this total expenditure for the preparation of its advertising matter.

If advertising is worth anything—and every successful business man says that it is—then some care should be given to its preparation, just as much as to the management of any other part of business.

Advertising, being a commodity, must be considered a commodity.

There are altogether too many typewriters, too many stenographers, too many bookkeepers, too many lawyers, too many doctors, too many clerks of every station, but there are not, by thousands, too many men and women who understand the writing of advertising and the directing of advertising.

The best advertisement writer for a business is some one interested in that business.

It may be the business man himself; it may be the business man's brightest clerk or cleverest daughter; but it is certainly some one who has the time and ability—and interest.

Better do it yourself, or have it done by some connected with you, than to trust it to the small army of ad-smiths who have only untried originality to sell.

*Copyright, 1897, by Nath'l C. Fowler, Jr.

Told at the Club.

There hangs on the walls of the Hardware Club of New York several newly added pictures. One of these is a Rembrandt, showing six solid citizens sitting about a table.

A member came in, and a worthy officer of the club said to him, "How do you like the new picture?"

"Very much. What is it called?"

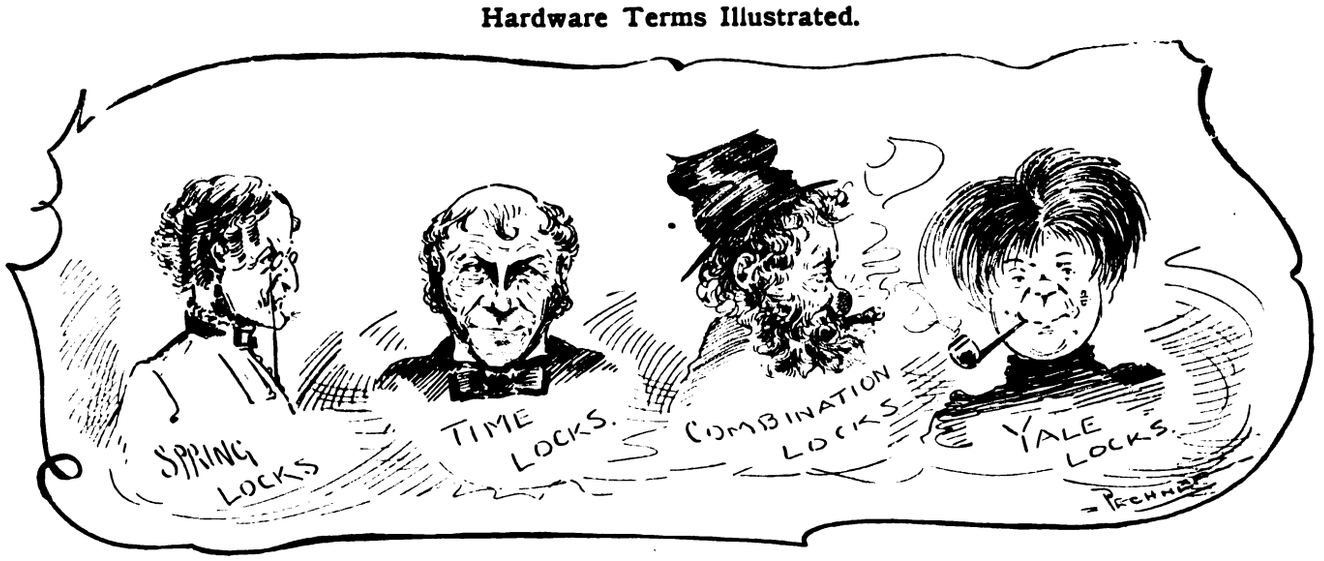
"'A Syndic of Drapers.'"

"Is that so? I thought it might be 'The Six Little Tailors.'"

A prominent and ministerial-looking member of the club went into a downtown hat store. Selecting a tile that suited him, he asked, "What's the price of this?"

"Eight dollars," responded the clerk.

"Any discount to a minister?" gravely asked the caller.



"Yes, sir. *You* can have it for seven dollars."

The Hardwareman put the hat on, walked over to a glass, took a long look, and said with emphasis, "I'll take this. If my congregation don't like it, they can go to the d——l."

A New Jersey suburbanite tells this one:

There is an editor in our little town who just for the present wishes he were somewhere else. Desiring to compliment the school teachers of the place, and extend the circulation of his newspaper among them, he wrote an elaborate article, which he headed "Pension a Lot of our School Teachers." He then continued in an eloquent strain to declare that "there are about a dozen of the best known teachers in our schools, who, because of their long service in the harness, should be pensioned immediately." Of course the intelligent compositor got in his work, and as the old man failed to read his proof, he was horrified to find his paper declaring that there were a lot of old school teachers in that town who ought to be "poisoned" immediately. The editor informs me, with tears in his eyes, that this is one of those unpleasant episodes which occur to an editor now and then.

"Othello's Occupation Gone."

Editor Hardware: To many men the loss of an occupation is unknown.

They have been lucky in this regard, and fail to appreciate the significance of the title to this article.

Fortune has seemed to smile upon them, and they little know that feeling which rises in a strong man's heart, who, after doing the best he could, finds himself in the dreaded situation, "out of work."

If he has been in business, and has worked against heavy odds, and has seen the grim spectre of failure in the distance, he may not be wholly unprepared for it when it does come, but the discouraging reality adds the climax to his worst of fears.

To the young man with no family to support, the loss of a situation is not so serious. If he is a young fellow of the right sort, he has some of his saved earnings to fall back upon, and he is full of hope, and can look for another situation.

When a man loses a situation through no fault of his own, it sometimes is an advantage to him, and proves a blessing in disguise.

Many men who have fair salaried positions are contented to thus go through life having no higher hopes and aims than simply to do their work well, and never expect to be anything more than a clerk all their lives. They thus become dwarfed in their mental capabilities, and if they live to be old, their services gradually become less and less valuable to their employers. Had some men of this stamp lost their positions early in life, the struggle that they would have been forced to make would have tended to develop what was best in them.

Many of the most successful business men of to-day would not have achieved their present financial positions had they always remained clerks. Had they had their choice, perhaps, they would always have been clerks; but many of them lost their situations, and this very fact was the door which opened up the way to starting a business of their own. So, should these words catch the eye of any young man recently discharged, let him take fresh hope and courage, and resolve to do something for himself. If he is made of the right kind of stuff and is contented to start in a small way, and be satisfied with slender wages for himself for a few years, his chances for winning a competency are good. To such a man, although the loss of his situation at first seemed a misfortune, in the end it will prove one of the greatest benefits that ever befell him.

But the many who are unfortunate enough to lose their situations—the man with a family to support, whose health perhaps is partly gone, and the fire and ambition of his early days being gone—it is a sad condition.

A case recently came under the writer's notice which illustrates this fact. A man of fifty-two had failed in business He had a partner, but they were forced to assign, owing to hard times, and our friend found himself without means of livelihood. He had begun life as a clerk at fifteen, and at thirty, having accumulated a few dollars, commenced business with a partner. He, himself, knew nothing of the financial part of the business, leaving the book-keeping to his partner. He worked early and late, took few holidays, and was always found behind his counter.

Now, after the failure, when the affairs were wound up and it was evident that if the business were continued it would be useless for both to attempt to make a living from it, our friend fully realized his position.

To get up in the morning and not have the store to go to, was indeed an innovation. The very thought of having nothing to do was a burden to him. He applied everywhere for a situation, but without success. Stores needing help preferred younger men with no families, so that if they discharged them again the responsibility would not be the same as an elderly man. It was useless for him to seek employment in other lines of business, as he knew nothing but what he had spent his life upon.

After a few weeks of enforced idleness, and when he was worrying himself into a state bordering upon despair, he was urged by a few friends to again start a small store for himself.

Kind friends furnished financial assistance, and with the past dear-bought experience, he was better prepared to make a success of it than before, and in a few years he was doing a fairly prosperous business, and making something more than a living.

But he had learned that the careful oversight of the finances was of the first importance, and that his trusting too much to his former partner had been the mistake of his life.

Of course, this man had friends who proved of great value to him in his time of need. And there are few men out of work but have the same. They may not be able to render financial aid, but they are ever ready to extend sympathy and offer encouragement, which are very much needed and appreciated by one in such an unfortunate position. It never pays a man to lose heart, no matter how dark the prospect, for a discouraged man can do little for himself or for anybody else. LYLE MERTON.

"Shooting" the Fire "Chutes."

The Dow Wire Works Co., Louisville, Ky., manufacturers of wire goods in various forms, fire escapes, etc., have just closed an important contract with the Louisville school board. Their Kirker-Bender fire escapes are to be placed on fourteen city school houses, and the Louisville *Dispatch* devotes a great deal of space to a description and illustration of this unique and successful life-saving apparatus. It says:

"While the Kirker-Bender escape is well known to thousands of youngsters who have attended school at the ten city school buildings already supplied with them, there are a great many yet of all ages in the city, as well as out, who have never had the exhilarating experience of a slide through one of these escapes. The accompanying illustration will give a fair idea both of the construction and the way in which it is used in case of fire. It is so arranged that children find it a pleasure to forsake studies for fire escape drills. They consider it a great treat to be allowed to go home from school down the escape and jump in with books and slates, making their exit at the bottom in greatest glee.

"The fire escape is especially adapted for use in hospitals, where sick and maimed patients could not be carried down an iron ladder without great difficulty and danger. The descent of the chute is so easy that no harm can come to a sick person, provided care is taken to properly place the invalid in the chute ready for the descent. The shape of the chute renders it as safe when used in connection with a skyscraper as when attached to a low building, and the slide for life is as easy and pleasant as walking downstairs.

"As is well known, one of the greatest dangers when a fire breaks out in a crowded building is the likelihood of a panic. Stairways are often rendered impassable in this way. Through hurry, one or more of those seeking to escape will fall, and those behind will crowd over them, trampling them under foot and often packing the stairway solidly with human bodies. With the chute such a condition is impossible. The person who falls into it will slide to the bottom as safely as he who starts carefully, and all danger is obviated."

Persistency is the wedge which opens up to its possessor the way of success.—*Hardware and Metal Reporter.*

Care in the Cookroom.

A TIMELY WARNING TO THOSE SELECTING KITCHEN UTENSILS.

While commendable progress has been achieved in many other important features of modern domestic economy, the sanitary accessories of our kitchens—decidedly the most important matter of all—have received very little attention from hygienists; and this oversight is to be deplored, for there can be no doubt that the well-being of the entire household is in the keeping of the culinary department of the home.

Many articles have been written on the wholesomeness or unwholesomeness of this and that food product; tables have been compiled to demonstrate the percentages of nutrition and the alimentary value of the various items of our daily fare; innumerable suggestions have been offered regarding the importance of care in the selection of the raw material; but too frequently the culinary processes are entirely ignored, and, as a result, otherwise healthful food becomes dangerous to health and frequently is the means of bringing sickness into the household.

Among all the dangers which threaten those unaccustomed to scrutinizing the kitchen equipment, we are satisfied that the risks incident to an undiscriminating selection of the kitchen utensils take decided pre-eminence, for the ordinary substitutes offered for the old-fashioned pots and pans are an unquestionable menace to every one partaking of many articles of food cooked in the same, for the enameled coating upon the iron is retained through the means of arsenical or antimonial preparations in some cases, and in others by the use of lead, which is a most dangerous and insidious poison. These toxic elements may not exist in large quantities in such utensils, but the fact that they are employed at all, and that there is always danger that an inexperienced workman in the manufactory may, through carelessness, exceed the usual quantity, or that unequal distribution of the same may occur, should afford food for thought to every prudent housewife. Even though only minute quantities of lead find their way into these utensils in which food is prepared, it should be remembered that this subtle poison is cumulative in its effects and that the most minute particles collect from day to day and ultimately work great injury to the system. The insidiousness of lead poisoning is indicated by the grave diseases incident to the painters' trade, in which this virulent poison is absorbed through the pores. Other cases might be cited wherein water allowed to stand over night in lead pipes caused fatal results, and paralysis from the use of hair dyes containing a preparation of lead are not infrequently reported. Any food of acid nature may set free the mineral poisons used in the manufacture of the kitchen utensils in question, and therefore the use of such vessels is fraught with constant dangers to health.

We have made a critical examination of the products of nearly a score of the manufacturers of such goods and the only articles of the kind found to be absolutely free from all the dangerous contaminations of which mention has been made, are those known as "Agate Nickel Steel Ware." The makers of this ware possess an exclusive process by which through the intervention of a coating of nickel the impervious coating is caused to adhere to the steel, thereby doing away with the necessity of a lead bath or the employment of antimonial or arsenical preparations to achieve such results.

The *American Journal of Health* has no disposition to unduly frighten the users of the dangerous utensils in question; it is not an alarmist, as its readers well know; but from a carefully-considered and conservative standpoint it feels impelled to acquaint its patrons with the truth in regard to any and every menace to the health and well-being of the household. To remain silent when the evils resulting from the use of unsanitary kitchen utensils have been so forcibly demonstrated would be to ignore a plainly indicated duty. For twenty-eight years we have uttered cautions regarding unfit and unsuitable food, have inculcated needed sanitary restrictions, and have ever been first to champion hygienic advancement according to modern lines of thought and in keeping with the latest scientific teachings of the age.

From the vantage ground of frank and fearless independence, and with no interests whatever to serve save those of the readers of this journal, we unhesitatingly declare that we have found one—and but one—product of the kind to be free from the drawbacks named, and in commending Agate nickel-steel-ware to every reader, we do so in the same spirit which for over a quarter of a century has animated and inspired this publication. We bestow the heartiest editorial endorsement upon this ware because we know that its use is absolutely devoid of all danger. We wish we had found others which we could offer to our readers as worthy of the same high praise.

C. H. BRACE, M. D.
—*American Journal of Health.*

Bissell Sweeper Co. Announcements.

The Bissell Carpet Sweeper Co., Grand Rapids, Mich., and New York, make announcement under date of Sept. 8, as follows:

To dealers handling our extra high grade exclusive brands: On August 2nd we announced to the trade a reduction in price on high grade exclusive sweepers, "Cyco" bearing, from $27 per dozen to $24, and on the "Cyco" bearing "Grand Rapids," japan, from $24 per dozen to $22 subject to rebates for quantity, and we are pleased to be able to state that the new prices have been greatly appreciated by the trade as is evidenced by the liberal orders we have received.

Our motive in reducing the prices on these goods was to enable the dealer to sell our high grade nickel brands at $3.00, and the "Grand Rapids" japan at $2.50, and still make a good margin of profit. At these popular prices for high grade Bissell sweepers your sales on our goods should almost double, and it is equally certain that the demand for cheap sweepers will correspondingly diminish.

We desire to add that to any of our customers who would like some of our high grade nickel brands in solid mahogany, piano finish, to retail at $3.50, we will supply the goods at the old price of $27 per dozen, subject to rebates for quantity.

These goods come regularly in the following popular assorted finishes: antique oak, English oak, natural oak, birch, (mahogany stain) and quarter-sawed sycamore.

We call your attention to the circular enclosed, describing our line of toy sweepers, which command a large sale during the fall and holiday seasons. Yours truly,

BISSELL CARPET SWEEPER CO.,
R. E. Shanahan, Ass't Secy.

The company also make further announcement, as follows:

"As our factory from now on will be crowded to their fullest capacity, we strongly urge that you place your orders for the holiday trade at once, to insure having the goods in time."

The Berlin Iron Bridge Co., East Berlin, Conn., have the contract for the new boiler house which the New York Belting & Packing Co. are putting up at Passaic, N. J. The building will be entirely fire proof, brick walls, with steel roof trusses covered with the Berlin Iron Bridge Co.'s patent anti-condensation corrugated iron covering.

The secretary-treasurer of the National Sportsmens' Association has left for the West to close contracts for special features for the coming Exposition to be held March 12th to 19th, both days inclusive, at the Madison Square Garden, New York.

President Benj. S. Lovell.

At a recent meeting of the directors of the John P. Lovell Arms Co., Boston, Mass., Col. Benj. S. Lovell, who has been the treasurer of the corporation since its incorporation, was elected as its president, to fill the vacancy occasioned by the death of the late lamented President John P. Lovell, the founder of the John P. Lovell Arms Co., and Henry L. Lovell was elected a member of the board of directors and treasurer of the corporation, in place of Col. Lovell.

In addition to holding the presidency of the John P. Lovell Arms Co., Col. B. S. Lovell is also president of the John P Lovell Co. (factory), South Portland, Me., and of the Lovell Arms & Cycle Co., of Worcester, the treasurership of each of which is held by Mr. Henry L. Lovell.

COL. BENJ. S. LOVELL.

These changes, necessitated by the death of President John P. Lovell, are in conformity with his expressed wishes.

Mr. Lovell desired to retire from the presidency of the John P. Lovell Arms Co. a year or two ago, but was induced by Col. Lovell to defer such a step at that time. Under the direction of its new president, Col. Lovell, the John P. Lovell Arms Co. is assured a continuance of the same successful and prosperous career that it has enjoyed for more than half a century.

We take pleasure in publishing herewith a portrait of the new president.

The Philadelphia Gas Improvement Co., Philadelphia, Pa., are increasing their plant by erecting a new fireproof pipe shop, constructed entirely of iron. The building has steel framework and a corrugated iron covering. The contract for erecting the building has been let to the Berlin Iron Bridge Co., of East Berlin, Conn.

New Members of the Hardware Club.

At the September meeting of the board of governors of the Hardware Club of New York, held on September 16th, the following gentlemen were unanimously elected to membership in the Club:

Herbert L. Pratt, Standard Oil Co., No. 26 Broadway.

William B. Lowden, No. 4 Murray Street.

David Daggett, No. 312 Broadway.

William E. Weeks, Whitehead & Hoag Co., No. 253 Broadway.

Samuel Stewart Bradley, No. 146 Centre Street.

The rooms of the Hardware Club of New York, Broadway and Murray Street, have undergone their usual summer renovating, and a number of notable features attract and please the members as they come back one by one from their summer vacations. New carpets have been laid in several of the rooms, and the large front room heretofore devoted to committee meetings, has been transformed into a cosy and handsomely furnished library, the room heretofore used for library purposes being refurnished and recarpeted and is to be used hereafter as the main parlor. The club has taken on a decided air of freshness, and suggests more than heretofore the successful history of this great fraternal organization.

The Cleveland Chamber of Commerce have organized a merchants' excursion to Cleveland from September 6th to 18th. A one and a third rate has been secured on the railroad, and reduced rates at the leading hotels. The territory comprises the States of Ohio, Indiana and Michigan, and those parts of Illinois, Pennsylvania and New York and the province of Ontario within the jurisdiction of the Central Passenger Association.

Will the 1898 Cycles Have Gear Cases?

Instead of radically changing the well-known features in construction of the leading cycles now on the market, how much more logical and sensible it would be to seek the best means of remedying the faults of the present construction, these faults being few, positive and well known to every cyclist, thus perfecting the cycle by evolution rather than revolution. In this new development a new model will appear, apparently of a new type and yet based upon the present construction. Probably no part of the wheel causes so much trouble as does the running gear, and yet the nuisance and discomfort of the chain gear is not because of mechanical faults. Indeed no other method of transmission of power would have stood the abuse to which the chain and sprockets have been subjected. But the many troubles due to dirty chains, "stretched" chains, worn sprockets, resultant loss by friction, accidents, discomfort and the general nuisance of the chain are due simply to the fact that in this one important detail of the wheel improvement has not kept pace with the perfection of the other parts. To be sure many chains based upon the most approved mechanical principles have been devised and the chain and sprockets are perfected so well that when new and perfectly clean, the loss by friction is as low as ½ of 1 per cent., so that the troubles of the chain are in no sense due to faults of its construction, but simply because wheel builders have neglected to properly protect a perfect gear after they had produced it. It has been demonstrated that a chain with bearings worn to such an extent that the chain was lengthened one link, loses 40 per cent. in friction. Yet this is not natural but abnormal wear caused by the fine particles of grit cutting away chain bearings, blocks and sprocket teeth, this grinding out causing a quick misfit of chain on sprockets. A watch or clock manufacturer who sends his product out with no protecting covering would be thought insane, and if one wheel manufacturer should leave the three bearings of wheels and sprockets open and fully exposed to the dust, his machine would be looked upon as a mechanical absurdity, and bankruptcy would immediately follow. But ever since the safety came out an average of over 100 delicate and sensitive bearings have been left wholly exposed to the dust, mud and rain, and with what resultant troubles every cyclist knows by experience. If three bearings should be protected from dust, mud and moisture, why not the other 100? Again, the grinding out of blocks and sprockets quickly destroys the fit of the gearing, resulting in enormous loss of power. In spite of all these well-known defects, the chain gear machine has proved its practicability and usefulness. What possibilities of comfort, easy propulsion and indifference to the weather and road lies before the cyclist when the "enclosed chain" is his mount, and what an impetus to the trade it must give when the running gear needs no attention whatever, and in dust, rain and mud the wheelman feels a smooth, elastic, easy-running gear beneath his feet. While this radical improvement is as of much importance and as much to be desired as the pneumatic tire, it may be accomplished with hardly any expense and without investment. The "gear case" of Europe performs this work to a certain extent, but its objectionable features are many. Designed simply as an accessory, it is unsightly, full of joints more or less open, impossible of attachment to American wheels, and altogether objectionable to the American rider. Conditions in this country differ from those in England, where mud is the chief enemy of the chain. Here we have a fine, penetrating dust the greater part of the riding season, and a protection fairly efficient against mud is no protection against this most dangerous enemy. It is, therefore, necessary that chain and sprockets be enclosed in a casing actually tight as regards dust and moisture, while due regard is given to the appearance not of the case itself, but of the wheel as a whole, with the casing appearing as a simple integral part of the complete machine. There is no question but that thus applied it gives a smooth, dressy appearance to the wheel, giving the whole a style and appearance of value, while a little familiarity with the "enclosed chain" model causes the ordinary exposed chain to appear bare, crude and unfinished. After two years of study and experiment, and several months of practical manufacture, an American inventor has very successfully worked out this problem, and to-day the company formed to develop the invention is fitting the wheels of riders all over the country, and arranging with our best manufacturers for the presentment of the "Enclosed Chain" as the standard high-grade model for '98. It promises an increase of interest in cycling; the general discarding of old mounts to obtain a wheel having such pronounced advantages, and obtained at reasonable prices; economy of manufacture with resultant low prices and good profits; the final acceptance of the bicycle as a legitimate vehicle, and the perpetuation of the cycle industry.

It Left a Sting.

Some issues since *Hardware* published some good advice to writers of business letters, the central thought of which was, "Never write a letter that leaves a sting."

This advice seems to have been overlooked by a partner of a Brooklyn concern, who had a difference of opinion with the other member of the firm. From the cool of the country, he indited an epistle that could hardly be construed into an olive branch of good will; and as an illustration of what a letter can be when an angry man tries, is here published in full—taken from the court proceedings that naturally ensued:

"The business will be run by me until I get you kicked out, which will be pretty —— soon.

"You dirty, suspicious Dutch hound! If I had you here this minute I'd slap your two-faced mug for you. When I return in a few days I'll jerk you out of that office so quick that it'll make your head swim. I gave you one warning about your behavior, and it is the last one. You are ruining the business, making enemies of all my customers. Everyone is complaining. I'll take some of that high-handed Dutch air out of you when I get in there. When I send a man in with orders they will be obeyed hereafter. You are a dirty, suspicious Dutch cur, and I am aching to smash your face. Several people warned me that you didn't have the brains of a ten-year-old boy, you blatherskite."

Death of George W. Harris.

George W. Harris, editor of the Colquitt County *Courier*, Moultrie, Ga., died on August 25, 1897.

Mr. Harris was born at Salem, Conn., August 16, 1837. He was sixth in descent from James Harris, who was born in Boston, Mass., in 1661, and who died in New London, Conn., September 13, 1715. He was a brother of the Hon. Jonathan N. Harris of New London, recently deceased.

When a young man Mr. Harris settled in New York, and from 1865 to 1873 was a member of the wholesale Hardware firm of Brown, Harris & Hopkins. He removed to Boston in 1882, and for a number of years was the head of the firm of G. W. Harris & Sons. In 1891 he withdrew from active business, and settled in the South.

When a young man Mr. Harris was deeply interested in Freemasonry, and was a past master of Hyatt Lodge 105, F. & A. M., and also a past district deputy grand master of the fourth Masonic district, Brooklyn, N. Y.

Two sons, George B. and Clifford L., and a widow by a second marriage, survive him. Interment took place in Greenwood Cemetery, Brooklyn, N. Y.

Reports from the South.

"Reports from the South," says *Hardware*, the organ of the business from which it derives its name, "are certainly of a reassuring nature. The South is rejuvenating, is the verdict of all close observers. The wholesome influences of the new tariff are apparent everywhere. The agricultural situation has never been so bright. Nothing lacks animation but the whiskey industry, and that will speedily mend under the impetus of the generally improving conditions."

All this is pleasant news, barring only the confident promise that the whiskey industry will soon "mend" in the sense of acquiring "animation" and more business, and it is all true, we believe, except in one particular. The reports from the South generally are reassuring. The crops are fairly good, and the present promise is that the main money crop will command a fair price. The agricultural situation has been brighter, perhaps, but it is reasonably bright. The farmers have been paying more attention than usual to food crops and products, and are not as much in debt for supplies as was the rule with them a few years ago. They have been compelled to economy and to prudent management in the conduct of their work, because of the scarcity of money, and they are better off in consequence than they have been at times when money was more plentiful and they owed more of it on mortgages, interest and other accounts. When they are comfortable in pocket, the "conditions" generally in the South are good. The prosperity of the South is based on their welfare. The "rejuvenation" of the South is due mainly to their industry and thrift, and the income derived from the sale of their products.

And this brings us to the consideration of the one particular statement in *Hardware's* summary of conditions which is subject to critical attention. "The wholesome influences of the new tariff," it says, "are apparent everywhere." Possibly they are apparent in the Hardware business, which is especially well cared for by the new tariff. The South makes practically no Hardware, and buys a great deal—all it uses. Higher prices for Hardware are distinctly to its disadvantage, accordingly, while they are highly advantageous to the manufacturers, as a matter of course. As the organ of the manufacturing interest, *Hardware* naturally regards such prices, produced by the new tariff, as "wholesome influences" for the Hardware industry, and presumably regards the higher prices for all other manufactured products as "wholesome influences" for the industries which manufacture them. We take it that this is all that it means, in fact, when it says that the wholesome influences of the new tariff are apparent everywhere in the South. If not, however, we shall be glad if it will explain what it does mean—that is to say, if it will explain particularly and definitely how and where the wholesome influences of the new tariff are exhibited in the case of a section only a trifling part of whose products are affected by it otherwise than injuriously.

Such influences, we are assured, are "apparent everywhere." It ought to be possible to point them out clearly somewhere.—*Charleston (S. C.) News and Courier.*

The Production of Metals in 1896.

What is claimed to be the most complete statement of the mineral production of the United States ever yet compiled has been tabled in a recent issue of the *Engineering and Mining Journal.* The figures have been obtained from the most reliable sources and are as close to the real facts as painstaking and conscientious care can get.

The production of pig iron for 1896 was 8,761,120 in metric tons (2204.6 pounds), with value at the point of production placed at $91,577,610. The output of the previous year was 9,597,449 tons, with value placed at $108,632,542.

Copper made a total of 467,822,923 pounds, the largest figure ever on the slate. Of this output more than one-half was shipped to other countries.

The production of lead for 1896 shows an increase of 17,938 short tons over the output of 1895, the value placed at $10,381,843.

Aluminum made a total of 1,300,000 pounds in 1896, with value at place of production $520,000. This is an increase over the output of 1895, which was 900,000 pounds, with a value of $495,000.

Gold production reached a point of 2,837,965 Troy ounces, valued at $58,660,637; the figures of 1895 being 2,265,612 ounces valued at $46,830,200.

Silver made a large increase over the figures of 1895, the total refined or obtained from our own ores being 56,222,322 fine ounces in 1896, or 9,891,087 over the output of the previous year. The value of the 1896 output was $37,725,178, and that of 1895, $30,254,296.

Metallic zinc or spelter made a poorer output than in the previous year, the production of 1896 being 77 637 short tons, being less by 4221 tons than the figures of 1895.

These summaries are as conclusive and perfect as they can be, and as on unquestioned authority are as reliable as they are interesting.

Law Notes.

Equity will not enforce a trust made in fraud of creditors.

Testimony of a single witness is sufficient to prove fraud.

Delivery of possession is essential to a gift in view of death.

A non-interest bearing deposit does not become due until demand.

The intent with which a conversion of trust property is made is immaterial.

A party cannot testify as the meaning or legal effect of an instrument in writing.

That the books of a firm show a person to be a partner is not conclusive against him.

The conveyance of all the firm property to a corporation dissolves the partnership.

A mortgage taken for a precedent debt does not make the mortgagee a purchaser for value.

Where two clauses of a contract are repugnant to each other, the latter will be rejected.

Money cannot be replevied by the owner after it has passed out of the hands of the original wrongdoer.

Stubs in a check book are not admissible to show the purpose for which the corresponding checks were given.

A conveyance made to hinder, delay and defraud creditors is invalid as to subsequent as well as antecedent creditors.

A member of a firm is not released because his co-partner agreed to assume the firm liabilities, with knowledge of the creditor.

Damages recoverable upon breach of contract are only those which are the direct and proximate result of the wrong complained of.

An order for goods made through the agent of the seller, subject to the latter's approval, may be countermanded before an acceptance is communicated to the buyer.

One buying personal property with knowledge of the existence of a mortgage upon it, and that it is unpaid, cannot attack the mortgage for want of acknowledgement, record and affidavit.

A duly authorized agent, acting on behalf of his principal, is not personally responsible on the contract, when the other party knows that he acts in the name and on behalf of the principal.

The next Exposition of the Sportsmen's Association will be held at the Madison Square Garden, New York, on March 12 to 19, 1898.

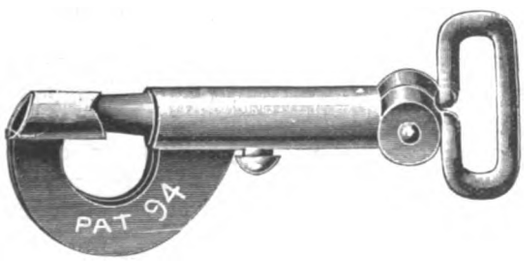
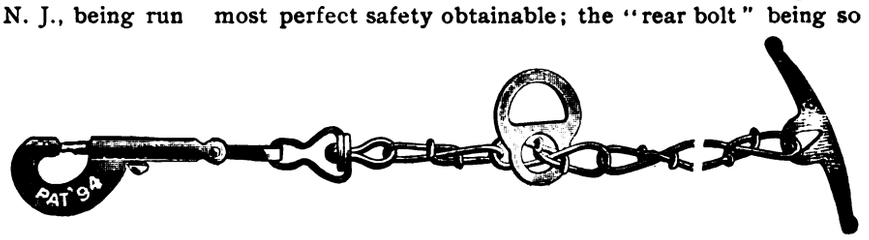
NEW GOODS AND SPECIALTIES.

Stitched Cotton Belting.



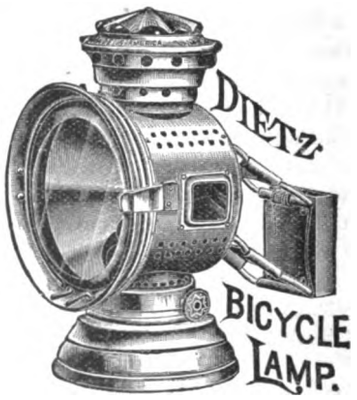
The Rossendale-Reddaway Belting & Hose Co. are among the largest manufacturers of Stitched Cotton Belting for machine driving and threshing machines in the United States; their extensive plant at Newark, N. J., being run



at present to its fullest capacity with the apparent possibility of long continuance. They are the manufacturers of the world renowned "Camel Hair Belting," which acknowledges no superior in point of excellence in wearing quality, and which has achieved so solid a record abroad as having so remarkably high co-efficient of friction in consequence of lying close to the surface of pulley, insuring the most perfect grip possible to be obtained. The Rossendale-Reddaway Co. are also large manufacturers of cotton and linen hose, especially fire hose, in the production of which their modern constructed plant is up to date, and fitted with the latest mechanical appliances.

White's "New Idea" Harness Snaps.

Ira F. White & Son, Nos. 76 and 78 Park Place, New York, are placing upon the market a line of sheet steel snaps for harness, rope chains, etc., and other chain goods such as coil chains, halter and picket chains, cow ties, swivels, dog collars, etc., that will command the attention of the trade by their uniform excellence and superior adaptability. The "New Idea" Snap, an illustration of which we give herewith, is manufactured from a special grade of the toughest sheet steel; the entire body (nose,

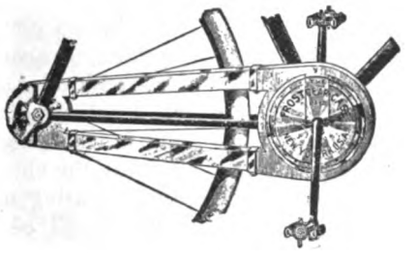


hook, ears and barrel) being formed from one piece. The eyes are solid cold forged steel. By this novel construction the greatest possible strength is obtained at the point of the severest strain—the hook—by presenting the edges of two plates of steel. As all "New Idea" snaps are nickel plated, they present a smooth surface and fine finish, and the barrel—or cylinder—being always free from scales or "warts," thus ensures a free action of spring and bolt, the most important feature in the success of any snap. The manufacturers claim for their novel construction of the knob bolt used in the "New Idea" Snap, the most perfect safety obtainable; the "rear bolt" being so

shielded, an accidental withdrawal is almost impossible. The snap which we illustrate, is only one of a large and complete line of harness, rope and open-eye snaps made by this firm. Special claims are also made for the "Square Knot" construction of the "solid steel wire" shown herewith, illustrating a tie which cannot be pulled apart, it being necessary to tear or shear the solid metal before it yields. Its peculiar form of construction insures a uniform strength that is not usually found in common welded chains, at the same time making it smooth, light, neat and strong, and making a halter chain, cow tie, etc., that is destined to become extremely popular. The manufacturers would be pleased to forward to the trade catalogue and discounts upon request.

The "Dietz" Bicycle Lamp.

The R. E. Dietz Co., No. 60 Laight Street, New York, are placing upon the market through the Hardware trade and dealers in bicycle sundries, the Dietz Bicycle Lamp, which we illustrate herewith. It is made of brass, finely polished and nickel plated, and weighs but 12 ounces. No solder is used except on bottom of oil fount. Among the claims made by the makers, it is stated the arrangement of drafts is such that the combustion is perfect. The light is white and intense, and it stays alight in spite of wind or jar. The reflector is parabolic, thus throwing all the rays of light straight ahead. It can be taken apart to clean. The oil fount is packed to prevent the oil working out. The



wick will not jar down. The door is hinged as the lamp can be more conveniently lighted in that way. They do not provide a sliding door on the side to light the lamp, because they think every time a lamp is so lit the reflector becomes more or less tarnished by the match. It is intended to be sold at $2.50, a liberal discount being given the trade from this established list price.

The Frost Gear Case.

The Frost Gear Case Co., No. 253 Broadway, New York, have been very successful this season in extending the

Digitized by Google

sale of their very desirable bicycle specialty, an illustration of which we present herewith. The materials used in the manufacture of Frost Gear Cases are rubber, aluminum and steel. The front box support is a steel stamping, covered by a seamless rubber wall. By the use of rubber they are enabled to get joints which are dust and water proof, and by means of the elastic wall the construction fits snugly around any size crank hanger and makes an absolutely tight joint at this point. The hole

in the inner wall of the rear box can be expanded over the rear sprocket, and springing back into place again gives a close joint. The rubber boxes are moulded to the required forms. The great adaptability of rubber to the varying close construction of American makers is one of the chief advantages of this invention. The rear box is supported on the rear axle. The rear support is stamped from a high grade of steel and heavily nickeled over copper. This support being adjustable, allows for different distances from center of rear sprocket to outside of stays. The rear box is shaped up to the support by means of a strong band-spring steel which fits inside the rubber box, and is held firmly to the rear ends of the chain tubes by the clamps which serve to support and align the chain runs This distender may be filed, allowing the rubber to be pushed in by the rear forks when the machine is built close. The entire rear support is so fitted as to be easily accommodated to the varying chain adjustments, and can even be put inside the frame if necessary. One of the strong points in favor of this gear case is that the face plate can be quickly removed, exposing the whole chain to view. When taking out the chain it is necessary only to roll back the front edge of the rubber box, and remove the chain nut through hole in the steel support. Putting the chain back in place is an extremely simple operation. Having placed the chain bolt in the open link, all that is necessary is to drop the chain gently down the tube, elevating the front end of the bicycle. When chain touches the rear sprocket a gentle revolution of the rear wheel will forward the chain down to the front end of the lower run, when it can be connected as usual, the whole operation not requiring as much time as it does to put on a chain on a lady wheel equipped with chain guard.

The Malin & Co.'s Spooled Wire.

The Malin & Co., Cleveland, Ohio, were the first important concern to recognize the selling advantages of a perfect line of spooled wire, and, from a small beginning, they achieved a deserved success that makes them to-day the largest manufacturers of these goods in the world, having

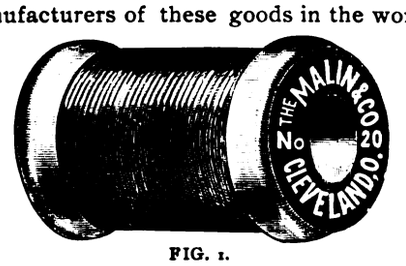


FIG. 1.

a daily output of 10,000 spools of wire. In addition to the usual and regular line of wire, without which no Hardware stock can be considered complete, they also spool many special wires, which are frequently required for manufacturing purposes on various sizes of spools. The salable stock line consists of steel, tinned, brass and copper wires, put upon spools for the retail requirements, holding quantities of 1 ounce, ¼, ½ or 1 pound, as shown in Fig. 1. This method enables the retailer to carry a very fine assortment of these desirable every-day goods without too great an outlay. The spools are packed in neat boxes, holding one dozen; each spool being plainly marked with the gauge of wire and the number of feet contained on the spool; the outer coil of the spool is coated with shellac,

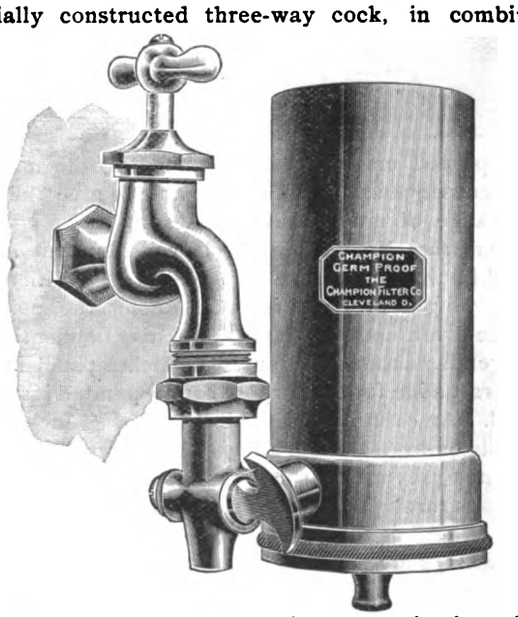

FIG. 2.

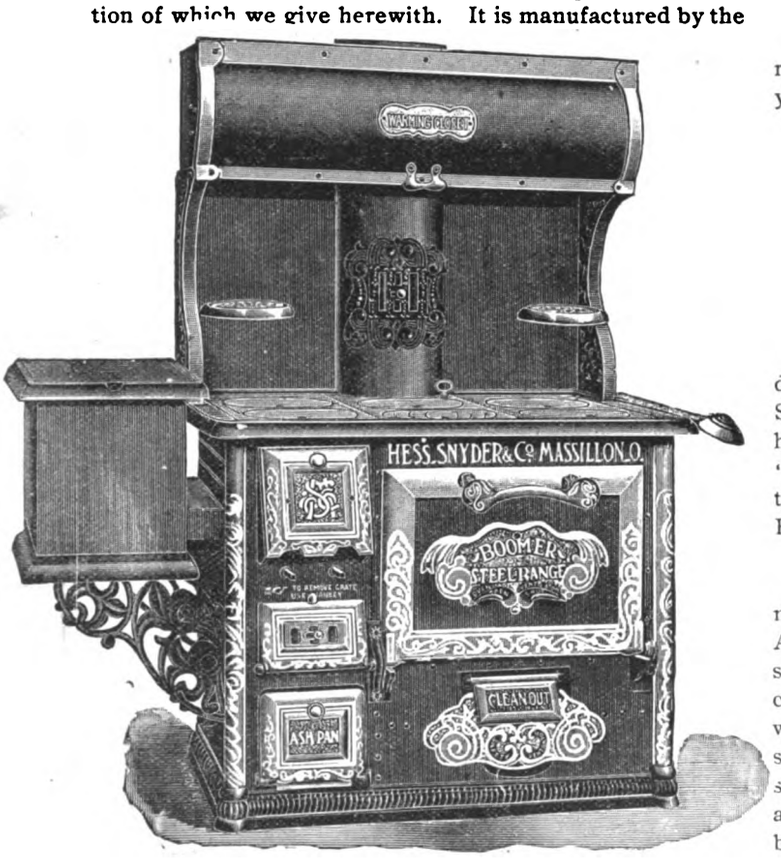
which prevents any rust or tarnish. The old style of handling wire in a retail store is inconceivable, being replaced so completely by this clean and handy style, and the profit of handling the goods is more certainly figured than by any other way. One of the most desirable ways in which the company offer their product is in the form we illustrate herewith (see Fig. 2), which is called a "Retail Stock of Spooled Wire." This stock consists of 147 spools of the kinds and gauges most desirable for a retail dealer no matter how small. A profit of about 100 per cent. can be realized by the retailer, and the stock always found in fine condition. These goods are all kept by the leading jobbers of the country, the last mentioned specialty being ordered in lots of 100 at a time. The company publish a very graphic catalogue, in which the illustrations are all very handsome and of full size. Catalogues and samples will be sent the Hardware trade upon request.

The Champion Germ-Proof Water Filter.

The Champion Safety Lock Co., Cleveland, Ohio, have recently added to their line of Patent Champion Germ-Proof Filters a style which will become very popular; it is shown in the illustration herewith. By the means of an especially constructed three-way cock, in combination



with a hose coupling (or a special connection intended for plain faucets), they are enabled to supply the demand for a filter of simple construction and yet of convenient form, which will furnish an ordinary household with filtered water for drinking and culinary purposes. The three-way

Digitized by Google

cock is constructed in such a manner that by simply a quarter turn of the key, the water from the water pipes will pass through the filter, and by another quarter turn a direct supply of unfiltered water may be obtained, or the supply of water may be entirely shut off. Another important feature is noticed, that to clean the filter it is only necessary to unscrew the bottom to which the filtering tube is attached, and brush off the accumulation of organic filth and disease germs. One of the best points in this style of their popular filters is the fact that although of large capacity, they do not reach down into the sink more than two inches; the fact also that a large supply of filtered or unfiltered water may be had at all times, makes it one of the most convenient and satisfactory filters that has come under our observation, and one that will undoubtedly fulfil all possible requirements. They issue a very handsome catalogue that will be mailed upon request.

Boomer Wrought Steel Ranges.

Hess, Snyder & Co., Massillon, Ohio, are the manufacturers of the "Boomer Wrought Steel Range" an illustration of which we give herewith. It is manufactured by the

aid of improved machinery and claimed by the manufacturers in consequence, that they are able to give the trade a steel range of much heavier material, it being made throughout from No. 14 gauge cold rolled patent leveled steel, and in their catalogue under each illustration they give the weight of each range. Among the points of excellence dwelt upon by the makers, may be mentioned:

The oven is ventilated through the nickel panel in oven door, a draft slide for the purpose being operated just below the panel. An oven rack with air space of ⅜ inch underneath rests on oven bottom allows a good circulation under the pans and prevents burning on the bottom.

Air passes through clean-out panel between false bottom and floor as well as through apertures in the back of range. These openings are sufficiently large to carry off any heat that may radiate through the following material: First, flue bottom; second, one inch of dead air space; third, ⅛-inch thick of asbestos; fourth, galvanized iron false bottom.

Air entering the ash pit passes up behind all linings through perforations in the top of linings. They are kept from overheating by a constant circulation of air behind them, consequently they will last much longer. The same air circulation keeps the oven next to the fire-box from becoming warmer than any other part of the oven, and passes on in a thoroughly heated condition through the perforations in top of linings to mingle with the gases emitted by the coal where a perceptible secondary combustion takes place. The fact is that a much hotter fire is produced by the consumption of gas and oxygen than by the coal itself.

A cast iron grate is introduced in the ash pit just above ash pan. The duplex grates are then revolved allowing hot coals to fall on grate. A covered broiler can then be introduced through broiler door. By this method a constant draft is passing through the fire keeping it hot, as well as carrying all steam and odor into the chimney.

The range as a whole presents a pleasing appearance, and a perusal of their catalogue, which will be forwarded upon request, will give particulars in regard to other features.

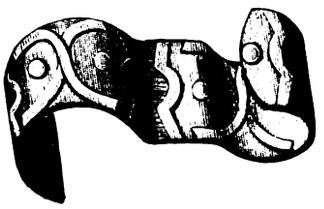
They Use the "Bommer."

That marvelous group of high buildings, which has been raised with unprecedented energy in New York in recent years, including the:

Manhattan Life,
Bowling Green,
American Surety,
Standard Oil,
Bank of Commerce,
St. Paul,
Johnson,
Presbyterian,
Manhattan Hotel, etc.,

dominate the sky line from every point of view. Bommer Spring Hinges are used in every one of those mentioned here. Bommer Spring Hinges have become famous for "That Easy Movement;" it is their peculiarity; they do their work calmly; no afterclaps. Live dealers in builders' Hardware carry them in stock.

An announcement that is of special interest to American manufacturers will be found on page 17 of to-day's issue. A first-class firm of Hamburg, Germany, who are wholesale dealers and agents in household goods, desire to open correspondence with American manufacturers in the Hardware line. They have a large staff of agents all over that section of the world, and desire to secure a number of specialties for import into Germany. Any communication addressed to "Foreign," care of *Hardware*, No. 143 Chambers Street, New York, will be forwarded to them.



The Allentown Hardware Co., Allentown, Pa., have suspended under executions aggregating some $29,000. It is reported that the personal property and real estate will be sold and the company reorganized. An officer of the company states that difficulty in making collections was the cause of their suspension, and that the sudden death of the superintendent some weeks ago was a severe blow. The many friends of the officers and managers of this company will be pained to learn of this temporary misfortune which has overtaken them.

On Wednesday, September 29th, there will be a meeting of the Hardwaremen of North Dakota, for the purpose of forming a Hardware association. A circular issued by those having this movement in charge, asking the co-operation of the Hardware merchants of the State, was responded to by more than fifty per cent. of the same, who gave their unqualified endorsement, and promise of assistance to the movement. The meeting is to be held at Grand Forks.

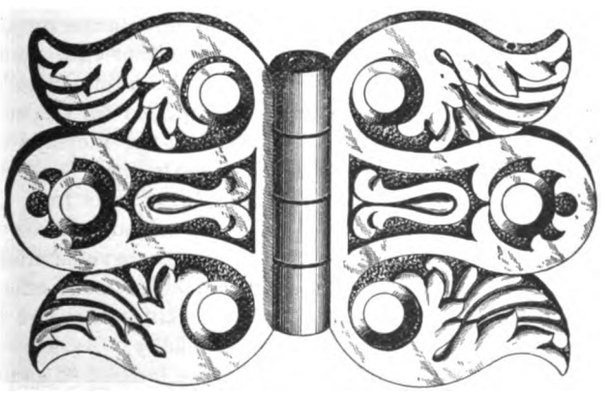
Christensen's Fancy Cabinet Hardware.

R. Christensen, No. 88 Chambers Street, New York, is engaged in manufacturing a full line of Fancy Cabinet and Gen-



eral Hardware, some illustrations of which we present herewith, and which include in the assortment a line of wrought polished brass hinges, with brass pins, in all the many and

various shapes demanded by the up-to-date dealer; this line also embraces brass hasps and staples in large variety, cabinet and closet hinges, moulding hooks, draw pulls in

plain and ornamental styles, and such other articles of fine ornamental Hardware which are now used largely for cabinet ornamentation and interior decoration. Any of

these goods can be furnished in brass or bronze metal, oxidized silver and other modern finishes, to meet every possible requirement demanded by an exacting taste.

Death of Henry M. Lyon.

Henry M. Lyon, formerly of the firm of Sickels, Sweet & Lyon, died on Thursday, September 16th, at Ampersand, Saranac Lake, N. Y., in his 39th year. He was well known to the Hardware trade of this city and throughout the Eastern States, where his trade acquaintance was very extensive and of long continuance. He had been the junior partner in the firm of Loderback, Gilbert & Co., which was eventually succeeded by Sickels, Sweet & Lyon, where he remained until about a year ago, when ill health caused him to sever his business connections, and endeavor to regain his health by a permanent change in his immediate surroundings. He was supposed to be in a condition of physical improvement, which his friends rejoiced in seeing evidence of, when the sudden announcement of his death came in the nature of a surprise.

Mr. Lyon was a member of the vestry of Christ Episcopal church, Bridgeport, Conn., and was prominent in Masonic circles, being a member of Corinthian Lodge, Jerusalem Chapter and Council, Hamilton Commandery, K.T., and Pyramid Temple, Nobles of the Mystic Shrine of that city. He was also a member of Seaside Council, Royal Arcanum. The Hardware Club of New York; the Seaside Club and Algonquin Club, Bridgeport, also shared in the honor of his membership; he was one of the early vice-presidents of the latter.

Being a ready and fluent speaker, and possessing a pleasing presence, his abilities and grace of character made his society much sought for on every social occasion. His life endeared him to those who were so fortunate as to know him, and his death brings an individual sorrow which will never be forgotten.

As feelingly referred to by Mr. Sickels, with whom he was for many years connected in business, "his associates experience a sense of loss difficult to express, being deeper and more emotional than is usually felt for a business associate, for underlying the close companionship known to all of his business friends, there was a feeling of love for the individual which indicated the possession of highly magnetic characteristics which deeply endeared him to those about him."

Robert Edwin Dietz.

Robert Edwin Dietz, who died at Hempstead, L. I., Sunday, September 19th, was born on the 5th of January, 1818, in this city, on the corner of Spring and Crosby Streets, in a house built there by his grandfather, who came to this country during the war for the independence of the colonies, and who kept a tannery on the corner of Wooster and Spring Streets. He was also the first manufacturer of glue in this city, his glue works being located in Magazine Street, which is now that part of Pearl Street between Broadway and Chatham Street.

The subject of our sketch has not only been a life-long resident of this city, but an enterprising man of untiring energy. He had six brothers and three sisters, and survived them all, and during his life has seen many changes here. As a boy, he skated from North to East River over the frozen stream, which was where Canal Street now is. He has seen the immense growth of this city, and the different modes of transit changed from the slow stages to our horse car, cable, electric and elevated railroad systems. In 1836, at the age of eighteen, he started as a Hardware clerk with the firm of Woolf, Spies & Clark, who were then doing a large business in Maiden Lane. They were an old firm, having been established early in 1800 by C. & J. D. Woolf. Mr. Dietz was one of our oldest volunteer firemen, having served in the department from 1837 to 1842. He was a member of No. 9 Hose Co., which used to lay with "Lady Washington" No. 40 Engine Co. in Elizabeth Street, and outlived all his companion mem-

Digitized by Google

bers of this company. He was a pioneer in the manufacture of artificial lights in this city, having commenced in 1840 to manufacture lamps, burners, gas fixtures, etc. He was a perfect encyclopedia on matters pertaining to the marvelous growth of this city. During his life he not only made a comfortable fortune for himself, but for more than half a century has given employment to hundreds of hands. When the famous opera singer, Jenny Lind, first appeared in America, the contract was awarded to Dietz Bros. & Co. to illuminate Castle Garden for the opening, and when the great showman, P. T. Barnum, opened his first museum on the southeast corner of Broadway and Ann Street, Dietz Brothers had the contract to fit it throughout with gas fixtures. When coal oil, or kerosene, first came in use, he and his brothers, in 1857, invented the first flat wick chimney burner. The "Dietz" burners had an extensive sale. About 1860 Dietz & Co. opened a branch house in London, England. In 1868 Mr. Dietz took up the manufacture of a new hand lantern called the Tubular. This style has largely superseded other kerosene lanterns, and to day is sold all over the world.

The present R. E. Dietz Co., of which R. E. Dietz was founder and former president, occupied, until its recent destruction by fire, a large building erected by him on Greenwich and Laight Streets, New York, with a branch house at Chicago, Ill., and at London, England.

Resolutions on Death of F. F. Stone.

At a special meeting of the Ohio Hardware Association, held at Sidney, Ohio, Thursday, September 9, 1897, the following resolutions on the death of Ferdinand F. Stone, of Urbana, Ohio, were read, received and adopted:

Whereas, It has pleased the All Wise Ruler of the Universe to remove from us by death, the grand, noble and generous-hearted F. F. Stone, a member of the Ohio Hardware Association; and,

Whereas, We recognized him while in life as an active, zealous and deeply interested member of our Association, having its interest and welfare nearest his heart, and, sympathizing with his prostrated and bereaved family, be it

Resolved, That in the sad death of F. F. Stone, the Ohio Hardware Association has lost one of its most useful, honored and respected members, whose untimely death has cast a gloom over the members of the Association, who will not only mourn his loss, but will ever keep green in their memories his frank, earnest work in the interests of the Association, and his genuine and courteous treatment of his fellow members.

Resolved, That we deeply sympathize with the stricken and bereaved family of the deceased, to whom he was a kind, affectionate and indulgent father and husband.

Resolved, That these resolutions be spread upon the minutes and that an engrossed copy, properly signed, be transmitted to the family of the deceased, and that the trade papers be requested to publish the same.

Important Cutlery Sale.

As will be seen by an announcement in another column, E. Bissell, Son & Co., No. 12 Murray Street and No. 15 Park Place, New York, announce by order of Charles J. Healy, who is retiring from the stock business, an auction sale of the entire balance of his stock of pocket and table cutlery and kindred goods. They will also offer for sale by order of Mr. Healy, as receiver, the balance of the stock of cutlery of the late firm of McIlwaine, Linn & Hughes, comprising a general assortment of pocket knives, scissors, razors, etc. They further announce that the sale will be worthy of the attention of the trade, and especially of all buyers of cutlery. This sale will take place on Wednesday and Thursday, September 29th and 30th, at 10 A.M. each day. Catalogues will be ready on September 25th, and will be mailed on application.

The Stearns Chainless.

The chainless bicycle has finally made a definite appearance in the United States. One large concern at least, E. C. Stearns & Co., have come out not only with an announcement that they are to make and sell a bevel geared chainless wheel in their line for 1898, but have issued for publication a complete description of the new model as it has been definitely decided upon by them. The accompanying illustration gives a fairly good idea of the external appearance of the new Stearns chainless. It is, in a way, a disappointment, for it is less bulky and awkward than it has been thought possible to build such a machine. In fact, it is graceful in its lines, and so far as its mechanism goes stands careful scrutiny in promising fashion. If the type is to prove practical, here certainly is a model which ought to stand the test.

E. C. Stearns & Co. say that they have decided to put a chainless Yellow Fellow out, after a series of experiments extending over several years, and what they claim for their design is that it is "the bevel gear so simplified that it can be assembled and adjusted by the average rider, and that the practical difficulties which concededly stand in the way of the perfect operation of bevel gears have been overcome by the simple devices which will be characteristic of our particular type of machine."

To best understand the new bicycle it must be mentally dissected, and to do this one has but to divide the driving mechanism into three parts, the crank hanger and its auxiliaries, the shaft which transmits the power from one set of gears to the other, and the rear hub and its attachments. In the chain driven bicycle there are but two sets of bearings in this part of the machine, those in the crank hanger and rear hubs. In addition to these in the new Stearns chainless there are two more sets upon which the bevel gears revolve. Beginning at the crank hanger, the power is applied to the cranks, the right hand crank being made integral with the one side of forward gear which corresponds to the sprocket on the chain driven bicycle. The gear of the bicycle is determined by the size of the side above referred to, and in the Stearns model a variation of from 68 to 80 is possible. The shaft which transmits the power to the rear wheel is not unlike an elongated rear axle. It has a bevel gear at either end, running on frictionless bearings, which may be adjusted to any degree of tightness or looseness or opened for inspection by simply unscrewing and sliding back the nickeled caps which are shown in the broadside engraving. The shaft proper runs through the right hand lower rear fork, thus keeping the tread of the bicycle substantially as narrow as in the chain driven type. The fourth bevel is integral with the rear hub, and here is an adjustment effected from the outside, so simple in its workings that the rear wheel may be removed quickly and readily. As shown in the illustration all the bearing parts are incased so as to be as near dust proof as possible, and it is claimed that the variation caused by wear will be so slight that it will not be necessary to adjust the wheel more than once a year. One of the several experimental machines has been run in

Digitized by Google

the Stearns factory for three months, with dry bearings on a line shaft with 36 tons pressure. That it stood up through such a test the firm considers good evidence of its practicability.

The adjustment of the bevel gears allows a wide variation in the angles of contact. Normally the gears are ⅝ inch face and 10 pitch, and operate noiselessly; ¼-inch balls are used in the gear bearings and in the rear hub, and 5-16-inch in the crank hanger. The tread is slightly under 5 inches, and the weight of the machine is 25 pounds.

National Credit Men.

A meeting of the Board of Administration of the National Association of Credit Men was held on September 20th at the Manhattan Hotel, New York. The entire Board was represented either personally or by proxy, and matters of special importance occupied their attention for six consecutive hours.

The work of the various standing committees—Membership, Legislative, Business, Literature, Credit Department Methods, Investigation, and Improvement of Mercantile Agency Service, was very carefully discussed, and the plan of activity submitted heartily endorsed.

The secretary's report shows the organization to be in a flourishing condition, with an organized membership of 1746, or a gain since June, in spite of the withdrawal of the St. Joseph association, of 333, and an individual membership of 243, or a gain since June of 55, making a present enrollment of 1989.

One of the most important questions discussed was that of the best method of handling fraudulent failures, and after listening to a comprehensive plan, the following resolutions were unanimously adopted:

Whereas, Fraudulent failures constitute a serious menace to the mercantile community, and

Whereas, Such failures are as dishonest and reprehensible as any form of robbery, and the safety of the business public demand that all persons involved therein be brought to justice, therefore be it

Resolved, By the Board of Administration of the National Association of Credit Men that the plan of dealing with suspicious failures presented be, and the same is hereby approved, and the Board recommends that the proposition contained therein to select legal correspondents throughout the United States to act in conjunction with some well known detective agency in investigating such failures be especially emphasized in carrying out such plan, and be it further

Resolved, That the officers of the association, together with the Committee on Investigation, be authorized to make such changes and modifications in the plan presented as they may deem expedient.

This is a very advanced position which has now been taken up by the association, and it is certain to have a far-reaching influence in materially reducing this class of dealings. The Board also passed a resolution instructing the officers to incorporate the association under the laws of the State of New York. The resignation of the St. Joseph association which was presented owing to the attitude of the National organization in endorsing, at its last convention, the Torrey Bankruptcy Bill, was accepted. A letter was also read from Mr. Yale, president of the St Joseph association, disclaiming any intention whatever in forming another National organization, which action was widely intimated at the time when the association withdrew from membership.

It was the unanimous sentiment of all the members of the Board that very effective work will be done during the current year looking to the great improvement of mercantile transactions. At the invitation of President Cannon, the Board dined together at the Hotel Manhattan at six-thirty.

It is better to aim high in life, even if your shot does fall short of the mark.

Review of the Markets.

Hardware: The demand continues to be generally good in every section of the country, especially in the Western States, where, in many instances, business surpasses every previous expectation. The orders from that favored section of the country have been kept up, and while of fairly good proportions, begin to show some relaxation in frequency as the markets fail to show much of a tendency toward advanced prices. The desire is prevalent among the manufacturers to obtain a higher price, but beyond a stiffening up on current quotations the changes are not sufficient to startle any one.

Wire Nails: The sales of wire nails have been very satisfactory to date, and while they have been many in number the volume of nails distributed has been from stocks by no means large, the supply throughout the trade in jobbers' and manufacturers' warehouses being of limited proportions. The mills are asking $1.45 to $1.50 for carload lots f. o. b., with prospects of a still further hardening of price in the near future, as a number of mills are not in the market to any great extent. New York quotations are given as $1.60@$1.65 according to quantity.

Cut Nails: The market for cut nails is less in sympathy with wire nails than would be supposed, considering the sustained inquiry, with so little change in current quotations. Competition is of a conventional character, and prices remain as previously quoted, carload lots on dock, New York, being held at $1.33; smaller lots from store, $1.43 to $1.45.

Steel Goods: The associated manufacturers in this important line have just announced their discounts for the coming season, every evidence being had that with the prospect of a very prosperous year before them, the determination to work in harmony with each other is everywhere apparent. List prices recently prevailing will be retained, and the discounts agreed upon are indicated by the following quotations of the Iowa Farming Tool Co., Fort Madison, Iowa, which relate to the regular line of steel goods and other specialties of their manufacture:

Linseed Oil: The Dean Linseed Oil Co., No. 181 Front Street, New York, quote prices as follows: In lots of less than 5 barrels, 39 cents per gallon; in lots of 5 barrels or more, 38 cents per gallon. Boiled linseed oil, 2 cents per gallon higher. Calcutta oil, 54 cents per gallon.

THE MINNEAPOLIS TRADE.

It has been some time since you have heard from us; it has not been on account of our being so busy taking in money realized from dollar wheat; but, as a matter of fact, we are already beginning to feel the good effects of higher prices for wheat, and we believe that prosperity, as far as our section of the country is concerned, has already come, and with reasonable prospect of remaining with us for some time to come; certainly the country tributary to these two cities is in a very prosperous condition. Jobbing houses in all lines report largely increased sales; in some instances the best business that they ever had. The draymen and transportation companies are employing all the extra teams that they can get to haul goods to the depots. Retail dealers generally, while not as busy as the jobbers, still report good business. While it is too late this fall to expect much in the way of increased sales locally in the builders' Hardware line, still there is considerable building going on, and more mechanics' tools being sold than for several years past. This of itself speaks volumes, as it shows that the mechanics are well employed, and have confidence enough in the future to warrant their taking a portion of their wages to buy necessary tools.

The lumbermen are quite pleased over the advance of about $2 per thousand in the price of lumber. Large logging contracts have been made, and in some instances men have already been sent to the woods much earlier than usual. There is no excuse for a laboring man here now to be out of work, for there is plenty of work and at good wages for all.

Nails are being held firm at the advance prices, and with the hope that corresponding advances will be made in other lines, such as screws, tacks, bolts, cordage and the general line of goods that are close to the raw material where prices have been exceedingly low. On the falling market that we have had for the past five years, it has been very difficult to make a profit, and we would like to see an upward tendency all along the line.

The gun and ammunition trade we understand has been very good here this season, an unmistakable sign of prosperity. Ducks, geese and prairie chickens will suffer accordingly; game of all kinds is reported abundant.

The State Fair just closed, and our usual fall carnival has brought enormous crowds to the twin cities; more money has undoubtedly been spent than in any former years.

W. K. MORISON & CO.

THE DAVENPORT TRADE.

Manufacturers are advancing prices slowly but surely. Jobbers are following suit as far as can be determined from travelers' reports.

Crops are safe from weather and frost. Prices of grain are still climbing the golden stairs. Prosperity received a hearty welcome on arrival and seems well pleased with the location and may settle here.

SICKELS, PRESTON & NUTTING CO.

THE PHILADELPHIA TRADE.

At the time our last letter was due for *Hardware*, we were engaged in a much more agreeable occupation, viz.: in fishing and sailing and having a good time generally, and while we may not have brought back the usual crop of fish stories, we have certainly returned with more vim and in better trim to meet the good times which we firmly believe are now on the way.

According to all reports, the Western jobbers are already feeling very decidedly the good effects of the new prices for farm products, and it is a consoling thought to Hardwaremen, who have suffered so long, and so much, from a falling market and continually lower prices, to see that the doctrine so often preached by economists that low prices are a benefit to the countrv is meeting with a most signal refutation, and that the whole country, without any regard to partisanship, rejoices at the increased prices now being paid for products of the farm, and is hopeful that the prices of other goods will advance also.

In the East the movement has been more gradual, but it seems to be none the less certain, and the money now be-

Digitized by Google

ing paid out in the West for crops is bound to find its way to the manufacturing East before long, and being paid out in wages is sure to have an effect on the Hardware trade at large. Already the improvement is noticed, while prices are firmer in tone, and many extreme quotations are being withdrawn. The most noticeable advances so far have been wire nails, wire and bolts, but the higher prices asked for material must soon result in higher figures on all goods near the raw material.

Collections are fair, and it is hoped that now that the severe drain of the last few years is over, those who have so far weathered the storm, will be able to pull through with unimpaired credit. BIDDLE HARDWARE CO.

THE COLUMBUS TRADE.

Trade continues good, but collections are not what they should be. The mine operators are not running smoothly yet, and have not harvested any coal since settlement of the strike. Quite a number discount their bills, but a greater number take the full limit of time, and a good deal more; those are the ones jobbers have been carrying for four months and longer. The fall in the price of wheat has checked the sale of that product, and farmers who will pay as soon as they sell their wheat, are making their creditors wait until the price suits them, and as they are hard to suit, it may be like the man who went to a Quaker meeting—a long wait. We understand that the only fellow who has a kick coming this fall is the football player. So we can't kick, if we were so disposed, as we don't play football.

Nails and wire are considerably higher, and manufacturers are not filling orders promptly. The strikes at the Salem Wire Nail Works, both at Salem and Findlay, and also at the New Castle Mills, take about eleven thousand kegs a day out of the market, which accounts for the shortage in nails. This section of the country was blessed with a much needed rain last week, and since that time the weather has been as fine as any one could want. Corn is being cut fast, and that work is about over, and the green things that perambulate on two legs can go under cover. We think all danger from frost is past. We make it a point to get under cover early ourselves.

THE SMITH BROS. HARDWARE CO.

THE OMAHA TRADE.

Trade in all lines, at the present time, is unusually active and the Hardware trade is no exception to the rule. Forces have been increased and in many cases are putting in extra time in order to handle the volume of business which is very largely in excess of the corresponding period for several years past. The outlook for Fall trade was never more promising and the question arising is as to whether manufacturers will be able to supply the demands and the jobbers be able to secure sufficient supply of goods to satisfy the demands of the trade.

RECTOR & WILHELMY CO.

THE BOSTON TRADE.

Although we know little of the "boom" that has struck certain distributing centers, we do know that we are having a good September business, with a much better feeling than existed one year ago. Business conditions are certainly growing better, and all signs point to its continuance. We are thanking Congress that it adjourned, and only hope it might remain in its present state of quietude for months to come. Were it to convene just now we might be plunged into a "currency reform" which would shatter our present bright prospects, or a Cuban or Hawaiian scare could be manufactured that would give us a set-back from which it might take months to recover.

We are pleased to note the legitimate reasons for several advances made in iron and steel, and hope they may be

EMERY WHEELS

Fall into two great classes: Those in which the emery grains are bound together by rubber, those in which some other cement is employed. The rubber wheel does safer work and more of it than any other—why? After the emery and cement are mixed together, it is necessary in every case to dry out the compound. During the drying a shrinkage occurs. *Shrinkage does not crack rubber; it does crack all other cements more or less, and often in the interior of the wheel, where it cannot be detected.* Even with the utmost care and best intentions in the world, makers of this kind of wheel cannot help sending them out to their customers with hidden cracks. They are put into use and burst—with the usual results. **The Vulcanite Emery Wheel--made with rubber--does not crack, and is the only kind that is absolutely safe.** That's one reason for using it—in next "Hardware" we will give you another.

maintained during the remaining months of the year. This means higher prices and better value for manufactured goods.

The demand for builders' Hardware shows that there are a large number of houses yet unfinished, and judging from the applications for building permits, this line of goods bids fair to remain in demand during the winter months.

Seasonable goods, axes, handles, skates, chains, etc., are moving well, and prices are being well maintained.

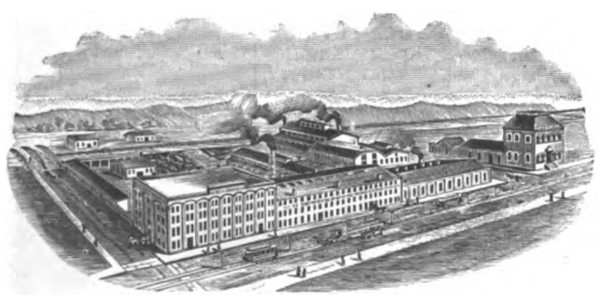
FRYE, PHIPPS & CO.

THE PITTSBURG TRADE.

The coal strike is over, and thousands of men at work trying to rush to market in two months what would ordinarily take four. This has a very beneficial effect upon business in this vicinity, and has shown it so in orders for tools, etc., during the past week. The general improvement over the western part of the country is working our way gradually. Our manufacturers feel it first and merchants next. We are pleased to see the stiffening prices in raw iron and its products. This will reach general Hardware before long, and help business greatly, as we all know how much easier it is to sell goods on a rising market. Having had to sell for years on a falling market, and take the loss of stock on hand at each decline, it will be quite an agreeable change.

With the improvement in business, it is to be hoped jobbing houses who have been doing business for years without reasonable profits, will cease senseless cutting of prices, and will ask a fair profit on their sales. Good years are scarce, and we should not forget it.

Weather conditions are favorable for fall trade, a welcome change from great heat having occurred last week.



LOGAN-GREGG HARDWARE CO.

What a man shall reap in business depends upon what he shall sow.—*Hardware and Metal Reporter.*

Recent Trade Publications.

The Pelouze Scale & Mfg. Co., Chicago, Ill., have just issued their 1897-1898 catalogue of their unique scale specialties, which is the most important they have ever given the trade, and exhibits ample evidence of their having greatly enlarged their manufacturing facilities and increased their novel line. It now embraces postal, counter, family, confectionery and hanging scales, making an assortment well worthy of the attention of all Hardware dealers. Among the scales of novel construction and special uses, we notice the "Ideal" No. R 1, specially made for weighing seeds, tea, etc., requiring fine weighing, from ⅛-ounce to 1 pound; also the "Victor" postal and merchandise scale, weighing from ½ ounce to 1½ pounds and giving the exact cost of postage in cents on letters, books, merchandise and newspapers. Their line of postal and merchandise scales is quite extensive and should meet with a ready sale, as they fulfill every possible requirement in these important departments. They also make a "Mercantile" equivalent scale, which will give the weight of any article from ½ ounce to 2 pounds, and at the same time gives the weight of same article by the dozen, gross or thousand, making it extremely useful in the warehouse or sample room where weight of samples is required on underwear, stockings, etc., for comparison in ordering. Catalogue will be furnished upon request.

Van Wagoner & Williams Hardware Co., Cleveland, Ohio, and No. 14 Warren Street, New York, have issued under date of September, 1897, a new catalogue of their many specialties, making a very complete pamphlet of 80 pages, fully illustrated and well printed on excellent paper. It is very important that the Hardware trade, who for so many years have been steady patrons of this company, should be in possession of this catalogue, for it contains numerous changes in list prices, and their discount sheet shown in our "Review of the Markets," names in many cases prices that have been materially reduced. The

SOLD BY ALL HARDWARE DEALERS.

extensive plant now controlled by this leading manufacturing house is well illustrated in a series of six half tone pictures, which form a prominent feature among the opening pages. Among the valuable specialties which have long been leading goods in the trade, are shown the American Gem and Oxford single and double acting spring hinges. The company have added to the line, the "Cambridge" Spring Hinge, especially designed to bolt on marble for water closet doors, hotels, office and public buildings, and the "Advance," which is the latest of the "holdback" variety, and presents a pleasing appearance, indicating strength and solidity. Their other "holdback" spring hinges, the Knoxville and Success, are handsomely illustrated, and so is their well known Columbia line, which, with the Crown and Acme, still retain their old time popularity. Embraced in a number of pages are their well known Gem and Star Coil door springs, their "Trackless" sliding door hanger, and the assortment of Gem steel wire coat, hat and ceiling hooks, etc., etc. Their heavy goods cover a number of pages, which include Samson anvils, solid box, machinists,' farmers' and coachmakers' vises, to the uniform excellence of which lines the trade can bear substantial witness, while the remaining contents of the book illustrate admirably their assortment of hammers, sledges, mauls, wedges, etc. The catalogue will be found a useful one for the trade, and will be forwarded upon request to the company at either address.

Simmons Hardware Co., St. Louis, Mo., catalogue No. 280, covering an extensive assortment of reed furniture, manufactured expressly for that company. It forms a pamphlet of 44 pages, oblong in shape, 7½x11 inches, and apparently embraces everything in reed goods of a desirable character. The illustrations which crowd every page with interest are excellent, and the compilation reflects credit on the catalogue department.

The Slaymaker, Barry Co., Connellsville, Pa., have just issued their catalogue No. 20, which is the most ambitious volume they have ever published, forming a handsomely bound volume in half morocco, with cloth sides, consisting of 350 pages, 9x12 inches in size, on good paper, and with excellent engravings. In addition to their very large line of padlocks, which have previously been the most noted product of the company, they show in this catalogue a full line of builders' Hardware, door locks and latches, butts, knobs, escutcheons, bolts, bells, etc., which present features of interest and importance.

White & Conant, Worcester, Mass., offer their Hardware stock and fixtures for sale. Any party who wants a good thing for cash can obtain particulars by seeing or addressing them.

Prussian Railroads.

J. C. Monaghan, U. S. Consul at Chemnitz, Prussia, has this to say regarding Prussia's railroad earnings: State ownership of railroads plays a very important part in Prussia's finances. Earning enormous sums, serving commerce and manufacturers in times of peace and all strategic purposes in times of war, they have more than justified the arguments that urged the Government to own them, and the liberal policies that constructed and developed them in all parts of the Empire.

"The real value of railroad statistics is not evident till one takes up the net gains. These, in the last estimate, were 436,000,000 marks ($103,768,000). Out of this surplus, 217,000,000 marks ($51,646,000) go to pay interest, bonds, etc., leaving 219,000,000 marks ($52,122,000) to be employed as the Government may deem best in other departments. The budget estimates of all other Government expenses amount to 480,000,000 marks ($114,240,000). After covering their own expenses, Prussia's railroads supply 46 per cent. of this amount. No other branch of public property pays so surely and so well. The certainty of the receipts, the amount, the ease with which they are obtained, and their cash character render them the most useful of all the moneys turned into the public treasury. Whether the railroads are managed more successfully than they would have been under private ownership it is hard to say. The State has had its hand on the roads from the very beginning. Seeing how they would aid armies, and also how necessary they would be in the new era opening up to the Empire, the Prussian government did not hesitate to take the management of the railroads. Their quasi-public character has helped the people to understand that they should be controlled, if not owned, by the State. The tendency all over the Empire is toward State and city ownership of all kinds of transportation facilities, roads, railroads for steam, horses, electricity, etc., as well as telephones, telegraphs, and other means of communication."

After a somewhat extended vacation, the man at the "Corner Desk" in the Hardware establishment of the W. Bingham Co., Cleveland, Ohio, is at it again. Under date of September 1st, his communication again appears for the interest and instruction of the Hardware trade in that section of the country. This little sheet is written and managed by J. B. Comstock, who wields a ready and facile pen, and who knows what the trade are in search of at each season of the year.

The Higgins Mfg. Co., Winchester, Mass., are introducing a line of 1898 bicycle specialties that deserve the attention of the trade. These include flat toe clips, wire toe clips, bicycle racks, saddles, etc. They also make tack claws and other Hardware specialties. They have recently issued a neat little catalogue of their bicycle sundries, and will be pleased to send it, with prices and other details, on application.

RETAIL TRADE RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Hardware Stores.

Anniston, Ala.—L. M. Burns, of the old firm of Burns and Hussey, has gone to Columbus, Ga., where he will establish a business for the sale of crockery, tinware, etc.

Barrytown, Mich.—S. S. Wilson.

Chicago, Ill.—The Chicago Stove Board Co. has been incorporated by William M. Gager and others to deal in stove boards. Capital stock, $2500.

De Land, Fla.—R. D. McDonald has opened with A. E. Gleason as manager.

Durand, Mich.—D. Deveraux will open on West Main Street.

Hamlet, Ind.—P. Roose will soon open.

Kalkaska, Mich.—H. Price has formed a partnership with T. D. Hobbs in the Hardware business.

Milford, Del.—T. D. Pierce will open in the old Herald building.

Minneapolis, Minn.—The Gardner-Warner Hardware Co. has been incorporated by H. B. Gardner, F. R. Warner and S. M. Davis. Capital stock, $50,000.

Montreal, Can.—Herbert Laurent.

Peoria, Ill.—The Kingman Implement Co. has been incorporated by Martin Kingman and others. Capital stock, $200,000.

Pittwood, Ill.—Lyman & Clawson have opened a new store.

Shoals, Ind.—Johnson & Chenoweth have opened a new agricultural implement and builders' Hardware business.

Tyler, Texas.—The Caspary Hardware Co. has been chartered by C. L. Caspary, J. S. Fletcher and J M. Jessup. Capital stock, $20.000.

Changes and Removals

Algonquin, Ill. — Lamson & Henning, Hardware, etc., reported to have dissolved partnership.

Atlantic City, N. J.—William Bowler will occupy his new store on Atlantic Avenue by September 15th.

Detroit, Mich.— Mrs. William Horning has purchased a half-interest in the Hardware store of H. H. Herrendeen & Co. at Big Rapids.

Helena, Mont.—The A. M. Holter Hardware Co. has bought the stock of the Montana Photograph Supply Co.

Holgate, Ohio.—Rothenberger Bros. contemplate purchasing the Hardware and farm implement stock of the Fast Hardware Co.

Lake Charles, La.—Loxley-Martin Hardware Co., reported to be in liquidation.

Lebanon, Ind.—Bell, Perkins & Co. W. A. Bell has withdrawn. The firm name hereafter will be Perkins & Co.

Lockwood, Mo.—Bird, Thumser & Co., Hardware, etc., reported to have been succeeded by McDermid & Thumser.

Mankato, Kan.—The first building stone laid in the past four years in the construction of a business house in this city was laid here recently. R. Hanna & Sons have begun a 50x100 feet store addition to their Hardware store. They will put up a two-story, 50 x 100 feet, making a building 100x100 feet. The main building will be two stories high, while the addition will be but one.

Mansfield, Ohio. — Gorton Bros., have purchased the Hardware store of Shelley, Crummey & Co.

Manton, Ill.—H. Schraeder, business purchased by A. P. Farley, who will continue the business.

Manton, Mich.— Ballard & Phelps dissolved partnership. Mr. Ballard continuing the business.

Mishawaka, Ind.—J. Hartman, stock purchased by Mr. Roose, of Hamlet.

Minneapolis, Minn.—Two of the larger agricultural implement houses of the city are to have enlarged quarters this fall. Dean & Co.—the concern headed by W. J. Dean, one of the oldest implement men in the Northwest—is to occupy the new warehouse at the corner of Washington and Third Avenue N. The other concern which is to increase its facilities for doing business will be Bradley, Clarke & Co. This concern, which does a large business in agricultural implements and machinery, is about to build an additional warehouse alongside the present quarters at Nos. 227-229 Fifth Street N. The new building will be uniform with the present four-story brick structure, and will cost about $15,000.

Montpelier, Ohio.—D. M. Marshman has sold his Hardware stock to the Montpelier Hardware Co., and for the present J. D. Hill will be manager of the concern. It is expected that the stock will soon pass into other hands who will continue the business at the old stand as heretofore.

Nashville, Mich.—F. T. Boise has sold out.

Nevada, Iowa.—J. W. Kinsell has sold his stock of Hardware to King & McArthur.

Ney, Ohio. — Ed. Bergman, Hardware dealer, contemplates erecting a larger store.

Norfolk, Neb.—A. J. Durland has been succeeded by O. D. Hamstreet.

Paterson, N. J.—The Hardware business of the estate of George Christie has been removed from Main Street to the Hall Building, corner of Washington and Fair Streets.

Pecatonic, Ill.—M. E. Smith, Hardware has sold out to the Eugene Real Estate & Investment Co.

Rahway, N. J.—The stock of the Mead Hardware Co. has been purchased by Abram A. Whitenack, with whom will be associated under the new firm name, Edward A. Marsh, as partner. The firm name has not yet been fully decided upon. Mr. Whitenack has been the manager of the Mead Hardware Co. several months, and as such has given ample evidence of good executive ability, and Mr. Marsh is also favorably known to the many customers of the same concern.

Richmond, Va.—W. E. Leidy, Hardware, stock has been sold by auction.

Rock Island, Ill.—Baker, McNeil & Sessler, J. M. Knox has purchased the interest of Mr. McNeill. The business will hereafter be conducted under the name of Baker & Knox.

Sandusky, Ohio.—F. Graves has retired from the Hardware business of Foster & Graves, and has been succeeded by J. H. Smith. The firm name will now be Foster & Smith.

Severy, Kan.—Job Evans & Son have been succeeded by M. J. Bidwell.

St. Albans. Vt.—Folsom & Morton have dissolved; C. H. Morton retires, and the business will be continued by H. G. Folsom & Co.

Tampa, Fla.—Notice of a very important business change was given recently by which the Hardware firm of Knight & Wall becomes a corporation and will be known in the future as the Knight & Wall Co. The capital stock of the company is $100,000, divided into shares of $1000, all of which are taken, the incorporators being H. L. Knight, C. L. Knight, Perry G. Wall, Jr., J. Edgar Wall and I. S. Craft. The company will be managed by practically the same people, H. L. Knight being the first president and Perry G. Wall, Jr., being the general manager and treasurer.

Tuscaloosa, Ala.—The Snow Hardware Co. is enlarging its cotton mill plant.

Tuscola, Ill.—Bagley Bros. will remove their store to larger quarters on Central Avenue.

Van Buren, Ind.—J. Horsman has purchased the A. J. Barnes Hardware store.

Washington, D. C.—Chas. E. Hodgkin, No. 913 Seventh Street, disposing of stock of Hardware.

Wymore, Neb.—Lewis Bros., succeeded by Stephenson & Sunderland.

Business Embarrassments

Caledon, Ont.—D. J. Dow; reported to have made an assignment.

New York, N. Y.—Daniel H. Waring and John W. Stantial, dealers in Hardware at No. 1400 Third Avenue, made an assignment to Frank M. Tichenor.

Redlands, Cal.—Ira H. Stoughton, reported to have filed petition in bankruptcy.

Recent Fires.

Alvin, Texas.—W. H. Nash & Co., Hardware and furniture store, on Hardie Street, destroyed by fire, at a loss of $18,000. Insured for less than half that amount.

Ina, Ill. —J. O. Calvin, Hardware, reported burnt out.

Lancaster, N. Y.—William Delzer's store damaged by fire. Total loss, $2500.

Milford, Kan.—J. Rudolph & Sons, burnt out.

New Straitsville, Ohio.—John W. Jones, dealer in Hardware and lumber, damaged by fire. Total loss $2000. Not insured.

Ortonville, Minn.—E. C. James, Hardware, damaged by fire.

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers, the country over, are requested to contribute to this page. News of new factories or companies, changes, improvements, etc, will be gladly received, and promptly published.

New Companies, Etc.

Baltimore, Md.—The Standard Mfg. Co. was incorporated recently, with a capital stock of $25,000, by David E. Evans, John H. Rothert, Jacob W. Hook, Alexander Sternberg, Charles Howard Hook, Robert M. Spedden and Walter Snyder. The company will manufacture fittings and other plumbers' supplies.

Chicago, Ill.—The Parkhurst-Wilkinson Co. has been incorporated by A. J. Eaton and others, for the purpose of manufacturing Hardware, etc. Capital stock, $300,000.

Cortland, N.Y.—Cortland Carriage Goods Co. has been incorporated to manufacture carriage and bicycle goods, carriage and saddlery Hardware, stamped ware and forgings; capital stock, $100,000; directors, E. H. Brewer, E. A. Brewer, D. H. Brown, M. W. Brown and Andrew Ainslie, of Cortland.

Cleveland, Ohio.—The United Blue Flame Oil Stove Co. has been incorporated by W. R. Jevons, A. J. Blockford, D. A. Dangler and others, with a capital stock of $10,000.

Hoboken, N. J.—The Hoyt & Grabhorn Co. has been incorporated with a capital stock of $25,000, and a paid up capital of $2500. The company is to manufacture tools and similar implements. The incorporators are: Arthur S. Hoyt, of Westport, Conn.; Alexander Grabhorn, of Hoboken, and Frederick K. Farr, of New York.

New Hartford, Conn.—H. Chapin's Son Co. has been incorporated by H. M. Chapin, Pine Meadow; F. M. Chapin, Pine Meadow; S. M. Jones, Englewood, N. J., and others, for the purpose of manufacturing wooden and metal articles. Capital stock, $60,000.

Rochester, Pa.—The Rochester Olive Stove Works Co. is erecting a large brick addition to their works.

Improved Conditions.

Berlin, Ont.—A representative of the Boss Washing Machine Co., of Cincinnati, Ohio, was in town recently, and in an interview with some of the business men stated that if circumstances were favorable it was quite probable that the company would locate here in the near future.

Birmingham, Ala. — The Birmingham Rolling Mills, which have been idle since July 1st, have resumed work, employing 1500 men. The Tennessee Coal, Iron & Railroad Co. blew in another furnace at Oxmoor recently, making the fifteenth furnace now in operation in this district. This is the largest number of furnaces in operation for five years, with a united daily output of 2600 tons of pig iron. Not since 1892 have the industries of Alabama given employment to as many men as now.

Buchanan, Mich. — The Rough Bros.' wagon works plant was sold recently to the National Manufacturing Co., of Milwaukee, Wis. The plant will be started at once in the manufacture of furniture and Hardware specialties and will employ 200 men.

Chicago, Ill.—The McCormick Harvesting Machine Co. have commenced the erection of a five-story and basement brick foundry, boiler, and machine shop. The buildings will be erected at Western and Blue Island Avenues, and are to cost $100,000.

Cleveland, Ohio.—The Cleveland Hardware Co. is now employing about 600 men, while a year ago there were scarcely 200 on its pay roll, and the works were being operated only about two days in the week. Now, in order to keep pace with the immense demand for material from the country, it is often found necessary to work at night.

Cleveland, Ohio.—The Cleveland Rolling Mill Co., whose gigantic plant is located in Newburg, a suburb of Cleveland, is now running full force and on full time, after a shut-down lasting nearly two years. The orders on which this great mill activity is based are not a few big jobs, but a multitude of pieces of small business.

Dubois, Pa.—The new Dubois Iron Works have been put in operation. The plant was erected this season by John E. Dubois, and will employ from 250 to 300 men when completed. The building is of brick and stone, 500x80 feet. A blacksmith shop and foundry will be attached, and the plant, when fully equipped, will cost probably a quarter of a million dollars. The motive power will be furnished by a gas engine.

Greenville, Mich.—The Ranney Refrigerator Co. will resume operations at once, after a shut down of four weeks. The factory will be run on full time and with 130 men. The season last year was very successful, the company having placed nearly 30,000 refrigerators on the market.

Hamilton, Ohio.—The Hamilton Ice Tool & Construction Co. has decided to locate at Libertyville. Work on the erection of a building 80x150 feet will begin soon.

Indianapolis, Ind.—The Marion Fruit Jar Works have resumed work after a several weeks' shut-down. The stamping works connected therewith have also started up, altogether giving employment to 400 people.

Kalamazoo, Mich.—The Kalamazoo Co. contemplates removing its large agricultural implement factory to Benton Harbor, and will commence manufacturing the latter part of this month.

Moline, Ill.—The Moline Plow Co. has started up its works with a force of 500 men, which will be increased to 900. The grinders, who went on strike shortly before the shops closed down last June, have returned to work. The company has extensive additions to its already immense establishment well under way. All the factories in Moline are now running with a stronger force than at any time during the last four years.

New Haven, Conn.—The outlook from a business standpoint for the coming fall and winter is one of encouragement. Manufacturers have always felt the impetus of better times. Sargent & Co. are running about 2000 hands, their full complement being about 2500 when times are good. Orders are coming in and their foundry department is quite busy with good prospects for the future.

North Tonawanda, N. Y.—Furnace B of the Tonawanda Iron & Steel Co.'s big plant here will be put in blast again just as soon as the coal strike is settled and a supply of coke can be secured. President Rogers says that the furnace would have been put in blast again some time ago had it not been for the scarcity of coke. Between 200 and 300 men will be added to the company's pay roll as soon as the furnace resumes, and the total number of men then employed will be about 500.

North Tonawanda, N. Y. — The Horix Mfg. Co., of Cleveland, Ohio, is the latest addition to the firms of this city. The Cleveland Co. has leased the old Carbon Works and will take possession at once. The company has a paid up capital stock of $25,000. It will fit up the plant secured here for the manufacture of water filters, and will also branch out into the manufacture of household novelties. The company will employ 40 men at the outset, and will soon increase that force to 70 if business warrants it. The new concern will secure Niagara Falls power at the first opportunity.

Portland, Conn.—The Pickering Governor Co., which has been located in this town for the past thirty years, has decided to move from this place to some larger city where the facilities for shipping goods are better. The news is followed by the announcement that the company will locate in Hartford. Vice-president John H. Hall, of the Colt Patent Firearms Co., is president of the Pickering Co., and after its removal the business of the company will be carried on in the Colt firearms factory. This means the addition of a large and thriving industry for Hartford—one that will count for something in the city's growth.

Racine, Wis.—The Racine Hardware Co. is busy at present turning out school furniture. They are running on full time and with a complete number of hands.

Warren, Ohio.—The Falcon Iron & Nail Co.'s sheet plate and puddle mills at Niles have been started. The mills employ about 500 men. Fires were started as soon as the scale was signed.

Williamsport, Pa.—N. W. Fredericks, E. D. Geary and Councilman Allen Xander, of Lock Haven, recently purchased the nail mill property in that city. The owners will rent the machinery and power on reasonable terms to any industry that may want to use them. If no industry can be secured, the new owners may start an industry of their own.

Recent Embarrassments.

Allentown, Pa.—The Allentown Hardware Works failed on an execution in favor of the Lehigh Valley Trust & Safe Deposit Co. for $16,000 and E. H. Reniger, trustee, for $13,000.

BICYCLE TRADE RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Companies, Agencies, Etc.

Mount Joy, Pa.—A. H. Engle has opened a new bicycle manufactory on West Main Street. The new wheel manufactured is the "Regal."

New York, N. Y.—Cycle Checking Lock Co. of New York has been incorporated to deal in bicycle devices. Capital, $250,000. Directors: Alrick H. Man, Thomas H. Ryan, Thomas R. Keator, Edward Barr, Alexander A. Forman, Samuel D. Page, Clayton Platt.

Pasadena, Cal.—California Cycleway Co. has been incorporated to construct and operate bicycle roads, etc. Capital stock, $150,000.

St. Louis, Mo.—The Cycle Improvement Co. has been incorporated by E. G. Van Zandt and others to engage in the manufacture of bicycles. Capital stock, $2500.

Tacoma, Wash.—The Swart Carrier & Seat Co. has been incorporated for $100,000 by R. B. Swart, F. D. Cooper and C. B. Swart. The company will be located at Tacoma, and will manufacture the Swart combination carrier and seat for bicycles, and all bicycle attachments.

Trenton, N. J.—Articles of incorporation have been filed by the National Cycle Armor Co. of Camden. The capital stock is $500,000. The company is to manufacture bicycles, and a special branch of its work will be the making of devices to prevent punctures of tires. The incorporators are John Wood, Jr., Haddonfield and Robert B. Esler and Robert B. Esler, Jr., of Philadelphia.

Trenton, N. J.—The Electric Bicycle Lamp Corporation has been incorporated to manufacture electric lights for bicycles. The capital stock is $250,000, with $1000 paid in. The incorporators are William Cranstown, Henry Newberger, Joseph Nicchia and Lewis P. McCulluch.

York, Neb.—The proposition of the Silver State Bicycle Works of Denver, to remove its plant to York was accepted at a mass meeting held last night at city Hall. The citizens agree to defray the moving expenses as the inducement for the removal.

Changes and Improvements.

Bridgeport, Conn.—Ellison & Middlebrook will close up their store in Fairfield Avenue. The reason that the firm is going out of business for the winter is a personal one. The bicycle season is about over, as far as it concerns agencies that deal in bicycles exclusively. Both Mr. Ellison and Mr. Middlebrook have received orders to go on the road this winter. There was good money in the offer, more than there would be if they conducted the store during the same months, and for that reason they have accepted the opportunity. Mr. Middlebrook will travel for the Orient Bicycle Co., and Mr. Ellison will act during the winter for the World Cycle Co.

Cincinnati, Ohio.—The Advance Carriage Co. will, in the near future, begin manufacturing bicycles.

Medway, Mass.—N. E. Cycle Co., reported to have dissolved.

Milwaukee, Wis.—The Milwaukee branch of the Union Cycle Mfg. Co., for a long time located on Third Street, has closed, and the stock removed to the home of the company, in Boston. Mr. Pieper, the local manager, said that the cheap wheels put upon the market the past year have killed the better wheel selling for this season in this market, and his company had decided to transfer their operations from Milwaukee to some point East where there was a demand for better wheels. Mr. Pieper expects to remain in Boston with the home office till further orders.

New Haven, Conn.—A meeting of the Yale Cycle Mfg. Co. was held recently, William Gay, president, officiating as chairman. There was a full representation of stockholders, and it was unanimously voted to change the name of the concern to the Merchants' Premium Co. The capital stock of the company has been increased from $2000 to $5000, of which two-fifths is paid in stock and the rest is ready to be paid in as soon as called.

New York, N. Y.—The Harris Mfg. Co. contemplate moving to Springfield, Mass., their present quarters being too small. The company manufacture engines, bicycles and horseless carriages.

Peoria, Ill.—The Ide bicycle factory is running three days a week and giving employment to seventy-six men. They had intended shutting down July 1, but orders have since been coming in at such a lively rate that they have found it impossible to close. A member of the firm stated recently that orders were better than in March last. The factory will close during September for the purpose of invoicing, and will immediately start up at an increased rate. A better season than for years is looked for.

Plainfield, N. J.—Mr. Yost having disposed of his interest in the firm of Yost & Rawson, engaged in the electrical construction and bicycle repairing business at No. 222 East Front Street, a change of management will take place. Rawson & Co. will be the name of the new firm and the electrical and bicycle repairing will be continued.

Steubenville, Ohio.—The Brilliant Tube & Iron Works' property was sold here at receiver's sale for $35,000 to the Wheeling Title & Trust Co., as trustees for the first mortgage bondholders. The property includes the rolling mill property and 460 acres of valuable coal land. The people of Brilliant are very much discouraged over the prospects, as the mill, which is the only industry the town boasts of, will not be operated by the purchaser.

Stockton, Cal.—W. B. Waterbury has been succeeded by Charles A. Eldridge.

Toledo, Ohio.—The Toledo Bicycle Supply Co., A. A. Barber has purchased the entire stock and supplies.

Toledo, Ohio.—Several of the bicycle factories of this city have recently started up with forces ranging from 75 to 225 men.

Toledo, Ohio.—There is a plan on foot to place all the retail bicycle stores of Toledo under one roof in the new Secor building.

Toledo, Ohio.—The Harris Toy Co., makers of the Perry saddle, recently sent out saddles on orders from Hamburg, and also to San Francisco for export. One of the foreign orders was from the island of Tahite, in the Pacific. The Harris people expect to make about 100,000 saddles next year.

Washington, D. C.—Ross Thompson has sold out his business.

Waterloo, N. Y.—Frank M. Bogenschneider has disposed of his bicycle store, including wheels and cycling paraphernalia, to W. H. Peck, of Elmira. Mr. Bogenschneider has for some time carried on the manufacture of wheels, as well as a bicycle warehouse and repair shop,

Recent Embarrassments.

Chicago, Ill.—Auburn Cycle Co. Luther M. Tracy has been appointed receiver in proceedings for the dissolution of the partnership between E. G. Rellihan and G. W. Kelly.

Chicago, Ill.—The A. R. Marsh Mfg. Co. of this city, manufacturers of bicycles, have made an assignment, with liabilities amounting to $20,000.

Danbury, Conn.—Arthur M. Nutt, bicycles, reported to have made an assignment.

Grand Rapids, Mich.—The suits involving the Hamilton-Kenwood Bicycle Co., have been discontinued, and a petition will be filed by J. J. Frederich Baars, trustee, under the $100,000 mortgage for the appointment of J. J. O'Brien as receiver to wind up the affairs of the concern.

New Haven, Conn.—The Dole Bros. Co., of this city, have made an assignment, with liabilities of about $1200. and assets of $200. F. C. Lum, trustee. The firm deals in sporting goods.

Reading, Pa.—The Standard Bicycle Co., of Reading, has had attached the receipts from the sheriff's sales of Edwin Laufer's Sons' store goods at South Bethlehem. This will compel their payment into court by the sheriff in order to test the validity of the judgments on which the sale was made.

Springfield, Mass.—Hendee & Nelson Mfg. Co., bicycles, filed petition in bankruptcy.

Wheeling, W. Va.—H. M. Riheldorfer, bicycles, reported to have made an assignment.

Recent Fires.

St. Louis, Mo.—The Baumann Cycle Co. sustained slight damage by fire recently.

West Brighton, S. I.—LeMetz Umbrella & Bicycle Handle Co., damaged by fire to the extent of between $50,000 and $75,000.

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

CRONK'S

Combination Fencing Plier.

This newly invented fencing tool is needed by all people that build or have occasion to remove or repair wire fence, as it is made with two staple pullers, two hammers and two button cutters. They are the same heft as the 1½ Maydole Hammer, and they are made of forged tool steel. No good farmer will be without one. They are warranted to cut No. 8 hard or No. 6 soft wire. Like the celebrated Cronk Plier they are fully warranted in all respects. No. 12, 11 in. long, $12.00. Dis. . . .

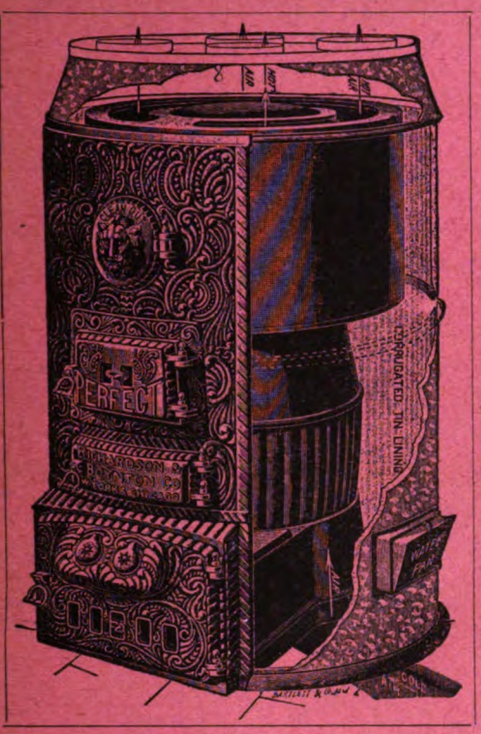
"VERY USEFUL TO US."

J. A. Ross & Co., Boston, Mass.: We find HARDWARE very useful to us, as well as interesting. Considering the quantity and quality of matter in each issue, the subscription price is very low for a semi-monthly magazine.

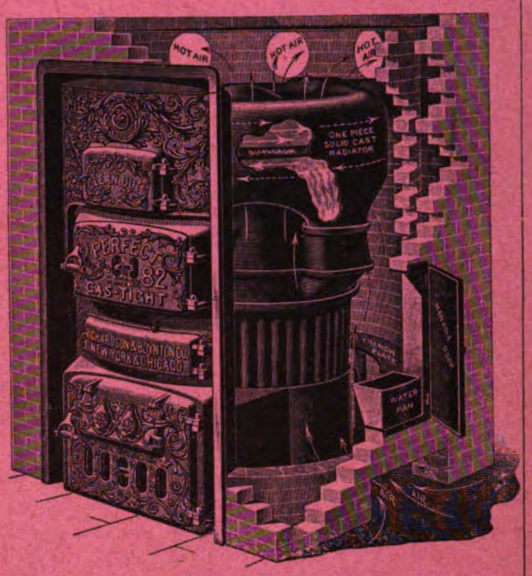
"SUBSCRIBE WITH PLEASURE."

Brown & Gilbert, Boston, Mass.: Please find enclosed $1 in payment for HARDWARE. We have found HARDWARE very useful and instructive, and subscribe for the coming year with pleasure.



"THE BEST THING OF ITS KIND."

W. L. L Morrow, Purdy, Mo.: I regard HARDWARE as the very best thing of its kind I have ever seen, and really at the low price of subscription I cannot see why it is not in the hands of every dealer in Hardware.



"IS JUST RIGHT."

Alling & Lodge, Madison, Ind.: We enclose $1 to pay for our subscription to HARDWARE for one year from date. Your paper is just right; don't make it too big so one can't find anything in it.

Every dealer has been advised many times this year to "Hold on. Don't place orders for Oaks."

Another "World Beater" is being evolved. Same old "chestnut."

NOW...

Four hundred imitations (and nearly one hundred manufacturers) cannot stop us from selling nearly one-third the "OAKS" made in the United States every year.

Here is the

"World Beater."

It has beat them all.

It does just as represented.

OAK ANDES

Every manufacturer claims that he has the best **Oak Stove;** every buyer wants the best **Oak Stove;** and without the least fear of contradiction we offer to the trade the **OAK ANDES** as the **Best Oak Stove.** It has the **Best Air Tight Jointless Bottom;** the **Best Air Tight Register Damper;** the **Heaviest Fire Pot;** the **Handsomest Design** and the **Best Workmanship** of any stove on the market. It is beyond question an **Air Tight Stove.** The sales for 1896 were four times as large as the manufacturers expected, and the indications are now that the capacity of the works will be severely taxed to meet the demand for the present year. Buyers who wish the best should secure the agency at once.

MANUFACTURED BY

Phillips & Clark Stove Company,

GENEVA, N. Y.

Western Branch:
135 Lake Street, Chicago, Ill.

Eastern Branch:
139 River Street, Troy, N. Y.

148 Lake Street, CHICAGO.
Factories: GEORGETOWN, CONN. CHICAGO, ILL.
ESTABLISHED 1818.

THE OLDEST AND LEADING MANUFACTURERS OF GALVANIZED WIRE GOODS IN AMERICA.

"Pennsylvania" Fruit Picker

This Cut almost speaks for itself—the device being so much like the human hand, shows at once the utility of the article.

AS A FRUIT PICKER IT HAS NO SUPERIOR.

It is made of Heavy Galvanized Wire, and Easily Adjusted to a Pole. It has been sold for several years, and the demand (as it is becoming known) is steadily increasing. The difficulty of detaching fruit and securing it unbruised is apparent to everyone so engaged. This overcomes the difficulty, and saves the finest fruit which commands the highest prices.

THE LOW PRICE AT WHICH IT IS SOLD

brings it within the reach of those who have but little fruit to gather as well as those who have large quantities. *Price, per dozen, $5.00.* It will gather Apples, Peaches, Pears, etc.

MANUFACTURED BY **EDWARD DARBY & SONS,**

233-235 Arch Street, PHILADELPHIA, PA.

"Goodell's" Turret Head Glass Cutters.

(Patented March 31, 1896)

SIX CUTTERS. Carefully Hardened, Ground and Tested before mounting. Nickeled Frame, Rosewood Finish Handle.

H. H. Mayhew Co., *Shelburne Falls, Mass., U. S. A.*

"FOR YEARS."

Henry Disston & Sons, Philadelphia, Pa. [*Saws, Files, etc.*]: Our opinion of HARDWARE is contained in the fact of our having carried an advertisement in your paper for a period of years.
